

BioAtla to Participate in the H.C. Wainwright 25th Annual Global Investment Conference

September 6, 2023 at 8:01 AM EDT

SAN DIEGO, Sept. 06, 2023 (GLOBE NEWSWIRE) -- BioAtla, Inc. (Nasdaq: BCAB), a global clinical-stage biotechnology company focused on the development of Conditionally Active Biologic (CAB) antibody therapeutics for the treatment of solid tumors, today announced that the Company's management will provide a corporate update and participate virtually in scheduled one-on-one investor meetings at the H.C. Wainwright 25th Annual Global Investment Conference, to be held September 11-13, 2023.

Format: Fireside chat and one-on-one investor meetings

Date/Time: Pre-recorded presentation available on-demand Monday, September 11, at 7:00 a.m. ET

Webcast Link: <https://journey.ct/events/view/63b632d3-e8e8-4a57-a88b-b434d240260b>

About BioAtla, Inc.

BioAtla is a global clinical-stage biotechnology company with operations in San Diego, California, and in Beijing, China through our contractual relationship with BioDuro-Sundia, a provider of preclinical development services. Utilizing its proprietary Conditionally Active Biologics (CAB) technology, BioAtla develops novel, reversibly active monoclonal and bispecific antibodies and other protein therapeutic product candidates. CAB product candidates are designed to have more selective targeting, greater efficacy with lower toxicity, and more cost-efficient and predictable manufacturing than traditional antibodies. BioAtla has extensive and worldwide patent coverage for its CAB technology and products with greater than 700 patents filed, more than 400 of which have been issued. Broad patent coverage in all major markets include methods of making, screening and manufacturing CAB product candidates in a wide range of formats and composition of matter coverage for specific products. BioAtla has two first-in-class CAB programs currently in Phase 2 clinical testing, mecbotamab vedotin, BA3011, a novel conditionally active AXL-targeted antibody-drug conjugate (CAB-AXL-ADC), and ozuritamab vedotin, BA3021, a novel conditionally active ROR2-targeted antibody-drug conjugate (CAB-ROR2-ADC). The Phase 1 stage CAB-CTLA-4 antibody, BA3071, is a novel CTLA-4 inhibitor designed to reduce systemic toxicity and potentially enable safer combination therapies with checkpoint inhibitors such as anti-PD-1 antibody. The company's first bispecific antibody, BA3182, is a Phase 1 clinical asset that targets EpCAM, which is highly and frequently expressed on many adenocarcinomas while engaging human CD3 expressing T cells.
