

BioAtla to Announce First Quarter 2022 Financial Results and Provide Business Highlights on May 4, 2022

April 8, 2022

SAN DIEGO, April 08, 2022 (GLOBE NEWSWIRE) -- BioAtla, Inc. (Nasdaq: BCAB), a global clinical-stage biotechnology company focused on the development of Conditionally Active Biologic (CAB) antibody and other protein therapeutics, today announced that it plans to host a conference call and webcast on Wednesday, May 4, 2022 at 4:30 p.m. Eastern Time to discuss its financial results for the quarter ended March 31, 2022, and provide an interim topline data update from the mecbotamab vedotin (BA3011) Phase 2 study in sarcoma as well as an operational update on our ongoing clinical programs, including BA3011, ozuriftamab vedotin (BA3021) and CAB-CTLA-4 (BA3071).

Conference Call and Webcast Information

Date: May 4, 2022

Time: 4:30 p.m. ET

Webcast Link: [BioAtla First Quarter 2022 Earnings Conference Call](#)

Dial-in Numbers: (844) 419-8639 (domestic) or (631) 259-7541 (international)

The press release with the financial results will be accessible prior to the conference call through "[News Releases](#)" in the News & Events section of the company's website. A replay of the call will also be available through "[Events & Presentations](#)" in the Investors section of the company's website.

About BioAtla, Inc.

BioAtla is a global clinical-stage biotechnology company with operations in San Diego, California, and in Beijing, China through our contractual relationship with BioDuro-Sundia, a provider of preclinical development services. Utilizing its proprietary Conditionally Active Biologics (CAB) technology, BioAtla develops novel, reversibly active monoclonal antibody and other protein therapeutic product candidates. CAB product candidates are designed to have more selective targeting, greater efficacy with lower toxicity, and more cost-efficient and predictable manufacturing than traditional antibodies. BioAtla has extensive and worldwide patent coverage for its CAB technology and products with more than 600 patents, more than 350 of which are issued. Broad patent coverage in all major markets include methods of making, screening and manufacturing CAB product candidates in a wide range of formats and composition of matter coverage for specific products. BioAtla has two first-in-class CAB programs currently in Phase 2 clinical testing in the United States, mecbotamab vedotin, BA3011, a novel conditionally active AXL-targeted antibody-drug conjugate (CAB-AXL-ADC), and ozuriftamab vedotin, BA3021, a novel conditionally active ROR2-targeted antibody-drug conjugate (CAB-ROR2-ADC). The investigational CAB-CTLA-4 antibody, BA3071, is a novel CTLA-4 inhibitor designed to reduce systemic toxicity and potentially enable safer combination therapies with checkpoint inhibitors such as anti-PD-1 antibody.
