Approximate date of commencement of proposed sale to the public: As soon as practicable after the effective date of this registration statement.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
		Emerging growth company	<input checked="" type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of the Securities Act.

CALCULATION OF REGISTRATION FEE

Title of each class of securities to be registered	Proposed maximum aggregate offering price(1)	Amount of registration fee(1)
Common Stock, \$0.0001 par value per share	\$100,000,000	\$10,910

(1) Estimated solely for the purpose of calculating the amount of the registration fee in accordance with Rule 457(o) under the Securities Act. Includes the offering price of shares that the underwriters have the option to purchase.

The Registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment that specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the registration statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

The information in this preliminary prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This preliminary prospectus is not an offer to sell these securities and we are not soliciting offers to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to completion, dated November 13, 2020

Preliminary Prospectus

shares

Common stock

This is an initial public offering of shares of common stock by BioAtla, Inc. We are offering _____ shares of our common stock. We estimate that the initial public offering price of our common stock will be between \$ _____ and \$ _____ per share.

Prior to this offering, there has been no public market for our common stock. We have applied to list our common stock on The Nasdaq Global Market under the symbol "BCAB."

We are an "emerging growth" company as that term is used in the Jumpstart Our Business Startups Act of 2012 and, as such, have elected to comply with certain reduced public company reporting requirements.

Following the completion of this offering, we will have two classes of common stock: common stock and Class B common stock. The rights of the holders of common stock and Class B common stock are identical, except with respect to voting and conversion. Each share of common stock will be entitled to one vote and will not be convertible into any other class of our share capital. Shares of Class B common stock will be non-voting, except as may be required by law. Each share of Class B common stock may be converted at any time into one share of common stock at the option of its holder, subject to the ownership limitations provided for in our amended and restated certificate of incorporation to become effective upon the completion of this offering. See "Description of capital stock" for more information on the rights of the holders of our common stock and Class B common stock.

	Per share	Total
Initial public offering price	\$	\$
Underwriting discounts and commissions(1)	\$	\$
Proceeds to BioAtla, Inc., before expenses	\$	\$

(1) See "Underwriting" for a description of the compensation payable to the underwriters.

We have granted the underwriters an option for a period of 30 days to purchase up to an additional _____ shares of common stock from us at the public offering price, less underwriting discounts and commissions.

Investing in our common stock involves a high degree of risk. See "[Risk factors](#)" beginning on page 14 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities, or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the shares of common stock to purchasers on or about _____, 2020

Neither we nor any of the underwriters have authorized anyone to provide you with information different from, or in addition to, that contained in this prospectus, any amendment or supplement to this prospectus or in any free writing prospectus prepared by or on behalf of us or to which we may have referred you in connection with this offering. We and the underwriters take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. Neither we nor any of the underwriters is making an offer to sell or seeking offers to buy these securities in any jurisdiction where or to any person to whom the offer or sale is not permitted. The information contained in this prospectus is accurate only as of the date on the front cover page of this prospectus, regardless of the time of delivery of this prospectus or of any sale of shares of our common stock, and the information in any free writing prospectus that we may provide you in connection with this offering is accurate only as of the date of that free writing prospectus. Our business, financial condition, results of operations and prospects may have changed since those dates.

[Table of Contents](#)

For investors outside the United States, neither we nor any of the underwriters has done anything that would permit this offering or possession or distribution of this prospectus or any free writing prospectus we may provide to you in connection with this offering in any jurisdiction where action for that purpose is required, other than in the United States. You are required to inform yourselves about and to observe any restrictions relating to this offering and the distribution of this prospectus and any free writing prospectus outside of the United States.

Prospectus summary

This summary highlights information contained in other parts of this prospectus. Because it is only a summary, it does not contain all of the information that you should consider before investing in shares of our common stock and it is qualified in its entirety by, and should be read in conjunction with, the more detailed information appearing elsewhere in this prospectus. You should read the entire prospectus carefully, especially "Risk factors," "Management's discussion and analysis of financial condition and results of operations" and our consolidated financial statements and related notes, before deciding to buy shares of our common stock. Unless the context requires otherwise, references in this prospectus to "BioAtla," "we," "us" and "our" refer, prior to the LLC conversion discussed below, to BioAtla, LLC and, after the conversion, to BioAtla, Inc.

Overview

We are a clinical-stage biopharmaceutical company developing our novel class of highly specific and selective antibody-based therapeutics for the treatment of solid tumor cancer. Our conditionally active biologics, or CABs, capitalize on our proprietary discoveries with respect to tumor biology, enabling us to target known and widely validated tumor antigens that have previously been difficult or impossible to target. Our novel CAB therapeutic candidates exploit characteristic pH differences between the tumor microenvironment and healthy tissue. Unlike healthy tissue, the tumor microenvironment is acidic, and we have designed our antibodies to selectively bind to their targets on tumor cells under acidic pH conditions but not on targets in normal tissues. Our approach is to identify the necessary targeting and potency required for cancer cell destruction, while aiming to eliminate or greatly reduce on-target, off-tumor toxicity—one of the fundamental challenges of existing cancer therapies.

The broad applicability of our CAB technology allows us to develop a wide array of product candidate modalities, such as monoclonal antibodies, antibody-drug conjugates, or ADCs, T cell-engaging bispecific antibodies and chimeric antigen receptor T cells, or CAR-T cells. A key advantage of our application of the CAB technology to antibodies is that it allows us to selectively target antigens on tumor cells and minimizes or eliminates binding to these antigens on normal cells, which reduces the toxicity associated with traditional approaches. We have initiated Phase 2 trials for our two latest stage ADC product candidates BA3011 (targeting AXL) and BA3021 (targeting ROR2) in multiple cancer indications, including sarcoma, NSCLC and melanoma. We are also supporting investigator-initiated trials for both BA3011 and BA3021 in platinum-resistant ovarian cancer. We have observed encouraging initial clinical signs of response to treatment and a wide therapeutic window, or range of dosage and duration. BA3011 and BA3021 have the potential to address large unmet medical needs in indications that together account for more than 350,000 new cases of solid tumor cancers and 150,000 deaths per year, in the United States alone. Additionally, we plan to work with our partner BeiGene Ltd., or BeiGene, to initiate Phase 1 trials in multiple cancer indications by year-end 2020 or early 2021 for our immuno-oncology antibody, BA3071 (targeting CTLA-4), which is designed to overcome the toxicity limitations of the currently approved anti-CTLA-4 antibody, to improve patient outcomes. We also have several candidates in our preclinical pipeline that include CAB bispecific antibodies targeting unmet medical needs in multiple types of solid tumors.

Our goal is to develop well-tolerated, novel cancer therapies that provide cures or extended survival to ensure patients' improved quality of life. Studies have shown that, as a drug class, antibodies have transformed oncology treatment and include some of the best-selling therapies on the biopharmaceutical market. While therapeutic antibodies have emerged as one of the most successful strategies for both solid and blood-based, or hematologic, malignancies, toxicity has narrowed the therapeutic window and ultimate potential of

impacting disease, as many of the key targets on tumor cells are also prevalent on normal cells. By exploiting our novel understanding of tumor biology, including unique characteristics of pH in the tumor microenvironment, we believe that our CAB technology has the potential to transform antibody-based cancer therapy. We have created and patented our CAB technology to enable the development of antibodies that are active in the tumor microenvironment, but inactive under normal physiological conditions, while maintaining target-specific binding. The biology of tumor formation, or tumorigenesis, yields a unique microenvironment consisting of a complex mixture of tumor cells, stromal fibroblasts, endothelial cells and immune cells like microglia, macrophages and lymphocytes and the non-cellular components of extracellular matrix such as collagen, fibronectin, hyaluronan and laminin, among others. The process of tumor formation creates an altered, unique microenvironment in and around the tumor that is also physically and chemically distinct from healthy tissue, with regard to temperature, pressure, chemical composition and especially the acidity or pH. The tumorigenesis-driven shifts in microenvironment conditions further weaken the immune response and promote tumor growth. Our CAB technology aims to uniquely exploit the fundamental pH differences between the tumor and healthy tissue, increasing antibody binding selectivity and thereby potentially eliminating or greatly reducing healthy cell on-target, off-tumor toxicity. This enhanced selectivity has the potential to greatly improve the benefit-risk ratio for the patient and allows us to deliver desired drug levels either as monotherapy or utilizing unique multi-targeted or combination therapies that are currently difficult or impossible to develop. Additionally, the combination of reversible binding with the selective, precision capability of our CAB technology enables both increased antibody potency and reduced toxicity.

Initially, we applied the reversible binding and precision capability of our CAB technology to develop next-generation ADC therapies. Traditional ADCs are a class of biologic drugs that are designed by attaching a toxic small molecule payload to an antibody, which then targets a specific antigen expressed on the target cell, but unfortunately, in most cases, this target is also present on normal tissue. Binding to the target on normal tissue leads to high on-target, off-tumor toxicity, which reduces the utility of traditional ADCs. Our CAB ADCs are designed to selectively bind to the antigens found in acidic pH conditions found in the tumor microenvironment, which has the potential to reduce off-tumor toxicity and related consequences. In addition, we developed CAB antibodies to immuno-oncology targets such as CTLA-4 for antitumor activity. We believe that our CAB technology can reduce the limitations resulting from systemic toxicities and expand the utility of this immuno-oncology therapy. We are also creating bispecific, T cell engaging, CAB antibodies that are comprised of two different binding specificities, which allows the antibody to bind to two specific targets at the same time, generally one target on the tumor cell and one target on an immune system cell. This is a powerful approach to harness cytotoxic T cells to directly kill tumor cells with reduced toxicity.

Our pipeline

We believe that there is significant potential to improve therapeutics for our patients with our proprietary CAB antibody technology across well-validated oncology targets activated in solid tumors. The following table summarizes our current product candidate pipeline.

Type	CAB Program	Target	Indications	Discovery	IND Enabling	Phase 1	Phase 2	Phase 3	Expected Upcoming Milestones
ADC	BA3011 (AXL-ADC)	AXL Positive	STS & Bone Sarcoma, NSCLC, Ovarian Cancer* (Mono & Combo w/ PD-1)						<ul style="list-style-type: none"> Ph2 interim data 2021 Ph2 registration data 2022
	BA3021 (ROR2-ADC)	ROR2 Positive	NSCLC, Melanoma, Ovarian Cancer* (Mono & Combo w/ PD-1)						<ul style="list-style-type: none"> Ph2 interim data 2021 Ph2 registration data 2022
CTLA-4	BA3071 (CTLA-4)	CTLA-4	RCC, NSCLC, SCLC, HCC, Melanoma, Bladder, Gastric, Cervical Cancer (Mono & Combo w/ PD-1)						<ul style="list-style-type: none"> Ph1 dose escalation trial to be initiated 2020 or early 2021 Ph1 data 2021
Bispecific	BA3182 (Bispecific)	EpCAM / CD3	NSCLC, SCLC, Colorectal, Ovarian, TNBC, Prostate Cancer**						<ul style="list-style-type: none"> US IND in 1H 2022
	BA3142 (Bispecific)	B7-H3 / CD3	NSCLC, SCLC, HNC, Melanoma, Sarcoma, Pancreatic, Prostate Cancer**						<ul style="list-style-type: none"> US IND in 2022
	EGFR (Bispecific)	EGFR / CD3	NSCLC, HNC, Pancreatic, TNBC, Colorectal Cancer**						<ul style="list-style-type: none"> US IND in 2022
	Nectin-4 (Bispecific)	Nectin-4 / CD3	Bladder, TNBC, Pancreatic Cancer**						<ul style="list-style-type: none"> US IND in 2022

Abbreviations: STS = Soft Tissue Sarcoma, NSCLC = Non-small Cell Lung Cancer, RCC = Renal Cell Carcinoma, SCLC = Small Cell Lung Cancer, HCC = Hepatocellular Carcinoma, TNBC = Triple-Negative Breast Cancer, HNC = Head and Neck Cancer
 * Ph2 investigator-initiated trial for Ovarian Cancer expected to be initiated by the end of 2020 or early 2021
 ** Anticipated indications based upon tumor target expression

BA3011: Our lead product candidate, BA3011, is a CAB ADC that targets AXL, a protein that is highly expressed on the surface of many tumors, including soft tissue and bone sarcomas and NSCLC, as well as other tumor types. In preclinical studies, we have observed that BA3011 binds to AXL under conditions that reflect those in tumors. We have developed a quantitative biomarker assay that is called the AXL Tumor membrane Percent Score, or TmPS. The TmPS measures the level of target expression on the tumor membrane which, consistent with industry standards, we use to identify those patients who we believe will be the most likely to respond to our product candidates. We believe that the higher the level of target expression on the tumor membrane, the more likely it is that our product candidates may have the potential to produce a response. We have completed the Phase 1 dose escalation trial in advanced cancer patients, established a recommended Phase 2 dose and initiated dosing in a Phase 2 clinical trial in soft tissue and bone sarcoma. We have also initiated a Phase 2 clinical trial in PD-1 refractory NSCLC patients. Interim analysis for both trials is anticipated in 2021 and the complete registrational data set expected in 2022. Additionally, we expect a multi-center investigator-initiated trial in platinum-resistant ovarian cancer will commence by the end of 2020 or early 2021.

BA3021: We are developing our second product candidate, BA3021, a CAB ADC targeting ROR2, a tumor target associated with tumor progression, metastasis and the development of resistance to conventional therapies and immuno-oncology agents. Employing a similar approach as with BA3011, we developed a TmPS quantitative assay based on ROR2 tumor membrane expression that we use to identify those patients who we believe will be the most likely to respond to our product candidates. We have completed the dose escalation part of a Phase 1 clinical trial in patients with locally advanced unresectable or metastatic solid tumors who were refractory or resistant to standard therapies, established a recommended Phase 2 dose and initiated a Phase 2 clinical trial in

PD-1 refractory melanoma and NSCLC with interim analysis anticipated in the second half of 2021 and the complete data set expected in 2022. Additionally, we expect a multi-center investigator-initiated trial in platinum-resistant ovarian cancer will commence by the end of 2020 or early 2021.

BA3071: Our third product candidate, BA3071, is a CAB anti-CTLA-4 antibody, which our preclinical studies have shown to maintain the function of the checkpoint inhibitor ipilimumab, but with greatly reduced systemic toxicities. We have a global collaboration with BeiGene on this program through which we will receive development milestones and tiered royalties on sales worldwide. We expect to work with our partner BeiGene to support the initiation of a Phase 1 dose-escalation trial of BA3071 as monotherapy and in combination with tislelizumab, an anti-PD-1 antibody in late stage development by BeiGene, by the end of 2020 or early 2021. We anticipate Phase 1 data in 2021.

Bispecific antibody programs: We have also leveraged our CAB technology to develop bispecific antibodies, which bind both a tumor-specific antigen and a T cell receptor using CAB antigen-binding domains. A bispecific antibody is a type of engineered antibody that can simultaneously bind two separate and unique antigens, unlike conventional monospecific antibodies that only bind to one type of target. We have shown in preclinical experiments that our CAB bispecific molecules meet or exceed the activity of conventional bispecifics and reduce systemic activation of potentially fatal immune responses. We advanced two CAB bispecific antibody product candidates into investigational new drug, or IND, enabling studies in the second half of 2020. We expect to submit multiple US INDs in the second half of 2021 or sometime in 2022.

Our CAB technology

We believe that our novel approach to increase the selectivity of antibody-based therapeutics while maintaining their potency may have the potential to fundamentally transform the development of anti-cancer therapeutics and expand the universe of targets for antibody-based therapies.

Our CABs are based on our patented protein discovery and engineering technology. We invented, developed and refined this technology which we believe selectively activates proteins and antibodies in diseased tissue based on differences in local conditions such as temperature, pressure, chemical composition and pH compared to normal healthy tissue. One of the most profound physicochemical differences between the tumor microenvironment and normal cellular environment is an increase in lactic acid and an associated decrease in pH in the tumor microenvironment from the normal physiological pH of about 7.4 or higher. Our technology allows us to exploit the differences between the tumor microenvironment and healthy tissue to focus binding on cancer cells. In addition, unlike other technologies, we have shown that activation of our CABs is reversible; not only are they activated due to the pH levels of the tumor microenvironment, but also, unlike prodrugs, they are reversibly inactivated when they leave the diseased tissue and are in a normal physiological environment.

Our CAB technology allows us to select antibodies that preferentially bind to the target under the conditions of interest, such as high local acidity. CAB antibodies have human or humanized antibody sequences, a characteristic that reduces the risk of immunogenicity compared to emerging technologies in the field, which is supported by both our preclinical and clinical data. Most importantly, CABs enable the possibility for higher or more frequent dosing as well as a longer course of therapy, all resulting in the potential for improved patient outcomes.

Low pH-dependent CAB antibodies are far less likely to bind to targets outside of tumors, resulting in antibodies generated by our CAB platform having a number of potential advantages over traditional antibodies:

- **Wide therapeutic window**
- **Opportunity to increase tumor-specific killing**

- **Increased drug exposure to tumors and improved pharmacokinetics**
- **Broader universe of tumor-specific antigens that can be targeted**

Through the use of our proprietary technology we have developed CAB antibodies, which we believe have specificity for tumors, while avoiding binding to the same antigen target expressed on many normal tissues. This allows us to develop therapeutics against targets that are expressed at high levels on tumors cells but are also present on normal cells and tissues, without the toxicities associated with traditional antibodies.

Our strengths

Our novel CAB technology is underpinned by the following competitive strengths and is driven by the expertise and vision of our management team:

- **Our CAB technology has been studied in robust Phase 1 clinical trials for our two leading clinical programs.**
- **Our CAB antibodies showcase strong drug-like characteristics, such as optimal exposure levels and low immunogenicity.**
- **We have demonstrated a proven ability to generate drug candidates for challenging or currently undruggable targets.**
- **Our diverse pipeline addresses areas of high unmet need, with several near-term value inflection points, including two programs in Phase 2 for multiple indications.**
- **Our proprietary CAB technology is covered by multiple patents and patent applications applicable to a wide range of modalities.**
- **Our talented and experienced management team drives the successful application of our novel CAB technology.**

Our strategy

Our mission is to develop and commercialize innovative antibody-based therapeutics for the treatment of solid tumors that depend on the physical and chemical properties of tumors and their microenvironment. We believe that our proprietary technology and approach have the potential to transform cancer therapy by decreasing systemic toxicities and improving efficacy. Our strategy to achieve this mission is as follows:

- **Advance BA3011 through regulatory approval and commercialization.**
- **Develop BA3021 in PD-1/L1 refractory tumors through regulatory approval and commercialization.**
- **Continue to capitalize on our unique technology to address areas of high unmet need in treating cancer.**
- **Maintain and strengthen our intellectual property portfolio.**
- **Selectively enter into collaborations to maximize the value of our platform and pipeline, including the existing collaboration involving BA3071.**

Our team

We are led by a team of protein and antibody engineering experts, immunologists, and experienced antibody clinical developers. Jay Short, Ph.D., our co-founder, Chairman, and Chief Executive Officer, is an inventor of our

CAB technology, has been issued more than 500 patents and has authored over 100 peer-reviewed publications. Dr. Short previously founded Diversa Corporation (now part of BASF), serving as its CEO, President and Chief Technology Officer, and he led its initial public offering and has over 35 years of experience in the biotechnology and biopharmaceutical industry. Scott Smith, our President, has over 30 years of biotechnology and biopharmaceutical industry experience and previously served as President and Chief Operating Officer at Celgene. At Celgene, he oversaw the clinical development and commercialization of Otezla[®]. Eric Sievers, MD, our Chief Medical Officer, was previously at Seattle Genetics where he led late stage clinical development and regulatory approval of Adcetris[®], an ADC approved for a variety of lymphomas. Richard Waldron, our Chief Financial Officer, has more than 35 years of experience in financing biotechnology and biopharmaceutical companies. He started the healthcare investment banking practice at Cowen & Company and raised the early equity and R&D structured financing for Genzyme Corporation.

Since inception, we have raised \$166 million from the issuance of debt and equity securities, including from leading biopharmaceutical investors such as Soleus Capital, HBM Healthcare Investments, Cormorant Asset Management, Farallon Capital, Pappas Capital, funds managed by Janus Henderson, Boxer Capital and Pfizer.

Risks associated with our business

Our business is subject to numerous risks, as more fully described in “Risk factors” immediately following this prospectus summary. You should read these risks before you invest in our common stock. We may be unable, for many reasons, including those that are beyond our control, to implement our business strategy. In particular, risks associated with our business include:

- We are a clinical-stage biopharmaceutical company with a limited operating history and no products approved for commercial sale. We have a history of significant losses and we expect to continue to incur significant losses for the foreseeable future, which together with our limited operating history, makes it difficult to assess our future viability.
- Even if this offering is successful, we will require substantial additional capital to finance our operations. If we are unable to raise such capital when needed, or on acceptable terms, we may be forced to delay, reduce or eliminate one or more of our research and drug development programs or future commercialization efforts.
- Our current product candidates are in various stages of development. Our product candidates may fail in development or suffer delays that adversely affect their commercial viability. If we or our existing or future collaborators are unable to complete development of, obtain regulatory approval for or commercialize our product candidates or experience significant delays in doing so, our business will be materially harmed.
- The market may not be receptive to our product candidates because they are based on our novel therapeutic modality, and we may not generate any future revenue from the sale or licensing of product candidates
- Results from early-stage clinical trials may not be predictive of results from late-stage or other clinical trials, and the results of our clinical trials may not satisfy the requirements of the United States Food and Drug Administration, or FDA, the European Medicines Agency, or EMA, or other comparable foreign regulatory authorities.
- Delays in the commencement and completion of clinical trials could increase costs and delay or prevent regulatory approval and commercialization of our product candidates.

- We may be unable to obtain U.S. or foreign regulatory approval and, as a result, unable to commercialize our product candidates.
- We face risks related to health epidemics and outbreaks, including the SARS-Cov-2, or COVID-19, pandemic, which could significantly disrupt our preclinical studies and clinical trials, and therefore our receipt of necessary regulatory approvals could be delayed or prevented.
- If safe and effective use of any of our product candidates, such as BA3011 and BA3021, depends on a companion diagnostic test, then the FDA generally will require approval or clearance of that companion diagnostic at the same time that the FDA approves our product candidates, if at all. If we are unable to successfully develop companion diagnostic tests for our product candidates, experience significant delays in doing so, rely on third parties in the development of such companion diagnostic tests, or do not obtain or face delays in obtaining FDA approval of a companion diagnostic test, the full commercial potential of our product candidates and our ability to generate revenue will be materially impaired.
- We face competition from entities that have developed or may develop product candidates for cancer, including companies developing novel treatments and technology platforms. If these companies develop technologies or product candidates more rapidly than we do or their technologies are more effective, our ability to develop and successfully commercialize product candidates may be adversely affected.
- If we fail to attract and retain qualified senior management and key scientific personnel, our business may be materially and adversely affected.
- We currently have no sales organization. If we are unable to establish sales, marketing and distribution capabilities on our own or through third parties, we may not be able to market and sell our product candidates, if approved, effectively in the United States and foreign jurisdictions or generate product revenue.
- We have entered, and may in the future seek to enter, into collaborations with third parties for the development and commercialization of certain of our product candidates. If we fail to enter into such collaborations, or such collaborations are not successful, we may not be able to capitalize on the market potential of our patented technology platform and resulting product candidates.
- We rely on third parties for the manufacture of our product candidates for preclinical studies and our ongoing clinical trials, and we expect to continue to do so for additional clinical trials and ultimately commercialization. This reliance on third parties increases the risk that we will not have sufficient quantities of our product candidates or products, if approved, or such quantities at an acceptable cost, which could delay, prevent or impair our development or commercialization efforts.
- If we are not able to obtain, maintain and protect our intellectual property rights in any product candidates or technologies we develop, or if the scope of the intellectual property protection obtained is not sufficiently broad, third parties could develop and commercialize products and technology similar or identical to ours, and we may not be able to compete effectively in our market.

Series D preferred stock financing and conversion from LLC

In July 2020, we raised an aggregate of \$72.5 million in gross proceeds from the issuance of our Series D preferred stock, led by Soleus Capital and HBM Healthcare Investments, as co-leads, with participation from multiple other dedicated life sciences investors. In connection with the Series D preferred stock financing, we

converted from a limited liability company into a Delaware corporation pursuant to a statutory conversion and changed our name from BioAtla, LLC to BioAtla, Inc. In connection with the conversion, all of the then-outstanding units of BioAtla, LLC were converted into shares of our common stock and our then-outstanding warrants were converted into warrants to purchase shares of common stock of BioAtla, Inc. Prior to the LLC Conversion, certain equity holders of BioAtla, LLC received equity in a newly-formed holding company, Himalaya Parent LLC, which holding company is a stockholder of us. In this prospectus, we refer to all of the transactions related to our conversion into a corporation and the equity conversions described above as the “LLC Conversion.” See “LLC conversion” for more information regarding the terms of the conversion and the resulting impact on our outstanding shares and capitalization.

While our outstanding equity as a limited liability company prior to the LLC Conversion is called “units,” unless otherwise indicated in this prospectus, we refer to such units in this prospectus as “shares” for the periods prior to the LLC Conversion for ease of comparison.

Corporate information

Our business was founded in March 2007 and originally operated as a Delaware limited liability company, BioAtla, LLC. In July 2020, we converted from a limited liability company into a Delaware corporation pursuant to a statutory conversion and changed our name from BioAtla, LLC to BioAtla, Inc. pursuant to the LLC Conversion described above. Our principal executive offices are located at 11085 Torreyana Road, San Diego, California 92121, and our telephone number is (858) 558-0708. Our corporate website address is www.bioatla.com. Information contained on or accessible through our website is not a part of this prospectus, and the inclusion of our website address in this prospectus is an inactive textual reference only.

We have obtained a registered trademark for BioAtla® in the United States. This prospectus contains references to our trademarks and to trademarks belonging to other entities. We do not intend our use or display of other companies’ trade names or trademarks to imply a relationship with, or endorsement or sponsorship of us by, any other companies.

Implications of being an emerging growth company and a smaller reporting company

We are an “emerging growth company,” as defined in the Jumpstart Our Business Startups Act of 2012. We will remain an emerging growth company until the earlier of (i) the last day of the fiscal year (a) following the fifth anniversary of the completion of this offering, (b) in which we have total annual gross revenue of at least \$1.07 billion or (c) in which we are deemed to be a large accelerated filer, which means the market value of our common stock that is held by non-affiliates exceeded \$700.0 million as of the prior June 30th and (ii) the date on which we have issued more than \$1.0 billion in non-convertible debt during the prior three-year period. We refer to the Jumpstart Our Business Startups Act of 2012 in this prospectus as the JOBS Act, and references in this prospectus to “emerging growth company” shall have the meaning associated with it in the JOBS Act.

An emerging growth company may take advantage of specified reduced reporting requirements and other burdens that are otherwise applicable generally to public companies. These provisions include:

- being permitted to present only two years of audited financial statements and only two years of related Management’s discussion and analysis of financial condition and results of operations in this prospectus;

- not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002, as amended, or Sarbanes-Oxley Act;
- an exemption from compliance with any new requirements adopted by the Public Company Accounting Oversight Board regarding mandatory audit firm rotations;
- reduced disclosure obligations regarding executive compensation in our periodic reports, proxy statements and registration statements; and
- exemptions from the requirement to hold a nonbinding advisory vote on executive compensation and to obtain stockholder approval of any golden parachute payments not previously approved.

We have elected to take advantage of certain of the reduced disclosure obligations in the registration statement of which this prospectus is a part and may elect to take advantage of other reduced reporting requirements in future filings. As a result, the information that we provide to our investors may be different from the information you might receive from other public reporting companies that are not emerging growth companies in which you hold equity interests. The JOBS Act provides that an emerging growth company can take advantage of an extended transition period for complying with new or revised accounting standards applicable to public companies until those standards would otherwise apply to private companies. We have elected to take advantage of such extended transition period, which means that when a standard is issued or revised and it has different application dates for public or private companies, we will adopt the new or revised standard at the time private companies adopt the new or revised standard and will do so until such time that we either irrevocably elect to “opt out” of such extended transition period or no longer qualify as an emerging growth company. We may choose to early adopt any new or revised accounting standards whenever such early adoption is permitted for private companies.

We are also a “smaller reporting company,” meaning that the market value of our shares held by non-affiliates plus the proposed aggregate amount of gross proceeds to us as a result of this offering is less than \$700 million and our annual revenue was less than \$100 million during the most recently completed fiscal year. We may continue to be a smaller reporting company after this offering if either (i) the market value of our shares held by non-affiliates is less than \$250 million or (ii) our annual revenue was less than \$100 million during the most recently completed fiscal year and the market value of our shares held by non-affiliates is less than \$700 million. If we are a smaller reporting company at the time we cease to be an emerging growth company, we may continue to rely on exemptions from certain disclosure requirements that are available to smaller reporting companies. Specifically, as a smaller reporting company, we may choose to present only the two most recent fiscal years of audited financial statements in our Annual Report on Form 10-K and have reduced disclosure obligations regarding executive compensation, and, similar to emerging growth companies, if we are a smaller reporting company with less than \$100 million in annual revenue, we would not be required to obtain an attestation report on internal control over financial reporting issued by our independent registered public accounting firm.

The offering

Common stock offered by us	shares.
Option to purchase additional shares of common stock	We have granted to the underwriters an option for a period of 30 days to purchase up to additional shares of our common stock at the initial public offering price, less underwriting discounts and commissions.
Common stock to be outstanding after this offering	shares (or shares if the underwriters' option to purchase additional shares is exercised in full).
Class B common stock to be outstanding after this offering	shares.
Total common stock and Class B common stock to be outstanding after this offering	shares.
Use of proceeds	We estimate that we will receive net proceeds of approximately \$ million (or approximately \$ million if the underwriters' option to purchase additional shares is exercised in full) from the sale of the shares of common stock offered by us in this offering, based on an assumed initial public offering price of \$ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. We anticipate that we will use the net proceeds from this offering, together with our existing cash and cash equivalents, as follows: (i) to fund the clinical development of BA3011 for the treatment of soft tissue and bone sarcoma patients through a Phase 2 clinical trial and for the treatment of NSCLC patients through a Phase 2 clinical trial; (ii) to fund the clinical development of BA3021 for the treatment of NSCLC and for the treatment of melanoma, each through a Phase 2 clinical trial; (iii) to fund IND-enabling studies and the clinical development of our CAB bispecific candidates through one or more Phase 1 clinical trials; (iv) to fund our ongoing efforts to develop additional clinical product candidates from our CAB platform; and (v) the remaining proceeds for working capital and other general corporate purposes. See "Use of proceeds."
Voting rights	<p>Following this offering, we will have two classes of common stock: common stock and Class B common stock. The rights of the holders of common stock and Class B common stock are identical, except with respect to voting and conversion.</p> <p>Each share of common stock will be entitled to one vote and will not be convertible into any other class of our share capital. Shares of Class B common stock will be non-voting, except as may be required by law.</p>

Each share of Class B common stock may be converted into one share of common stock at the option of its holder, subject to the ownership limitations provided for in our amended and restated certificate of incorporation to become effective upon the completion of this offering.

See "Description of capital stock" for additional information.

Risk factors

You should read the "Risk factors" section of this prospectus for a discussion of certain of the factors to consider carefully before deciding to purchase any shares of our common stock.

Proposed Nasdaq Global Market symbol "BCAB"

The number of shares of our common stock to be outstanding after this offering is based on 280,652,170 shares of common stock outstanding as of September 30, 2020, after giving effect to the LLC Conversion described under "LLC conversion," and excludes:

- 9,329,799 shares of common stock issuable upon the exercise of outstanding warrants as of September 30, 2020, at a weighted-average exercise price of \$7.50 per share;
- shares of common stock issuable upon the vesting of restricted stock units granted to certain of our executive officers, directors, employees and consultants under our 2020 Equity Incentive Plan, or the 2020 Plan;
- shares of common stock reserved for future issuance under the 2020 Plan, as well as any shares of our common stock that become available pursuant to provisions in the 2020 Plan that automatically increase the share reserve under our 2020 Plan or the other provisions of the 2020 Plan pursuant to which additional shares may become available for issuance under the 2020 Plan; and
- shares of our common stock that will become available for future issuance under our 2020 Employee Stock Purchase Plan, or the ESPP, and shares of our common stock that become available pursuant to provisions in the ESPP that automatically increase the share reserve under the ESPP.

Unless otherwise indicated and except with respect to historical financial information, all information contained in this prospectus:

- assumes no exercise by the underwriters of their option to purchase up to an additional shares of our common stock;
- assumes no issuances of shares of non-voting Class B common stock upon the completion of this offering;
- gives effect to the automatic conversion upon the completion of this offering of all of our outstanding shares of Series D preferred stock into an aggregate of 199,791,519 shares of common stock;
- assumes the consummation of the LLC Conversion described under "LLC conversion" on July 10, 2020; and
- gives effect to the filing and effectiveness of our amended and restated certificate of incorporation and the adoption of our amended and restated bylaws immediately prior to the completion of this offering.

Summary consolidated financial data

The following summary consolidated financial data should be read together with our consolidated financial statements and related notes, "Selected consolidated financial data" and "Management's discussion and analysis of financial condition and results of operations" appearing elsewhere in this prospectus. Our historical results are not necessarily indicative of the results that may be expected in the future. We derived the summary consolidated statement of operations data for the years ended December 31, 2018 and 2019 and the summary consolidated balance sheet data as of December 31, 2019 from our audited consolidated financial statements and related notes appearing elsewhere in this prospectus. We derived the summary consolidated statements of operations data for the nine months ended September 30, 2019 and 2020 and the summary balance sheet data as of September 30, 2020 from our unaudited interim consolidated financial statements included elsewhere in this prospectus. In our opinion, these unaudited consolidated financial statements have been prepared on a basis consistent with our audited consolidated financial statements and contain all adjustments, consisting only of normal and recurring adjustments, necessary for a fair presentation of such financial data.

(in thousands, except unit/share and per unit/share amounts)	Years ended December 31,		Nine months ended	
	2018	2019	2019	2020
			(unaudited)	
Consolidated statements of operations data:

Pro forma net loss per common share, basic and diluted (unaudited) ⁽²⁾		\$ (0.10)		\$ (0.05)
Pro forma weighted-average shares of common stock outstanding, basic and diluted (unaudited) ⁽²⁾		280,652,170		280,652,170

Table of Contents

- (1) The net loss attributable to common stockholders and related per share amounts are based on the period from July 10, 2020 to September 30, 2020, the period where we had common stock outstanding. See Note 1 to our consolidated financial statements included elsewhere in this prospectus for an explanation of the method used to calculate the historical net loss per share, basic and diluted.
- (2) See "Unaudited pro forma condensed consolidated financial information" included elsewhere in this prospectus for an explanation of the method used to calculate the pro forma net loss per share, basic and diluted.

	As of September 30, 2020		
	Actual	Pro forma ⁽¹⁾	Pro forma as adjusted ⁽²⁾⁽³⁾
	(unaudited, in thousands)		
Balance sheet data:			
Cash and cash equivalents	\$ 56,757	\$ 56,757	\$
Working capital ⁽⁴⁾	21,774	21,774	
Total assets	62,773	62,773	
Other debt	682	682	
Series D convertible preferred stock	98,777	—	
Total stockholders' equity (deficit)	(74,521)	24,256	

- (1) Pro forma amounts reflect the conversion of all outstanding Series D preferred stock upon the completion of this offering into 199,791,519 shares of common stock and the related reclassification of the carrying value to permanent equity.
- (2) The pro forma as adjusted amounts give effect to (i) the pro forma adjustments set forth in footnote (1) above and (ii) the issuance and sale by us of _____ shares of our common stock in this offering at an assumed initial public offering price of \$ _____ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, after deducting the estimated underwriting discounts and commissions and estimated expenses payable by us.
- (3) A \$1.00 increase (decrease) in the assumed initial public offering price of \$ _____ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, would increase (decrease) each of cash and cash equivalents, total assets and total members'/stockholders' deficit by \$ _____ million, assuming that the number of shares offered by us as set forth on the cover page of this prospectus remains the same, and after deducting the estimated underwriting discounts and commissions and estimated expenses payable by us. An increase (decrease) of 1.0 million shares in the number of shares of common stock offered by us would increase (decrease) each of cash and cash equivalents, total assets and total members'/stockholders' deficit by approximately \$ _____ million, assuming an initial public offering price of \$ _____ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated expenses payable by us. The pro forma as adjusted information discussed above is illustrative only and will be adjusted based on the actual public offering price and other terms of this offering determined at pricing.
- (4) We define working capital as our current assets minus current liabilities.

Risk factors

Investing in our common stock involves a high degree of risk. You should carefully consider the following risk factors and all other information contained in this prospectus, including our consolidated financial statements and related notes appearing elsewhere in this prospectus and "Management's discussion and analysis of financial condition and results of operations," before purchasing our common stock. If any of the following risks, as well as other risks and uncertainties, occur, our business, financial condition, results of operations and prospects could be materially and adversely affected. In that case, the market price of our common stock could decline and you could lose some or all of your investment.

Risks related to our financial position and need for additional capital

We are a clinical-stage biopharmaceutical company with a limited operating history and no products approved for commercial sale. We have a history of significant losses and we expect to continue to incur significant losses for the foreseeable future, which together with our limited operating history, makes it difficult to assess our future viability.

We are a clinical-stage biopharmaceutical company with a limited operating history upon which you can evaluate our business and prospects. We have no products approved for commercial sale and have not generated any revenue from product sales. Since the commencement of our operations, we have focused substantially all of our resources on conducting research and development activities, including drug discovery, preclinical studies and clinical trials of our product candidates, including the ongoing Phase 2 clinical trials of BA3011 and BA3021, establishing and maintaining our intellectual property portfolio, manufacturing clinical and research material through third parties, hiring personnel, establishing product development and commercialization collaborations with third parties, raising capital and providing general and administrative support for these operations. We have not yet demonstrated our ability to successfully obtain marketing approvals, manufacture a commercial-scale product or arrange for a third party to do so on our behalf or conduct sales and marketing activities necessary for successful product commercialization. As a result, it may be more difficult for you to assess our future viability than it could be if we had a longer operating history.

We have incurred significant losses to date. Our ability to generate product revenue sufficient to achieve profitability will depend on the successful development and eventual commercialization of one or more of our current and future product candidates. Our net losses were \$29.0 million and \$29.8 million for the years ended December 31, 2018 and 2019, respectively and \$28.4 million and \$19.5 million for the nine months ended September 30, 2019 and 2020, respectively. As of September 30, 2020, we had an accumulated deficit of \$167.8 million. These losses have resulted primarily from costs incurred in connection with research and development activities and general and administrative costs associated with our operations. We do not expect to generate meaningful revenue from product sales for the foreseeable future, and we expect to continue to incur significant operating expenses for the foreseeable future due to the cost of research and development, including identifying and designing product candidates and conducting preclinical studies and clinical trials, and the regulatory approval process for our product candidates. We expect our expenses, and the potential for losses, to increase substantially as we conduct clinical trials of our lead product candidates and seek to expand our pipeline.

However, the amount of our future expenses and potential losses is uncertain. Our ability to achieve profitability, if ever, will depend on, among other things, our successfully developing product candidates, obtaining regulatory approvals to market and commercialize product candidates, manufacturing any approved products on commercially reasonable terms and potentially establishing a sales and marketing organization or suitable third-party alternatives to commercialize any approved product. If we, or our existing or future

[Table of Contents](#)

collaborators, are unable to develop and commercialize one or more of our product candidates or if sales revenue from any product candidate that receives approval is insufficient, we will not achieve profitability, which could have a material and adverse effect on our business, financial condition, results of operations and prospects.

Even if this offering is successful, we will require substantial additional capital to finance our operations. If we are unable to raise such capital when needed, or on acceptable terms, we may be forced to delay, reduce or eliminate one or more of our research and drug development programs or future commercialization efforts.

The development of biopharmaceutical products, including conducting preclinical studies and clinical trials, is a very time-consuming, expensive and uncertain process that takes years to complete. Our operations have consumed substantial amounts of cash since inception, and we expect our expenses to increase in connection with our ongoing activities, particularly as we conduct clinical trials of, and seek marketing approval for, BA3011 and BA3021 and advance our other programs. Even if one or more of the product candidates that we develop is approved for commercial sale, we anticipate incurring significant costs associated with sales, marketing, manufacturing and distribution activities. Our expenses could increase beyond expectations if we are required by the FDA, the EMA or other comparable foreign regulatory agencies to perform clinical trials or preclinical studies in addition to those that we currently anticipate. Other unanticipated costs may also arise. Because the design and outcome of our planned and anticipated clinical trials are highly uncertain, we cannot reasonably estimate the actual amount of resources and funding that will be necessary to successfully complete the development and commercialization of any product candidate we develop. In addition, upon the completion of this offering, we expect to incur additional costs associated with operating as a public company. Accordingly, we will need to obtain substantial additional funding in order to continue our operations.

As of September 30, 2020, we had approximately \$56.8 million in cash and cash equivalents. Based on our current operating plan, our current cash and cash equivalents, together with the anticipated proceeds from this offering, are expected to be sufficient to fund our ongoing operations at least through . Our estimate as to how long we expect the net proceeds from this offering, together with our existing cash and cash equivalents, to be able to continue to fund our operations is based on assumptions that may prove to be wrong, and we could use our available capital resources sooner than we currently expect. Changing circumstances, some of which may be beyond our control, could cause us to consume capital significantly faster than we currently anticipate, and we may need to seek additional funds sooner than planned.

We plan to use the net proceeds to us from this offering to fund the research and development of our product candidates and development programs, and to fund working capital and other general corporate purposes. Advancing the development of our product candidates will require a significant amount of capital. The net proceeds from this offering, together with our existing cash and cash equivalents, will not be sufficient to fund any of our product candidates through regulatory approval. Because the length of time and activities associated with successful research and development of any individual product candidate are highly uncertain, we are unable to estimate the actual funds we will require for development, marketing approval and commercialization activities. The timing and amount of our operating expenditures will depend largely on:

- the timing and progress of our ongoing clinical trials for BA3011 and BA3021;
- the number and scope of preclinical and clinical programs we decide to pursue;
- the progress of the development efforts of our current collaborator, BeiGene, for BA3071 or collaborators with whom we may in the future enter into collaborations and research and development agreements;
- the timing and amount of target specific indication and milestone payments we may receive under our collaboration agreements;

[Table of Contents](#)

- our ability to maintain our current licenses, collaboration and research and development programs or possibly establish new collaboration arrangements;
- the costs involved in prosecuting and enforcing patent and other intellectual property claims;
- the cost and timing of regulatory approvals; and
- our efforts to enhance operational systems and hire additional personnel, including personnel to support development of our product candidates and satisfy our obligations as a public company.

If we are unable to obtain funding on a timely basis, including under our current or future collaborations, or on acceptable terms, we may have to delay, reduce or terminate our research and development programs and preclinical studies or clinical trials, limit strategic opportunities or undergo reductions in our workforce or other corporate restructuring activities. We may seek to raise any necessary additional capital through a combination of public or private equity offerings, debt financings, collaborations, strategic alliances, licensing arrangements and other marketing and distribution arrangements. We cannot assure you that such financing will be available at acceptable terms to us, if at all. Failure to generate sufficient cash flows from operations, raise additional capital, and reduce discretionary spending should additional capital not become available could have a material adverse effect on our ability to achieve our intended business objectives. To the extent that we raise additional capital through collaborations, strategic alliances or licensing arrangements with third parties, we may have to relinquish valuable rights to our product candidates. We may also have to forego future revenue streams of research programs at an earlier stage of development or on less favorable terms than we would otherwise choose or have to grant licenses on terms that may not be favorable to us. Our ability to raise additional funds will depend on financial, economic and other factors, many of which are beyond our control. For example, market volatility resulting from the COVID-19 pandemic could adversely impact our ability to access capital as and when needed. If we do raise additional capital through public or private equity or convertible debt offerings, the ownership interest of our existing stockholders will be diluted, and the terms of these securities may include liquidation or other preferences that adversely affect our stockholders' rights. If we raise additional capital through debt financing, we may be subject to covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures, acquiring other businesses, products or technology or declaring dividends. If we are unable to obtain additional funding from these or other sources, it may be necessary to significantly reduce our rate of spending through reductions in staff and delay, scale back or stop certain research and development programs.

Risks related to the discovery, development and commercialization of our product candidates

Our current product candidates are in various stages of development. Our product candidates may fail in development or suffer delays that adversely affect their commercial viability. If we or our existing or future collaborators are unable to complete development of, obtain regulatory approval for or commercialize our product candidates or experience significant delays in doing so, our business will be materially harmed.

We have no products on the market and our product candidates are in various stages of development. We are currently conducting Phase 2 clinical trials of BA3011 and BA3021, and we plan to work with our partner BeiGene to initiate Phase 1 trials of BA3071 by year-end 2020 or early 2021 with various other product candidates in earlier stages of development. Our ability to achieve and sustain profitability depends on obtaining regulatory approvals for and, if approved, successfully commercializing our product candidates, either alone or with third parties. Before obtaining regulatory approval for the commercial distribution of our product candidates, we or an existing or future collaborator must conduct extensive preclinical tests and clinical trials to demonstrate the safety, efficacy, purity and potency of our product candidates. In addition, the FDA may not agree with our

[Table of Contents](#)

clinical trial plans. For example, we have initiated potentially registration-enabling Phase 2 trials for BA3011 in treatment-refractory sarcoma patients and PD-1 refractory NSCLC patients. The FDA has reviewed the trial designs, but has not opined on whether the Phase 2 clinical trials will in fact be sufficient to support regulatory approval. However, the FDA is expected to consider this further at the interim data review point. We cannot assure you that the FDA will agree that such data will be sufficient to support approval. Any product candidate can unexpectedly fail at any stage of preclinical or clinical development and the historical failure rate for product candidates is high. The results from preclinical testing of a product candidate may not predict the results that will be obtained in later clinical trials of the product candidate. We or our existing or future collaborators may experience issues that delay or prevent clinical testing and regulatory approval of, or our ability to commercialize, product candidates, including:

- delays in our clinical trials resulting from factors related to the COVID-19 pandemic;
- negative or inconclusive results from preclinical testing or clinical trials leading to a decision or requirement to conduct additional preclinical testing or clinical trials or abandon a program;
- product-related side effects experienced by participants in clinical trials or by individuals using therapeutic biologics that share characteristics with our product candidates;
- delays in submitting INDs or comparable foreign applications or delays or failure in obtaining the necessary approvals from regulators or institutional review boards, or IRBs, to commence a clinical trial, or a suspension or termination of a clinical trial once commenced;
- conditions imposed by the FDA or comparable foreign authorities, including the EMA, regarding the scope or design of clinical trials;
- delays in enrolling patients in clinical trials;
- high drop-out rates of patients;
- inadequate drug materials or other supplies necessary for the conduct of our clinical trials;
- greater than anticipated clinical trial costs;
- poor effectiveness of our product candidates during clinical trials;
- unfavorable FDA or other regulatory agency inspection and review of a clinical trial site;
- deficiencies in our third-party manufacturers' manufacturing processes or facilities;
- success or further approval of competitor products approved in indications in which we undertake development of our product candidates, which may change the standard of care or change the standard for approval of our product candidates in our proposed indications;
- failure of any third-party contractors, investigators or contract research organizations, or CROs, to comply with regulatory requirements or otherwise meet their contractual obligations in a timely manner, or at all;
- delays and changes in regulatory requirements, policy and guidelines, including the imposition of additional regulatory oversight around clinical testing generally or with respect to our technology or product candidates in particular; or
- varying interpretations of data by the FDA and similar foreign regulatory agencies, including the EMA.

Because CABs represent a new generation of antibodies, a delay or failure in development of any CAB product candidate could represent a major set-back for our patented technology platform and for our company generally.

We are substantially dependent on the success of our patented CAB technology platform, and our future success depends heavily on the successful development of this platform.

We use our CAB technology platform to develop product candidates for cancer therapies. Any failures or setbacks involving our CAB technology platform, including adverse events, could have a detrimental impact on all of our product candidates and our research pipeline. For example, we may uncover a previously unknown risk associated with CABs or other issues that may be more problematic than we currently believe, which may prolong the period of observation required for obtaining, necessitate additional clinical testing or result in the failure to obtain, regulatory approval. If our CAB technology is not safe in certain product candidates, we would be required to abandon or redesign all of our current product candidates, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

We may not be successful in our efforts to use and expand our patented CAB technology platform to continue to build a pipeline of product candidates and develop marketable products.

We are using our patented technology platform to develop CABs in oncology indications with our lead product candidates BA3011 and BA3021, as well as continuing to build our pipeline of product candidates. Our business depends not only on our ability to successfully develop, obtain regulatory approval for, and commercialize the product candidates we currently have in clinical and preclinical development, but to continue to generate new product candidates through our platform. Even if we are successful in continuing to build our pipeline and further progress the clinical development of our current product candidates, any additional product candidates may not be suitable for clinical development, including as a result of harmful side effects, manufacturing issues, limited efficacy or other characteristics that indicate that they are unlikely to be products that will succeed in clinical development, receive marketing approval or achieve market acceptance. If we cannot validate our technology platform by successfully commercializing CAB product candidates, we may not be able to obtain product, licensing or collaboration revenue in future periods, which would adversely affect our business, financial condition, results of operations and prospects.

We may expend our resources to pursue particular product candidates and fail to capitalize on product candidates that may be more profitable or for which there is a greater likelihood of success.

As a result of our limited financial and managerial resources, we must make strategic decisions as to which targets and product candidates to pursue and may forego or delay pursuit of opportunities with other targets or product candidates or for other indications that later prove to have greater commercial potential. Our resource allocation decisions may cause us to fail to capitalize on viable commercial products or profitable market opportunities. Failure to properly assess potential product candidates could result in our focus on product candidates with low market potential, which would harm our business, financial condition, results of operations and prospects. Our spending on current and future research and development programs and product candidates for specific targets or indications may not yield any commercially viable products. Our understanding and evaluation of biological targets for the discovery and development of new CAB product candidates may fail to identify challenges encountered in subsequent preclinical and clinical development. If we do not accurately evaluate the likelihood of clinical trial success, commercial potential or target market for a particular product candidate, we may relinquish valuable rights to that product candidate through collaboration, licensing or other royalty arrangements in cases in which it would have been more advantageous for us to retain sole development and commercialization rights.

If the market opportunities for any product that we develop are smaller than we believe they are, our revenue may be adversely affected and our business may suffer.

We focus our product candidate development on therapeutic CAB antibodies for the treatment of various oncology indications, such as soft tissue and bone sarcoma, NSCLC, melanoma and ovarian cancer, among others. Our projections of addressable patient populations that may benefit from treatment with our product candidates are based on our estimates. These estimates, which have been derived from a variety of sources, including scientific literature, surveys of clinics, physician interviews, patient foundations and market research, may prove to be incorrect. Further, new studies may change the estimated incidence or prevalence of these cancers. Additionally, the potentially addressable patient population for our product candidates may not ultimately be amenable to treatment with our product candidates. In addition, the subset of patients that are likely to respond to our product candidates, as identified by our quantitative biomarker assay/TmPS, may not correspond with and may be smaller than what market data may indicate. Our market opportunity may also be limited by future competitor treatments that enter the market. If any of our estimates prove to be inaccurate, the market opportunity for any product candidate that we or our strategic partners develop could be significantly diminished and have an adverse material impact on our business.

The market may not be receptive to our product candidates because they are based on our novel therapeutic modality, and we may not generate any future revenue from the sale or licensing of product candidates

The product candidates that we are developing are primarily based on our patented CAB technology platform, which uses new technologies to create our novel therapeutic approach. Market participants with significant influence over acceptance of new treatments, such as physicians and third-party payors, may not adopt a product or treatment based on our patented technology platform, and we may not be able to convince patients, the medical community and third-party payors to accept and use, or to provide favorable reimbursement for, any product candidates developed by us or our existing or future collaborators. Market acceptance of our product candidates will depend on, among other factors:

- the timing of our receipt of any marketing and commercialization approvals;
- the terms of any approvals and the countries in which approvals are obtained;
- the safety and efficacy of our product candidates;
- the prevalence and severity of any adverse side effects associated with our product candidates;
- limitations or warnings contained in any labeling approved by the FDA or other regulatory authority, including the EMA;
- relative convenience and ease of administration of our product candidates;
- the willingness of patients to accept any new methods of administration;
- the success of any physician education programs;
- the availability of adequate government and third-party payor reimbursement;
- the pricing of our products, particularly as compared to alternative treatments; and
- availability of alternative effective treatments for the disease indications our product candidates are intended to treat and the relative risks, benefits and costs of those treatments.

If any product candidate we commercialize fails to achieve market acceptance, it could have a material and adverse effect on our business, financial condition, results of operations and prospects.

Results from early-stage clinical trials may not be predictive of results from late-stage or other clinical trials, and the results of our clinical trials may not satisfy the requirements of the FDA, EMA or other comparable foreign regulatory authorities.

Positive and promising results from preclinical studies and early-stage clinical trials may not be predictive of results from late-stage clinical trials or from clinical trials of the same product candidates for the treatment of other indications. Product candidates in later stages of clinical trials may fail to show the desired safety and efficacy traits despite having progressed through preclinical studies and initial clinical trials. Late-stage clinical trials could differ in significant ways from early-stage clinical trials, including changes to inclusion and exclusion criteria, efficacy endpoints, dosing regimen and statistical design. Moreover, success in clinical trials in a particular indication does not guarantee that a product candidate will be successful for the treatment of other indications. Many companies in the biopharmaceutical industry have suffered significant setbacks in late-stage clinical trials after achieving encouraging or positive results in early-stage development. We cannot assure you that we will not face similar setbacks in our ongoing or planned clinical trials, including in our Phase 2 clinical trials of BA3011 for the treatment of soft tissue and bone sarcoma and PD-1 refractory NSCLC, our Phase 2 clinical trial of BA3021 for the treatment of PD-1 refractory melanoma and NSCLC and any subsequent or post-marketing confirmatory clinical trials.

Moreover, preclinical and clinical data are often susceptible to varying interpretations and analyses and many companies that believed their product candidates performed satisfactorily in preclinical studies and clinical trials nonetheless failed to obtain FDA, EMA or comparable foreign regulatory authority approval. We cannot guarantee that the FDA will agree with our clinical trial plans. For example, we have initiated potentially registration-enabling Phase 2 trials for BA3011 in treatment-refractory sarcoma patients and PD-1 refractory NSCLC. The FDA has reviewed the trial designs, but has not opined on whether the Phase 2 clinical trials will in fact be sufficient to support regulatory approval. However, the FDA is expected to consider this further at the interim data review point. We cannot assure you that the FDA will agree that such data will be sufficient to support approval. To the extent that the results of the trials are not satisfactory to the FDA or foreign regulatory authorities for support of a marketing application, we may be required to expend significant resources, which may not be available to us, to conduct additional trials in support of potential approval of our product candidates. Even if regulatory approval is secured for any of our product candidates, the terms of such approval may limit the scope and use of our product candidate, which may also limit its commercial potential. Furthermore, the approval policies or regulations of the FDA, EMA or comparable foreign regulatory authorities may significantly change in a manner rendering our clinical data insufficient for approval, which may lead to the FDA, EMA or comparable foreign regulatory authorities delaying, limiting or denying approval of our product candidates.

Interim, topline and preliminary data from our clinical trials that we announce or publish from time to time may change as more patient data become available, and are subject to audit and verification procedures that could result in material changes in the final data.

From time to time, we may publicly disclose preliminary, interim or topline data from our clinical trials, such as the interim data from our ongoing Phase 2 clinical trials of BA3011 and BA3021. These interim updates are based on a preliminary analysis of then-available data, and the results and related findings and conclusions are subject to change following a more comprehensive review of the data related to the particular study or trial. For example, we may report tumor responses in certain patients that are unconfirmed at the time and which do not ultimately result in confirmed responses to treatment after follow-up evaluations. We also make assumptions, estimations, calculations and conclusions as part of our analyses of data, and we may not have received or had the opportunity to fully and carefully evaluate all data. As a result, the topline results that we report may differ from future results of the same studies, or different conclusions or considerations may qualify such results, once additional data have been received and fully evaluated. Topline data also remain subject to audit and verification procedures that may result in the final data being materially different from the preliminary data we

previously published. As a result, topline data should be viewed with caution until the final data are available. In addition, we may report interim analyses of only certain endpoints rather than all endpoints. Interim data from clinical trials that we may complete are subject to the risk that one or more of the clinical outcomes may materially change as patient enrollment continues and more patient data become available. Adverse changes between interim data and final data could significantly harm our business and prospects. Further, additional disclosure of interim data by us or by our competitors in the future could result in volatility in the price of our common stock.

In addition, the information we choose to publicly disclose regarding a particular study or clinical trial is typically selected from a more extensive amount of available information. You or others may not agree with what we determine is the material or otherwise appropriate information to include in our disclosure, and any information we determine not to disclose may ultimately be deemed significant with respect to future decisions, conclusions, views, activities or otherwise regarding a particular product candidate or our business. If the preliminary or topline data that we report differ from late, final or actual results, or if others, including regulatory authorities, disagree with the conclusions reached, our ability to obtain approval for, and commercialize, our product candidates may be harmed, which could harm our business, financial condition, results of operations and prospects.

Delays in the commencement and completion of clinical trials could increase costs and delay or prevent regulatory approval and commercialization of our product candidates.

We cannot guarantee that clinical trials of our product candidates will be conducted as planned or completed on schedule, if at all. A failure of one or more clinical trials can occur at any stage of the clinical trial process, and other events may cause us to temporarily or permanently stop a clinical trial. Events that may prevent successful or timely commencement and completion of clinical development include:

- negative preclinical data;
- delays in receiving the required regulatory clearance from the appropriate regulatory authorities to commence clinical trials or amend clinical trial protocols, including any objections to our INDs or protocol amendments from the FDA;
- delays in reaching, or a failure to reach, a consensus with regulatory authorities on study design;
- delays in reaching, or failure to reach, agreement on acceptable terms with prospective CROs and clinical trial sites, the terms of which can be subject to extensive negotiation and may vary significantly among different CROs and trial sites;
- difficulties in obtaining IRB approval at each site;
- challenges in recruiting suitable patients to participate in a trial;
- the inability to enroll a sufficient number of patients in clinical trials to ensure adequate statistical power to detect statistically significant treatment effects;
- difficulties in having patients complete a trial or return for post-treatment follow-up;
- our CROs or clinical trial sites failing to comply with regulatory requirements or meet their contractual obligations to us in a timely manner, or at all, deviating from the protocol or dropping out of a clinical trial;
- unforeseen safety issues, including occurrence of treatment emergent adverse events, or TEAEs, associated with the product candidate that are viewed to outweigh the product candidate's potential benefits;

[Table of Contents](#)

- difficulties in adding new clinical trial sites;
- ambiguous or negative interim results;
- lack of adequate funding to continue the clinical trial;
- difficulties in manufacturing sufficient quantities of product candidate for use in clinical trials; or
- the COVID-19 pandemic, which may result in clinical site closures, delays to patient enrollment, patients discontinuing their treatment or follow up visits or changes to trial protocols.

We could encounter delays if a clinical trial is suspended or terminated by us, by the IRBs of the institutions in which such trials are being conducted, by a Data Safety Monitoring Board, or DSMB, for such trial or by the FDA or other regulatory authorities. Such authorities may impose such a suspension or termination due to a number of factors, including failure to conduct the clinical trial in accordance with regulatory requirements or our clinical protocols, inspection of the clinical trial operations or trial site by the FDA or other regulatory authorities resulting in the imposition of a clinical hold, unforeseen safety issues or adverse side effects, failure to demonstrate a benefit from using a drug, changes in governmental regulations or administrative actions or lack of adequate funding to continue the clinical trial. If we experience delays in the completion of, or termination of, any clinical trial of our product candidates, the commercial prospects of our product candidates will be harmed, and our ability to generate product revenues from any of these product candidates will be delayed. In addition, any delays in completing our clinical trials will increase our costs, slow down our product candidate development and approval process and jeopardize our ability to commence product sales and generate revenues. Any of these occurrences may harm our business, financial condition, results of operations and prospects significantly. In addition, many of the factors that cause, or lead to, a delay in the commencement or completion of clinical trials may also ultimately lead to the denial of regulatory approval of our product candidates.

In addition, data obtained from trials and studies are susceptible to varying interpretations, and regulators may not interpret our data as favorably as we do, which may delay, limit or prevent regulatory approval. Our clinical trial results may not be successful, or even if successful, may not lead to regulatory approval.

Enrollment and retention of patients in clinical trials is an expensive and time-consuming process and could be made more difficult or rendered impossible by multiple factors outside our control.

We may encounter delays or difficulties in enrolling, or be unable to enroll, a sufficient number of patients to complete any of our clinical trials on our current timelines, or at all, and even once enrolled, we may be unable to retain a sufficient number of patients to complete any of our trials. Enrollment in our clinical trials may be slower than we anticipate, leading to delays in our development timelines. For example, we may face difficulty enrolling a sufficient number of patients in a timely manner in our clinical trials for BA3011 and BA3021 due to the limited number of suitable patients meeting the required AXL or ROR2 tumor membrane expression levels.

Patient enrollment and retention in clinical trials depends on many factors, including the size and nature of the patient population, the nature of the trial protocol, our ability to recruit clinical trial investigators with the appropriate competencies and experience, delays in enrollment due to travel or quarantine policies, or other factors, related to the COVID-19 pandemic or other epidemics or pandemics, the existing body of safety and efficacy data with respect to the study drug, the number and nature of competing treatments and ongoing clinical trials of competing drugs for the same indication, the proximity of patients to clinical sites, the eligibility criteria for the trial and the proportion of patients screened that meets those criteria, our ability to obtain and maintain patient consents and our ability to successfully complete prerequisite studies before enrolling certain patient populations. Furthermore, any negative results or new safety signals we may report in clinical trials of

[Table of Contents](#)

our product candidates may make it difficult or impossible to recruit and retain patients in other clinical trials we are conducting. Similarly, negative results reported by our competitors about their drug candidates may negatively affect patient recruitment in our clinical trials. Also, marketing authorization of competitors in this same class of drugs may impair our ability to enroll patients into our clinical trials, delaying or potentially preventing us from completing recruitment of one or more of our trials.

Delays or failures in planned patient enrollment or retention may result in increased costs, program delays or both, which could have a harmful effect on our ability to develop our product candidates, or could render further development impossible. In addition, we rely on clinical trial sites to ensure timely conduct of our clinical trials and, while we have entered into agreements governing their services, we are limited in our ability to compel their actual performance.

Our product candidates may cause undesirable and unforeseen side effects or have other properties impacting safety that could halt their clinical development, delay or prevent their regulatory approval, limit their commercial potential or result in significant negative consequences.

Undesirable side effects caused by our product candidates could cause us or regulatory authorities to interrupt, delay or halt clinical trials and could result in a more restrictive label or the delay or denial of regulatory approval by the FDA or other regulatory authorities and potential product liability claims. Such side effects could also affect patient recruitment or the ability of enrolled patients to complete the trial. Many compounds developed in the biopharmaceutical industry that initially showed promise in early-stage testing for treating cancer have later been found to cause side effects that prevented their further development. Any of these occurrences may materially and adversely affect our business, financial condition, results of operations and prospects.

In our clinical trials for BA3011 and BA3021, we have observed adverse events such as reversible myelosuppression, transient liver enzyme elevations, pyrexia, or fever, metabolic disturbances and peripheral neuropathy.

For our current and future clinical trials, we have contracted with and expect to continue to contract with CROs experienced in the assessment and management of toxicities arising during clinical trials. Nonetheless, they may have difficulty observing patients and treating toxicities, which may be more challenging due to personnel changes, shift changes, house staff coverage or related issues. This could lead to more severe or prolonged toxicities or even patient deaths, which could result in us or the FDA delaying, suspending or terminating one or more of our clinical trials and which could jeopardize regulatory approval.

Further, clinical trials by their nature test product candidates in only samples of the potential patient populations. With a limited number of patients and limited duration of exposure in such trials, rare and severe side effects of our product candidates may not be uncovered until a significantly larger number of patients are exposed to the product candidate. For example, while we believe that BA3011 and BA3021 have demonstrated manageable tolerability profiles thus far, we cannot assure you that these and our other product candidates will not cause more severe side effects in a greater proportion of patients.

In addition, BA3011 and BA3021 are being studied in combination with other therapies, which may exacerbate adverse events associated with the therapy. Patients treated with BA3011, BA3021 or our other product candidates may also be undergoing surgical, radiation or chemotherapy treatments, which can cause side effects or adverse events that are unrelated to our product candidate but may still impact the success of our clinical trials.

The inclusion of critically ill patients in our clinical trials may result in deaths or other adverse medical events due to other therapies or medications that such patients may be using or due to the gravity of such patients'

[Table of Contents](#)

illnesses. For example, some of the late-stage patients enrolled in our BA3011 and BA3021 clinical trials may die or experience major clinical events either during the course of our clinical trials or after participating in such trials due mainly to the gravity of their illness, which has occurred in the past.

In the event that any of our product candidates receive regulatory approval, and we or others later identify undesirable and unforeseen side effects caused by such product, any of the following negative consequences could occur, including:

- regulatory authorities may suspend, limit or withdraw their approval of such product, or seek an injunction against its manufacture or distribution;
- we may be required to conduct additional clinical trials or post-approval studies;
- we may be required to recall a product or change the way such product is administered to patients;
- additional restrictions may be imposed on the marketing of the particular product or the manufacturing processes for the product or any component thereof;
- regulatory authorities may require the addition of labeling statements, such as a boxed warning or a contraindication, or issue safety alerts, Dear Healthcare Provider letters, press releases or other communications containing warnings or other safety information about the product;
- we may be required to implement a Risk Evaluation and Mitigation Strategy, or REMS, and/or create a Medication Guide outlining the risks of such side effects for distribution to patients, a communication plan for healthcare providers and/or other elements to assure safe use;
- we could be sued and held liable for harm caused to patients;
- we may be subject to fines, injunctions or the imposition of civil or criminal penalties;
- the product may become less competitive; and
- our reputation may suffer.

Any of these events could prevent us from achieving or maintaining market acceptance of the particular product candidate, if approved, and result in the loss of significant revenues to us, which would materially and adversely affect our results of operations and business. In addition, if one or more of our product candidates prove to be unsafe, our business, financial condition, results of operations and prospects may be materially and adversely affected.

We or our collaborator BeiGene are developing certain of our product candidates in combination with other therapies, and regulatory approval, safety or supply issues with these other therapies may delay or prevent the development and approval of our product candidates.

Currently, we are evaluating the use of each of BA3011 and BA3021 in combination with an anti-PD-1 inhibitor and plan to evaluate the use of BA3071, which is being developed by our collaborator BeiGene, in combination with an anti-PD-1 inhibitor. In the future, we may explore the use of these or our other product candidates in combination with other therapies. If we choose to develop a product candidate for use in combination with an approved therapy, we are subject to the risk that the FDA, EMA or comparable foreign regulatory authorities in other jurisdictions could revoke approval of, or that safety, efficacy, manufacturing or supply issues could arise with, the therapy used in combination with our product candidate. If the therapies we use in combination with our product candidates are replaced as the standard of care, the FDA, EMA or comparable foreign regulatory authorities in other jurisdictions may require us to conduct additional clinical trials. The occurrence of any of these risks could result in our product candidates, if approved, being removed from the market or being less successful commercially.

[Table of Contents](#)

Where we develop a product candidate for use in combination with a therapy that has not been approved by the FDA, EMA or comparable foreign regulatory authorities in other jurisdictions, we will not be able to market our product candidate for use in combination with such an unapproved therapy, unless and until the unapproved therapy receives regulatory approval. Currently, our collaborator BeiGene is evaluating the use of BA3071 in combination with tislelizumab, an anti-PD-1 antibody in late stage development for solid tumor patients. However, tislelizumab has not been approved by the FDA for the treatment of solid tumors. These unapproved therapies face the same risks described with respect to our product candidates currently in development, including serious adverse effects and delays in their clinical trials. In addition, other companies may also develop their products or product candidates in combination with the unapproved therapies with which we are developing our product candidates for use in combination. Any setbacks in these companies' clinical trials, including the emergence of serious adverse effects, may delay or prevent the development and approval of our product candidates.

If the FDA, EMA or comparable foreign regulatory authorities in other jurisdictions do not approve or revoke their approval of, or if safety, efficacy, manufacturing, or supply issues arise with, therapies we choose to evaluate in combination with any of our product candidates, we may be unable to obtain regulatory approval of or to commercialize such product candidates in combination with these therapies.

If safe and effective use of any of our product candidates, such as BA3011 and BA3021, depends on a companion diagnostic test, then the FDA generally will require approval or clearance of that companion diagnostic at the same time that the FDA approves our product candidates, if at all. If we are unable to successfully develop companion diagnostic tests for our product candidates, experience significant delays in doing so, rely on third parties in the development of such companion diagnostic tests, or do not obtain or face delays in obtaining FDA approval of a companion diagnostic test, the full commercial potential of our product candidates and our ability to generate revenue will be materially impaired.

We are exploring predictive biomarkers to determine patient selection for our clinical trials. Specifically, to help inform which patients may be most suitable for treatment with BA3011 and BA3021, we have developed a Clinical Laboratory Improvement Amendments, or CLIA, validated quantitative biomarker assay, the Tumor membrane Percent Score, or TmPS, which measures AXL and ROR2 expression levels on the tumor membrane and cytoplasm. We are using both AXL and ROR2 TmPS scores in our ongoing clinical trials and they may be used for patient selection in future clinical trials. If the AXL and ROR2 TmPS scores prove to be a useful method for patient selection, we will incorporate the specific diagnostic test into our registrational studies and partner with the appropriate diagnostic provider to codevelop a companion diagnostic.

If safe and effective use of any of our product candidates, such as BA3011 and BA3021, depends on a companion diagnostic test then the FDA generally will require approval or clearance of that companion diagnostic, at the same time that the FDA approves our product candidates, if at all. The process of obtaining or creating such diagnostic is time-consuming and costly and a delay in diagnostic approval could delay drug approval. According to FDA guidance, if the FDA determines that a companion diagnostic device is essential to the safe and effective use of a novel therapeutic product or indication, the FDA generally will not approve the therapeutic product or new therapeutic product indication if the companion diagnostic is not also approved or cleared for that indication. If a satisfactory companion diagnostic is not commercially available, we may be required to create or obtain one that would be subject to regulatory approval requirements. On April 13, 2020, the FDA issued new guidance on developing and labeling companion diagnostics for a specific group of oncology therapeutic products, including recommendations to support a broader labeling claim rather than individual therapeutic products. We will continue to evaluate the impact of this guidance on our companion diagnostic development and strategy. This guidance and future policies from the FDA and other regulatory authorities may impact our development of a companion diagnostic for our product candidates and result in delays in

regulatory approval. We may be required to conduct additional studies to support a broader claim. Also, to the extent other approved diagnostics are able to broaden their labeling claims to include our approved drug products, we may be forced to abandon our companion diagnostic development plans or we may not be able to compete effectively upon approval, which could adversely impact our ability to generate revenue from the sale of our approved products and our business, financial condition, results of operations and prospects.

We expect to rely on third parties for the design, development and manufacture of companion diagnostic tests for our product candidates that require such tests. If the FDA, EMA or a comparable foreign regulatory authority requires approval of a companion diagnostic for any of our product candidates, whether before or after it obtains marketing approval, we, and/or future collaborators, may encounter difficulties in developing and obtaining approval for such product candidate. If we or our third-party collaborators experience any delay in developing or obtaining regulatory approval of a companion diagnostic, we may be unable to enroll enough patients for our current and planned clinical trials, the development of our product candidates may be adversely affected or we may not obtain marketing approval, and we may not realize the full commercial potential of our product candidates, including BA3011 and BA3021.

We face competition from entities that have developed or may develop product candidates for cancer, including companies developing novel treatments and technology platforms. If these companies develop technologies or product candidates more rapidly than we do or their technologies are more effective, our ability to develop and successfully commercialize product candidates may be adversely affected.

The development and commercialization of drugs and therapeutic biologics is highly competitive. We compete with a variety of multinational biopharmaceutical companies and specialized biotechnology companies, as well as technology being developed at universities and other research institutions. Our competitors have developed, are developing and will develop product candidates and processes competitive with our product candidates. We believe that a significant number of products are currently under development, and may become commercially available in the future, for the treatment of conditions for which we are developing product candidates. We believe that while our patented CAB technology platform, its associated intellectual property and our scientific and technical know-how give us a competitive advantage in this space, competition from many sources remains. Our success will partially depend on our ability to develop and protect therapeutics that are safer and more effective than competing products. Our commercial opportunity and success will be reduced or eliminated if competing products are safer, more effective or less expensive than the therapeutics we develop.

Although we do not believe competing companies have selective CAB technology, there is a wide array of activity in multiple areas of immune-based cellular therapies for oncology including CAR-T and T-cell receptor therapies. Certain companies are also pursuing antibody therapies in immuno-oncology, ADCs and various prodrug biologic products designed to be preferentially activated at tumor sites. There are also companies developing technologies designed to deliver biologics and chemotherapeutic agents with some targeting capabilities. In addition, if any of our product candidates are approved in oncology indications such as pancreatic, breast, and other cancers, they may compete with existing biologics and small molecule therapies, or may be used in combination with existing therapies. There are also many other therapies under development that are intended to treat the same cancers that we are targeting or may target with our CAB platform, including through approaches that could prove to be more effective, have fewer side effects, be cheaper to manufacture, be more convenient to administer or have other advantages over any products resulting from our technologies.

There are numerous companies in various stages of clinical development of ADCs, a key feature of our product candidates BA3011, BA3021 and BA3071. Currently, there are 10 approved ADCs and as of February 2020, there were approximately 60 ADCs in clinical development, the vast majority of which were being developed for the

treatment of cancer. Certain other companies are also pursuing antibody therapies in immuno-oncology, such as Seattle Genetics. Although we do not believe competing companies have selective CAB technology, there is a wide array of activity in multiple areas of immune-based cellular therapies for oncology. We also face competition on specific targets, including on antibody-based therapies for AXL, the target of our lead product candidate, BA3011, from Genmab A/S and on antibody-based therapies for ROR2, the target of our second product candidate, BA3021, from NBE-Therapeutics AG.

Many of our competitors, either alone or with strategic partners, have significantly greater financial, technical, manufacturing, marketing, sales and supply resources or experience than we do. Accordingly, our competitors may be more successful than us in obtaining approval for treatments and achieving widespread market acceptance, rendering our treatments obsolete or non-competitive. Accelerated merger and acquisition activity in the biotechnology and biopharmaceutical industries may result in even more resources being concentrated among a smaller number of our competitors. These companies also compete with us in recruiting and retaining qualified scientific and management personnel, establishing clinical trial sites and patient registration for clinical trials and acquiring technologies complementary to, or necessary for, our programs. Smaller or early-stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. The level of generic competition and the availability of reimbursement from government and other third-party payors will also significantly affect the pricing and competitiveness of our products. In addition, our competitors also may obtain FDA or other regulatory approval for their products more rapidly than we may obtain approval for ours, which could result in our competitors establishing a strong market position before we are able to enter the market.

There are also requirements governing the reporting of ongoing clinical trials and completed clinical trial results to public registries. Sponsors of clinical trials of FDA-regulated products, including biologics, are required to register and disclose certain clinical trial information, which is publicly available at www.clinicaltrials.gov. Information related to the product, patient population, phase of investigation, study sites and investigators, and other aspects of the clinical trial is then made public as part of the registration. Sponsors are also obligated to discuss the results of their clinical trials after completion. Disclosure of the results of these trials can be delayed in certain circumstances for up to two years after the date of completion of the trial. Competitors may use this publicly available information to gain knowledge regarding the progress of development programs

Our commercial opportunity could be substantially limited in the event that our competitors develop and commercialize products that are more effective, safer, less toxic or more convenient than products we may develop. In geographies that are critical to our commercial success, competitors may also obtain regulatory approvals before us, resulting in our competitors building a strong market position in advance of our products' entry. Such competitors could also recruit our employees, which could negatively impact our level of expertise and our ability to execute our business plan.

Our biologic product candidates for which we intend to seek approval may face competition sooner than anticipated.

The Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act, or the ACA, includes a subtitle called the Biologics Price Competition and Innovation Act of 2009, or BPCIA, which created an abbreviated approval pathway for biological products that are biosimilar to or interchangeable with an FDA-licensed reference biological product. Under the BPCIA, an application for a biosimilar product may not be submitted to the FDA until four years following the date that the reference product was first licensed by the FDA. In addition, the approval of a biosimilar product may not be made effective by the FDA until 12 years from the date on which the reference product was first licensed. During this

[Table of Contents](#)

12-year period of exclusivity, another company may still market a competing version of the reference product if the FDA approves a full BLA for the competing product containing the sponsor's own preclinical data and data from adequate and well-controlled clinical trials to demonstrate the safety, purity and potency of their product. The law is complex and is still being interpreted and implemented by the FDA. As a result, its ultimate impact, implementation, and meaning are subject to uncertainty. While it is uncertain when such processes intended to implement BPCIA may be fully adopted by the FDA, any such processes could have an adverse effect on the future commercial prospects for our product candidates.

There is a risk that any product candidates we may develop that are approved as a biological product under a BLA would not qualify for the 12-year period of exclusivity or that this exclusivity could be shortened due to congressional action or otherwise, or that the FDA will not consider any product candidates we may develop to be reference products for competing products, potentially creating the opportunity for generic competition sooner than anticipated. Other aspects of the BPCIA, some of which may impact the BPCIA exclusivity provisions, have also been the subject of recent litigation, including litigation challenging the constitutionality of the ACA.

For example, on December 14, 2018, a Texas U.S. District Court Judge ruled that the ACA is unconstitutional in its entirety because the "individual mandate" was repealed by Congress as part of the Tax Cuts and Jobs Act, or the TCJA. On December 18, 2019, the U.S. Court of Appeals for the 5th Circuit upheld the District Court ruling that the individual mandate was unconstitutional and remanded the case back to the District Court to determine whether the remaining provisions of the ACA are invalid as well. On March 2, 2020, the United States Supreme Court granted the petitions for writs of certiorari to review this case, and oral arguments were held on November 10, 2020, although it is unclear when a decision will be made or how the Supreme Court will rule. There may also be other efforts to challenge, repeal or replace the ACA. We continue to evaluate the effect that the ACA and its possible repeal and replacement has on our business and exclusivity under the BPCIA. It is uncertain the extent to which any such changes may impact our business or financial condition.

Our business entails a significant risk of product liability, and if we are unable to obtain sufficient insurance coverage, such failure could have a material and adverse effect on our business, financial condition, results of operations and prospects.

We expect to be exposed to significant product liability risks inherent in the development, testing and manufacturing of our product candidates and products, if approved. Product liability claims could delay or prevent completion of our development programs. If we succeed in marketing products, such claims could result in an FDA investigation of the safety and effectiveness of our products, our third-party manufacturer's manufacturing processes and facilities or our marketing programs and potentially a recall of our products or more serious enforcement action, including limitations on the approved indications for which our product candidates may be used or suspension or withdrawal of approvals. Regardless of the merits or eventual outcome, liability claims may also result in decreased demand for our products, injury to our reputation, costs to defend the related litigation, a diversion of management's time and our resources, substantial monetary awards to trial participants or patients and a decline in our stock price. We currently have product liability insurance that we believe is appropriate for our stage of development and may need to obtain higher levels prior to marketing any of our product candidates. Any insurance we have or may obtain may not provide sufficient coverage against potential liabilities. In addition, we may be subject to liability based on the actions of our existing or future collaborators in connection with their development of products using our CAB technology. Furthermore, clinical trial and product liability insurance is becoming increasingly expensive. As a result, we may be unable to maintain sufficient insurance at a reasonable cost to protect us against losses caused by product liability claims that could have a material and adverse effect on our business, financial condition, results of operations and prospects.

Risks related to regulatory approval and other legal compliance matters

We may be unable to obtain U.S. or foreign regulatory approval and, as a result, unable to commercialize our product candidates.

Our product candidates are subject to extensive governmental regulations relating to, among other things, the research, development, testing, manufacture, quality control, import, export, safety, effectiveness, labeling, packaging, storage, distribution, record keeping, approval, advertising, promotion, marketing, post-approval monitoring and post-approval reporting of drugs and therapeutic biologics. Rigorous preclinical testing and clinical trials and an extensive regulatory approval process are required to be successfully completed in the United States and in many foreign jurisdictions before a new drug or therapeutic biologic can be marketed. Satisfaction of these and other regulatory requirements is costly, lengthy, time-consuming, uncertain and subject to unanticipated delays. We have not previously submitted a BLA to the FDA, or similar drug approval filings to comparable foreign regulatory authorities, for any product candidate, and it is possible that none of the product candidates we may develop will obtain the regulatory approvals necessary for us or our existing or future collaborators to begin selling them.

We have not completed any large-scale or pivotal clinical trials nor managed the regulatory approval process with the FDA or any other regulatory authority. The time required to obtain FDA and other approvals is unpredictable but typically takes many years following the commencement of clinical trials, depending upon the type, complexity and novelty of the product candidate, and numerous other factors including the substantial discretion of regulatory authorities. The standards that the FDA and its foreign counterparts, including the EMA, use when regulating us and our existing or future collaborators require judgment and can change, which makes it difficult to predict with certainty how they will be applied. Any analysis we perform of data from preclinical and clinical activities is subject to confirmation and interpretation by regulatory authorities, which could delay, limit or prevent regulatory approval. We may also encounter unexpected delays or increased costs due to new government regulations, for example, from future legislation or administrative action, or from changes in FDA policy during the period of product development, clinical trials and FDA regulatory review. It is impossible to predict whether legislative changes will be enacted, or whether FDA or foreign regulations, guidance or interpretations will be changed, or what the impact of such changes, if any, may be.

In addition, our product candidates could fail to receive regulatory approval for many reasons including the following:

- the FDA or comparable foreign regulatory authorities may disagree with the design or implementation of our clinical trials;
- we may be unable to demonstrate to the satisfaction of the FDA or comparable foreign regulatory authorities that a product candidate is safe, pure and potent for its proposed indication;
- the results of clinical trials may fail to achieve the level of statistical significance required by the FDA or comparable foreign regulatory authorities for approval;
- we may be unable to demonstrate that a product candidate's clinical and other benefits outweigh its safety risks;
- we may be unable to demonstrate a sufficient response rate or duration of response for a product candidate;
- the FDA or comparable foreign regulatory authorities may disagree with our interpretation of data submitted in support of regulatory approval;
- the data collected from preclinical studies and clinical trials of our product candidates may not be sufficient to support the submission of a BLA or other regulatory submission necessary to obtain regulatory approval in the United States or elsewhere; and

[Table of Contents](#)

- we or our contractors may not meet the current Good Manufacturing Practices, or cGMPs, and other applicable requirements for manufacturing processes, procedures, documentation and facilities necessary for approval by the FDA or comparable foreign regulatory authorities.

Any delay or failure in obtaining required approvals could have a material and adverse effect on our ability to generate revenues from the particular product candidate for which we are seeking approval. Furthermore, any regulatory approval to market a drug may be subject to significant limitations on the approved uses or indications for which we may market the drug or the labeling or other restrictions. In addition, the FDA has the authority to require a REMS as part of approving a BLA, or after approval, which may impose further requirements or restrictions on the distribution or use of an approved drug. These requirements or restrictions might include limiting prescribing to certain physicians or medical centers that have undergone specialized training, limiting treatment to patients who meet certain safe-use criteria and requiring treated patients to enroll in a registry. These limitations and restrictions may significantly limit the size of the market for the drug and affect reimbursement by third-party payors.

We are also subject to numerous foreign regulatory requirements governing, among other things, the conduct of clinical trials, manufacturing and marketing authorization, pricing and third-party reimbursement. The foreign regulatory approval process varies among countries and may include all of the risks associated with FDA approval described above as well as risks attributable to the satisfaction of local regulations in foreign jurisdictions. Moreover, the time required to obtain approval may differ from that required to obtain FDA approval. Approval by the FDA does not ensure approval by regulatory authorities outside the United States and vice versa.

We intend to seek approval from the FDA or comparable foreign regulatory authorities through the use of accelerated approval pathways, if available. If we are unable to obtain such approval, we may be required to conduct additional preclinical studies or clinical trials beyond those that we contemplate, which could increase the expense of obtaining, and delay the receipt of, necessary marketing approvals. Even if we receive accelerated approval from the FDA, if our confirmatory trials do not verify clinical benefit or if we do not comply with rigorous post-marketing requirements, the FDA may seek to withdraw accelerated approval.

We intend to seek an accelerated approval for BA3011 and BA3021 and we may seek accelerated approval for one or more of our other product candidates. Under the accelerated approval program, the FDA may grant accelerated approval to a product candidate designed to treat a serious or life-threatening condition that provides meaningful therapeutic benefit over available therapies upon a determination that the product candidate has an effect on a surrogate endpoint or intermediate clinical endpoint that is reasonably likely to predict clinical benefit. The FDA considers a clinical benefit to be a positive therapeutic effect that is clinically meaningful in the context of a given disease, such as irreversible morbidity or mortality. For the purposes of accelerated approval, a surrogate endpoint is a marker, such as a laboratory measurement, radiographic image, physical sign, or other measure that is thought to predict clinical benefit, but is not itself a measure of clinical benefit. An intermediate clinical endpoint is a clinical endpoint that can be measured earlier than an effect on irreversible morbidity or mortality that is reasonably likely to predict an effect on irreversible morbidity or mortality or other clinical benefit. The accelerated approval pathway may be used in cases in which the advantage of a new drug over available therapy may not be a direct therapeutic advantage, but is a clinically important improvement from a patient and public health perspective. We intend to seek accelerated approval for some of our product candidates on the basis of objective response rate, a surrogate endpoint that we believe is reasonably likely to predict clinical benefit. However, full approval of another product for the same indication as any of our product candidates for which we are seeking accelerated approval may make accelerated approval of our product candidates more difficult. If granted, accelerated approval is contingent on the sponsor's agreement to conduct, in a diligent manner, additional post-approval confirmatory studies to verify and describe the drug's clinical benefit and, in some cases, the FDA may require that the trial be designed, initiated, and/or fully enrolled prior to submission of the application or approval. Failure to conduct

required post-approval studies, or to confirm a clinical benefit during post-marketing studies, would allow the FDA to withdraw the product from the market on an expedited basis. All promotional materials for product candidates approved under accelerated regulations are subject to prior review by the FDA.

Prior to seeking accelerated approval for any of our product candidates, we intend to seek feedback from the FDA and will otherwise evaluate our ability to seek and receive accelerated approval. We cannot assure you that after our evaluation of the feedback and other factors we will decide to pursue or submit a BLA for accelerated approval or any other form of expedited development, review or approval. Similarly, we cannot assure you that after subsequent FDA feedback we will continue to pursue accelerated approval or any other form of expedited development, review or approval, even if we initially decide to do so. Furthermore, if we decide to submit an application for accelerated approval or receive an expedited regulatory designation (e.g., breakthrough therapy designation) for our product candidates, we cannot assure you that such application will be accepted or that any expedited development, review or approval will be granted on a timely basis, or at all. The FDA or other comparable foreign regulatory authorities could also require us to conduct further studies prior to considering our application or granting approval of any type.

We have received funding under the CARES Act.

On April 22, 2020, we executed a promissory note in favor of City National Bank evidencing an unsecured loan, or the PPP loan, in the aggregate principal amount of approximately \$0.7 million, which was made pursuant to the Paycheck Protection Program, or the PPP. The PPP was established under the CARES Act, which was enacted on March 27, 2020, and is administered by the U.S. Small Business Administration, or the SBA. The promissory note provides for a fixed interest rate of one percent per year with a maturity date of April 22, 2022. Monthly principal and interest payments due on the loan are deferred for a six-month period beginning from the date of disbursement. We may prepay the loan at any time prior to April 30, 2022 with no prepayment penalties or premiums. We have used all proceeds from the loan to retain employees, maintain payroll and make lease and utility payments. Under the terms of the CARES Act, loan recipients can apply for and be granted forgiveness for all or a portion of the loans granted under the PPP beginning 60 days after loan approval. Such forgiveness will be subject to approval by the SBA and the lender and determined, subject to limitations, based on factors set forth in the CARES Act, including verification of the use of loan proceeds for payment of payroll costs and payments of mortgage interest, rent and utilities. The terms of any forgiveness may also be subject to further regulations and guidelines that the SBA may adopt. If the loan is not forgiven, we will be required to repay the outstanding principal, along with accrued interest. We will carefully monitor all qualifying expenses and other requirements necessary to attain loan forgiveness. While we intend to ask for forgiveness, we cannot assure you that we will obtain forgiveness of the PPP Loan in whole or in part.

Even if we receive regulatory approval for any of our product candidates, we will be subject to ongoing regulatory obligations and continued regulatory review, which may result in significant additional expense. Additionally, our product candidates, if approved, could be subject to labeling and other restrictions and market withdrawal and we may be subject to penalties if we fail to comply with regulatory requirements or experience unanticipated problems with our products.

Any regulatory approvals that we or our existing or future collaborators obtain for our product candidates may also be subject to limitations on the approved indicated uses for which a product may be marketed or to conditions of approval, or contain requirements for potentially costly post-marketing testing, including “Phase 4” clinical trials, and surveillance to monitor the safety and efficacy of the product candidate. Furthermore, any regulatory approval to market a product may be subject to limitations on the labeling of the product or may require safety warnings or other restrictions. In addition, the FDA has the authority to require a REMS plan as part of a BLA or after approval, which may impose further requirements or restrictions on the distribution or use of an approved biologic, such as limiting prescribing to certain physicians or medical centers that have undergone specialized training, limiting treatment to

[Table of Contents](#)

patients who meet certain safe-use criteria and requiring treated patients to enroll in a registry. These limitations and restrictions may limit the size of the market for the product and affect reimbursement by third-party payors.

In addition, if the FDA or a comparable foreign regulatory authority approves any of our product candidates, the manufacturing processes, labeling, packaging, distribution, adverse event reporting, storage, import, export, advertising, promotion and recordkeeping for the product will be subject to extensive and ongoing regulatory requirements. These requirements include submissions of safety and other post-marketing information and reports, registration, as well as continued compliance with cGMPs and the FDA's Good Clinical Practices, or GCP, for any clinical trials that we conduct post-approval. The manufacturer and manufacturing facilities we use to make a future product, if any, will also be subject to periodic review and inspection by the FDA and other regulatory agencies, including for continued compliance with cGMP requirements. Any product promotion and advertising will also be subject to regulatory requirements and continuing regulatory review. Later discovery of previously unknown problems with a product, including adverse events of unanticipated severity or frequency, or with our third-party manufacturers or manufacturing processes, or failure to comply with regulatory requirements, may result in, among other things:

- restrictions on the marketing or manufacturing of the product;
- withdrawal of the product from the market or voluntary or mandatory product recalls;
- fines, warning or untitled letters or holds on clinical trials;
- delay of approval or refusal by the FDA or comparable regulatory authorities in other jurisdictions to approve pending applications or supplements to approved applications filed by us, our current collaborator or any future strategic partners;
- suspension or revocation of product license approvals;
- product seizure or detention or refusal to permit the import or export of products; and
- injunctions or the imposition of civil or criminal penalties.

The FDA's policies may change and additional government regulations may be enacted that could prevent, limit or delay regulatory approval of our product candidates. We also cannot predict the likelihood, nature or extent of government regulation that may arise from future legislation or administrative action, either in the United States or abroad. If these regulations impose constraints on FDA's ability to engage in oversight and implementation activities in the normal course, our business may be negatively impacted. If we are slow or unable to adapt to changes in existing requirements or the adoption of new requirements or policies, or if we are not able to maintain regulatory compliance, we may lose any marketing approval that we may have obtained and we may not achieve or sustain profitability, which would adversely affect our business, financial condition, results of operations and prospects.

Even if we are able to commercialize any product candidate, such product candidate may become subject to unfavorable pricing regulations or third-party coverage and reimbursement policies, which would harm our business.

The regulations that govern regulatory approvals, pricing and reimbursement for new drugs and therapeutic biologics vary widely from country to country. Some countries require approval of the sale price of a drug or therapeutic biologic before it can be marketed. In many countries, the pricing review period begins after marketing approval is granted. In some foreign markets, prescription biopharmaceutical pricing remains subject to continuing governmental control even after initial approval is granted. As a result, we might obtain regulatory approval for a product in a particular country, but then be subject to price regulations that delay our commercial

launch of the product, possibly for lengthy time periods, and negatively impact the revenues we are able to generate from the sale of the product in that country. Adverse pricing limitations may hinder our ability to recoup our investment in one or more product candidates, even if our product candidates obtain regulatory approval.

Our ability to commercialize any products successfully also will depend in part on the extent to which reimbursement for these products and related treatments will be available from government authorities, private health insurers and other organizations. Even if we succeed in bringing one or more products to the market, these products may not be considered cost-effective, and the amount reimbursed for any products may be insufficient to allow us to sell our products on a competitive basis. Because our programs are in the early stages of development, we are unable at this time to determine their cost effectiveness or the likely level or method of reimbursement. Increasingly, the third-party payors who reimburse patients or healthcare providers, such as government and private insurance plans, are requiring that drug companies provide them with predetermined discounts from list prices, and are seeking to reduce the prices charged or the amounts reimbursed for biopharmaceutical products. If the price we are able to charge for any products we develop, or the reimbursement provided for such products, is inadequate in light of our development and other costs, our return on investment could be adversely affected.

There is significant uncertainty related to third-party payor coverage and reimbursement of newly approved products. In the United States, for example, principal decisions about reimbursement for new products are typically made by the Centers for Medicare & Medicaid Services, or CMS, an agency within the U.S. Department of Health and Human Services, or HHS. CMS decides whether and to what extent a new product will be covered and reimbursed under Medicare, and private third-party payors often follow CMS's decisions regarding coverage and reimbursement to a substantial degree. However, one third-party payor's determination to provide coverage for a product candidate does not assure that other payors will also provide coverage for the product candidate. As a result, the coverage determination process is often time-consuming and costly. This process will require us to provide scientific and clinical support for the use of our products to each third-party payor separately, with no assurance that coverage and adequate reimbursement will be applied consistently or obtained in the first instance.

Moreover, there has been heightened governmental scrutiny recently over the manner in which drug manufacturers set prices for their marketed products, which has resulted in several Congressional inquiries and proposed and enacted federal and state legislation designed to, among other things, bring more transparency to product pricing, review the relationship between pricing and manufacturer patient programs, and reform government program reimbursement methodologies for drug products. For example, at the federal level, the Trump administration's budget proposal for fiscal year 2021 includes a \$135 billion allowance to support legislative proposals seeking to reduce drug prices, increase competition, lower out-of-pocket drug costs for patients, and increase patient access to lower-cost generic and biosimilar drugs. Additionally, the Trump administration previously released a "Blueprint" to lower drug prices and reduce out of pocket costs of drugs that contained proposals to increase manufacturer competition, increase the negotiating power of certain federal healthcare programs, incentivize manufacturers to lower the list price of their products and reduce the out of pocket costs of drug products paid by consumers. The HHS has solicited feedback on some of these measures and has implemented others under its existing authority. For example, in May 2019, CMS issued a final rule to allow Medicare Advantage Plans the option of using step therapy for Part B drugs beginning January 1, 2020. This final rule codified CMS's policy change that was effective January 1, 2019. At the state level, legislatures have increasingly passed legislation and implemented regulations designed to control pharmaceutical and biological product pricing, including price or patient reimbursement constraints, discounts, restrictions on certain product access and marketing cost disclosure and transparency measures, and, in some cases, designed to encourage importation from other countries and bulk purchasing.

In some countries, particularly member states of the European Union, the pricing of prescription drugs is subject to governmental control. In these countries, pricing negotiations with governmental authorities can take considerable time after receipt of marketing approval for a product. In addition, there can be considerable pressure by governments and other stakeholders on prices and reimbursement levels, including as part of cost containment measures. Political, economic and regulatory developments may further complicate pricing negotiations, and pricing negotiations may continue after reimbursement has been obtained. Reference pricing used by various European Union member states and parallel distribution, or arbitrage between low-priced and high-priced member states, can further reduce prices. In some countries, we or our existing or future collaborators may be required to conduct a clinical trial or other studies that compare the cost-effectiveness of our product candidates to other available therapies in order to obtain or maintain reimbursement or pricing approval. Publication of discounts by third-party payors or authorities may lead to further pressure on the prices or reimbursement levels within the country of publication and other countries.

There may be significant delays in obtaining reimbursement for newly-approved drugs or therapeutic biologics, and coverage may be more limited than the purposes for which the drug or therapeutic biologic is approved by the FDA or similar regulatory authorities outside of the United States. Moreover, eligibility for reimbursement does not imply that any drug or therapeutic biologic will be reimbursed in all cases or at a rate that covers our costs, including research, development, manufacture, sale and distribution. Interim reimbursement levels for new drugs or therapeutic biologics, if applicable, may also be insufficient to cover our costs and may not be made permanent. Reimbursement rates may be based on payments allowed for lower-cost drugs or therapeutic biologics that are already reimbursed, may be incorporated into existing payments for other services and may reflect budgetary constraints or imperfections in Medicare data. Net prices for drugs or therapeutic biologics may be reduced by mandatory discounts or rebates required by government healthcare programs or private payors and by any future relaxation of laws that presently restrict imports of drugs or therapeutic biologics from countries where they may be sold at lower prices than in the U.S. Third-party payors often rely upon Medicare coverage policy and payment limitations in setting their own reimbursement rates. If reimbursement of any product candidate approved for marketing is unavailable or limited in scope or amount, or if pricing is set at unsatisfactory levels, our business, financial condition, results of operations or prospects could be materially and adversely affected, and our ability to commercialize such products, once approved, could be materially impaired.

The FDA and other regulatory agencies actively enforce the laws and regulations prohibiting the promotion of off-label uses.

If any of our product candidates are approved and we are found to have improperly promoted off-label uses of those products, we may become subject to significant liability. The FDA and other regulatory agencies strictly regulate the promotional claims that may be made about prescription products, such as our product candidates, if approved. In particular, a product may not be promoted for uses that are not approved by the FDA or such other regulatory agencies as reflected in the product's approved labeling. For example, if we receive marketing approval for BA3011 as a treatment for soft tissue and bone sarcoma, physicians may nevertheless use our product for their patients in a manner that is inconsistent with the approved labeling. If we are found to have promoted such off-label uses, we may become subject to significant liability. Moreover, although we believe that our product candidates may be safer or more effective than other therapies, unless we conduct head-to-head comparative studies, we will not be able to make any claims of superiority. The U.S. federal government has levied large civil and criminal fines against companies for alleged improper promotion of off-label use and has enjoined several companies from engaging in off-label promotion. The FDA has also requested that companies enter into consent decrees or permanent injunctions under which specified promotional conduct is changed or curtailed. If we cannot successfully manage the promotion of our product

candidates, if approved, we could become subject to significant liability, which would materially adversely affect our business, financial condition, results of operations and prospects.

Disruptions at the FDA, the SEC and other government agencies caused by funding shortages or global health concerns could hinder their ability to hire and retain key leadership and other personnel, or otherwise prevent new or modified products from being developed, approved or commercialized in a timely manner or at all, or otherwise prevent those agencies from performing normal business functions on which the operation of our business may rely, which could negatively impact our business.

The ability of the FDA to review and approve new products can be affected by a variety of factors, including government budget and funding levels, ability to hire and retain key personnel and accept the payment of user fees, statutory, regulatory and policy changes and other events that may otherwise affect the FDA's ability to perform routine functions. In addition, government funding of the Securities and Exchange Commission, or SEC, and other government agencies on which our operations may rely, including those that fund research and development activities, is subject to the political process, which is inherently fluid and unpredictable.

Disruptions at the FDA and other agencies may also slow the time necessary for new drugs to be reviewed or approved by necessary government agencies, which would adversely affect our business. For example, in recent years, including in 2018 and 2019, the U.S. government shut down several times and certain regulatory agencies, such as the FDA and the SEC, had to furlough critical employees and stop critical activities. Separately, in response to the COVID-19 pandemic, on March 10, 2020, the FDA announced its intention to postpone most inspections of foreign manufacturing facilities and products through April 2020. On March 18, 2020, the FDA announced its intention to temporarily postpone routine surveillance inspections of domestic manufacturing facilities and provided guidance regarding the conduct of clinical trials, which guidance continues to evolve. In April 2020, the FDA stated that its New Drug Program was continuing to meet program user fee performance goals, but due to many agency staff working on COVID-19 activities, it was possible that the FDA would not be able to sustain that level of performance indefinitely. As of June 23, 2020, the FDA noted it was conducting mission critical domestic and foreign inspections to ensure compliance of manufacturing facilities with FDA quality standards. Starting the week of July 20, 2020, the FDA began to work toward resuming domestic on-site inspections, but such activities depend on data about the virus' trajectory in a given state and locality and the rules and guidelines that are put in place by state and local governments. The FDA has developed a rating system to assist in determining when and where it is safest to conduct prioritized domestic inspections. Pre-approval and for-cause inspections outside the United States that are not deemed mission-critical remain temporarily postponed, while those deemed mission-critical are considered for inspection on a case-by-case basis. Regulatory authorities outside the United States may adopt similar restrictions or other policy measures in response to the COVID-19 pandemic.

Additionally, as of June 23, 2020, the FDA noted it was continuing to ensure timely reviews of applications for medical products during the COVID-19 pandemic in line with its user fee performance goals. On July 16, 2020, the FDA noted that it is continuing to expedite oncology product development with its staff teleworking full-time. If a prolonged government shutdown occurs, or if global health concerns continue to prevent the FDA or other regulatory authorities from conducting their regular inspections, reviews, or other regulatory activities, it could significantly impact the ability of the FDA to timely review and process our regulatory submissions, which could have a material adverse effect on our business. Further, upon completion of this offering and in our operations as a public company, future government shutdowns or delays could impact our ability to access the public markets and obtain necessary capital in order to properly capitalize and continue our operations.

The FDA, EMA and other comparable foreign regulatory authorities may not accept data from trials conducted in locations outside of their jurisdiction.

We may choose to conduct international clinical trials in the future. The acceptance of study data by the FDA, EMA or other comparable foreign regulatory authority from clinical trials conducted outside of their respective jurisdictions may be subject to certain conditions. In cases where data from foreign clinical trials are intended to serve as the basis for marketing approval in the United States, the FDA will generally not approve the application on the basis of foreign data alone unless (i) the data are applicable to the United States population and United States medical practice; (ii) the trials are performed by clinical investigators of recognized competence and pursuant to current GCP requirements; and (iii) the FDA is able to validate the data through an on-site inspection or other appropriate means. Additionally, the FDA's clinical trial requirements, including the adequacy of the patient population studied and statistical powering, must be met. In addition, such foreign trials would be subject to the applicable local laws of the foreign jurisdictions where the trials are conducted. We cannot assure you that the FDA, EMA or any applicable foreign regulatory authority will accept data from trials conducted outside of its applicable jurisdiction. If the FDA, EMA or any applicable foreign regulatory authority does not accept such data, it would result in the need for additional trials, which would be costly and time-consuming and delay aspects of our business plan, and which may result in our product candidates not receiving approval for commercialization in the applicable jurisdiction.

Our employees, independent contractors, principal investigators, CROs, consultants, suppliers and vendors may engage in misconduct or other improper activities, including noncompliance with regulatory standards and requirements.

We are exposed to the risk that our employees, independent contractors, principal investigators, CROs, consultants, suppliers and vendors may engage in fraudulent conduct or other illegal activity. Misconduct by these parties could include intentional, reckless and/or negligent conduct or disclosure of unauthorized activities to us that violates: (i) FDA laws and regulations, including those laws that require the reporting of true, complete and accurate information to the FDA, (ii) manufacturing standards, (iii) federal and state healthcare fraud and abuse laws and regulations or (iv) laws that require the true, complete and accurate reporting of financial information or data. In particular, sales, marketing and business arrangements in the healthcare industry are subject to extensive laws and regulations intended to prevent fraud, kickbacks, self-dealing and other abusive practices. These laws and regulations may restrict or prohibit a wide range of pricing, discounting, marketing and promotion, sales commission, customer incentive programs and other business arrangements. Activities subject to these laws also involve the improper use of information obtained in the course of clinical trials, which could result in regulatory sanctions and serious harm to our reputation. It is not always possible to identify and deter misconduct by employees and other third parties, and the precautions we take to detect and prevent this activity may not be effective in controlling unknown or unmanaged risks or losses or in protecting us from governmental investigations or other actions or lawsuits stemming from a failure to be in compliance with such laws or regulations. If any such actions are instituted against us, and we are not successful in defending ourselves or asserting our rights, those actions could have a material and adverse effect on our business, financial condition, results of operations and prospects, including the imposition of significant fines or other sanctions, including exclusion from government healthcare programs, and serious harm to our reputation.

Healthcare legislative reform measures may have a material adverse effect on our business and results of operations.

Existing regulatory policies may change and additional government regulations may be enacted that could prevent, limit or delay regulatory approval of our product candidates. We cannot predict the likelihood, nature

or extent of government regulation that may arise from future legislation or administrative action, either in the United States or abroad. If we are slow or unable to adapt to changes in existing requirements or the adoption of new requirements or policies, or if we are not able to maintain regulatory compliance, we may lose any marketing approval that we may have obtained and we may not achieve or sustain profitability.

For example, in March 2010, the ACA was enacted, which substantially changed the way healthcare is financed by both the government and private insurers, and significantly impacted the U.S. pharmaceutical industry. Some of the provisions of the ACA have yet to be implemented, and there have been judicial and Congressional challenges to certain aspects of the ACA, as well as recent efforts by the Trump administration to repeal or replace certain aspects of the ACA. Since January 2017, President Trump has signed several Executive Orders and other directives designed to delay the implementation of certain provisions of the ACA or otherwise circumvent some of the requirements for health insurance mandated by the ACA. Concurrently, Congress has considered legislation that would repeal or repeal and replace all or part of the ACA. While Congress has not passed comprehensive repeal legislation, two bills affecting the implementation of certain taxes under the ACA have passed. On December 22, 2017, President Trump signed into law federal tax legislation commonly referred to as the TCJA, which includes a provision repealing, effective January 1, 2019, the tax-based shared responsibility payment imposed by the ACA on certain individuals who fail to maintain qualifying health coverage for all or part of a year that is commonly referred to as the "individual mandate". In addition, the 2020 federal spending package permanently eliminates, effective January 1, 2020, the ACA-mandated "Cadillac" tax on high-cost employer-sponsored health coverage and medical device tax and, effective January 1, 2021, also eliminates the health insurer tax. The Bipartisan Budget Act of 2018 among other things, amended the ACA, effective January 1, 2019, to close the coverage gap in most Medicare Part D drug plans. In December 2018, CMS published a new final rule permitting further collections and payments to and from certain ACA-qualified health plans and health insurance issuers under the ACA risk adjustment program in response to the outcome of federal district court litigation regarding the method CMS uses to determine this risk adjustment. On December 14, 2018, a Texas U.S. District Court Judge ruled that the ACA is unconstitutional in its entirety because the "individual mandate" was repealed by Congress as part of the TCJA. On December 18, 2019, the U.S. Court of Appeals for the 5th Circuit ruled that the individual mandate was unconstitutional and remanded the case back to the District Court to determine whether the remaining provisions of the ACA are invalid as well. On March 2, 2020, the U.S. Supreme Court granted the petitions for writs of certiorari to review the case, and oral arguments were held on November 10, 2020, although it is unclear when a decision will be made or how the Supreme Court will rule. In addition, there may be other efforts to challenge, repeal or replace the ACA. We are continuing to monitor any changes to the ACA that, in turn, may potentially impact our business in the future.

In addition, other legislative changes have been proposed and adopted in the United States since the ACA was enacted. These changes included aggregate reductions to Medicare payments to providers of 2% per fiscal year, effective April 1, 2013, which, due to subsequent legislative amendments, will stay in effect through 2030 unless additional congressional action is taken. In addition, the CARES Act suspended the 2% Medicare sequester from May 1, 2020 through December 31, 2020. In January 2013, President Obama signed into law the American Taxpayer Relief Act of 2012, which, among other things, reduced Medicare payments to several providers, and increased the statute of limitations period for the government to recover overpayments to providers from three to five years. These new laws may result in additional reductions in Medicare and other healthcare funding, which could have a material adverse effect on customers for our drugs, if approved, and accordingly, our financial operations.

Moreover, there has been heightened governmental scrutiny recently over the manner in which drug manufacturers set prices for their marketed products, which has resulted in several Congressional inquiries and proposed and enacted federal and state legislation designed to, among other things, bring more transparency

[Table of Contents](#)

to product pricing, review the relationship between pricing and manufacturer patient programs, and reform government program reimbursement methodologies for drug products. For example, at the federal level, the Trump administration released a “Blueprint” to lower drug prices and reduce out of pocket costs of drugs that contains additional proposals to increase manufacturer competition, increase the negotiating power of certain federal healthcare programs, incentivize manufacturers to lower the list price of their products and reduce the out of pocket costs of drug products paid by consumers. On March 10, 2020, the Trump administration sent “principles” for drug pricing to Congress, calling for legislation that would among other things, cap Medicare Part D beneficiary out-of-pocket pharmacy expenses, provide an option to cap Medicare Part D beneficiary monthly out-of-pocket expenses, and place limits on pharmaceutical price increases. Additionally, the Trump administration’s budget proposal for the fiscal year 2020 contains further drug price control measures that could be enacted during the budget process or in future legislation, including, for example, measures to permit

Medicare Part D plans to negotiate the price of certain drugs under Medicare Part B, to allow some states to negotiate prices under Medicaid, and to eliminate cost sharing for generic drugs for low-income patients. Although a number of these and other measures may require additional authorization to become effective, Congress and the Trump administration have each indicated that it will continue to seek new legislative and/or administrative measures to control drug costs. At the state level, legislatures have increasingly passed legislation and implemented regulations designed to control pharmaceutical and biological product pricing, including price or patient reimbursement constraints, discounts, restrictions on certain product access and marketing cost disclosure and transparency measures, and, in some cases, designed to encourage importation from other countries and bulk purchasing.

Further, on May 30, 2018, the Trickett Wendler, Frank Mongiello, Jordan McLinn, and Matthew Beilina Right to Try Act of 2017, or the Right to Try Act, was signed into law. The law, among other things, provides a federal framework for certain patients to access certain investigational new product candidates that have completed a Phase 1 clinical trial and that are undergoing investigation for FDA approval. Under certain circumstances, eligible patients can seek treatment without enrolling in clinical trials and without obtaining FDA permission under the FDA expanded access program. There is no obligation for a drug manufacturer to make its products available to eligible patients as a result of the Right to Try Act.

We expect that the ACA, as well as other healthcare reform measures that may be adopted in the future, may result in more rigorous coverage criteria and in additional downward pressure on the price that we receive for any approved product. Any reduction in reimbursement from Medicare or other government programs may result in a similar reduction in payments from private payors. The implementation of cost containment measures or other healthcare reforms may prevent us from being able to generate revenue, attain profitability or commercialize our product candidates.

At the state level, individual states are increasingly aggressive in passing legislation and implementing regulations designed to control pharmaceutical and biological product pricing, including price or patient reimbursement constraints, discounts, restrictions on certain product access and marketing cost disclosure and transparency measures, and, in some cases, designed to encourage importation from other countries and bulk purchasing. In addition, regional healthcare authorities and individual hospitals are increasingly using bidding procedures to determine what pharmaceutical products and which suppliers will be included in their prescription drug and other healthcare programs. These measures could reduce the ultimate demand for our products, once approved, or put pressure on our product pricing.

We expect that additional state and federal healthcare reform measures will be adopted in the future, any of which could limit the amounts that federal and state governments will pay for healthcare products and services, which could result in reduced demand for our current product candidates and any future product candidates or additional pricing pressures. It is possible that additional governmental action is taken to address the COVID-19

pandemic. For example, on April 18, 2020, CMS announced that QHP issuers under the ACA may suspend activities related to the collection and reporting of quality data that would have otherwise been reported between May and June 2020 given the challenges healthcare providers are facing responding to the COVID-19 virus.

Legislative and regulatory proposals have been made to expand post-approval requirements and restrict sales and promotional activities for biotechnology products. We cannot be sure whether additional legislative changes will be enacted, or whether FDA regulations, guidance or interpretations will be changed, or what the impact of such changes on the marketing approvals of our product candidates, if any, may be. In addition, increased scrutiny by Congress of the FDA's approval process may significantly delay or prevent marketing approval, as well as subject us to more stringent product labeling and post-marketing testing and other requirements.

Our relationships with healthcare professionals, clinical investigators, CROs and third-party payors in connection with our current and future business activities may be subject to federal and state healthcare fraud and abuse laws, false claims laws, transparency laws, government price reporting and health information privacy and security laws, which could expose us to significant losses, including, among other things, criminal sanctions, civil penalties, contractual damages, exclusion from governmental healthcare programs, reputational harm, administrative burdens and diminished profits and future earnings.

Healthcare providers, physicians and third-party payors will play a primary role in the recommendation and prescription of any product candidates for which we obtain marketing approval. Our current and future arrangements with healthcare professionals, clinical investigators, CROs, third-party payors and customers may expose us to broadly applicable fraud and abuse and other healthcare laws and regulations that may constrain the business or financial arrangements and relationships through which we market, sell and distribute our product candidates for which we obtain marketing approval. Restrictions under applicable federal and state healthcare laws and regulations, include the following:

- the U.S. federal Anti-Kickback Statute, which prohibits, among other things, persons and entities from knowingly and willfully soliciting, offering, receiving or providing remuneration, directly or indirectly, in cash or in kind to induce or reward, or in return for, either the referral of an individual for, or the purchase, order or recommendation of, any good or service, for which payment may be made under federal and state healthcare programs, such as Medicare and Medicaid. A person or entity does not need to have actual knowledge of the statute or specific intent to violate it in order to have committed a violation;
- the U.S. federal false claims and civil monetary penalties laws, including the U.S. federal False Claims Act, which imposes criminal and civil penalties, including through civil whistleblower or qui tam actions, against individuals or entities for knowingly presenting, or causing to be presented, to the federal government, claims for payment that are false or fraudulent or making a false statement to avoid, decrease or conceal an obligation to pay money to the federal government. In addition, the government may assert that a claim including items and services resulting from a violation of the federal Anti-Kickback Statute constitutes a false or fraudulent claim for purposes of the False Claims Act;
- the U.S. federal Health Insurance Portability and Accountability Act of 1996, or HIPAA, which imposes criminal and civil liability for, among other things, knowingly and willfully executing, or attempting to execute, a scheme to defraud any healthcare benefit program, or knowingly and willfully falsifying, concealing or covering up a material fact or making any materially false statement in connection with the delivery of or payment for healthcare benefits, items or services; similar to the federal Anti-Kickback Statute, a person or entity does not need to have actual knowledge of the statute or specific intent to violate it in order to have committed a violation;

[Table of Contents](#)

- HIPAA, as amended by the Health Information Technology for Economic and Clinical Health Act of 2009 and its implementing regulations, or HITECH, which imposes obligations on certain covered entity healthcare providers, health plans, and healthcare clearinghouses as well as their business associates that perform certain services involving the use or disclosure of individually identifiable health information, including mandatory contractual terms, with respect to safeguarding the privacy, security, and transmission of individually identifiable health information, and require notification to affected individuals and regulatory authorities of certain breaches of security of individually identifiable health information;
- federal and state consumer protection and unfair competition laws, which broadly regulate marketplace activities and activities that potentially harm customers;
- the U.S. Physician Payments Sunshine Act created under the ACA, and its implementing regulations, which require that certain manufacturers of drugs, devices, medical supplies and therapeutic biologics that are reimbursable under Medicare, Medicaid, and Children's Health Insurance Programs report annually to the Department of Health and Human Services information related to certain payments and other transfers of value to physicians, as defined by such law, and teaching hospitals, as well as ownership and investment interests held by the physicians described above and their immediate family members. Effective January 1, 2022, the U.S. federal physician transparency reporting requirements will extend to include transfers of value made during the previous year to certain non-physician providers such as physician assistants and nurse practitioners; and
- analogous state laws and regulations, such as state anti-kickback and false claims laws that may apply to sales or marketing arrangements and claims involving healthcare items or services reimbursed by non-governmental third-party payors, including private insurers; some state laws require that pharmaceutical companies to comply with the pharmaceutical industry's voluntary compliance guidelines and the relevant compliance guidance promulgated by the federal government in addition to requiring drug and therapeutic biologics manufacturers to report information related to payments to physicians and other healthcare providers or marketing expenditures, and state laws governing the privacy and security of health information in certain circumstances, many of which differ from each other in significant ways and often are not preempted by HIPAA, thus complicating compliance efforts.

State and foreign laws also govern the privacy and security of health information in some circumstances, many of which differ from each other in significant ways and often are not preempted by HIPAA, thus complicating compliance efforts. For instance, the collection and use of health data in the European Union is governed by the General Data Protection Regulation, or the GDPR, which extends the geographical scope of European Union data protection law to non-European Union entities under certain conditions, tightens existing European Union data protection principles and creates new obligations for companies and new rights for individuals. Failure to comply with the GDPR may result in substantial fines and other administrative penalties. The GDPR may increase our responsibility and liability in relation to personal data that we process and we may be required to put in place additional mechanisms ensuring compliance with the GDPR. Moreover, the United Kingdom leaving the European Union could also lead to further legislative and regulatory changes. It remains unclear how the United Kingdom data protection laws or regulations will develop in the medium to longer term and how data transfer to the United Kingdom from the European Union will be regulated, especially following the United Kingdom's departure from the European Union on January 31, 2020 without a deal. However, the United Kingdom has transposed the GDPR into domestic law with the Data Protection Act 2018, which remains in force following the United Kingdom's departure from the European Union. In addition, on June 28, 2018, the State of California enacted the California Consumer Privacy Act, or CCPA, which went into effect on January 1, 2020. The CCPA creates individual privacy rights for California consumers and increases the privacy and security obligations of entities handling certain personal information. The CCPA provides for civil penalties for violations, as well as a private right of action for data breaches that is expected to increase data breach

litigation. The CCPA may increase our compliance costs and potential liability, and similar laws have been proposed at the federal level and in other states.

Ensuring that our internal operations and future business arrangements with third parties comply with applicable healthcare laws and regulations will involve substantial costs. If our operations are found to be in violation of any of the laws described above or any other governmental laws and regulations that may apply to us, we may be subject to significant penalties, including civil, criminal and administrative penalties, damages, fines, exclusion from participation in government-funded healthcare programs such as Medicare and Medicaid or similar programs in other countries or jurisdictions, disgorgement, imprisonment, reputational harm and diminished profits. Defending against any such actions can be costly, time-consuming and may require significant financial and personnel resources. Therefore, even if we are successful in defending against any such actions that may be brought against us, our business may be impaired.

If we fail to comply with U.S. and foreign regulatory requirements, regulatory authorities could limit or withdraw any marketing or commercialization approvals we may receive and subject us to other penalties that could materially harm our business.

Even if we receive marketing and commercialization approval of a product candidate, we will be subject to continuing regulatory requirements, including in relation to adverse patient experiences with the product and clinical results that are reported after a product is made commercially available, both in the United States and any foreign jurisdiction in which we seek regulatory approval. The FDA has significant post-market authority, including the authority to require labeling changes based on new safety information and to require post-market studies or clinical trials to evaluate safety risks related to the use of a product or to require withdrawal of the product from the market. The FDA also has the authority to require a REMS plan after approval, which may impose further requirements or restrictions on the distribution or use of an approved drug or therapeutic biologic. The manufacturer and manufacturing facilities we use to make a future product, if any, will also be subject to periodic review and inspection by the FDA and other regulatory agencies, including for continued compliance with cGMP requirements. The discovery of any new or previously unknown problems with our third-party manufacturers, manufacturing processes or facilities may result in restrictions on the product, manufacturer or facility, including withdrawal of the product from the market. We rely, and expect we will continue to rely, on third-party manufacturers, and we will not have control over compliance with applicable rules and regulations by such manufacturers. Any product promotion and advertising will also be subject to regulatory requirements and continuing regulatory review. If we or our existing or future collaborators, manufacturers or service providers fail to comply with applicable continuing regulatory requirements in the United States or foreign jurisdictions in which we seek to market our products, we or they may be subject to, among other things, fines, warning or untitled letters, holds on clinical trials, delay of approval or refusal by the FDA to approve pending applications or supplements to approved applications, suspension or withdrawal of regulatory approval, product recalls and seizures, administrative detention of products, refusal to permit the import or export of products, operating restrictions, injunctions, civil penalties and criminal prosecution.

Our research and development activities could be affected or delayed as a result of possible restrictions on animal testing.

Certain laws and regulations require us to test our product candidates on animals before initiating clinical trials involving humans. Animal testing activities have been the subject of controversy and adverse publicity. Animal rights groups and other organizations and individuals have attempted to stop animal testing activities by pressing for legislation and regulation in these areas and by disrupting these activities through protests and other means. To the extent the activities of these groups are successful, our research and development activities may be interrupted, delayed or become more expensive.

We are subject to U.S. and certain foreign export and import controls, sanctions, embargoes, anti-corruption laws and anti-money laundering laws and regulations. Compliance with these legal standards could impair our ability to compete in domestic and international markets. We can face criminal liability and other serious consequences for violations, which can harm our business.

We are subject to export control and import laws and regulations, including the U.S. Export Administration Regulations, U.S. Customs regulations, various economic and trade sanctions regulations administered by the U.S. Treasury Department's Office of Foreign Assets Controls, the U.S. Foreign Corrupt Practices Act of 1977, as amended, or FCPA, the U.S. domestic bribery statute contained in 18 U.S.C. § 201, the U.S. Travel Act, the USA PATRIOT Act and other state and national anti-bribery and anti-money laundering laws in the countries in which we conduct activities. Anti-corruption laws are interpreted broadly and prohibit companies and their employees, agents, contractors and other collaborators from authorizing, promising, offering or providing, directly or indirectly, improper payments or anything else of value to recipients in the public or private sector. We may engage third parties to sell our products outside the United States, to conduct clinical trials and/or to obtain necessary permits, licenses, patent registrations and other regulatory approvals. We have direct or indirect interactions with officials and employees of government agencies or government-affiliated hospitals, universities and other organizations. We can be held liable for the corrupt or other illegal activities of our employees, agents, contractors and other collaborators, even if we do not explicitly authorize or have actual knowledge of such activities. Any violations of the laws and regulations described above may result in substantial civil and criminal fines and penalties, imprisonment, the loss of export or import privileges, debarment, tax reassessments, breach of contract and fraud litigation, reputational harm and other consequences.

We and our third-party contractors must comply with environmental, health and safety laws and regulations. A failure to comply with these laws and regulations could expose us to significant costs or liabilities.

We and our third-party contractors are subject to numerous environmental, health and safety laws and regulations, including those governing laboratory procedures and the use, generation, manufacture, distribution, storage, handling, treatment, remediation and disposal of hazardous materials and wastes. Hazardous chemicals, including flammable and biological materials, are involved in certain aspects of our business, and we cannot eliminate the risk of injury or contamination from the use, generation, manufacture, distribution, storage, handling, treatment or disposal of hazardous materials and wastes. In the event of contamination or injury, or failure to comply with environmental, health and safety laws and regulations, we could be held liable for any resulting damages, fines and penalties associated with such liability which could exceed our assets and resources.

Although we maintain workers' compensation insurance to cover us for costs and expenses we may incur due to injuries to our employees resulting from the use of biological or hazardous materials or wastes arising out of and in the course of employment, this insurance may not provide adequate coverage against potential liabilities. We do not maintain insurance for environmental liability that may be asserted against us in connection with our storage or disposal of biological, hazardous or radioactive materials.

Environmental, health and safety laws and regulations are becoming increasingly more stringent. We may incur substantial costs in order to comply with current or future environmental, health and safety laws and regulations. These current or future laws and regulations may impair our research, development or production efforts. Our failure to comply with these laws and regulations also may result in substantial fines, penalties or other sanctions.

Risks related to employee matters, managing our growth and other risks related to our business

If we fail to attract and retain qualified senior management and key scientific personnel, our business may be materially and adversely affected.

Our success depends in part on our continued ability to attract, retain and motivate highly qualified management and clinical and scientific personnel. We are highly dependent upon members of our senior management, including Jay M. Short, Ph.D., our Chairman and Chief Executive Officer, Scott Smith, our President, and Carolyn Anderson Short, our Chief of Intellectual Property and Strategy and Assistant Secretary, as well as our senior scientists and other members of our senior management team. The loss of services of any of these individuals could delay or prevent the successful development of our product pipeline, the initiation and completion of our planned clinical trials or the commercialization of product candidates or any future product candidates.

Competition for qualified personnel in the pharmaceutical, biopharmaceutical and biotechnology field is intense due to the limited number of individuals who possess the skills and experience required by our industry. We will need to hire additional personnel as we expand our clinical development and if we initiate commercial activities. We may not be able to attract and retain quality personnel on acceptable terms, or at all. In addition, to the extent we hire personnel from competitors, we may be subject to allegations that they have been improperly solicited or that they have divulged proprietary or other confidential information, or that their former employers own their research output.

We currently have no sales organization. If we are unable to establish sales, marketing and distribution capabilities on our own or through third parties, we may not be able to market and sell our product candidates, if approved, effectively in the United States and foreign jurisdictions or generate product revenue.

We currently do not have a marketing or sales organization. In order to commercialize our product candidates in the United States and foreign jurisdictions on our own, we must build our marketing, sales, distribution, managerial and other non-technical capabilities or make arrangements with third parties to perform these services, and we may not be successful in doing so. If any of our product candidates receives regulatory approval, we will need to develop internal sales, marketing and distribution capabilities to commercialize such products, which would be expensive and time-consuming, or make arrangements with third parties to perform these services. If we decide to market our products directly, we will need to commit significant financial and managerial resources to develop a marketing and sales force with technical expertise and supporting distribution, administration and compliance capabilities. If we rely on third parties with such capabilities to market our products or decide to co-promote products with existing or future collaborators, we will need to establish and maintain marketing and distribution arrangements with third parties, and we cannot assure you that we will be able to enter into such arrangements on acceptable terms, or at all. In entering into third-party marketing or distribution arrangements, any revenue we receive will depend upon the efforts of the third parties, and we cannot assure you that such third parties will establish adequate sales and distribution capabilities or be successful in gaining market acceptance of any approved product. If we are not successful in commercializing any product approved in the future, either on our own or through arrangements with one or more third parties, we may not be able to generate any future product revenue and we would incur significant additional losses.

In order to successfully implement our plans and strategies, we will need to grow the size of our organization, and we may experience difficulties in managing this growth.

As of November 1, 2020, we had 35 employees, and 18 dedicated independent contractors based in China and engaged through our agreement with BioDuro, a provider of preclinical development services. In order to successfully implement our development and commercialization plans and strategies, and as we transition into operating as a public company, we expect to need additional development, managerial, operational, financial, sales, marketing and other personnel. Future growth would impose significant added responsibilities on members of management, including:

- identifying, recruiting, integrating, maintaining and motivating additional employees;
- managing our internal development efforts effectively, including the clinical and regulatory review process for BA3011 and BA3021 and any other product candidates, while complying with our contractual obligations to contractors and other third parties; and
- improving our operational, financial and management controls, reporting systems and procedures.

Our future financial performance and our ability to successfully develop and, if approved, commercialize BA3011, BA3021 and any future product candidates will depend, in part, on our ability to effectively manage any future growth, and our management may also have to divert a disproportionate amount of its attention away from day-to-day activities in order to devote a substantial amount of time to managing these growth activities.

To date, we have used the services of outside vendors to perform tasks, including preclinical and clinical trial management, manufacturing, statistics and analysis and research and development functions. Our growth strategy may also entail expanding our group of contractors or consultants to implement these tasks going forward. Because we rely on numerous consultants, effectively outsourcing many key functions of our business, we will need to be able to effectively manage these consultants to ensure that they successfully carry out their contractual obligations and meet expected deadlines. However, if we are unable to effectively manage our outsourced activities or if the quality or accuracy of the services provided by consultants is compromised for any reason, our clinical trials may be extended, delayed or terminated, and we may not be able to obtain regulatory approval for BA3011, BA3021 and any future product candidates or otherwise advance our business. We may not be able to manage our existing outside contractors or find other competent outside contractors and consultants on economically reasonable terms, or at all. If we are not able to effectively expand our organization by hiring new employees and expanding our groups of consultants and contractors, we may not be able to successfully implement the tasks necessary to further develop and commercialize BA3011, BA3021 and any future product candidates and, accordingly, may not achieve our research, development and commercialization goals.

Our internal computer systems, or those of any of our CROs, manufacturers, other contractors, consultants, existing or future collaborators, may fail or suffer security or data privacy breaches or other unauthorized or improper access to, use of or destruction of our proprietary and confidential data, employee data or personal data, which could result in additional costs, significant liabilities, harm to our reputation and material disruption of our operations.

Despite the implementation of security measures, our internal computer systems and those of our current and any future CROs, manufacturers, other contractors, consultants, existing or future collaborators and other third-party service providers are vulnerable to damage from various methods, including cybersecurity attacks, breaches, intentional or accidental mistakes or errors, or other technological failures, which can include, among other things, computer viruses, unauthorized access attempts, including third parties gaining access to systems

using stolen or inferred credentials, denial-of-service attacks, phishing attempts, service disruptions, natural disasters, fire, terrorism, war and telecommunication and electrical failures. As the cyber-threat landscape evolves, these attacks are growing in frequency, sophistication and intensity, and are becoming increasingly difficult to detect. If such an event were to occur and cause interruptions in our operations or result in the unauthorized acquisition of or access to personally identifiable information or individually identifiable health information (violating certain privacy laws such as HIPAA, HITECH, the CCPA and GDPR), it could result in a material disruption of our product candidate development programs and our business operations and we could incur significant liabilities. Some of the federal, state and foreign government requirements include obligations of companies to notify individuals of security breaches involving particular personally identifiable information, which could result from breaches experienced by us or by our vendors, contractors or organizations with which we have formed strategic relationships. Notifications and follow-up actions related to a security breach could impact our reputation and cause us to incur significant costs, including legal expenses and remediation costs. For example, the loss of clinical trial data from completed, ongoing or future clinical trials involving our product candidates could result in delays in our regulatory approval efforts and significantly increase our costs to recover or reproduce the lost data. In addition, because of our approach of running multiple clinical trials in parallel, any breach of our computer systems may result in a loss of data or compromised data integrity across many of our programs in various stages of development.

We also rely on third parties to manufacture our product candidates, and similar events relating to their computer systems could also have a material adverse effect on our business. To the extent that any disruption or security breach were to result in a loss of, or damage to, our data, or inappropriate disclosure of confidential or proprietary information, we could be exposed to litigation and governmental investigations, the further development and commercialization of our product candidates could be delayed and we could be subject to significant fines or penalties for any noncompliance with certain state, federal or international privacy and security laws.

Our insurance policies may not be adequate to compensate us for the potential losses arising from any such disruption, failure or security breach. In addition, such insurance may not be available to us in the future on economically reasonable terms, or at all. Further, our insurance may not cover all claims made against us and could have high deductibles in any event, and defending a suit, regardless of its merit, could be costly and divert management attention.

A portion of our research and development activities take place in China. Uncertainties regarding the interpretation and enforcement of Chinese laws, rules and regulations, a trade war or political unrest in China could materially adversely affect our business, financial condition and results of operations.

We conduct preclinical research and development activities in China through BioDuro, which is U.S. owned, but governed by Chinese laws, rules and regulations and have a collaboration with BeiGene, a company headquartered in China. The Chinese legal system is a civil law system based on written statutes. Unlike the common law system, prior court decisions may be cited for reference but have limited precedential value. In addition, the Chinese legal system is based in part on government policies and internal rules, some of which are not published on a timely basis or at all, and which may have a retroactive effect. As a result, we may not be aware of our violation of these policies and rules until after the occurrence of the violation. Any administrative and court proceedings in China may be protracted, resulting in substantial costs and diversion of resources and management attention. Since Chinese administrative and court authorities have significant discretion in interpreting and implementing statutory and contractual terms, it may be more difficult to evaluate the outcome of administrative and court proceedings and the level of legal protection we enjoy than in more developed legal systems.

Furthermore, we are exposed to the possibility of disruption of our research and development activities in the event of changes in the policies of the United States or Chinese governments, political unrest or unstable economic conditions in China. For example, a trade war could lead to increased costs for clinical materials that are manufactured in China. These interruptions or failures could also impede commercialization of our product candidates and impair our competitive position. Further, we may be exposed to fluctuations in the value of the local currency in China. Future appreciation of the local currency could increase our costs. These uncertainties may impede our ability to enforce the contracts we have entered into and our ability to continue our research and development activities and could materially and adversely affect our business, financial condition and results of operations.

Our current operations are concentrated in two locations. We or the third parties upon whom we depend may be adversely affected by earthquakes, wildfires or other natural disasters, and our business continuity and disaster recovery plans may not adequately protect us from a serious disaster.

A portion of our current operations are located in our facilities in San Diego, California, and we conduct a portion of our research and development activities in China through our arrangement with BioDuro. Any unplanned event, such as flood, fire, explosion, earthquake, extreme weather condition, medical epidemics or pandemics, power shortage, telecommunication failure or other natural or manmade accidents or incidents that result in us being unable to fully utilize our facilities, or the manufacturing facilities of our third-party contract manufacturers, may have a material and adverse effect on our ability to operate our business, particularly on a daily basis, and have significant negative consequences on our financial and operating conditions. Loss of access to these facilities may result in increased costs, delays in the development of our product candidates or interruption of our business operations. Earthquakes, wildfires or other natural disasters could further disrupt our operations, and have a material and adverse effect on our business, financial condition, results of operations and prospects. If a natural disaster, power outage or other event prevented us from using all or a significant portion of our headquarters, damaged critical infrastructure, such as our research facilities or the manufacturing facilities of our third-party contract manufacturers, or otherwise disrupted operations, it may be difficult or, in certain cases, impossible, for us to continue our business for a substantial period of time. The disaster recovery and business continuity plans we have in place may prove inadequate in the event of a serious disaster or similar event. We may incur substantial expenses as a result of the limited nature of our disaster recovery and business continuity plans, which could have a material adverse effect on our business. As part of our risk management policy, we maintain insurance coverage at levels that we believe are appropriate for our business. However, in the event of an accident or incident at these facilities, we cannot assure you that the amounts of insurance will be sufficient to satisfy any damages and losses. If our facilities, or the manufacturing facilities of our third-party contract manufacturers, are unable to operate because of an accident or incident or for any other reason, even for a short period of time, any or all of our research and development programs may be harmed. Any business interruption may have a material and adverse effect on our business, financial condition, results of operations and prospects. In addition, all of our therapeutic antibodies are manufactured by starting with cells which are stored in a one master cell bank for each antibody manufactured stored in multiple locations. While we believe we will have adequate backup should any cell bank be lost in a catastrophic event, and we take precautions when transporting our cell banks, it is possible that we could lose multiple cell banks and have our manufacturing severely impacted by the need to replace the cell banks.

Our business is subject to economic, political, regulatory and other risks associated with conducting business internationally.

We may seek regulatory approval of our product candidates outside of the United States including the European Union, Australia, New Zealand, and Japan. We conduct preclinical research and development activities in China

[Table of Contents](#)

through BioDuro, which is U.S. owned, but governed by Chinese laws, and have a collaboration with BeiGene, a company headquartered in China. Accordingly, we expect that we will be subject to additional risks related to operating in foreign countries if we obtain the necessary approvals, including:

- differing regulatory requirements and reimbursement regimes in foreign countries;
- unexpected changes in tariffs, trade barriers, price and exchange controls and other regulatory requirements;
- economic weakness, including inflation, or political instability in particular foreign economies and markets;
- compliance with tax, employment, immigration and labor laws for employees living or traveling abroad;
- foreign taxes, including withholding of payroll taxes;
- foreign currency fluctuations, which could result in increased operating expenses and reduced revenue, and other obligations incident to doing business in another country;
- difficulties staffing and managing foreign operations;
- workforce uncertainty in countries where labor unrest is more common than in the United States;
- potential liability under the FCPA or comparable foreign regulations;
- challenges enforcing our contractual and intellectual property rights, especially in those foreign countries that do not respect and protect intellectual property rights to the same extent as the United States;
- production shortages resulting from any events affecting raw material supply or manufacturing capabilities abroad; and
- business interruptions resulting from geo-political actions, including war and terrorism.

These and other risks associated with our international operations may materially adversely affect our ability to attain or maintain profitable operations.

We face risks related to health epidemics and outbreaks, including the COVID-19 pandemic, which could significantly disrupt our preclinical studies and clinical trials, and therefore our receipt of necessary regulatory approvals could be delayed or prevented.

We face risks related to health epidemics or outbreaks of communicable diseases. For example, in December 2019, a novel strain of coronavirus, SARS-CoV-2, causing a disease referred to as COVID-19, emerged in China. Since then, COVID-19 has spread to multiple countries worldwide, including the United States and member states of the European Union. On March 11, 2020, the World Health Organization declared the outbreak of COVID-19 as a pandemic. The outbreak of such communicable diseases could result in a widespread health crisis that could adversely affect general commercial activity and the economies and financial markets of many countries, which in the case of COVID-19 has occurred. The COVID-19 pandemic has resulted in governments implementing numerous containment measures, such as travel bans and restrictions, particularly quarantines, shelter-in-place or total lock-down orders and business limitations and shutdowns. For example, our primary operations are located in San Diego, California, and San Diego County and the State of California issued shelter-in-place orders in response to the COVID-19 pandemic. These containment measures are subject to change and the respective government authorities may tighten the restrictions at any time.

We are following, and plan to continue to follow, recommendations from federal, state and local governments regarding workplace policies, practices and procedures. In March 2020, we implemented a remote working

policy for many of our employees, began restricting non-essential travel and temporarily reduced salaries of our employees. We are complying with all applicable guidelines for our clinical trials, including remote clinical monitoring. In April 2020, we borrowed \$0.7 million under the Paycheck Protection Program under the Coronavirus Aid, Relief and Economic Security, or CARES Act, as discussed further under “—Liquidity and capital resources.” We are continuing to monitor the potential impact of the pandemic, but we cannot be certain what the overall impact will be on our business, financial condition, results of operations and prospects.

In addition, the COVID-19 pandemic is having a severe effect on the clinical trials of many drug candidates. Some trials have been merely delayed, while others have been cancelled. The extent to which the COVID-19 pandemic may impact our preclinical and clinical trial operations will depend on future developments, which are highly uncertain and cannot be predicted with confidence, such as the duration and geographic reach of the outbreak, the severity of COVID-19, and the effectiveness of actions to contain and treat COVID-19. To date, we have not experienced material business disruptions, including with respect to any of the clinical trials we are conducting, or impairments of any of our assets as a result of the pandemic, the continued spread of COVID-19 globally could adversely impact our clinical trial operations, including our ability to recruit and retain patients and principal investigators and site staff who, as healthcare providers, may have heightened exposure to COVID-19 if an outbreak occurs in their geography. Disruptions or restrictions on our ability to travel to monitor data from our clinical trials, or to conduct clinical trials, or the ability of patients enrolled in our studies to travel, or the ability of staff at study sites to travel, as well as temporary closures of our facilities or the facilities of our clinical trial partners and their contract manufacturers, would negatively impact our clinical trial activities. In addition, we rely on independent clinical investigators, CROs and other third-party service providers to assist us in managing, monitoring and otherwise carrying out our preclinical studies and clinical trials, including the collection of data from our clinical trials, and the outbreak may affect their ability to devote sufficient time and resources to our programs or to travel to sites to perform work for us. Similarly, our preclinical trials could be delayed and/or disrupted by the COVID-19 pandemic. As a result, the expected timeline for data readouts of our preclinical studies and clinical trials and certain regulatory filings may be negatively impacted, which would adversely affect our ability to obtain regulatory approval for and to commercialize our product candidates, increase our operating expenses and have a material adverse effect on our business, financial condition, results of operations and prospects.

Risks related to our dependence on third parties

We have entered, and may in the future seek to enter, into collaborations with third parties for the development and commercialization of certain of our product candidates. If we fail to enter into such collaborations, or such collaborations are not successful, we may not be able to capitalize on the market potential of our patented technology platform and resulting product candidates.

We have entered into a Global Co-Development and Collaboration Agreement with BeiGene for the development, manufacturing and commercialization of BA3071. Under the terms of our BeiGene collaboration, BeiGene is generally responsible for developing BA3071 and is responsible for global regulatory filings and commercialization. Subject to the terms of the agreement, BeiGene holds an exclusive license with us to develop and manufacture the product candidate globally. BeiGene is responsible for all costs of development, manufacturing and commercialization globally. In addition, we may in the future seek third-party collaborators or joint venture partners for development and commercialization of additional CAB product candidates. With respect to our BeiGene collaboration, and what we expect will be the case with any future license or collaboration agreements, we have, and would expect to have, limited control over the amount and timing of resources that our existing or future collaborators dedicate to the development or commercialization of our product candidates. Our ability to generate revenues from these arrangements will depend on our existing or future collaborators' willingness to select additional product candidates to license and their abilities and

[Table of Contents](#)

willingness to fulfill their payment obligations and successfully perform the functions assigned to them in these arrangements.

Our existing collaboration arrangement with BeiGene currently poses, and future collaborations involving our product candidates will pose, the following risks to us:

- collaborators have significant discretion in determining the efforts and resources that they will apply to these collaborations;
- collaborators may not pursue development and commercialization of our product candidates or may elect not to continue or renew development or commercialization programs based on preclinical or clinical trial results, changes in the collaborators' strategic focus due to their acquisition of competitive products or their internal development of competitive products, available funding or other external factors, such as a business combination that diverts resources or creates competing priorities;
- collaborators may delay clinical trials, provide insufficient funding for a clinical trial program, stop a clinical trial or abandon a product candidate, repeat or conduct new clinical trials or require a new formulation of a product candidate for clinical testing;
- collaborators and other alliances could independently develop, or develop with third parties, products that compete directly or indirectly with our product candidate, particularly if the collaborators believe that competitive products are more likely to be successfully developed or can be commercialized under terms that are more economically attractive than ours;
- collaborators with marketing, manufacturing and distribution rights to one or more products may not commit sufficient resources to or otherwise not perform satisfactorily in carrying out these activities;
- we could grant exclusive rights to our collaborators that would prevent us from collaborating with others;
- collaborators may not properly maintain or defend our intellectual property rights or may use our intellectual property or proprietary information in a way that gives rise to actual or threatened litigation that could jeopardize or invalidate our intellectual property or proprietary information or expose us to potential liability;
- collaborators may infringe the intellectual property rights of third parties, which may expose us to litigation and potential liability;
- disputes may arise between the collaborators and us that result in the delay or termination of the research, development or commercialization of our product candidate or that result in costly litigation or arbitration that diverts management attention and resources;
- disputes may arise with respect to the ownership of any intellectual property developed pursuant to our collaborations;
- collaborators may not provide us with timely and accurate information regarding development, regulatory or commercialization status or results, which could adversely impact our ability to manage our own development efforts, accurately forecast financial results or provide timely information to our stockholders regarding our out-licensed product candidates;
- collaborations may be terminated and, if terminated, this may result in a need for additional capital to pursue further development or commercialization of the applicable current or future product candidates; and
- collaborators' sales and marketing activities or other operations may not be in compliance with applicable laws resulting in civil or criminal proceedings.

[Table of Contents](#)

Collaboration agreements may not lead to development or commercialization of our product candidates in the most efficient manner or at all. If a collaborator of ours were to be involved in a business combination, the continued pursuit and emphasis on our product development or commercialization program could be delayed, diminished or terminated.

If our existing or future collaborators cease development efforts under our existing or future collaboration agreements, or if any of those agreements are terminated, we may lose committed funding under those agreements and these collaborations may fail to lead to commercial products and the reputation of our patented CAB technology platform may suffer.

Revenue from research and development collaborations depend upon continuation of the collaborations, initiation and expansion of the number of programs subject to the collaborations, the achievement of milestones and royalties, if any, derived from future products developed from our research. If we are unable to successfully advance the development of our product candidates or achieve milestones, revenue and cash resources from milestone payments under our existing or future collaboration agreements will be substantially less than expected.

Our ability to advance our product candidates may be limited by third parties on which we rely for certain technologies which we use in certain of our programs. If any third party developing our product candidates or other candidates based on our patented CAB technology platform experiences a delay or failure in development, regulatory approval or commercialization, even if such failure is not due to our CAB technology, it could reflect negatively on us, our other product candidates and our patented CAB technology platform. In addition, if BeiGene or one of our future collaborators terminates its agreement with us, we may find it more difficult to attract new collaborators and our perception in the business and financial communities and our stock price could be adversely affected.

We may not be successful in establishing commercialization collaborations, which could adversely affect our ability to commercialize our product candidates, if approved.

From time to time, we may evaluate and, if strategically attractive, seek to enter into additional collaborations, including with major biotechnology or biopharmaceutical companies. The competition for collaborators is intense, and the negotiation process is time-consuming and complex. Any new collaboration may be on terms that are not optimal for us, and we may not be able to maintain any new collaboration if, for example, development or approval of a product candidate is delayed, sales of an approved product candidate do not meet expectations or the collaborator terminates the collaboration. Moreover, such arrangements are complex and time-consuming to negotiate, document and implement and they may require substantial resources to maintain.

In addition, it is possible that a collaborator may not devote sufficient resources to the commercialization of our product candidates or may otherwise fail in its commercialization efforts, in which event the commercialization of such product candidates could be delayed or terminated and our business could be substantially harmed. In addition, the terms of any collaboration or other arrangement that we establish may not be favorable to us or may not be perceived as favorable, which may negatively impact our business, financial condition, results of operations and prospects.

If third parties on which we rely to conduct our preclinical and clinical trials, do not perform as contractually required, fail to satisfy regulatory or legal requirements or miss expected deadlines, our development programs could be delayed with material and adverse effects on our business, financial condition, results of operations and prospects.

We rely, and expect we will continue to rely, on third-party investigators, CROs, data management organizations and consultants to conduct, supervise and monitor our ongoing clinical trials and preclinical studies. We currently rely on third parties to manage and conduct our clinical trials of BA3011 and BA3021. Because we rely on these third parties and do not have the ability to conduct preclinical studies or clinical trials independently, we will have less control over the timing, quality and other aspects of preclinical studies and clinical trials than we would have had we conducted them on our own. These investigators, CROs and consultants will not be our employees and we will have limited control over the amount of time and resources that they dedicate to our development programs. These third parties may have contractual relationships with other entities, some of which may be our competitors, which may draw time and resources from our development programs. The third parties with whom we may contract might not be diligent, careful or timely in conducting our preclinical studies or clinical trials, resulting in the preclinical studies or clinical trials being delayed or unsuccessful.

If we cannot contract with acceptable third parties on commercially reasonable terms, or at all, or if these third parties do not carry out their contractual duties, satisfy legal and regulatory requirements for the conduct of preclinical studies or clinical trials or meet expected deadlines, our development programs could be delayed and otherwise adversely affected. In all events, we will be responsible for ensuring that each of our preclinical studies and clinical trials are conducted in accordance with the general investigational plan, protocols for the trial and regulatory requirements. The FDA requires preclinical studies to be conducted in accordance with Good Laboratory Practices, or GLPs, and clinical trials to be conducted in accordance with GCPs, including for designing, conducting, recording and reporting the results of preclinical studies and clinical trials to assure that data and reported results are credible and accurate and that the rights, integrity and confidentiality of clinical trial participants are protected. Our reliance on third parties that we do not control will not relieve us of these responsibilities and requirements. Any adverse development or delay in our preclinical studies and clinical trials could have a material and adverse effect on our business, financial condition, results of operations and prospects.

We rely on third parties for the manufacture of our product candidates for preclinical studies and our ongoing clinical trials, and we expect to continue to do so for additional clinical trials and ultimately commercialization. This reliance on third parties increases the risk that we will not have sufficient quantities of our product candidates or products, if approved, or such quantities at an acceptable cost, which could delay, prevent or impair our development or commercialization efforts.

We rely, and expect we will continue to rely, on third-party contract manufacturers to manufacture our preclinical and clinical trial product supplies and the raw materials used to create our product candidates. We do not own manufacturing facilities for producing such supplies, and we do not have long-term manufacturing agreements. Furthermore, the raw materials for our product candidates may be sourced, in some cases, from a single-source supplier. If we were to experience an unexpected loss of supply of any of our product candidates or any of our future product candidates for any reason, whether as a result of manufacturing, supply or storage issues or otherwise, we could experience delays, disruptions, suspensions or terminations of, or be required to restart or repeat, any pending or ongoing clinical trials. For example, the extent to which the COVID-19 pandemic impacts our ability to procure sufficient supplies for the development of our product candidates will depend on the severity and duration of the spread of the virus, and the actions undertaken to contain COVID-19 or treat its effects. We cannot assure you that our preclinical and clinical development product supplies or raw materials will not be limited, interrupted, or be of satisfactory quality or continue to be available at acceptable

[Table of Contents](#)

prices. In particular, any replacement of a manufacturer could require significant effort and expertise because there are a limited number of qualified replacements. The technical skills or technology required to manufacture our product candidates may be unique or proprietary to the original manufacturer and we may have difficulty transferring such skills or technology to another third party and a feasible alternative may not exist. These factors would increase our reliance on such manufacturer or require us to obtain a license from such manufacturer in order to have another third-party manufacture our product candidates.

If we submit an application for regulatory approval of any of our product candidates, the facilities used by our contract manufacturers to manufacture our product candidates will be subject to inspection by the FDA or other regulatory authorities. If our contract manufacturers cannot successfully manufacture material that conforms to our specifications and the strict regulatory requirements of the FDA or others or if they are unable to maintain a compliance status acceptable to the FDA or other regulatory authorities, approval of our product candidates may be delayed or we may need to find alternative manufacturing facilities, which would significantly impact our ability to develop, obtain regulatory approval for or market our product candidates, if approved.

We expect to continue to rely on third-party manufacturers if we receive regulatory approval for any product candidate. If we are unable to obtain or maintain third-party manufacturing for product candidates, or to do so on commercially reasonable terms, we may not be able to develop and commercialize our product candidates successfully. Even if we are able to establish agreements with third-party manufacturers, reliance on third-party manufacturers entails additional risks, including:

- the failure of the third party to manufacture our product candidates according to our schedule, or at all, including if our third-party contractors give greater priority to the supply of other products over our product candidates or otherwise do not satisfactorily perform according to the terms of the agreements between us and them;
- the reduction or termination of production or deliveries by suppliers, or the raising of prices or renegotiation of terms;
- the termination or nonrenewal of arrangements or agreements by our third-party contractors at a time that is costly or inconvenient for us;
- the breach by the third-party contractors of our agreements with them;
- the failure of third-party contractors to comply with applicable regulatory requirements;
- the failure of the third party to manufacture our product candidates according to our specifications;
- the mislabeling of clinical supplies, potentially resulting in the wrong dose amounts being supplied or active drug or placebo not being properly identified;
- clinical supplies not being delivered to clinical sites on time, leading to clinical trial interruptions, or of drug supplies not being distributed to commercial vendors in a timely manner, resulting in lost sales; and
- the misappropriation of our proprietary information, including our trade secrets and know-how.

In addition, we have no material long-term contracts with our suppliers, and we compete with other companies for raw materials and production. We may experience a significant disruption in the supply of raw materials from current sources or, in the event of a disruption, we may be unable to locate alternative materials suppliers of comparable quality at an acceptable price, or at all. In addition, if we experience significant increased demand, or if we need to replace an existing supplier, we may be unable to locate additional supplies of raw materials on terms that are acceptable to us, or at all, or we may be unable to locate any supplier with

sufficient capacity to meet our requirements or to fill our orders in a timely manner. Identifying a suitable supplier is an involved process that requires us to become satisfied with their quality control, responsiveness and service, financial stability and labor and other ethical practices. Even if we are able to expand existing sources, we may encounter delays in production and added costs as a result of the time it takes to train suppliers in our methods, products and quality control standards.

The manufacture of biotechnology products is complex, and manufacturers often encounter difficulties in production. If we or any of our third-party manufacturers encounter any loss of materials or if any of our third-party manufacturers encounter other difficulties, or otherwise fail to comply with their contractual or regulatory obligations, our ability to provide product candidates for clinical trials or our products to patients, once approved and the development or commercialization of our product candidates could be delayed or stopped.

The manufacture of biotechnology products is complex and requires significant expertise and capital investment, including the development of advanced manufacturing techniques and process controls. We and our contract manufacturers must comply with cGMPs, regulations and guidelines for the manufacturing of biologics used in clinical trials and, if approved, marketed products. In order to conduct clinical trials of our product candidates, we and existing and future collaborators will need to manufacture them in large quantities and in accordance with cGMPs. Manufacturers of biotechnology products often encounter difficulties in production, particularly in scaling up and validating initial production. In addition, if microbial, viral or other contaminations are discovered in our products or in the manufacturing facilities in which our products are made, such manufacturing facilities may need to be closed for an extended period of time to investigate and remedy the contamination. Delays in raw materials availability and supply may also extend the period of time required to develop our products. Furthermore, changes in our manufacturing methods may require comparability studies, including clinical bridging studies, which may result in delays to the approval process for our product candidates.

All of our therapeutic antibodies are manufactured by starting with cells which are stored in a cell bank. We have one master cell bank for each antibody manufactured in accordance with cGMPs, which is stored in multiple locations. We are currently creating multiple working cell banks. While we believe we will have adequate backup should any cell bank be lost in a catastrophic event, and we take precautions when transporting our cell banks, it is possible that we could lose multiple cell banks and have our manufacturing severely impacted by the need to replace the cell banks.

We cannot assure you that any stability or other issues relating to the manufacture of any of our product candidates or products will not occur in the future. Additionally, our manufacturers may experience manufacturing difficulties due to resource constraints or as a result of labor disputes or unstable political environments. For example, the extent to which the COVID-19 pandemic impacts the ability to procure sufficient supplies for the development of our product candidates will depend on the severity and duration of the spread of the virus, and the actions undertaken to contain COVID-19 or treat its effects. If our manufacturers were to encounter any of these difficulties, or otherwise fail to comply with their contractual obligations, our ability to provide any product candidates to patients in planned clinical trials and products to patients, once approved, would be jeopardized. Any delay or interruption in the supply of clinical trial supplies could delay the completion of planned clinical trials, increase the costs associated with maintaining clinical trial programs and, depending upon the period of delay, require us to commence new clinical trials at additional expense or terminate clinical trials completely. Any adverse developments affecting clinical or commercial manufacturing of our product candidates or products may result in shipment delays, inventory shortages, lot failures, product withdrawals or recalls, or other interruptions in the supply of our product candidates or products or enforcement actions by regulatory authorities. We may also have to take inventory write-offs and incur other

charges and expenses for product candidates or products that fail to meet specifications, undertake costly remediation efforts or seek more costly manufacturing alternatives. Accordingly, failures or difficulties faced at any level of our supply chain could adversely affect our business and delay or impede the development and commercialization of any of our product candidates or products and could have an adverse effect on our business, financial condition, results of operations and prospects.

Risks related to intellectual property

If we are not able to obtain, maintain and protect our intellectual property rights in any product candidates or technologies we develop, or if the scope of the intellectual property protection obtained is not sufficiently broad, third parties could develop and commercialize products and technology similar or identical to ours, and we may not be able to compete effectively in our market.

Our success depends in part on our ability to obtain and maintain patents and other forms of intellectual property rights, including in-licenses of intellectual property rights of others, for our product candidates, methods used to develop and manufacture our product candidates and methods for treating patients using our product candidates, as well as our ability to preserve our trade secrets, to prevent third parties from infringing upon our proprietary rights and to operate without infringing upon the proprietary rights of others. As of November 1, 2020, we own or have rights to 265 issued or allowed patents and 212 pending patent applications worldwide. The patent process is expensive and time-consuming, and we may not be able to apply for patents on certain aspects of our product candidates in a timely fashion, at a reasonable cost, in all jurisdictions, or at all. Our existing issued and granted patents and any future patents we obtain may not be sufficiently broad to prevent others from using our technology or from developing competing products and technology. There is no guarantee that any of our pending patent applications will result in issued or granted patents, that any of our issued or granted patents will not later be found to be invalid or unenforceable or that any issued or granted patents will include claims that are sufficiently broad to cover our product candidates or to provide meaningful protection from our competitors.

Moreover, the patent position of biotechnology and biopharmaceutical companies can be highly uncertain because it involves complex legal and factual issues. We will be able to protect our proprietary rights from unauthorized use by third parties only to the extent that our current and future proprietary technology and product candidates are covered by valid and enforceable patents or are effectively maintained as trade secrets. If third parties disclose or misappropriate our proprietary rights, it may materially and adversely affect our position in the market. Furthermore, even if they are unchallenged, our patents and patent applications may not adequately protect our intellectual property, provide exclusivity for our product candidates, or prevent others from designing around our patent claims.

Once granted, patents may remain open to opposition, interference, re-examination, post-grant review, *inter partes* review, nullification or derivation action in court or before patent offices or similar proceedings for a given period after allowance or grant, during which time third parties can raise objections against granted patents. In the course of such proceedings, which may continue for a protracted period of time, the patent owner may be compelled to limit the scope of the allowed or granted patent claims thus attacked, or may lose the allowed or granted claims altogether. As of the date of this prospectus, there is an ongoing patent opposition proceeding regarding our patent EP2 406 399 at the European Patent Office which is related to a version of methods used for evolving and screening potential product candidates. The Opposition Division revoked EP2 406 399 in its decision dated March 10, 2020 and we filed an appeal on July 20, 2020. In addition, we cannot assure you that:

- We may obtain, maintain, protect and enforce intellectual property protection for our technologies and product candidates.

[Table of Contents](#)

- Others will not or may not be able to make, use or sell compounds that are the same as or similar to our product candidates but that are not covered by the claims of the patents that we own or license.
- We or our licensors, or our existing or future collaborators are the first to make the inventions covered by each of our issued patents and pending patent applications that we own or license.
- We or our licensors, or our existing or future collaborators are the first to file patent applications covering certain aspects of our inventions.
- Others will not independently develop similar or alternative technologies or duplicate any of our technologies without infringing our intellectual property rights.
- A third party may not challenge our patents and, if challenged, that a court would hold that our patents are valid, enforceable and infringed.
- Any issued patents that we own or have licensed will provide us with any competitive advantage, or will not be challenged by third parties.
- We may develop or in-license additional proprietary technologies that are patentable.
- Pending patent applications that we own or may license will lead to issued patents.
- The patents of others will not have a material or adverse effect on our business, financial condition, results of operations and prospects.
- Our competitors do not conduct research and development activities in countries where we do not have enforceable patent rights and then use the information learned from such activities to develop competitive products for sale in our commercial markets.

If the breadth or strength of protection provided by the patents and patent applications we hold, obtain or pursue with respect to our product candidates is challenged, or if they fail to provide meaningful exclusivity for our product candidates, it could threaten our ability to practice our technologies or commercialize our product candidates. We cannot offer any assurances about which, if any, patents will issue, the breadth of any such patent, or whether any issued patents will be found invalid and unenforceable or will be threatened by third parties. Furthermore, an interference or derivation proceeding can be provoked by a third party or instituted by a patent office or in a court proceeding, to determine who was the first to invent any of the subject matter covered by the patent claims of our applications.

Where we obtain licenses from third parties, in some circumstances, we may not have the right to control the preparation, filing and prosecution of patent applications, or to maintain the patents, covering technology that we license from third parties. We may also require the cooperation of our licensors to enforce any licensed patent rights, and such cooperation may not be provided. Therefore, these patents and applications may not be prosecuted and enforced in a manner consistent with the best interests of our business. Moreover, if we do obtain necessary licenses, we will likely have obligations under those licenses, and any failure to satisfy those obligations could give our licensor the right to terminate the license. Termination of a necessary license could have a material adverse impact on our business.

If we are unable to protect the confidentiality of our trade secrets, our business and competitive position would be harmed.

In addition to seeking patent protection for certain aspects of our product candidates, we also consider trade secrets, including confidential and unpatented know-how important to the maintenance of our competitive

position. We seek to protect trade secrets and confidential and unpatented know-how, in part, by entering into non-disclosure and confidentiality agreements with parties who have access to such knowledge, such as our employees, corporate collaborators, outside scientific collaborators, CROs, contract manufacturers, consultants, advisors and other third parties. We also enter into confidentiality and invention or patent assignment agreements with our employees and consultants that obligate them to maintain confidentiality and assign their inventions to us. We also seek to preserve the integrity and confidentiality of our data, trade secrets and know-how by maintaining physical security of our premises and physical and electronic security of our information technology systems. Monitoring unauthorized uses and disclosures is difficult, and we do not know whether the steps we have taken to protect our proprietary technologies will be effective. We cannot guarantee that our trade secrets and other proprietary and confidential information will not be disclosed or that competitors will not otherwise gain access to our trade secrets. Despite these efforts, any of these parties may breach the agreements and disclose our proprietary information, including our trade secrets, and we may not be able to obtain adequate remedies for such breaches. Enforcing a claim that a party illegally disclosed or misappropriated a trade secret is difficult, expensive and time-consuming, and the outcome is unpredictable. In addition, some courts in the United States and certain foreign jurisdictions are less willing or unwilling to protect trade secrets. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor, we would have no right to prevent them from using that technology or information to compete with us. If any of our trade secrets were to be disclosed to or independently developed by a competitor, our competitive position could be harmed.

Trade secrets and know-how can be difficult to protect as trade secrets and know-how will over time be disseminated within the industry through independent development, the publication of journal articles, and the movement of personnel skilled in the art from company to company or academic to industry scientific positions. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor, we would have no right to prevent such competitor from using that technology or information to compete with us, which could harm our competitive position. If we are unable to prevent material disclosure of the intellectual property related to our technologies to third parties, we will not be able to establish or maintain a competitive advantage in our market, which could materially adversely affect our business, results of operations and financial condition. Even if we are able to adequately protect our trade secrets and proprietary information, our trade secrets could otherwise become known or could be independently discovered by our competitors. Competitors could willfully infringe our intellectual property rights, design around our protected technology or develop their own competitive technologies that fall outside of our intellectual property rights. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor, in the absence of patent protection, we would have no right to prevent them, or those to whom they communicate, from using that technology or information to compete with us. If our trade secrets are not adequately protected so as to protect our market against competitors' products, others may be able to exploit our product candidates and discovery technologies to identify and develop competing product candidates, and thus our competitive position could be adversely affected, as could our business.

The terms of our patents may not protect our competitive position on our product candidates for an adequate amount of time.

Patents have a limited lifespan. In the United States, if all maintenance fees are timely paid, the natural expiration of a patent is generally 20 years after its earliest U.S. non-provisional effective filing date. Although various extensions may be available, the life of a patent, and the protection it affords, is limited. Even if patents covering our technologies or product candidates are obtained, once the patent life has expired, we may be open to competition. Our issued patents will expire on dates ranging from 2030 to 2037, subject to any patent extensions that may be available for such patents. If patents are issued on our pending patent applications, the resulting patents are projected to expire on dates ranging from 2030 to 2041. Due to the amount of time

required for the development, testing and regulatory review of new product candidates, patents protecting such candidates might expire before or shortly after such candidates are commercialized. As a result, our owned and licensed patent portfolio may not provide us with sufficient rights to exclude others from commercializing products similar or identical to ours.

If we do not obtain patent term extension for our product candidates, our business may be materially harmed.

Depending upon the timing, duration and specifics of FDA marketing approval of our product candidates, one or more of our U.S. patents may be eligible for limited patent term restoration under the Drug Price Competition and Patent Term Restoration Act of 1984, or the Hatch-Waxman Amendments. The Hatch-Waxman Amendments permit a patent restoration term of up to five years as compensation for patent term lost during product development and the FDA regulatory review process. A maximum of one patent may be extended per FDA-approved product as compensation for the patent term lost during the FDA regulatory review process. A patent term extension cannot extend the remaining term of a patent beyond a total of 14 years from the date of product approval and only those claims covering such approved drug product, a method for using it or a method for manufacturing it may be extended. Patent term extension may also be available in certain foreign countries upon regulatory approval of our product candidates. However, we may not be granted an extension because of, for example, failing to apply within applicable deadlines, failing to apply prior to expiration of relevant patents or otherwise failing to satisfy applicable requirements. Moreover, the applicable time period or the scope of patent protection afforded could be less than we request or require. If we are unable to obtain patent term extension or restoration or the term of any such extension is less than we request or require, our competitors may obtain approval of competing products following our patent expiration, and our revenue could be reduced, possibly materially. Further, if this occurs, our competitors may take advantage of our investment in development and trials by referencing our clinical and preclinical data and launch their product earlier than might otherwise be the case.

Recent patent reform legislation could increase the uncertainties and costs surrounding the prosecution of our patent applications and the enforcement or defense of our issued patents.

In September 2011, the Leahy-Smith America Invents Act, or Leahy-Smith Act, was signed into law. The Leahy-Smith Act includes a number of significant changes to U.S. patent law. These include provisions that affect the way patent applications will be prosecuted and may also affect patent litigation. In particular, under the Leahy-Smith Act, the United States transitioned in March 2013 to a “first inventor to file” system in which, assuming that other requirements of patentability are met, the first inventor to file a patent application will be entitled to the patent regardless of whether another party was first to invent the claimed invention. A third party that files a patent application in the USPTO after March 2013 but before us could therefore be awarded a patent covering an invention of ours even if we had made the invention before it was made by such third party. This will require us to be cognizant going forward of the time from invention to filing of a patent application. Furthermore, our ability to obtain and maintain valid and enforceable patents depends on whether the differences between our technology and the prior art render our technology to be patentable over the prior art. Since patent applications in the United States and most other countries are confidential for a period of time after filing or until issuance, we cannot be certain that we were the first to either (i) file any patent application related to our product candidates or (ii) invent any of the inventions claimed in our patents or patent applications.

The Leahy-Smith Act also includes a number of significant changes that affect the way patent applications will be prosecuted and also may affect patent litigation. These include allowing third-party submission of prior art to the USPTO during patent prosecution and the provision of additional procedures to attack the validity of a patent by USPTO administered post-grant proceedings, including PGR, IPR and derivation proceedings. An

adverse determination in any such submission or proceeding could reduce the scope or enforceability of, or invalidate, our patent rights, which could adversely affect our competitive position.

Because of the application of a lower evidentiary standard in USPTO proceedings compared to the evidentiary standard applied in United States federal courts necessary to invalidate a patent claim, a third party could potentially provide evidence in a USPTO proceeding sufficient for the USPTO to hold a claim invalid even though the same evidence would be insufficient to invalidate the claim if first presented in a district court action. Accordingly, a third party may attempt to use the USPTO procedures to invalidate patent claims that would not have been invalidated if first challenged by the third party as a defendant in a district court action. Thus, the Leahy-Smith Act and its implementation could increase the uncertainties and costs surrounding the prosecution and defense of our or our licensors' patent applications and the enforcement or defense of our issued patents, all of which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Changes in U.S. patent law, or laws in other countries, could diminish the value of patents in general, thereby impairing our ability to protect our product candidates.

As is the case with other biopharmaceutical companies, our success is heavily dependent on intellectual property, particularly patents. Obtaining and enforcing patents in the biopharmaceutical industry involves a high degree of technological and legal complexity. Therefore, obtaining and enforcing biopharmaceutical patents is costly, time-consuming and inherently uncertain. Changes in either the patent laws or in the interpretations of patent laws in the United States and other countries may diminish the value of our intellectual property and may increase the uncertainties and costs surrounding the prosecution of patent applications and the enforcement or defense of issued patents. We cannot predict the breadth of claims that may be allowed or enforced in our patents or in third-party patents. In addition, Congress or other foreign legislative bodies may pass patent reform legislation that is unfavorable to us.

For example, the U.S. Supreme Court has ruled on several patent cases in recent years, sometimes narrowing the scope of patent protection available in certain circumstances, weakening the rights of patent owners in certain circumstances or weakening the rights of patent owners in certain situations. In addition to increasing uncertainty with regard to our ability to obtain patents in the future, this combination of events has created uncertainty with respect to the value of patents, once obtained. Depending on decisions by the U.S. Congress, the U.S. federal courts, the USPTO or similar authorities in foreign jurisdictions, the laws and regulations governing patents could change in unpredictable ways that would weaken our ability to obtain new patents or to enforce our existing patent and the patents we might obtain or license in the future.

Other companies or organizations may challenge our or our licensors' patent rights or may assert patent rights that prevent us from developing and commercializing our products.

CAB therapeutics are a new scientific field. We have obtained grants and issuances of CAB therapeutic patents and the various technologies used in discovering and producing CAB therapeutic proteins. The issued patents and pending patent applications in the United States and in key markets around the world that we own or license claim many different methods, compositions and processes relating to the discovery, development, manufacture and commercialization of antibody and immunoregulatory therapeutics. Specifically, we own a portfolio of patents, patent applications and other intellectual property covering CAB compositions of matter as well as their development and methods of use.

As the field of antibody and immunoregulatory therapeutics matures, patent applications are being processed by national patent offices around the world. There is uncertainty about which patents will issue, and, if they do,

as to when, to whom, and with what claims. In addition, third parties may attempt to invalidate our intellectual property rights. Even if our rights are not directly challenged, disputes could lead to the weakening of our intellectual property rights. Our defense against any attempt by third parties to circumvent or invalidate our intellectual property rights could be costly to us, could require significant time and attention of our management and could have a material and adverse effect on our business, financial condition, results of operations and prospects or our ability to successfully compete.

There are many issued and pending patents that claim aspects of our product candidates and modifications that we may need to apply to our product candidates. There are also many issued patents that claim antibodies or portions of antibodies that may be relevant for CAB products we wish to develop. Thus, it is possible that one or more organizations will hold patent rights to which we will need a license. If those organizations refuse to grant us a license to such patent rights on reasonable terms, we may not be able to market products or perform research and development or other activities covered by these patents.

Intellectual property rights of third parties could prevent or delay our drug discovery and development efforts and could adversely affect our ability to commercialize our product candidates, and we might be required to litigate or obtain licenses from third parties in order to discover, develop or market our product candidates. Such litigation or licenses could be costly or not available on commercially reasonable terms.

Our commercial success depends in part on our ability to develop, manufacture, market and sell our product candidates and use our proprietary technologies without infringing or otherwise violating the patents and proprietary rights of third parties. There is a substantial amount of litigation involving patent and other intellectual property rights in the biotechnology and pharmaceutical industries, including patent infringement lawsuits, interferences, derivation proceedings, post grant reviews, *inter partes* reviews, and reexamination proceedings before the USPTO or oppositions and other comparable proceedings in foreign jurisdictions. Given the vast number of patents in our field of technology, we cannot assure you that marketing of our product candidates or practice of our technologies will not infringe existing patents or patents that may be granted in the future. Because the antibody landscape is still evolving and the CAB antibody landscape is a new field, it is difficult to conclusively assess our freedom to operate without infringing on third-party rights. There are numerous companies that have pending patent applications and issued patents broadly covering many aspects of antibodies generally or covering antibodies directed against the same targets as, or targets similar to, those we are pursuing. Our competitive position may suffer if patents issued to third parties or other third-party intellectual property rights cover our products or product candidates or elements thereof, or our manufacture or uses relevant to our development plans. If any third-party patents were held by a court of competent jurisdiction to cover the manufacturing process of any of our product candidates, any molecules formed during the manufacturing process or any final product or formulation itself, the holders of any such patents may be able to block our ability to commercialize such product candidate. In such cases, we may not be in a position to develop or commercialize products or product candidates unless we successfully pursue litigation to nullify or invalidate the third-party intellectual property right concerned, or enter into a license agreement with the intellectual property right holder, if available on commercially reasonable terms. Parties making claims against us may obtain injunctive or other equitable relief, which could effectively block our ability to further practice our technologies or develop and commercialize one or more of our product candidates. There may be issued patents of which we are not aware, held by third parties that, if found to be valid and enforceable, could be alleged to be infringed by our CAB technologies. There also may be pending patent applications of which we are not aware that may result in issued patents, which could be alleged to be infringed by our CAB technologies. If such an infringement claim should be brought and be successful, we may be required to pay substantial damages, be forced to abandon our product candidates or seek a license from any patent holders, and would most likely be required to pay license fees or royalties or both, each of which could be substantial. No assurances can be given that a license will be available on commercially reasonable terms, if at all. Even if we

were able to obtain a license, the rights we obtain may be nonexclusive, which would provide our competitors access to the same intellectual property rights upon which we are forced to rely. As the biotechnology and pharmaceutical industries expand and more patents are issued, the risk increases that our product candidates or technologies may give rise to claims of infringement of the patent rights of others.

We or our collaboration partner, or any future strategic partners may be subject to third-party claims for infringement or misappropriation of patent or other proprietary rights. If we or our licensors, or any future strategic partners are found to infringe a third-party patent or other intellectual property rights, we could be required to pay damages, potentially including treble damages, if we are found to have willfully infringed. In addition, we or our licensors, or any future strategic partners may choose to seek, or be required to seek, a license from a third party, which may not be available on acceptable terms, if at all. Even if a license can be obtained on acceptable terms, the rights may be non-exclusive, which could give our competitors access to the same technology or intellectual property rights licensed to us. If we fail to obtain a required license, we or our existing or future collaborators may be unable to effectively market product candidates based on our technology, which could limit our ability to generate revenue or achieve profitability and possibly prevent us from generating revenue sufficient to sustain our operations. In addition, we may find it necessary to pursue claims or initiate lawsuits to protect or enforce our patent or other intellectual property rights. The cost to us in defending or initiating any litigation or other proceeding relating to patent or other proprietary rights, even if resolved in our favor, could be substantial, and litigation would divert our management's attention. Some of our competitors may be able to sustain the costs of complex patent litigation more effectively than we can because they have substantially greater resources. Uncertainties resulting from the initiation and continuation of patent litigation or other proceedings could delay our research and development efforts and limit our ability to continue our operations.

We may not identify relevant third-party patents or may incorrectly interpret the relevance, scope or expiration of a third-party patent which might adversely affect our ability to develop and market our products.

We cannot guarantee that any of our patent searches or analyses, including the identification of relevant patents, the scope of patent claims or the expiration of relevant patents, are complete or thorough, nor can we be certain that we have identified each and every third-party patent and pending application in the United States and abroad that is relevant to or necessary for the commercialization of our product candidates in any jurisdiction. For example, U.S. applications filed before November 29, 2000, and certain U.S. applications filed after that date that will not be filed outside the United States, remain confidential until patents issue. Patent applications in the United States and elsewhere are published approximately 18 months after the earliest filing for which priority is claimed, with such earliest filing date being commonly referred to as the priority date. Therefore, patent applications covering our product candidates or technologies could have been filed by others without our knowledge. Additionally, pending patent applications that have been published can, subject to certain limitations, be later amended in a manner that could cover our platform technologies, our products or the use of our products. Third-party intellectual property right holders may also actively bring infringement claims against us, even if we have received patent protection for our technologies and product candidates. The scope of a patent claim is determined by an interpretation of the law, the written disclosure in a patent and the patent's prosecution history. Our interpretation of the relevance or the scope of a patent or a pending application may be incorrect, which may negatively impact our ability to market our products. We may incorrectly determine that our products are not covered by a third-party patent or may incorrectly predict whether a third party's pending application will issue with claims of relevant scope. Our determination of the expiration date of any patent in the United States or abroad that we consider relevant may be incorrect, which may negatively impact our ability to develop and market our product candidates.

If we fail to identify and correctly interpret relevant patents, we may be subject to infringement claims. We cannot guarantee that we will be able to successfully settle or otherwise resolve such infringement claims. If we are unable to successfully settle future claims on terms acceptable to us, we may be required to engage in or continue costly, unpredictable and time-consuming litigation and may be prevented from or experience substantial delays in marketing our products. If we fail in any such dispute, in addition to being forced to pay damages, we may be temporarily or permanently prohibited from commercializing any of our product candidates that are held to be infringing. We might, if possible, also be forced to redesign product candidates or our technologies so that we no longer infringe the third-party intellectual property rights. Any of these events, even if we were ultimately to prevail, could require us to divert substantial financial and management resources that we would otherwise be able to devote to our business.

We may be subject to claims challenging the inventorship or ownership of our patents and other intellectual property.

We may also be subject to claims that former employees, collaborators or other third parties have an ownership interest in our patents or other intellectual property. We may have ownership disputes in the future arising, for example, from conflicting obligations of consultants or others who are involved in developing our product candidates. Litigation may be necessary to defend against these and other claims challenging inventorship or ownership. If we fail in defending any such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights, such as exclusive ownership of, or right to use, valuable intellectual property. Such an outcome could have a material adverse effect on our business. Even if we are successful in defending against such claims, litigation could result in substantial costs and be a distraction to management and other employees.

We may be involved in lawsuits to protect or enforce our patents or the patents of our licensors, which could be expensive, time-consuming and unsuccessful, and issued patents covering our product candidates could be found invalid or unenforceable if challenged in court in the United States and abroad.

Competitors may infringe our patents or the patents of our licensors. If we were to initiate legal proceedings against a third party to enforce a patent covering one of our products or our technology, the defendant could counterclaim that our patent is invalid or unenforceable, or the court may refuse to stop the defendant in such infringement proceeding from using the technology at issue on the grounds that our patents do not cover the technology in question. In patent litigation in the United States, defendant counterclaims alleging invalidity or unenforceability are commonplace. Grounds for a validity challenge could be an alleged failure to meet any of several statutory requirements, for example, lack of novelty, obviousness or non-enablement. Grounds for an unenforceability assertion could be an allegation that someone connected with prosecution of the patent withheld relevant information from the USPTO, or made a misleading statement, during prosecution. The outcome following legal assertions of invalidity and unenforceability during patent litigation is unpredictable. With respect to the validity question, for example, we cannot be certain that there is no invalidating prior art, of which we and the patent examiner were unaware during prosecution. If a defendant were to prevail on a legal assertion of invalidity or unenforceability, we would lose at least part, and perhaps all, of the patent protection on one or more of our products or certain aspects of our platform technology. Such a loss of patent protection could have a material and adverse effect on our business, financial condition, results of operations and prospects. Patents and other intellectual property rights also will not protect our technology if competitors design around our protected technology without legally infringing our patents or other intellectual property rights.

Interference or derivation proceedings provoked by third parties or brought by us, the USPTO or any foreign patent authority may be necessary to determine the priority and/or ownership of inventions with respect to our

patents or patent applications or those of our licensors. An unfavorable outcome could require us to cease using the related technology or to attempt to license rights to it from the prevailing party. Our business could be harmed if the prevailing party does not offer us a license on commercially reasonable terms, if any license is offered at all. Our defense of litigation or interference proceedings may fail and, even if successful, may result in substantial costs and distract our management and other employees.

We may not be able to prevent, alone or with our licensors, misappropriation of our intellectual property, trade secrets or confidential information, particularly in countries where the laws may not protect those rights as fully as in the United States. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation. In addition, there could be public announcements of the results of hearings, motions or other interim proceedings or developments. If securities analysts or investors perceive these results to be negative, it could have a substantial adverse effect on the price of our common stock.

We may not be able to protect our intellectual property rights throughout the world.

Obtaining a valid and enforceable issued or granted patent covering our technology in the United States and worldwide can be extremely costly. In jurisdictions where we have not obtained patent protection, competitors may use our technology to develop their own products and further, may export otherwise infringing products to territories where we have patent protection, but where it is more difficult to enforce a patent as compared to the United States. Competitor products may compete with our future products in jurisdictions where we do not have issued or granted patents or where our issued or granted patent claims or other intellectual property rights are not sufficient to prevent competitor activities in these jurisdictions. The legal systems of certain countries, particularly certain developing countries, make it difficult to enforce patents and such countries may not recognize other types of intellectual property protection, particularly that relating to biopharmaceuticals. This could make it difficult for us to prevent the infringement of our patents or marketing of competing products in violation of our proprietary rights in certain jurisdictions. Proceedings to enforce our patent rights in foreign jurisdictions, regardless of whether they are successful, could result in substantial cost and divert our efforts and attention from other aspects of our business. Similarly, if our trade secrets are disclosed in a foreign jurisdiction, competitors worldwide could have access to our proprietary information and we may be without satisfactory recourse. Such disclosure could have a material adverse effect on our business. Moreover, our ability to protect and enforce our intellectual property rights may be adversely affected by unforeseen changes in foreign intellectual property laws.

We generally file a provisional patent application first (a priority filing) at the USPTO. An international application under the Patent Cooperation Treaty, or PCT, is usually filed within 12 months after the priority filing. Based on the PCT filing, national and regional patent applications may be filed in the United States, Europe, Japan, Australia and Canada and, depending on the individual case, also in any or all of, *inter alia*, Brazil, China, Hong Kong, India, Israel, Mexico, New Zealand, Russia, South Africa, South Korea and other jurisdictions. We have so far not filed for patent protection in all national and regional jurisdictions where such protection may be available. In addition, we may decide to abandon national and regional patent applications before grant. Finally, the grant proceeding of each national or regional patent is an independent proceeding which may lead to situations in which applications might in some jurisdictions be refused by the relevant registration authorities, while granted in other jurisdictions. It is also quite common that depending on the country, various scopes of patent protection may be granted on the same product candidate or technology. Furthermore, while we intend to protect our intellectual property rights in our expected significant markets, we cannot ensure that we will be able to initiate or maintain similar efforts in all jurisdictions in which we may wish to market our product candidates. Accordingly, our efforts to protect our intellectual property rights in such

countries may be inadequate, which may have an adverse effect on our ability to successfully commercialize our product candidates in all of our expected significant foreign markets.

The laws of some jurisdictions do not protect intellectual property rights to the same extent as the laws in the United States, and many companies have encountered significant difficulties in protecting and defending such rights in such jurisdictions. The requirements for patentability differ, in varying degrees, from country to country, and the laws of some foreign countries do not protect intellectual property rights, including trade secrets, to the same extent as federal and state laws of the United States. If we or our licensors encounter difficulties in protecting, or are otherwise precluded from effectively protecting, the intellectual property rights important for our business in such jurisdictions, the value of these rights may be diminished and we may face additional competition from others in those jurisdictions. Many countries have compulsory licensing laws under which a patent owner may be compelled to grant licenses to third parties. In addition, many countries limit the enforceability of patents against government agencies or government contractors. In these countries, the patent owner may have limited remedies, which could materially diminish the value of such patent. If we or any of our licensors are forced to grant a license to third parties with respect to any patents relevant to our business, our competitive position in the relevant jurisdiction may be impaired and our business and results of operations may be adversely affected.

Intellectual property litigation could cause us to spend substantial resources and distract our personnel from their normal responsibilities.

Litigation or other legal proceedings relating to intellectual property claims, with or without merit, is unpredictable and generally expensive and time-consuming and is likely to divert significant resources from our core business, including distracting our technical and management personnel from their normal responsibilities. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation. In addition, there could be public announcements of the results of hearings, motions or other interim proceedings or developments and if securities analysts or investors perceive these results to be negative, it could have a substantial adverse effect on the price of our common stock. Such litigation or proceedings could substantially increase our operating losses and reduce the resources available for development activities or any future sales, marketing or distribution activities.

We may not have sufficient financial or other resources to adequately conduct such litigation or proceedings. Some of our competitors may be able to sustain the costs of such litigation or proceedings more effectively than we can because of their greater financial resources and more mature and developed intellectual property portfolios. Accordingly, despite our efforts, we may not be able to prevent third parties from infringing upon or misappropriating or from successfully challenging our intellectual property rights. Uncertainties resulting from the initiation and continuation of patent litigation or other proceedings could have a material adverse effect on our ability to compete in the marketplace.

If we fail to comply with our obligations under any license, collaboration or other agreements, we may be required to pay damages and could lose intellectual property rights that are necessary for developing and protecting our product candidates or we could lose certain rights to grant sublicenses.

Our current Global Co-Development and Collaboration Agreement with BeiGene imposes, and any future collaboration agreements or license agreements we enter into are likely to impose, various development, commercialization, funding, milestone, royalty, diligence, sublicensing, insurance, patent prosecution and enforcement and/or other obligations on us. If we breach any of these obligations, or use the intellectual property licensed to us in an unauthorized manner, we may be required to pay damages and the licensor may

have the right to terminate the license, which could result in us being unable to develop, manufacture and sell products that are covered by the licensed technology or enable a competitor to gain access to the licensed technology. Moreover, our licensors may own or control intellectual property that has not been licensed to us and, as a result, we may be subject to claims, regardless of their merit, that we are infringing or otherwise violating the licensor's rights. In addition, while we cannot currently determine the amount of the royalty obligations we would be required to pay on sales of future products, if any, the amounts may be significant. The amount of our future royalty obligations will depend on the technology and intellectual property we use in products that we successfully develop and commercialize, if any. Therefore, even if we successfully develop and commercialize products, we may be unable to achieve or maintain profitability.

We may not be successful in obtaining or maintaining necessary rights to our product candidates through acquisitions and in-licenses.

We may find that our programs require the use of proprietary rights held by third parties, and the growth of our business may depend in part on our ability to acquire, in-license or use these proprietary rights. We may be unable to acquire or in-license compositions, methods of use, processes or other third-party intellectual property rights from third parties that we identify as necessary for our product candidates. The licensing and acquisition of third-party intellectual property rights is a competitive area, and a number of more established companies are also pursuing strategies to license or acquire third-party intellectual property rights that we may consider attractive. These established companies may have a competitive advantage over us due to their size, financial resources and greater clinical development and commercialization capabilities. In addition, companies that perceive us to be a competitor may be unwilling to assign or license rights to us. Moreover, collaboration arrangements are complex and time-consuming to negotiate, document, implement and maintain. We may not be successful in our efforts to establish and implement collaborations or other alternative arrangements should we choose to enter into such arrangements. We also may be unable to license or acquire third-party intellectual property rights on terms that that would be favorable to us or would allow us to make an appropriate return on our investment. Even if we are able to obtain a license to intellectual property of interest, we may not be able to secure exclusive rights, in which case others could use the same rights and compete with us.

Obtaining and maintaining patent protection depends on compliance with various procedural, document submission, fee payment and other requirements imposed by governmental patent agencies, and our patent protection could be reduced or eliminated for non-compliance with these requirements.

The USPTO and various foreign governmental patent agencies require compliance with a number of procedural, documentary, fee payment and other provisions during the patent process. Periodic maintenance fees, renewal fees, annuity fees and various other governmental fees on patents and/or applications will be due to be paid to the USPTO and various governmental patent agencies outside of the United States in several stages over the lifetime of the patents and/or applications. We employ reputable law firms and other professionals and rely on such third parties to help us comply with these requirements and effect payment of these fees with respect to the patents and patent applications that we own, and if we in-license intellectual property we may have to rely upon our licensors to comply with these requirements and effect payment of these fees with respect to any patents and patent applications that we license. In many cases, an inadvertent lapse can be cured by payment of a late fee or by other means in accordance with the applicable rules. However, there are situations in which noncompliance can result in abandonment or lapse of a patent or patent application, resulting in partial or complete loss of patent rights in the relevant jurisdiction. In such an event, competitors might be able to enter the market earlier than would otherwise have been the case. The standards applied by the USPTO and foreign patent offices in granting patents are not always applied uniformly or predictably. For example, there is no uniform worldwide policy regarding patentable subject matter or the scope of claims allowable in biotechnology.

and biopharmaceutical patents. As such, we do not know the degree of future protection that we will have on our technologies and product candidates. While we will endeavor to try to protect our technologies and product candidates with intellectual property rights such as patents, as appropriate, the process of obtaining patents is time-consuming, expensive and sometimes unpredictable.

We may be subject to claims that we or our employees or consultants have wrongfully used or disclosed alleged trade secrets of our employees' or consultants' former employers or their clients. These claims may be costly to defend and if we do not successfully do so, we may be required to pay monetary damages and may lose valuable intellectual property rights or personnel.

Many of our employees were previously employed at universities or biotechnology or biopharmaceutical companies, including our competitors or potential competitors. Although no claims against us are currently pending, we may be subject to claims that these employees or we have inadvertently or otherwise used or disclosed trade secrets or other proprietary information of their former employers. Litigation may be necessary to defend against these claims. If we fail in defending such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights or personnel. A loss of key research personnel or their work product could hamper our ability to commercialize, or prevent us from commercializing, our product candidates, which could severely harm our business. Even if we are successful in defending against these claims, litigation could result in substantial costs and be a distraction to management.

If our trademarks and trade names are not adequately protected, then we may not be able to build name recognition in our markets of interest and our business may be adversely affected.

Our trademarks or trade names may be challenged, infringed, circumvented, declared generic or determined to be infringing on other marks. We only have one currently registered trademark, and rely on common law protection for the rest of our trademarks. We may not be able to protect our rights to these trademarks and trade names or may be forced to stop using these names, which we need for name recognition by potential partners or customers in our markets of interest. During trademark registration proceedings, we may receive rejections. Although we would be given an opportunity to respond to those rejections, we may be unable to overcome such rejections. In addition, in the USPTO and in comparable agencies in many foreign jurisdictions, third parties are given an opportunity to oppose pending trademark applications and to seek to cancel registered trademarks. Opposition or cancellation proceedings may be filed against our trademarks, and our trademarks may not survive such proceedings. If we are unable to establish name recognition based on our trademarks and trade names, we may not be able to compete effectively and our business may be adversely affected.

Risks related to our common stock and this offering

Our operating results may fluctuate significantly or may fall below the expectations of investors or securities analysts, each of which may cause our stock price to fluctuate or decline.

We expect our operating results to be subject to annual and quarterly fluctuations. Our net loss and other operating results will be affected by numerous factors, including:

- variations in the level of expense related to the ongoing development of our product candidates or future development programs;
- results of preclinical studies and clinical trials, or the addition or termination of clinical trials;
- the success of our existing collaboration with BeiGene and any potential additional collaboration, licensing or similar arrangements;

[Table of Contents](#)

- any intellectual property infringement lawsuit or opposition, interference or cancellation proceeding in which we may become involved;
- additions and departures of key personnel;
- strategic decisions by us or our competitors, such as acquisitions, divestitures, spin-offs, joint ventures, strategic investments or changes in business strategy;
- if any of our product candidates receives regulatory approval, the terms of such approval and market acceptance and demand for such product candidates;
- regulatory developments affecting our product candidates or those of our competitors; and
- changes in general market and economic conditions.

If our operating results fall below the expectations of investors or securities analysts, the price of our common stock could decline substantially. Furthermore, any fluctuations in our operating results may, in turn, cause the price of our stock to fluctuate substantially.

Our stock price may be volatile, and you could lose all or part of your investment.

The trading price of our common stock following this offering is likely to be highly volatile. As a result of this volatility, investors may not be able to sell their common stock at or above the initial public offering price. The market price for our common stock may be influenced by many factors, including the other risks described in this section of the prospectus titled “Risk factors” and the following:

- the timing and results of our clinical trials or those of our competitors;
- regulatory or legal developments in the United States and other countries, especially changes in laws or regulations applicable to our products;
- the success of competitive products or technologies;
- introductions and announcements of new products by us, our current collaborator, our future collaborators or our competitors, and the timing of these introductions or announcements;
- actions taken by regulatory agencies with respect to our products, preclinical studies, clinical trials, manufacturing process or sales and marketing terms;
- actual or anticipated variations in our financial results or those of companies that are perceived to be similar to us;
- the success of our efforts to acquire or in-license additional technologies, products or product candidates;
- developments concerning any future collaborations, including those regarding manufacturing, supply and commercialization of our products;
- market conditions in the pharmaceutical and biotechnology sectors;
- announcements by us or our competitors of significant acquisitions, strategic collaborations, joint ventures or capital commitments;
- developments or disputes concerning patents or other proprietary rights, including patents, litigation matters and our ability to obtain patent protection for our products;

Table of Contents

- our ability or inability to raise additional capital and the terms on which we raise it;
- the recruitment or departure of key personnel;
- changes in the structure of healthcare payment systems;
- actual or anticipated changes in earnings estimates or changes in stock market analyst recommendations regarding our common stock, other comparable companies or our industry generally;
- our failure or the failure of our competitors to meet analysts' projections or guidance that we or our competitors may give to the market;
- fluctuations in the valuation of companies perceived by investors to be comparable to us;
- announcement and expectation of additional financing efforts;
- speculation in the press or investment community;
- trading volume of our common stock;
- sales of our common stock by us, our insiders or our other stockholders;
- expiration of market stand-off or lock-up agreements;
- the concentrated ownership of our common stock;
- changes in accounting principles;
- terrorist acts, acts of war or periods of widespread civil unrest;
- the impact of any natural disasters or public health emergencies, such as the COVID-19 pandemic; and
- general economic, industry and market conditions.

In addition, the stock markets in general, and the markets for pharmaceutical, biopharmaceutical and biotechnology stocks in particular, have experienced extreme volatility that has been often unrelated to the operating performance of the issuer. These broad market and industry factors may seriously harm the market price of our common stock, regardless of our operating performance.

You will experience immediate and substantial dilution as a result of this offering and may experience additional dilution in the future.

The initial public offering price is substantially higher than the net tangible book value per share of our outstanding common stock immediately following the completion of this offering. Based on the initial public offering price of \$ per share, if you purchase shares of common stock in this offering, you will experience substantial and immediate dilution in the pro forma as adjusted net tangible book value per share of \$ as of September 30, 2020. That is because the price that you pay will be substantially greater than the pro forma net tangible book value per share of the common stock that you acquire. This dilution is due in large part to the fact that our earlier investors paid substantially less than the initial public offering price when they purchased their shares of our capital stock. You will experience additional dilution when those holding stock options or warrants exercise their right to purchase common stock under our equity incentive plans or when we otherwise issue additional shares of common stock. See "Dilution."

The future issuance of equity or of debt securities that are convertible into equity will dilute our share capital.

We will need to raise additional capital in the future. To the extent we raise additional capital through the issuance of equity or convertible debt securities in the future, there will be further dilution to investors participating in this offering and the terms of these securities may include liquidation or other preferences that adversely affect our stockholders' rights. Future issuances of our common stock or other equity securities, or the perception that such sales may occur, could adversely affect the trading price of our common stock and impair our ability to raise capital through future offerings of shares or equity securities. We may choose to raise additional capital through the issuance of equity or convertible debt securities due to market conditions or strategic considerations even if we believe we have sufficient funds for our current or future operating plans. No prediction can be made as to the effect, if any, that future sales of common stock or the availability of common stock for future sales will have on the trading price of our common stock.

The dual class structure of our common stock and the option of the holder of shares of our Class B common stock to convert into shares of our common stock may limit your ability to influence corporate matters.

Our common stock, which is the stock we are offering in this initial public offering, has one vote per share, while our Class B common stock is non-voting. Nonetheless, each share of our Class B common stock may be converted at any time into one share of common stock at the option of its holder, subject to the limitations provided for in the amended and restated certificate of incorporation to become effective upon the completion of this offering. Consequently, if holders of Class B common stock following this offering exercise their option to make this conversion, this will have the effect of increasing the relative voting power of those prior holders of our Class B common stock, and correspondingly decrease the voting power of the current holders of our common stock, which may limit your ability to influence corporate matters. Because our Class B common stock is generally non-voting, stockholders who own more than 10% of our Class B common stock and common stock overall but 10% or less of our common stock will not be required to report changes in their ownership from transactions in our Class B common stock pursuant to Section 16(a) of the Securities Exchange Act of 1934, as amended, or the Exchange Act, and would not be subject to the short-swing profit provisions of Section 16(b) of the Exchange Act. In addition, acquisitions of Class B common stock would not be subject to notification pursuant to the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended.

An active trading market for our common stock may not develop.

Prior to this offering, there has been no public market for our common stock. The initial public offering price for our common stock will be determined through negotiations with the underwriters. Although our common stock will be listed on The Nasdaq Global Market, an active trading market for our shares may never develop or be sustained following this offering. If an active market for our common stock does not develop, it may be difficult for you to sell shares you purchase in this offering without depressing the market price for the shares or at all.

Because our management will have flexibility in allocating the net proceeds from this offering, you may not agree with how we use them and the proceeds may not be invested successfully.

We intend to use the net proceeds to us from this offering to fund the research and development of our product candidates and development programs, and to fund working capital and other general corporate purposes, and therefore, our management will have flexibility in allocating the offering proceeds. See "Use of proceeds." Accordingly, you will be relying on the judgment of our management with regard to the allocation of these net proceeds, and you will not have the opportunity, as part of your investment decision, to assess whether the proceeds are being allocated appropriately. It is possible that the proceeds will be invested in a way that does not yield a favorable, or any, return for our company.

If securities or industry analysts do not publish research or reports about our business, or if they issue adverse or misleading research or reports regarding us, our business or our market, our stock price and trading volume could decline.

The trading market for our common stock will be influenced by the research and reports that industry or securities analysts publish about us, our business or our market. We do not currently have and may never obtain research coverage by securities and industry analysts. If no or few securities or industry analysts commence coverage of us, the trading price for our stock would be negatively impacted. In the event we obtain securities or industry analyst coverage, if any of the analysts who cover us issue adverse or misleading research or reports regarding us, our business model, our intellectual property, our stock performance or our market, or if our operating results fail to meet the expectations of analysts, our stock price would likely decline. If one or more of these analysts cease coverage of us or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

Our principal stockholders and management own a significant percentage of our stock and will be able to exert significant control over matters subject to stockholder approval and their interests may conflict with your interests as an owner of our common stock.

Based on the beneficial ownership of our common stock as of November 1, 2020, after this offering, our executive officers and directors, together with holders of 5% or more of our outstanding common stock before this offering and their respective affiliates, will beneficially own approximately % of our outstanding common stock (assuming no exercise of the underwriters' option to purchase additional shares of common stock). In addition, as of November 1, 2020, Himalaya Parent LLC owned 40.22% of our common stock after giving effect to the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock. Dr. Jay M. Short, Ph.D, our Chairman and Chief Executive Officer, and Ms. Carolyn Anderson Short, our Chief of Intellectual Property and Strategy and Assistant Secretary, are managers of Himalaya Parent LLC and collectively make investment decisions on behalf of Himalaya Parent LLC. The owners of Himalaya Parent LLC include Dr. Jay Short, Ms. Anderson Short, Scott Smith, members of our board of directors, other employees of us and other equity holders of BioAtla, LLC prior to the LLC Conversion.

As a result, Himalaya Parent LLC, Dr. Short, Ms. Short and our other principal stockholders will continue to have significant influence over the outcome of corporate actions requiring stockholder approval, including the election of directors, any merger, consolidation or sale of all or substantially all of our assets and any other significant corporate transaction. The interests of these stockholders may not be the same as or may even conflict with your interests. For example, these stockholders could delay or prevent a change of control of our company, even if such a change of control would benefit our other stockholders, which could deprive our stockholders of an opportunity to receive a premium for their common stock as part of a sale of our company or our assets and might affect the prevailing market price of our common stock. The significant concentration of stock ownership may adversely affect the trading price of our common stock due to investors' perception that conflicts of interest may exist or arise.

In addition, we have entered into certain related party transactions with Himalaya Therapeutics SEZC, Inversagen, LLC and BioAtla Holdings, LLC, including various licensing arrangements with respect to certain CAB antibodies. Dr. Short and Ms. Anderson Short are each managers of Inversagen, LLC and BioAtla Holdings, LLC and directors of Himalaya Therapeutics SEZC. In addition, Ms. Anderson Short is also an officer of Himalaya Therapeutics SEZC. These related party transactions, and any future related party transactions, create the possibility of actual conflicts of interest with regard to Dr. Short and Ms. Anderson Short.

Participation in this offering by our existing stockholders and/or their affiliated entities may reduce the public float for our common stock.

To the extent certain of our existing stockholders and their affiliated entities participate in this offering, such purchases would reduce the nonaffiliate public float of our shares, meaning the number of shares of our common stock that are not held by officers, directors and controlling stockholders. A reduction in the public float could reduce the number of shares that are available to be traded at any given time, thereby adversely impacting the liquidity of our common stock and depressing the price at which you may be able to sell shares of common stock purchased in this offering.

Sales of a substantial number of shares of our common stock in the public market could cause our stock price to fall.

Our common stock price could decline as a result of sales of a large number of shares of common stock after this offering or the perception that these sales could occur. These sales, or the possibility that these sales may occur, might also make it more difficult for us to sell equity securities in the future at a time and price that we deem appropriate.

Upon the completion of this offering, _____ shares of common stock (including _____ RSUs) will be outstanding (_____ shares if the underwriters exercise their option to purchase additional shares from us in full), based on the number of shares outstanding as of September 30, 2020.

All shares of common stock expected to be sold in this offering will be freely tradable without restriction or further registration under the Securities Act unless held by our “affiliates” as defined in Rule 144 under the Securities Act, or Rule 144. The resale of the remaining _____ shares, or approximately _____ % of our outstanding shares of common stock following this offering, is currently prohibited or otherwise restricted as a result of securities law provisions, market standoff agreements entered into by certain of our stockholders with us or lock-up agreements entered into by our stockholders with the underwriters in connection with this offering. However, subject to applicable securities law restrictions, these shares will be able to be sold in the public market beginning 181 days after the date of this prospectus. The representatives of the underwriters may release some or all of the shares of common stock subject to lock-up agreements at any time in their sole discretion and without notice, which would allow for earlier sales of shares in the public market. Shares issued upon the exercise of stock options and warrants outstanding under our equity incentive plans or pursuant to future awards granted under those plans will become available for sale in the public market to the extent permitted by the provisions of applicable vesting schedules, market stand-off agreements and/or lock-up agreements, as well as Rules 144 and 701 under the Securities Act. For more information, see “Shares eligible for future sale.”

Upon the completion of this offering, the holders of approximately _____ shares of common stock, or _____ % of our outstanding shares following this offering, will have rights, subject to certain conditions, to require us to file registration statements covering the sale of their shares or to include their shares in registration statements that we may file for ourselves or our other stockholders. We also intend to register the offer and sale of all shares of common stock that we may issue under our equity compensation plans. Once we register the offer and sale of shares for the holders of registration rights and shares that may be issued under our equity incentive plans, these shares will be able to be sold in the public market upon issuance, subject to applicable securities laws and the lock-up agreements described under “Underwriting.”

We are an “emerging growth company” and a “smaller reporting company,” and the reduced disclosure requirements applicable to emerging growth companies and smaller reporting companies may make our common stock less attractive to investors.

We are an “emerging growth company,” as defined in the JOBS Act. We will remain an emerging growth company until the earlier of (i) the last day of the fiscal year (a) following the fifth anniversary of the completion of this offering, (b) in which we have total annual gross revenue of at least \$1.07 billion or (c) in which we are deemed to be a large accelerated filer, which means the market value of our common stock that is held by non-affiliates exceeded \$700.0 million as of the prior June 30th and (ii) the date on which we have issued more than \$1.0 billion in non-convertible debt during the prior three-year period.

An emerging growth company may take advantage of specified reduced reporting requirements and other burdens that are otherwise applicable generally to public companies. These provisions include:

- being permitted to present only two years of audited financial statements and only two years of related Management’s discussion and analysis of financial condition and results of operations in this prospectus;
- not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act;
- an exemption from compliance with any new requirements adopted by the Public Company Accounting Oversight Board regarding mandatory audit firm rotations;
- reduced disclosure obligations regarding executive compensation in our periodic reports, proxy statements and registration statements; and
- exemptions from the requirement to hold a nonbinding advisory vote on executive compensation and to obtain stockholder approval of any golden parachute payments not previously approved.

We have elected to take advantage of certain of the reduced disclosure obligations in the registration statement of which this prospectus is a part and may elect to take advantage of other reduced reporting requirements in future filings. As a result, the information that we provide to our investors may be different from the information you might receive from other public reporting companies that are not emerging growth companies in which you hold equity interests. The JOBS Act provides that an emerging growth company can take advantage of an extended transition period for complying with new or revised accounting standards applicable to public companies until those standards would otherwise apply to private companies. We have elected to take advantage of such extended transition period, which means that when a standard is issued or revised and it has different application dates for public or private companies, we will adopt the new or revised standard at the time private companies adopt the new or revised standard and will do so until such time that we either irrevocably elect to “opt out” of such extended transition period or no longer qualify as an emerging growth company. As a result of this election, our financial statements may not be comparable to companies that comply with public company effective dates. We may choose to early adopt any new or revised accounting standards whenever such early adoption is permitted for private companies.

We are also a “smaller reporting company,” meaning that the market value of our shares held by non-affiliates plus the proposed aggregate amount of gross proceeds to us as a result of this offering is less than \$700 million and our annual revenue was less than \$100 million during the most recently completed fiscal year. We may continue to be a smaller reporting company after this offering if either (i) the market value of our shares held by non-affiliates is less than \$250 million or (ii) our annual revenue was less than \$100 million during the most recently completed fiscal year and the market value of our shares held by non-affiliates is less than \$700 million. If we are a smaller reporting company at the time we cease to be an emerging growth company, we

[Table of Contents](#)

may continue to rely on exemptions from certain disclosure requirements that are available to smaller reporting companies. Specifically, as a smaller reporting company, we may choose to present only the two most recent fiscal years of audited financial statements in our Annual Report on Form 10-K and have reduced disclosure obligations regarding executive compensation, and, similar to emerging growth companies, if we are a smaller reporting company with less than \$100 million in annual revenue, we would not be required to obtain an attestation report on internal control over financial reporting issued by our independent registered public accounting firm.

Anti-takeover provisions in our charter documents to be in effect upon the completion of this offering and under Delaware law could make an acquisition of us, which may be beneficial to our stockholders, more difficult and may prevent attempts by our stockholders to replace or remove our current management.

Provisions in the amended and restated certificate of incorporation and our amended and restated bylaws to be in effect upon the completion of this offering may delay or prevent an acquisition of us or a change in our management. In addition, these provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our board of directors. Because our board of directors is responsible for appointing the members of our management team, these provisions could in turn affect any attempt by our stockholders to replace current members of our management team. These provisions include:

- a prohibition on actions by our stockholders by written consent;
- a requirement that special meetings of stockholders be called only by the chairman of our board of directors, our chief executive officer, or our board of directors pursuant to a resolution adopted by a majority of the total number of authorized directors;
- advance notice requirements for election to our board of directors and for proposing matters that can be acted upon at stockholder meetings;
- a requirement that directors may only be removed “for cause” and only with 66 2/3% voting stock of our stockholders;
- a requirement that only the board of directors may change the number of directors and fill vacancies on the board;
- division of our board of directors into three classes, serving staggered terms of three years each; and
- the authority of the board of directors to issue preferred stock with such terms as the board of directors may determine.

Moreover, because we are incorporated in Delaware, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, as amended, which prohibits a person who owns in excess of 15% of our outstanding voting stock from merging or combining with us for a period of three years after the date of the transaction in which the person acquired in excess of 15% of our outstanding voting stock, unless the merger or combination is approved in a prescribed manner. These provisions would apply even if the proposed merger or acquisition could be considered beneficial by some stockholders.

As a California-domiciled public company, we will be required to have at least two or three women on our board of directors by the end of 2021, depending on the size of our board at the time.

Our success depends in part on our continued ability to attract, retain and motivate highly qualified individuals to our board of directors. As a public company headquartered in California, we will be required to have two or

three women on our board of directors by the end of 2021, depending on the size of our board of directors at the time. We expect to have seven seats on our board of directors which will require us to have at least three women on our board of directors by the end of 2021. While we currently have one woman on the board of directors, recruiting and retaining board members carries uncertainty, and failure to comply with this California requirement will result in financial penalties.

We will incur increased costs as a result of operating as a public company, and our management will be required to devote substantial time to new compliance initiatives and corporate governance practices. Additionally, if we fail to maintain proper and effective internal controls, our ability to produce accurate financial statements on a timely basis could be impaired.

As a public company, and particularly after we are no longer an emerging growth company or a smaller reporting company, we will incur significant legal, accounting and other expenses that we did not incur as a private company. The Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the listing requirements of The Nasdaq Global Market and other applicable securities rules and regulations impose various requirements on public companies, including establishment and maintenance of effective disclosure and financial controls and corporate governance practices. Also the Exchange Act requires, among other things, that we file annual, quarterly and current reports with respect to our business and operating results. Our management and other personnel will need to devote a substantial amount of time to these compliance initiatives. Moreover, these rules and regulations will increase our legal and financial compliance costs and will make some activities more time-consuming and costly. For example, we expect that these rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced policy limits and coverage or to incur substantial costs to maintain the same or similar coverage. These rules and regulations could also make it more difficult for us to attract and retain qualified members of our board of directors or our board committees or as executive officers. However, these rules and regulations are often subject to varying interpretations, in many cases due to their lack of specificity, and, as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices.

In addition, as a public company, we will be required to incur additional costs and obligations in order to comply with SEC rules that implement Section 404 of the Sarbanes-Oxley Act. Under these rules, beginning with our second annual report on Form 10-K after we become a public company, we will be required to make a formal assessment of the effectiveness of our internal control over financial reporting, and once we cease to be an emerging growth company or a smaller reporting company with less than \$100 million in annual revenue, we will be required to include an attestation report on internal control over financial reporting issued by our independent registered public accounting firm. To achieve compliance with Section 404 within the prescribed period, we will be engaging in a process to document and evaluate our internal control over financial reporting, which is both costly and challenging. In this regard, we will need to continue to dedicate internal resources, potentially engage outside consultants and adopt a detailed work plan to assess and document the adequacy of our internal control over financial reporting, continue steps to improve control processes as appropriate, validate through testing that controls are designed and operating effectively, and implement a continuous reporting and improvement process for internal control over financial reporting.

The rules governing the standards that must be met for management to assess our internal control over financial reporting are complex and require significant documentation, testing and possible remediation to meet the detailed standards under the rules. During the course of its testing, our management may identify material weaknesses or deficiencies which may not be remedied in time to meet the deadline imposed by the Sarbanes-Oxley Act. Our internal control over financial reporting will not prevent or detect all errors and all fraud.

[Table of Contents](#)

If we are not able to comply with the requirements of Section 404 of the Sarbanes-Oxley Act in a timely manner, or if we are unable to maintain proper and effective internal controls, we may not be able to produce timely and accurate financial statements. If that were to happen, the market price of our stock could decline and we could be subject to sanctions or investigations by the stock exchange on which our common stock is listed, the SEC or other regulatory authorities. In addition, if we are not able to continue to meet these requirements, we may not be able to remain listed on The Nasdaq Global Market.

Our disclosure controls and procedures may not prevent or detect all errors or acts of fraud.

Upon the completion of this offering, we will become subject to the periodic reporting requirements of the Exchange Act. We designed our disclosure controls and procedures to reasonably assure that information we must disclose in reports we file or submit under the Exchange Act is accumulated and communicated to management, and recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. We believe that any disclosure controls and procedures or internal controls and procedures, no matter how well-conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

These inherent limitations include the facts that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by an unauthorized override of the controls. Accordingly, because of the inherent limitations in our control system, misstatements due to error or fraud may occur and not be detected.

Because we do not anticipate paying any cash dividends on our capital stock in the foreseeable future, your ability to achieve a return on your investment will depend on appreciation of the value of our common stock.

We have never declared or paid cash dividends on our capital stock. We currently intend to retain all of our future earnings, if any, to finance the growth and development of our business and do not anticipate declaring or paying any cash dividends for the foreseeable future. Any return to stockholders will therefore be limited to any appreciation in the value of our common stock, which is not certain.

We may be subject to securities litigation, which is expensive and could divert our management's attention.

In the past, companies that have experienced volatility in the market price of their securities have been subject to securities class action litigation. We may be the target of this type of litigation in the future. Regardless of the merits or the ultimate results of such litigation, securities litigation brought against us could result in substantial costs and divert our management's attention from other business concerns.

Our certificate of incorporation and bylaws to be effective upon the completion of this offering designate the Court of Chancery of the State of Delaware as the sole and exclusive forum for certain types of actions and proceedings that may be initiated by our stockholders, which could limit our stockholders' ability to obtain a favorable judicial forum for disputes with us or our directors, officers or employees.

Our amended and restated certificate of incorporation to be effective upon the completion of this offering provides that, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, if the Court of Chancery of the State of Delaware does not have jurisdiction, the federal district court for the District of Delaware) shall be the sole and exclusive forum for the following types of proceedings: (i) any derivative action or proceeding brought on behalf of our company, (ii) any action asserting a claim of breach of a fiduciary duty owed by any of our directors, officers, employees or stockholders to our

company or our stockholders, (iii) any action asserting a claim arising pursuant to any provision of the General Corporation Law of the State of Delaware or as to which the General Corporation Law of the State of Delaware confers jurisdiction on the Court of Chancery of the State of Delaware or (iv) any action asserting a claim arising pursuant to any provision of our amended and restated certificate of incorporation or amended and restated bylaws (in each case, as they may be amended from time to time) or governed by the internal affairs doctrine. This provision would not apply to suits brought to enforce a duty or liability created by the Exchange Act or any other claim for which the U.S. federal courts have exclusive jurisdiction. Furthermore, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all such Securities Act actions. Accordingly, both state and federal courts have jurisdiction to entertain such claims. Our amended and restated bylaws further provide that the federal district courts of the United States of America will be the exclusive forum to the fullest extent permitted by law, for resolving any complaint asserting a cause of action arising under the Securities Act. This choice of forum provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and employees. Alternatively, if a court were to find these provisions of our amended and restated certificate of incorporation and amended and restated bylaws inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect our business and financial condition. Any person or entity purchasing or otherwise acquiring any interest in shares of our capital stock shall be deemed to have notice of and to have consented to the provisions of our amended and restated certificate of incorporation and amended and restated bylaws described above.

Special note regarding forward-looking statements

This prospectus, including the sections entitled “Prospectus summary,” “Risk factors,” “Management’s discussion and analysis of financial condition and results of operations” and “Business,” contains forward-looking statements. We may, in some cases, use words such as “anticipate,” “believe,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “potential,” “predict,” “project,” “should,” “will,” “would” or the negative of those terms, and similar expressions that convey uncertainty of future events or outcomes to identify these forward-looking statements. Any statements contained herein that are not statements of historical facts may be deemed to be forward-looking statements. Forward-looking statements in this prospectus include statements about:

- our ability to develop and advance our current product candidates and programs into, and successfully complete, clinical trials;
- the ability of our clinical trials to demonstrate safety and efficacy of our product candidates and other positive results;
- the size of the market opportunity for our product candidates, including our estimates of the number of patients who suffer from the diseases we are targeting;
- our manufacturing, commercialization and marketing capabilities and strategy;
- our plans and strategies to develop and commercialize our CAB antibodies;
- our plans to further develop our technology platform and expand our pipeline of product candidates;
- the potential benefits and advantages of our current and future product candidates that we may develop from our patented technology platform;
- the impact of the COVID-19 pandemic on our business, financial condition, results of operations, and prospects;
- the timing or likelihood of regulatory filings and approvals for our product candidates;
- regulatory developments in the United States and Europe and other foreign countries;
- our expectations and plans to obtain funding for our operations, including from our existing and potential future collaboration and licensing agreements;
- our expectations regarding our ability to obtain and maintain intellectual property protection for our technology platform and product candidates;
- the potential benefits of our strategic relationships and our plans to pursue additional strategic relationships;
- our continued reliance on third parties to conduct additional clinical trials of our product candidates and for the manufacture of our product candidates for preclinical studies and clinical trials;
- our anticipated use of proceeds from this offering; and
- our estimates regarding expenses, future revenue, capital requirements and needs for additional financing.

These forward-looking statements reflect our management’s beliefs and views with respect to future events and are based on estimates and assumptions as of the date of this prospectus and are subject to risks and uncertainties. We discuss many of these risks in greater detail under “Risk factors.” Moreover, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for

[Table of Contents](#)

our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. Given these uncertainties, you should not place undue reliance on these forward-looking statements.

You should read this prospectus and the documents that we reference in this prospectus and have filed as exhibits to the registration statement, of which this prospectus is a part, completely and with the understanding that our actual future results may be materially different from what we expect. We qualify all of the forward-looking statements in this prospectus by these cautionary statements. Except as required by law, we undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

Market, industry and other data

This prospectus includes statistical and other industry and market data that we obtained from independent industry publications and research, surveys and studies conducted by independent third parties as well as our own estimates of the prevalence of certain diseases and conditions. The market data used in this prospectus involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such data. Our estimates of the patient population with the potential to benefit from treatment with any product candidates we may develop include several key assumptions based on our industry knowledge, industry publications and third-party research, which may be based on a small sample size and may fail to accurately reflect the addressable patient population. While we believe that our internal assumptions are reasonable, no independent source has verified such assumptions.

Use of proceeds

We estimate that we will receive net proceeds of approximately \$ million (or approximately \$ million if the underwriters' option to purchase additional shares is exercised in full) from the sale of the shares of common stock offered by us in this offering, based on an assumed initial public offering price of \$ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

A \$1.00 increase (decrease) in the assumed initial public offering price of \$ per share, which is the midpoint of the price range set forth on the cover page of this prospectus, would increase (decrease) the net proceeds to us from this offering by approximately \$ million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. Similarly, a 1.0 million share increase (decrease) in the number of shares offered by us, as set forth on the cover page of this prospectus, would increase (decrease) the net proceeds to us by \$ million, assuming the assumed initial public offering price of \$ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, remains the same, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

The principal purposes of this offering are to obtain additional capital to support our operations, establish a public market for our common stock and facilitate our future access to the public capital markets. More specifically, we anticipate that we will use the net proceeds from this offering, together with our existing cash and cash equivalents, as follows:

- approximately \$ million to fund the clinical development of BA3011 for the treatment of soft tissue and bone sarcoma patients through a Phase 2 clinical trial and for the treatment of NSCLC patients through a Phase 2 clinical trial;
- approximately \$ million to fund the clinical development of BA3021 for the treatment of NSCLC and for the treatment of melanoma, each through a Phase 2 clinical trial;
- approximately \$ million to fund IND-enabling studies and the clinical development of our CAB bispecific candidates through one or more Phase 1 clinical trials;
- approximately \$ million to fund our ongoing efforts to develop additional clinical product candidates from our CAB platform; and
- the remaining proceeds for working capital and other general corporate purposes.

Based on our current operating plan, our current cash and cash equivalents, together with the anticipated proceeds from this offering, are expected to be sufficient to fund our ongoing operations at least through . However, we have based this estimate on assumptions that may prove to be wrong, and we could utilize our available capital resources sooner than we currently expect. The net proceeds from this offering, together with our existing cash and cash equivalents, will not be sufficient to fund any of our product candidates through regulatory approval, and we anticipate needing to raise additional capital to complete the development and commercialization of our product candidates. Our expected use of net proceeds from this offering represents our current intentions based upon our present plans and business condition. As of the date of this prospectus, we cannot predict with certainty all of the particular uses for the net proceeds to be received upon the completion of this offering or the amounts that we will actually spend on the uses set forth above. The amounts and timing of our actual use of the net proceeds will vary depending on numerous factors, including

[Table of Contents](#)

the timing and progress of our preclinical and clinical development programs, as well as those of our collaborator, the cost and timing of regulatory approvals, the amount of payments we receive under our existing collaboration and whether we enter into future licensing or collaboration arrangements. As a result, our management will have broad discretion in the application of the net proceeds, and investors will be relying on our judgment regarding the application of the net proceeds of this offering.

Pending our use of the net proceeds of this offering, we plan to invest the net proceeds from this offering in short- and intermediate-term, interest-bearing obligations, investment-grade instruments, certificates of deposit or direct or guaranteed obligations of the U.S. government. We cannot predict whether the proceeds invested will yield a favorable return.

Dividend policy

We have never declared or paid any cash dividends on our capital stock. We currently intend to retain all available funds and any future earnings to support our operations and finance the growth and development of our business. We do not intend to pay cash dividends on our common stock for the foreseeable future. Any future determination related to our dividend policy will be made at the discretion of our board of directors and will depend upon, among other factors, our results of operations, financial condition, capital requirements, contractual restrictions, business prospects and other factors our board of directors may deem relevant.

LLC conversion

On July 10, 2020, we completed a corporate reorganization in which we, Himalaya Parent LLC, our wholly owned subsidiary, and BioAtla MergerSub LLC, our wholly owned indirect subsidiary, entered into an Agreement and Plan of Merger, or the Merger Agreement, pursuant to which BioAtla, LLC was merged into and with BioAtla MergerSub LLC, with BioAtla, LLC surviving, and the equity holders of BioAtla, LLC immediately prior to the effective time of the Merger Agreement received membership interests, on a one-for-one basis, of Himalaya Parent LLC as consideration. We refer to such transactions as the “Corporate Reorganization.” As part of the Corporate Reorganization, all of the holders of our outstanding convertible notes, representing \$21.8 million principal amount in the aggregate plus related accrued interest, exchanged their convertible notes for membership interests in Himalaya Parent LLC. In addition, on July 10, 2020, BioAtla, LLC distributed to Himalaya Parent LLC all of its equity interests in Himalaya Therapeutics SEZC, a majority-owned subsidiary that is engaged in the development of a set of antibodies in the field of oncology primarily in Greater China.

In connection with the Series D preferred stock financing, which initially closed on July 13, 2020, we converted from a limited liability company into a Delaware corporation pursuant to a statutory conversion and changed our name from BioAtla, LLC to BioAtla, Inc. In connection with the LLC Conversion, all of the then-outstanding units of BioAtla, LLC were converted into shares of our common stock and our then-outstanding warrants to purchase units of BioAtla, LLC were converted into warrants to purchase shares of common stock of BioAtla, Inc.

Following the LLC Conversion, BioAtla, Inc. continued to hold all property and assets of BioAtla, LLC and assumed all of the obligations of BioAtla, LLC (exclusive of the profits interest liability related to awards granted under BioAtla, LLC’s profits interest plan), as of July 13, 2020. BioAtla, Inc. is governed by a certificate of incorporation filed with the Delaware Secretary of State and its bylaws. Immediately prior to the completion of this offering, we will adopt our amended and restated certificate of incorporation and amended and restated bylaws, the material portions of which are described under the heading “Description of capital stock.” Upon completion of the LLC Conversion, certain members of the advisory board of BioAtla, LLC became members of the board of directors of BioAtla, Inc. and officers of BioAtla, LLC became the officers of BioAtla, Inc. Following the Corporate Reorganization, the LLC Conversion and the distribution of Himalaya Therapeutics SEZC, BioAtla, Inc. is a single legal entity with no consolidated variable interest entities, or VIEs, or subsidiaries. BioAtla, Inc. currently has a number of license agreements with related parties, including BioAtla Holdings, LLC, Inversagen, LLC and Himalaya Therapeutics SEZC, and also with F1 Oncology, Inc., who is not a related party. These license agreements represent variable interests in entities that meet the definition of a VIE, but these agreements do not provide us with the power to direct the activities that are most significant to the economic success of these entities, so we are not the primary beneficiary of these VIEs and do not currently consolidate any VIEs. None of the related party VIEs currently have any material operating activities. See Note 9 and Note 11 to our consolidated financial statements included elsewhere in this prospectus for further information about these related parties and VIEs. Himalaya Parent LLC does not control BioAtla, Inc. as it does not hold the majority of the voting shares of BioAtla, Inc. Except as otherwise noted herein, the consolidated financial statements included elsewhere in this prospectus are those of BioAtla, LLC and its consolidated subsidiaries prior to the LLC Conversion and those of BioAtla, Inc. subsequent to the LLC Conversion.

Investors in this offering will acquire only, and this prospectus describes only the offering of, common stock representing shares of BioAtla, Inc. Unless otherwise indicated or the context otherwise requires, all references in this prospectus to the terms “BioAtla,” “we,” “us” and “our” refer, prior to the LLC Conversion, to BioAtla, LLC and, after the LLC Conversion, to BioAtla, Inc.

Capitalization

The following table sets forth our cash and cash equivalents and our capitalization as of September 30, 2020:

- on an actual basis;
- on a pro forma basis to give effect to (i) the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock into an aggregate of 199,791,519 shares of common stock and the related reclassification of the carrying value of our convertible preferred stock to permanent equity and (ii) the filing and effectiveness of our amended and restated certificate of incorporation; and
- on a pro forma as adjusted basis, reflecting the pro forma adjustments discussed above and giving further effect to the sale by us of _____ shares of our common stock in this offering at an assumed initial public offering price of \$ _____ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

The pro forma information below is illustrative only and our cash and cash equivalents and our capitalization following the completion of this offering will depend on the actual initial public offering price and other terms of this offering determined at pricing. You should read this table together with “Selected consolidated financial data,” “LLC conversion”, “Unaudited pro forma condensed consolidated financial information”, “Management’s discussion and analysis of financial condition and results of operations” and our financial statements and the related notes appearing elsewhere in this prospectus.

[Table of Contents](#)

- (1) A \$1.00 increase (decrease) in the assumed initial public offering price of \$ _____ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus would increase (decrease) the amount of each of cash and cash equivalents, additional paid-in capital and total capitalization by approximately \$ _____ million, assuming the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. Similarly, a 1.0 million share increase (decrease) in the number of shares offered by us, as set forth on the cover page of this prospectus, would increase (decrease) each of cash and cash equivalents, additional paid-in capital and total capitalization by \$ _____ million, assuming the assumed initial public offering price of \$ _____ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, remains the same, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

The number of shares of our common stock to be outstanding after this offering is based on 280,652,170 shares of common stock outstanding as of September 30, 2020, after giving effect to the LLC Conversion described under the “LLC conversion,” and excludes:

- 9,329,799 shares of common stock issuable upon the exercise of outstanding warrants as of September 30, 2020, at a weighted-average exercise price of \$7.50 per share;
- _____ shares of common stock issuable upon the vesting of restricted stock units granted to certain of our executive officers, directors, employees and consultants under the 2020 Plan;
- _____ shares of common stock reserved for future issuance under the 2020 Plan, as well as any shares of our common stock that become available pursuant to provisions in the 2020 Plan that automatically increase the share reserve under our 2020 Plan or the other provisions of the 2020 Plan pursuant to which additional shares may become available for issuance under the 2020 Plan; and
- _____ shares of our common stock that will become available for future issuance under the ESPP, and shares of our common stock that become available pursuant to provisions in the ESPP that automatically increase the share reserve under the ESPP.

Dilution

If you invest in our common stock in this offering, your ownership interest will be immediately diluted to the extent of the difference between the initial public offering price per share of our common stock and the pro forma as adjusted net tangible book value per share of our common stock immediately after this offering.

Our historical net tangible book value (deficit) as of September 30, 2020, was \$(74.5) million, or \$(0.92) per share of our common stock. Our historical net tangible book value (deficit) is the amount of our total tangible assets less our total liabilities and convertible preferred stock. Historical net tangible book value (deficit) per share is our historical net tangible book value (deficit) divided by the number of shares of common stock outstanding as of September 30, 2020.

Our pro forma net tangible book value as of September 30, 2020 was \$24.3 million, or \$0.09 per share of common stock, based on the total number of shares of common stock outstanding as of September 30, 2020, after giving effect to: (i) the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock into an aggregate of 199,791,519 shares of common stock and the related reclassification of the carrying value of our convertible preferred stock to permanent equity and (ii) the filing and effectiveness of our amended and restated certificate of incorporation.

Our pro forma as adjusted net tangible book value as of September 30, 2020, was \$ _____ million, or \$ _____ per share of common stock. Pro forma as adjusted net tangible book value is our pro forma net tangible book value, after giving further effect to (i) the sale of shares of our common stock in this offering at an assumed initial public offering price of \$ _____ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us and (ii) no issuances of shares of Class B common stock upon the completion of this offering. This amount represents an immediate increase in pro forma as adjusted net tangible book value of \$ _____ per share to our existing stockholders, and an immediate dilution of \$ _____ per share to new investors participating in this offering.

The following table illustrates this dilution on a per share basis:

Assumed initial public offering price per share	\$ _____
Historical net tangible book value (deficit) per share as of September 30, 2020	\$(0.92)
Pro forma increase in net tangible book value per share as of September 30, 2020 attributable to the pro forma adjustments described above	\$ 1.01
Pro forma net tangible book value (deficit) per share as of September 30, 2020	\$ 0.09
Increase in pro forma net tangible book value per share attributable to investors participating in this offering	\$ _____
Pro forma as adjusted net tangible book value per share after this offering	\$ _____
Pro forma as adjusted dilution per share to investors participating in this offering	\$ _____

A \$1.00 increase (decrease) in the assumed initial public offering price of \$ _____ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, would increase (decrease) the pro forma as adjusted net tangible book value per share after this offering by approximately \$ _____ per share and the pro forma per share dilution to investors participating in this offering by approximately \$ _____ per share, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

[Table of Contents](#)

Similarly, a 1.0 million share increase (decrease) in the number of shares offered by us, as set forth on the cover page of this prospectus, would increase (decrease) the pro forma as adjusted net tangible book value per share after this offering by approximately \$ and decrease (increase) the pro forma as adjusted per share dilution to investors participating in this offering by approximately \$ per share, assuming the assumed initial public offering price of \$ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, remains the same, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

If the underwriters exercise in full their option to purchase additional shares of our common stock in this offering, the pro forma as adjusted net tangible book value will increase by \$, representing an immediate increase in pro forma as adjusted net tangible book value to existing stockholders of \$ per share and an immediate decrease (increase) of pro forma as adjusted dilution of \$ per share to new investors participating in this offering, at an assumed initial public offering price of \$ per share, which is the midpoint of the estimated price range set forth on the cover page of this prospectus, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

The number of shares of our common stock to be outstanding after this offering is based on 280,652,170 shares of common stock outstanding as of September 30, 2020, after giving effect to the LLC Conversion described under "LLC conversion," and excludes:

- 9,329,799 shares of common stock issuable upon the exercise of outstanding warrants as of September 30, 2020, at a weighted-average exercise price of \$7.50 per share;
- shares of common stock issuable upon the vesting of restricted stock units granted to certain of our executive officers, directors, employees and consultants under the 2020 Plan;
- shares of common stock reserved for future issuance under the 2020 Plan, as well as any shares of our common stock that become available pursuant to provisions in the 2020 Plan that automatically increase the share reserve under our 2020 Plan or the other provisions of the 2020 Plan pursuant to which additional shares may become available for issuance under the 2020 Plan; and
- shares of our common stock that will become available for future issuance under the ESPP, and shares of our common stock that become available pursuant to provisions in the ESPP that automatically increase the share reserve under the ESPP.

We may choose to raise additional capital through the issuance of equity or convertible debt securities due to market conditions or strategic considerations even if we believe we have sufficient funds for our current or future operating plans. To the extent we issue additional shares of common stock or other equity or convertible debt securities in the future, there will be further dilution to investors participating in this offering.

Selected consolidated financial data

The following selected consolidated financial data should be read together with our consolidated financial statements and related notes and “Management’s discussion and analysis of financial condition and results of operations” appearing elsewhere in this prospectus. Our historical results are not necessarily indicative of the results that may be expected in the future. We derived the selected consolidated statement of operations data for the years ended December 31, 2018 and 2019 and the selected consolidated balance sheet data as of December 31, 2018 and 2019 from our audited consolidated financial statements and related notes appearing elsewhere in this prospectus. We derived the selected consolidated statements of operations data for the nine months ended September 30, 2019 and 2020 and the selected balance sheet data as of September 30, 2020 from our unaudited interim consolidated financial statements included elsewhere in this prospectus. In our opinion, these unaudited consolidated financial statements have been prepared on a basis consistent with our audited consolidated financial statements and contain all adjustments, consisting only of normal and recurring adjustments, necessary for a fair presentation of such financial data.

Unaudited pro forma condensed consolidated financial information

The following unaudited pro forma condensed consolidated financial information has been prepared in accordance with Article 11 of Regulation S-X and is based on our historical consolidated financial statements as adjusted to give effect to the transactions described below and to reflect the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock into an aggregate of 199,791,519 shares of common stock and the related reclassification of the carrying value of our convertible preferred stock to permanent equity. The assumptions and estimates underlying the unaudited adjustments to the pro forma condensed consolidated financial information are described in the accompanying notes, which should be read together with the pro forma condensed consolidated financial information. The pro forma adjustments are based on currently available information and certain estimates and assumptions we believe are reasonable. Therefore, the actual effects of the transaction may differ from the pro forma adjustments. However, management believes that the pro forma adjustments provide a reasonable basis for presenting the significant effects of the transactions.

Our unaudited pro forma consolidated statements of operations and related notes are presented for illustrative purposes only and should not be relied upon as an indication of the operating results that we would have achieved if the transactions described below had taken place on another specified date. In addition, future results may vary significantly from the results reflected in the unaudited pro forma consolidated statements of operations and should not be relied on as an indication of our future results.

The unaudited pro forma condensed balance sheet is based on our historical balance sheet as of September 30, 2020.

The unaudited pro forma condensed consolidated statement of operations for the year ended December 31, 2019 and the nine months ended September 30, 2020 is based on our historical consolidated statement of operations for those dates and gives effect to the transactions below as if they had occurred on January 1, 2019.

In July 2020, BioAtla, LLC completed a series of transactions, or the Corporate Reorganization, in connection with converting from a Delaware limited liability company into a Delaware corporation and completing a Series D preferred stock financing. The Corporate Reorganization involved the formation of Himalaya Parent LLC as a wholly owned subsidiary of BioAtla, LLC and the formation of BioAtla MergerSub LLC, as a wholly owned subsidiary of Himalaya Parent LLC. Under the Agreement and Plan of Merger dated July 10, 2020 between BioAtla, LLC, Himalaya Parent LLC and BioAtla MergerSub LLC, or the Merger Agreement, BioAtla, LLC was merged into and with BioAtla MergerSub LLC, with BioAtla, LLC surviving, and the members of BioAtla, LLC immediately prior to the effective time of the Merger Agreement received membership interests, on a one-for-one basis, of Himalaya Parent LLC as consideration. The Himalaya Parent LLC operating agreement provided identical equity rights for the then outstanding units of BioAtla, LLC. In addition:

- (i) Himalaya Parent LLC assumed the profits interest liability of BioAtla, LLC;
- (ii) BioAtla, LLC distributed to Himalaya Parent LLC its equity interests in Himalaya Therapeutics SEZC, a majority-owned subsidiary which is engaged in the development of a set of antibodies in the field of oncology primarily in Greater China;
- (iii) BioAtla, LLC converted into a Delaware corporation pursuant to a statutory conversion and changed its name to BioAtla, Inc. Following the Corporate Reorganization, Himalaya Parent LLC owns 59,164,808 shares of BioAtla, Inc. Series D preferred stock and 80,860,651 shares of BioAtla, Inc. common stock, and BioAtla, Inc. holds all property, assets and obligations of BioAtla, LLC (exclusive of the profits interest liability related to awards granted under BioAtla, LLC's profits interest plan) upon completion of the Corporate Reorganization. In addition, the then-outstanding warrants to purchase

[Table of Contents](#)

equity of BioAtla, LLC were converted into warrants to purchase shares of common stock of BioAtla, Inc.; and

- (iv) BioAtla, Inc. issued an aggregate of 59,164,808 shares of Series D preferred stock to Himalaya Parent LLC and Himalaya Parent LLC issued an aggregate of 59,164,808 Class D units in connection with the holders of convertible notes of BioAtla, LLC converting their convertible notes into Class D units of Himalaya Parent LLC.

In connection with the Corporate Reorganization, we entered into a Series D Preferred Stock Purchase Agreement pursuant to which we issued 140,626,711 shares of Series D preferred stock at \$0.51554931 per share.

Notes to the unaudited pro forma condensed consolidated financial information

1. Pro forma adjustments

(a) To reflect the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock into an aggregate of 199,791,519 shares of common stock and the related reclassification of the carrying value of our convertible preferred stock to permanent equity.

(b) To reflect: (i) the settlement of all outstanding convertible notes with a carrying value of \$27.9 million, including related accrued interest, embedded derivatives and unamortized debt discounts at the settlement date, (ii) the issuance of 59,164,808 shares of Series D preferred stock of BioAtla, Inc. to Himalaya Parent LLC in connection with the settlement of the convertible notes at a fair value of \$30.6 million based on the fair value of the Class D units issued to the noteholders, (iii) a loss of \$2.7 million upon extinguishment of the convertible promissory notes for the difference between the fair value of the consideration received and the carrying value of the convertible promissory notes at the date of settlement, (iv) the elimination of all interest expense related to the convertible promissory notes assuming they converted as of January 1, 2019, and (v) the elimination of the change in fair value of embedded derivatives assuming they were settled as of January 1, 2019. The extinguishment of the convertible promissory notes is not expected to recur.

(c) The pro forma net loss per common share is based on BioAtla, Inc.'s pro forma net loss divided by 280,652,170 pro forma weighted-average shares of common stock outstanding which assumes the following had occurred as of January 1, 2019: (i) the issuance of 80,860,651 shares of common issued by BioAtla, Inc. to Himalaya Parent LLC in connection with the Corporate Reorganization, (ii) the issuance of 59,164,808 shares of Series D convertible preferred stock of BioAtla, Inc. to Himalaya Parent LLC in connection with the settlement of the convertible notes outstanding at the date of the Corporate Reorganization, (iii) the issuance of 140,626,711 shares of Series D convertible preferred stock pursuant to the Series D Preferred Stock Purchase Agreement and in connection with the Corporate Reorganization and (iv) the conversion of all outstanding Series D convertible preferred stock into 199,791,519 shares of common stock.

2. Income taxes

In connection with our conversion to a Delaware corporation pursuant to a statutory conversion, we became subject to US federal and state income tax, and recorded a net deferred tax asset based on the difference between the book value and tax basis of our assets and liabilities as of the date of the conversion. We recorded a full valuation allowance against our net deferred tax asset based on our determination that it was not likely that our net deferred tax assets would be realized.

Management's discussion and analysis of financial condition and results of operations

You should read the following discussion and analysis of our financial condition and results of operations together with "Selected consolidated financial data" and our financial statements and related notes included elsewhere in this prospectus. Some of the information contained in this discussion and analysis or set forth elsewhere in this prospectus, including information with respect to our plans and strategy for our business, include forward-looking statements that involve risks and uncertainties. You should review "Risk factors" for a discussion of important factors that could cause our actual results to differ materially from the results described in or implied by the forward-looking statements contained in the following discussion and analysis.

Overview

We are a clinical-stage biopharmaceutical company developing our novel class of highly specific and selective antibody-based therapeutics for the treatment of solid tumor cancer. Our CABs capitalize on our proprietary discoveries with respect to tumor biology, enabling us to target known and widely validated tumor antigens that have previously been difficult or impossible to target. Our novel CAB therapeutic candidates exploit characteristic pH differences between the tumor microenvironment and healthy tissue. Unlike healthy tissue, the tumor microenvironment is acidic, and we have designed our antibodies to selectively bind to their targets on tumor cells under acidic pH conditions but not on targets in normal tissues. Our approach is to identify the necessary targeting and potency required for cancer cell destruction, while aiming to eliminate or greatly reduce on-target, off-tumor toxicity—one of the fundamental challenges of existing cancer therapies.

We are a United States-based company with research facilities in San Diego, California and, through our contractual relationship with BioDuro, a provider of preclinical development services, in Beijing, China. Since the commencement of our operations, we have focused substantially all of our resources on conducting research and development activities, including drug discovery, preclinical studies and clinical trials of our product candidates, including the ongoing Phase 2 clinical trials of BA3011 and BA3021, establishing and maintaining our intellectual property portfolio, manufacturing clinical and research material through third parties, hiring personnel, establishing product development and commercialization collaborations with third parties, raising capital and providing general and administrative support for these operations. Since 2014, such research and development activities have exclusively related to the research, development, manufacture and Phase 1 and Phase 2 clinical testing of our CAB antibody-based product candidates and the strengthening of our proprietary CAB technology platform and pipeline. We do not have any products approved for sale, and we have not generated any revenue from product sales.

On July 10, 2020, we completed a corporate reorganization in which we, Himalaya Parent LLC, our wholly owned subsidiary, and BioAtla MergerSub LLC, our wholly owned indirect subsidiary, entered into an Agreement and Plan of Merger, or the Merger Agreement, pursuant to which BioAtla, LLC was merged into and with BioAtla MergerSub LLC, with BioAtla, LLC surviving, and the equity holders of BioAtla, LLC immediately prior to the effective time of the Merger Agreement received membership interests, on a one-for-one basis, of Himalaya Parent LLC as consideration. We refer to such transactions as the "Corporate Reorganization." See "LLC conversion" for a discussion of the Corporate Reorganization. Except as otherwise noted, the consolidated financial statements discussed in this section and included elsewhere in this prospectus are those of BioAtla, LLC and its consolidated subsidiaries prior to the LLC Conversion and those of BioAtla, Inc. subsequent to the LLC Conversion.

We have incurred significant losses to date. Our ability to generate product revenue sufficient to achieve profitability will depend on the successful development and eventual commercialization of one or more of our

[Table of Contents](#)

current and future product candidates. Our net losses were \$29.0 million and \$29.8 million for the years ended December 31, 2018 and 2019, respectively and \$28.4 million and \$19.5 million for the nine months ended September 30, 2019 and 2020, respectively. As of September 30, 2020, we had an accumulated deficit of \$167.8 million. These losses have resulted primarily from costs incurred in connection with research and development activities and general and administrative costs associated with our operations. We do not expect to generate meaningful revenue from product sales for the foreseeable future, and we expect to continue to incur significant operating expenses for the foreseeable future due to the cost of research and development, including identifying and designing product candidates and conducting preclinical studies and clinical trials, and the regulatory approval process for our product candidates. We expect our expenses, and the potential for losses, to increase substantially as we conduct clinical trials of our lead product candidates and seek to expand our pipeline.

We expect our expenses and capital requirements will increase substantially in connection with our ongoing activities as we:

- advance the clinical development of BA3011;
- advance the clinical development of BA3021;
- expand our pipeline of bispecific and other CAB antibody-based product candidates;
- continue to invest in our CAB technology platform;
- maintain, protect and expand our intellectual property portfolio, including patents, trade secrets and know-how;
- seek marketing approvals for any product candidates that successfully complete clinical trials;
- establish additional product collaborations and commercial manufacturing relationships with third parties;
- build sales, marketing and distribution infrastructure and relationships with third parties to commercialize product candidates for which we may obtain marketing approval;
- continue to expand our operational, financial and management information systems; and
- attract, hire and retain additional clinical, scientific, management, administrative and commercial personnel.

Furthermore, following the completion of this offering, we expect to incur additional costs associated with operating as a public company, including significant legal, accounting, insurance, investor relations and other administrative and professional services expenses that we did not incur as a private company.

As a result, we will require substantial additional capital to develop our product candidates and fund operations for the foreseeable future. Until such time as we can generate significant revenue from product sales, if ever, we expect to finance our operations through a combination of public or private equity offerings, debt financings, collaborations and other similar arrangements. The amount and timing of our future funding requirements will depend on many factors, including the pace and results of our development efforts. We cannot assure you that we will ever be profitable or generate positive cash flow from operating activities.

Because of the numerous risks and uncertainties associated with product development, we are unable to accurately predict the timing or amount of increased expenses or when, or if, we will be able to achieve profitability. Even if we do achieve profitability, we may not be able to sustain or increase profitability on a quarterly or annual basis. If we fail to become profitable or are unable to sustain profitability on a continuing basis, then we may be unable to raise capital, maintain our research and development efforts, expand our business or continue our operations at planned levels, and as a result we may be forced to substantially reduce or terminate our operations.

[Table of Contents](#)

To date, we have funded our operations primarily through the receipt of \$71.0 million from our collaboration agreements, \$27.6 million from the issuance of convertible debt and \$138.3 million from the issuance of equity securities. As of September 30, 2020, our cash and cash equivalents totaled approximately \$56.8 million. Based on our current operating plan, our current cash and cash equivalents, together with the anticipated proceeds from this offering, are expected to be sufficient to fund our ongoing operations at least through . However, we have based this estimate on assumptions that may prove to be wrong, and we could utilize our available capital resources sooner than we currently expect.

BioAtla was formed in April 2007 as a Delaware limited liability corporation. We initially operated as a service provider and service-related partnered drug developer for primarily human therapeutic proteins and simultaneously refined our proprietary CAB technology platform and related technologies. Since 2013, we transitioned away from our services business to focus on internal development of our own proprietary products.

Impact of COVID-19 on our business

On March 11, 2020, the World Health Organization declared the outbreak of COVID-19 caused by a novel strain of coronavirus as a pandemic, which continues to spread throughout the United States and around the world. The worldwide COVID-19 pandemic may affect our ability to complete our current preclinical studies and clinical trials, initiate and complete our planned preclinical studies and clinical trials, disrupt regulatory activities or have other adverse effects on our business, results of operations, financial condition and prospects. In addition, the pandemic has caused substantial disruption in the financial markets and may adversely impact economies worldwide, both of which could adversely affect our business, operations and ability to raise funds to support our operations. To date, we have not experienced material business disruptions, including with respect to any of the clinical trials we are conducting, or impairments of any of our assets as a result of the pandemic. We are following, and plan to continue to follow, recommendations from federal, state and local governments regarding workplace policies, practices and procedures. In March 2020, we implemented a remote working policy for many of our employees, began restricting non-essential travel and temporarily reduced salaries of our employees. We are complying with all applicable guidelines for our clinical trials, including remote clinical monitoring. In April 2020, we borrowed \$0.7 million under the Paycheck Protection Program under the CARES Act, as discussed further under “—Liquidity and capital resources.” We are continuing to monitor the potential impact of the pandemic, but we cannot be certain what the overall impact will be on our business, financial condition, results of operations and prospects.

Financial operations overview

Revenue

To date, we have not generated any revenue from the sale of products and do not expect to generate meaningful revenue in the near future. In March 2015, we entered into an agreement with Beijing Sinobioway Group Co. Ltd, or Sinobioway, pursuant to which we granted to Sinobioway a right of first refusal to certain rights to our CAB antibodies in the Greater China territory. This agreement was restructured in March 2018 and no further revenue was recognized from this collaboration. In December 2015, we entered into a four-year preclinical research agreement with Pfizer, which expired according to its terms in December 2019.

In April 2019, we entered into a Global Co-Development and Collaboration Agreement with BeiGene, Ltd. which, as amended in December 2019 and October 2020, provides for the development, manufacturing and commercialization of BA3071. Under the terms of our BeiGene collaboration, BeiGene is generally responsible for developing BA3071 and is responsible for global regulatory filings and commercialization. Subject to the

terms of the agreement, BeiGene holds an exclusive license with us to develop and manufacture the product candidate globally. BeiGene is responsible for all costs of development, manufacturing and commercialization globally. In addition, we may in the future seek third-party collaborators or joint venture partners for development and commercialization of additional CAB product candidates. At the time of execution of the BeiGene collaboration, we received a \$20 million upfront payment and in December 2019, we received an additional \$5 million for the reimbursement of manufacturing costs. We are eligible to receive up to \$225.5 million in subsequent development and regulatory milestones globally and commercial milestones in the BeiGene territory, together with tiered royalties, ranging from the high-single digits to the low twenties, on sales worldwide.

During 2018 and 2019, we recognized revenue from our collaboration with Sinobioway, our current collaboration with BeiGene and to a much lesser degree from our collaboration with Pfizer.

Operating expenses

Research and development

Research and development expenses consist primarily of costs incurred in the discovery and development of our product candidates.

- External expenses consist of:
 - Fees paid to third parties such as contractors, clinical research organizations (CROs) and consultants, including through our relationship with BioDuro, and other costs related to preclinical and clinical trials;
 - Fees paid to third parties such as contract manufacturing organizations (CMOs) and other vendors for manufacturing research and clinical trial materials; and
 - Expenses related to laboratory supplies and services.
- Unallocated expenses consist of:
 - Personnel-related expenses, including salaries, benefits and equity-based compensation expenses, for personnel in our research and development functions; and
 - Related equipment and facilities depreciation expenses.

We expense research and development costs in the periods in which they are incurred. Nonrefundable advance payments for goods or services to be received in future periods for use in research and development activities are deferred and capitalized. The capitalized amounts are then expensed as the related goods are delivered and service are performed.

We expect our research and development expenses to increase substantially for the foreseeable future as we continue to invest in research and development activities to advance our product candidates and our clinical programs and expand our product candidate pipeline. The process of conducting the necessary preclinical and clinical research to obtain regulatory approval is costly and time-consuming. Product candidates in later stages of clinical development generally have higher development costs than those in earlier stages of clinical development, primarily due to the increased size and duration of later-stage clinical trials. Accordingly, to the extent that our product candidates continue to advance into clinical trials, including larger and later-stage clinical trials, our expenses will increase substantially and may become more variable. The actual probability of success for our product candidates may be affected by a variety of factors, including the safety and efficacy of our product candidates, the quality and consistency in their manufacture, investment in our clinical programs

[Table of Contents](#)

and competition with other products. As a result of these variables, we are unable to determine the duration and completion costs of our research and development projects and programs or when and to what extent we will generate revenue from the commercialization and sale of our product candidates. We may never succeed in achieving regulatory approval for any of our product candidates.

General and administrative

Our general and administrative expenses consist primarily of personnel-related expenses for personnel in our executive, finance, corporate and other administrative functions, intellectual property and patent costs, facilities and other allocated expenses, other expenses for outside professional services, including legal, human resources, audit and accounting services and insurance costs. Personnel-related expenses consist of salaries, benefits and equity-based compensation. We also expect our general and administrative expenses to increase as a result of operating as a public company, including additional costs (i) to comply with the rules and regulations of the SEC and those of The Nasdaq Global Market, (ii) for legal and auditing services, (iii) for additional insurance, (iv) relating to investor relations activities and (v) associated with other administrative and professional services. We also expect our intellectual property expenses to increase as we expand our intellectual property portfolio.

Interest income

Interest income consists primarily of interest earned on our cash and cash equivalent balances. Our interest income has not been significant to date, but we expect interest income to increase as we invest the net proceeds from this offering.

Interest expense

Interest expense consists primarily of interest incurred on our outstanding convertible debt, including coupon interest and the amortization of debt discounts, including those related to beneficial conversion features and embedded derivatives. We expect our interest expense to decline subsequent to the settlement of our outstanding convertible debt in July 2020.

Change in fair value of derivative liability

The convertible promissory notes we issued during 2019 and 2020 contained redemption features which we determined were embedded derivatives to be recognized as liabilities and measured at fair value. At the end of each reporting period, changes in the estimated fair value during the period are recorded as a change in the fair value of derivative liability. The embedded derivative liability was recorded at fair value utilizing an income approach that identified the cash flows using a "with-and-without" valuation methodology. The inputs used to determine the estimated fair value of the derivative instrument were based primarily on the probability of an underlying event triggering the embedded derivative occurring and the timing of such event. We will no longer record changes in the fair value of the derivative liability subsequent to the settlement of the derivative liability in connection with the conversion of our outstanding convertible debt in July 2020.

Extinguishment of convertible debt

In April 2020, we amended the terms of certain outstanding convertible promissory notes that we concluded were extinguishments. In July 2020, in connection with our Corporate Reorganization, we settled all of our outstanding convertible promissory notes and recognized extinguishment losses for the difference between the fair value of the consideration given to the noteholders and the carrying value of the related convertible promissory notes.

[Table of Contents](#)*Other income (expense)*

Other income (expense) primarily includes miscellaneous items of income and expense that were not significant for the periods presented.

Results of operations**Comparison of the nine months ended September 30, 2019 and 2020**

Collaboration revenue

Collaboration revenue of \$0.4 million for the nine months ended September 30, 2020 consisted of \$0.4 million of revenue recognized under our collaboration with BeiGene. BeiGene collaboration revenue decreased from \$2.5 million for the nine months ended September 30, 2019 to \$0.4 million for the nine months ended September 30, 2020 primarily due to a decrease in our development activities related to BA3071.

Collaboration revenue of \$3.0 million for the nine months ended September 30, 2019 consisted of \$2.5 million of revenue recognized under our collaboration with BeiGene and \$0.5 million of revenue recognized under our collaboration with Pfizer, which expired according to its terms in December 2019.

[Table of Contents](#)

Research and development expense

The following table summarizes our research and development expenses allocated by CAB program for the periods indicated:

	Nine months ended September 30,		Change
	2019	2020	
	(in thousands)		
External expenses:			
BA3011 (AXL-ADC)	\$ 3,243	\$ 3,052	\$ (191)
BA3021 (ROR2-ADC)	4,869	2,114	(2,755)
Other CAB Programs	9,466	2,163	(7,303)
Total external expenses	17,578	7,329	(10,249)
Unallocated expenses:			
Personnel and related	4,019	3,751	(268)
Equity-based compensation	(635)	(3,355)	(2,720)
Facilities and other	1,621	1,723	102
Total research and development expenses	<u>\$22,583</u>	<u>\$ 9,448</u>	<u>\$ (13,135)</u>

Research and development expenses were \$22.6 million and \$9.4 million for the nine months ended September 30, 2019 and 2020, respectively. The decrease of \$13.1 million was driven by a \$10.2 million decrease in external costs as we were nearing completion of manufacturing activities for our clinical candidates and nearing completion of Phase 1 clinical trials for both BA3011 and BA 3021 in late 2019, a \$2.7 million decrease in equity-based compensation due to a decrease in the fair value of awards under our profits interest plan and a \$0.3 million decrease in personnel-related expenses. These decreases were offset by an increase of \$0.1 million in facility and related expenses.

General and administrative expense

General and administrative expenses were \$7.9 million for the nine months ended September 30, 2019 compared to \$4.6 million for the nine months ended September 30, 2020. The decrease of \$3.3 million was primarily due to a \$3.8 million decrease in stock-based compensation related to a decrease in the fair value of awards under our profits interest plan, a \$0.5 million decrease in travel related expense, a decrease of \$0.2 million in professional fees related to intellectual property matters, a decrease of \$0.1 million in conference fees and a \$0.1 million decrease in outside consulting, offset by a \$0.6 million increase in professional fees related to accounting and audit services, a \$0.4 million increase in personnel related expenses as we expanded our administrative functions in support of our development activities and a \$0.4 million increase in facility and related expenses.

Interest income

Interest income was \$0.1 million for the nine months ended September 30, 2019 compared to \$37,000 for the nine months ended September 30, 2020. The decrease of \$0.1 million was primarily due to lower average cash and cash equivalent balances and lower rates of return.

Interest expense

Interest expense was \$1.1 million for the nine months ended September 30, 2019 compared to \$1.4 million for the nine months ended September 30, 2020. The increase of \$0.3 million was primarily due to our issuance of

[Table of Contents](#)

\$4.3 million of convertible promissory notes between October 2019 and May 2020 and the related coupon interest and amortization of debt discounts related to embedded derivatives and beneficial conversion features. All of our convertible debt was settled in July 2020.

Change in fair value of derivative liability

Change in fair value of derivative liability was \$11,000 for the nine months ended September 30, 2019 compared to \$1.6 million for the nine months ended September 30, 2020. The increase of \$1.6 million was primarily due to changes in the fair value of embedded derivatives issued in connection with our outstanding convertible promissory notes.

Extinguishment of convertible debt

Extinguishment of convertible debt was \$0 for the nine months ended September 30, 2019 compared to \$2.9 million for the nine months ended September 30, 2020. The increase of \$2.9 million was primarily due to \$2.7 million of losses on extinguishment we recognized in July 2020, in connection with our Corporate Reorganization, when we settled all of our outstanding convertible promissory notes and recognized extinguishment losses for the difference between the fair value of the consideration given to the noteholders and the carrying value of the related convertible promissory notes. In addition, in April 2020, we recognized \$0.2 million of losses on extinguishment related to the amendment of the terms of certain outstanding convertible promissory notes that we concluded were extinguishments.

Other income (expense)

We had minimal other expense with \$12,000 for the nine months ended September 30, 2019 compared to \$0 for the nine months ended September 30, 2020.

Comparison of the years ended December 31, 2018 and 2019

	Years ended December 31,		Change
	2018	2019	
	(in thousands)		
Collaboration revenue	\$ 10,627	\$ 5,200	\$ (5,427)
Operating expenses:			
Research and development expense	26,305	25,919	(386)
General and administrative expense	12,556	7,549	(5,007)

Net loss attributable to noncontrolling interests	—	61	61
Net loss attributable to BioAtla LLC	\$ (28,979)	\$ (29,794)	\$ (815)

[Table of Contents](#)

Collaboration revenue

Collaboration revenue of \$5.2 million for the year ended December 31, 2019 consisted of \$4.7 million of revenue recognized under our collaboration with BeiGene and \$0.5 million of revenue recognized under our collaboration with Pfizer, which expired according to its terms in December 2019.

Collaboration revenue of \$10.6 million for the year ended December 31, 2018 consisted of \$0.2 million of revenue recognized under our collaboration with Pfizer and \$10.5 million of revenue recognized under our collaboration with Sinobioway, which was restructured in March 2018 and for which no further revenue was recognized.

Research and development expense

The following table summarizes our research and development expenses allocated by CAB program for the periods indicated:

	Years ended December 31,		Change
	2018	2019	
	(in thousands)		
External expenses:			
BA3011 (AXL-ADC)	\$ 5,745	\$ 4,409	\$ (1,336)
BA3021 (ROR2-ADC)	4,987	6,451	1,464
Other CAB programs	8,672	10,643	1,971
Total external expenses	19,404	21,503	2,099
Unallocated expenses:			
Personnel and related	3,962	5,265	1,303
Equity-based compensation	1,142	(2,997)	(4,139)
Facilities and other	1,797	2,148	351
Total research and development expenses	\$ 26,305	\$ 25,919	\$ (386)

Research and development expenses were \$26.3 million and \$25.9 million for the years ended December 31, 2018 and 2019, respectively. The decrease of \$0.4 million was primarily driven by a \$4.1 million decrease in equity-based compensation due to a decrease in the fair value of awards under our profits interest plan and a \$3.0 million decrease in manufacturing expenses for our two lead ADC product candidates, BA3011 and BA3021. This decrease was offset by an increase of \$3.1 million for clinical development of our two lead ADC product candidates, BA3011 and BA3021, and an increase of \$2.0 million for other CAB programs primarily related to IND enabling activities for our immuno-oncology antibody, BA3071, as well as a \$1.3 million increase in personnel-related expenses due primarily to annual salary increases and the full year impact of personnel hired in 2018.

General and administrative expense

General and administrative expenses were \$12.6 million in 2018 compared to \$7.5 million in 2019. The decrease of \$5.0 million was primarily due to a \$4.9 million decrease in stock-based compensation related to a decrease in the fair value of awards under our profits interest plan and a \$0.7 million decrease in travel related expense, offset by a \$0.7 million increase in personnel related expenses as we expanded our administrative functions in support of our development activities.

[Table of Contents](#)

Interest income

Interest income was \$0.2 million in 2018 compared to \$0.1 million in 2019. The decrease of \$0.1 million was primarily due to lower average cash and cash equivalent balances.

Interest expense

Interest expense was \$0.9 million in 2018 compared to \$1.6 million in 2019. The increase of \$0.7 million was primarily due to our issuance of \$4.0 million of convertible promissory notes during 2019.

Change in fair value of derivative liability

Change in fair value of derivative liability was \$0 in 2018 compared to \$0.1 million in 2019. The increase of \$0.1 million was primarily due to the change in fair value of the embedded derivative liability associated with our issuance of \$4.0 million of convertible promissory notes during 2019.

Other income (expense)

We had minimal other expense with \$5,000 in 2018 compared to \$22,000 in 2019.

Liquidity and capital resources

We have incurred aggregate net losses and negative cash flows from operations since our inception and anticipate we will continue to incur net losses for the foreseeable future. As of September 30, 2020, we had cash and cash equivalents of \$56.8 million.

Convertible and promissory notes

As of December 31, 2019, we had outstanding convertible notes with an aggregate principal balance of \$19.0 million and issued an additional \$2.8 million of convertible notes between March and April of 2020. All principal and accrued interest under the convertible notes was converted into our Series D preferred stock in July 2020.

On April 22, 2020, we received proceeds from a loan, or PPP Loan, in the amount of \$0.7 million from City National Bank, as lender, pursuant to the Paycheck Protection Program, or PPP, of the CARES Act. The PPP Loan is evidenced by a promissory note, or Note, which contains customary events of default relating to, among other things, payment defaults and breaches of representations, warranties or terms of the PPP Loan documents. The PPP Loan matures on April 22, 2022 and bears interest at an annual rate of approximately 1%. Beginning on November 22, 2020, we are required to make 18 equal monthly payments of principal and interest. We may prepay the PPP Loan at any time prior to maturity with no prepayment penalties. The proceeds from the PPP Loan may only be used for payroll costs (including benefits), rent and utility obligations, and interest on certain of our other debt obligations.

All or a portion of the PPP Loan may be forgiven by the U.S. Small Business Administration, or SBA, upon application by us beginning 60 days after loan approval and upon documentation of expenditures in accordance with the SBA requirements. In the event the PPP Loan, or any portion thereof, is forgiven pursuant to the PPP, the amount forgiven is applied to outstanding principal. If it is determined that we were not eligible to receive the PPP Loan, we may be subject to penalties and could be required to repay the PPP Loan in its entirety.

Future funding requirements

Our primary uses of cash are to fund operating expenses, which consist primarily of research and development expenses related to our programs and related personnel costs. The timing and amount of future funding requirements depends on many factors, including the following:

- the initiation, scope, rate of progress, results and costs of our preclinical studies, clinical trials and other related activities for our product candidates;
- the costs associated with manufacturing our product candidates and establishing commercial supplies and sales, marketing and distribution capabilities;
- the timing and costs of capital expenditures to support our research and development efforts;
- the number and characteristics of other product candidates that we pursue;
- our ability to maintain, expand and defend the scope of our intellectual property portfolio, including the amount and timing of any payments we may be required to make in connection with the licensing, filing, defense and enforcement of any patents or other intellectual property rights;
- the timing, receipt and amount of sales from our potential products;
- our need and ability to hire additional management, scientific and medical personnel;
- the effect of competing products that may limit market penetration of our product candidates;
- our need to implement additional internal systems and infrastructure, including financial and reporting systems;
- the economic and other terms, timing and success of any collaboration, licensing, or other arrangements into which we may enter in the future, including the timing of receipt of any milestone or royalty payments under these agreements;
- the compliance and administrative costs associated with being a public company; and
- the extent to which we acquire or invest in businesses, products or technologies, although we have no commitments or agreements relating to any of these types of transactions.

Based on our current operating plan, our current cash and cash equivalents, together with the proceeds from this offering, are expected to be sufficient to fund our ongoing operations at least through . However, we have based this estimate on assumptions that may prove to be wrong, and we could utilize our available capital resources sooner than we currently expect.

In addition, we will require additional funding in order to complete development of our product candidates and commercialize our products, if approved. We may seek to raise any necessary additional capital through a combination of public or private equity offerings, debt financings, collaborations, strategic alliances, licensing arrangements and other marketing and distribution arrangements. We cannot assure you that, in the event we require additional financing, such financing will be available at acceptable terms to us, if at all. Failure to generate sufficient cash flows from operations, raise additional capital, and reduce discretionary spending should additional capital not become available could have a material adverse effect on our ability to achieve our intended business objectives. Because of the numerous risks and uncertainties associated with the development and commercialization of our product candidates, we are unable to estimate the amounts of increased capital outlays and operating expenditures associated with our current and anticipated preclinical studies and clinical trials. To the extent that we raise additional capital through collaborations, strategic

[Table of Contents](#)

alliances or licensing arrangements with third parties, we may have to relinquish valuable rights to our product candidates. We may also have to forego future revenue streams of research programs at an earlier stage of development or on less favorable terms than we would otherwise choose, or have to grant licenses on terms that may not be favorable to us. Our ability to raise additional funds will depend on financial, economic and other factors, many of which are beyond our control. For example, market volatility resulting from the COVID-19 pandemic could adversely impact our ability to access capital as and when needed. We may choose to raise additional capital through the issuance of equity or convertible debt securities due to market conditions or strategic considerations even if we believe we have sufficient funds for our current or future operating plans. To the extent we issue additional shares of common stock or other equity or convertible debt securities in the future, there will be further dilution to investors participating in this offering and the terms of these securities may include liquidation or other preferences that adversely affect our stockholders' rights. If we raise additional capital through debt financing, we may be subject to covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures, acquiring other businesses, products or technology, or declaring dividends. If we are unable to obtain additional funding from these or other sources, it may be necessary to significantly reduce our rate of spending through reductions in staff and delay, scale back or stop certain research and development programs.

Cash flows

The following summarizes our cash flows for the periods indicated:

	Years ended December 31,		Nine months ended September 30,	
	2018	2019	2019	2020
	(in thousands)			
Net cash provided by (used in):				
Operating activities	\$ (35,317)	\$ (9,645)	\$ (7,749)	\$ (22,328)
Investing activities	(988)	(1,509)	(1,136)	(195)
Financing activities	5,019	3,995	2,495	75,576
Net increase (decrease) in cash and cash equivalents	<u>\$ (31,286)</u>	<u>\$ (7,159)</u>	<u>\$ (6,390)</u>	<u>\$ 53,053</u>

Cash used in operating activities

Net cash used in operating activities for the nine months ended September 30, 2020 was \$22.3 million, which consisted of a consolidated net loss of \$19.5 million, a net change of \$0.8 million in our net operating assets and liabilities and \$2.0 million of non-cash transactions. The net change in our operating assets and liabilities was primarily due to an increase in accounts payable and accrued expenses of \$1.3 million, an increase in accrued interest of \$0.9 million on our outstanding convertible debt prior to its settlement in July 2020 and a decrease in deferred revenue of \$0.4 million as we recognized deferred revenue related to our collaboration with BeiGene. The non-cash transactions primarily consisted of a decrease in the profits interest liability of \$7.6 million primarily due to a decrease in the fair value of the underlying awards and \$0.1 million of deferred rent, offset by a \$2.9 million loss on extinguishment of convertible debt, a \$1.6 million change in the fair value of our derivative liability, non-cash charges of \$0.7 million related to depreciation and amortization and \$0.5 million of non-cash interest.

Net cash used in operating activities for the nine months ended September 30, 2019 was \$7.7 million, which consisted of a consolidated net loss of \$28.5 million, a net change of \$20.7 million in our net operating assets and liabilities and a nominal net amount of non-cash transactions. The net change in our operating assets and liabilities was primarily due to an increase in deferred revenue of \$17.0 million as we recognized as revenue

[Table of Contents](#)

only a portion of the \$25.0 million of upfront payment and cost reimbursements we received from BeiGene, a decrease in prepaid expenses of \$1.1 million, a decrease in accounts payable and accrued expenses of \$1.7 million and an increase in accrued interest of \$0.9 million on our outstanding convertible debt. The non-cash transactions primarily consisted of a decrease in the profits interest liability of \$1.1 million primarily due to a decrease in the fair value of the underlying awards, offset by non-cash charges of \$0.6 million related to depreciation and amortization, \$0.2 million of non-cash interest and \$0.2 million of deferred rent.

Net cash used in operating activities for the year ended December 31, 2019 was \$9.6 million, which consisted of a consolidated net loss of \$29.9 million and a net change of \$25.1 million in our net operating assets and liabilities, and \$4.9 million in non-cash transactions. The net change in our operating assets and liabilities was primarily due to an increase in deferred revenue of \$19.8 million as we recognized as revenue only a small portion of the \$25.0 million of upfront payment and cost reimbursements we received from BeiGene, a decrease in prepaid expenses of \$0.9 million, a decrease in accounts payable and accrued expenses of \$3.1 million and an increase in accrued interest of \$1.3 million on our outstanding convertible debt. The \$4.9 million change in non-cash transactions primarily consisted of a decrease in the profits interest liability of \$6.4 million primarily due to a decrease in the fair value of the underlying awards, offset by non-cash charges of \$0.9 million related to depreciation and amortization, \$0.1 million related to the change in fair value of derivative liability, \$0.4 million of non-cash interest and \$0.2 million of deferred rent.

Net cash used in operating activities for the year ended December 31, 2018 was \$35.3 million, which consisted of a consolidated net loss of \$29.0 million and a net change of \$9.7 million in our net operating assets and liabilities, partially offset by \$3.4 million in non-cash transactions. The net change in our operating assets and liabilities was primarily due to a decrease in deferred revenue of \$10.6 million as we recognized revenue for previously received cash payments, offset by an increase in accrued interest of \$0.9 million on our outstanding convertible debt. The non-cash transactions primarily consisted of changes in the fair value of our profits interest liability of \$2.6 million and depreciation and amortization expense of \$0.8 million.

Cash used in investing activities

Cash used in investing activities was \$1.0 million and \$1.5 million for the years ended December 31, 2018 and 2019, respectively, and \$1.1 million and \$0.2 million for the nine months ended September 30, 2019 and 2020, respectively, related to the purchase of property and equipment.

Cash provided by financing activities

Net cash provided by financing activities was \$75.6 million for the nine months ended September 30, 2020, which consisted primarily of \$72.3 million of net proceeds from our issuance of Series D convertible preferred stock, \$2.8 million of proceeds from the issuance of convertible promissory notes and \$0.7 million of proceeds from a PPP loan, offset by the payment of \$0.1 million of costs incurred in connection with our proposed initial public offering. Net cash provided by financing activities was \$2.5 million for the nine months ended September 30, 2019, which consisted primarily of proceeds from the issuance of convertible notes.

Net cash provided by financing activities was \$5.0 million and \$4.0 million for the years ended December 31, 2018 and 2019, respectively, which consisted primarily of proceeds from the issuance of convertible notes.

Contractual obligations

The following table summarizes our contractual obligations as of December 31, 2019:

	Total	Payments due by period			More than 5 years
		Less than 1 year	1 – 3 years	3 – 5 years	
Operating lease obligations ⁽¹⁾	\$ 8,287	\$ 1,192	\$ 2,929	\$ 3,321	\$ 845
Debt obligations ⁽²⁾⁽³⁾	26,600	14,000	—	12,600	—
Total	\$34,887	\$15,192	\$2,929	\$15,921	\$ 845

(1) Our operating lease obligations relate to our corporate headquarters in San Diego. In June 2017, as amended in January 2019, we entered into a non-cancellable operating lease for a new facility in San Diego, California. The lease commenced in January 2018, at which time we gained access to the leased space and began recognizing rent expense. The lease expires in July 2025 and we have an option to extend the term of the lease for an additional five years. The lease includes certain rent abatement, rent escalations, tenant improvement allowances and additional charges for common area maintenance and other costs.

(2) Includes interest through maturity.

(3) All of these debt obligations were settled in connection with our Series D preferred stock financing in July 2020 and are no longer outstanding.

We issued \$2.8 million of convertible promissory notes in early 2020. Excluded from the table above is \$0.7 million we borrowed under our PPP loan in April 2020.

We enter into contracts in the normal course of business with clinical trial sites and clinical supply manufacturers and with vendors for preclinical studies, research supplies and other services and products for operating purposes. These contracts generally provide for termination after a notice period, and, therefore, are cancelable contracts and not included in the table above. In addition, we enter into agreements in the normal course of business with CROs, CMOs and other vendors for research and development services for operating purposes, which are generally cancelable upon written notice. These payments are not included in the table of contractual obligations.

Critical accounting policies and estimates

Our management's discussion and analysis of our financial condition and results of operations is based on our financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, as well as the reported revenue generated, and reported expenses incurred during the reporting periods. Our estimates are based on our historical experience and on various other factors that we believe are reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions.

While our significant accounting policies are described in the Note 1 to our consolidated financial statements included elsewhere in this prospectus, we believe that the following critical accounting policies are most important to understanding and evaluating our reported financial results.

Accrued expenses

As part of the process of preparing our consolidated financial statements, we accrue expenses as of each balance sheet date. This process involves reviewing open contracts and purchase orders, communicating with our personnel to identify services that have been performed on our behalf and estimating the level of service

[Table of Contents](#)

performed and the associated cost incurred for the service when we have not yet been invoiced or otherwise notified of the actual cost. We make estimates of our accrued expenses as of each balance sheet date based on facts and circumstances known to us at that time. The estimates in our accrued research and development expenses include the costs incurred for services performed by our vendors in connection with research and development activities for which we have not yet been invoiced. We periodically confirm the accuracy of our estimates with the service providers and make adjustments if necessary.

We base our expenses related to research and development activities on our estimates of the services received and efforts expended pursuant to quotes and contracts with vendors that conduct research and development on our behalf. The financial terms of these agreements are subject to negotiation, vary from contract to contract and may result in uneven payment flows. There may be instances in which payments made to our vendors will exceed the level of services provided and result in a prepayment of the research and development expense. In accruing service fees, we estimate the time period over which services will be performed and the level of effort to be expended in each period. If the actual timing of the performance of services or the level of effort varies from our estimate, we adjust the accrual or prepaid expense accordingly. Advance payments for goods and services that will be used in future research and development activities are expensed when the activity has been performed or when the goods have been received rather than when the payment is made.

Although we do not expect our estimates to be materially different from amounts actually incurred, if our estimates of the status and timing of services performed differ from the actual status and timing of services performed, it could result in us reporting amounts that are too high or too low in any particular period. To date, there have been no material differences between our estimates of such expenses and the amounts actually incurred.

Collaboration revenue

Effective January 1, 2019, we adopted Accounting Standards Update, or ASU, 2014-09, *Revenue from Contracts with Customers (Topic 606)*, or Topic 606, using the modified retrospective method. Topic 606 supersedes the revenue recognition requirements in ASC Topic 605, *Revenue Recognition*, or Topic 605. There was no material cumulative effect of adopting Topic 606. All periods prior to the adoption date of Topic 606 have not been restated to reflect the impact of the adoption of Topic 606, but are accounted for and presented under Topic 605.

Revenue recognition under Topic 606

We recognize revenue in a manner that depicts the transfer of control of a product or a service to a customer and reflects the amount of the consideration we are entitled to receive in exchange for such product or service. In doing so, we follow a five-step approach: (i) identify the contract with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations, and (v) recognize revenue when (or as) the customer obtains control of the product or service. We consider the terms of a contract and all relevant facts and circumstances when applying the revenue recognition standard.

A customer is a party that has entered into a contract with us, where the purpose of the contract is to obtain a product or a service that is an output of our ordinary activities in exchange for consideration. To be considered a contract, (i) the contract must be approved (in writing, orally, or in accordance with other customary business practices), (ii) each party's rights regarding the product or the service to be transferred can be identified, (iii) the payment terms for the product or the service to be transferred can be identified, (iv) the contract must have commercial substance (that is, the risk, timing or amount of future cash flows is expected to change as a

result of the contract), and (v) it is probable that we will collect substantially all of the consideration to which we are entitled to receive in exchange for the transfer of the product or the service.

A performance obligation is defined as a promise to transfer a product or a service to a customer. We identify each promise to transfer a product or a service (or a bundle of products or services, or a series of products and services that are substantially the same and have the same pattern of transfer) that is distinct. A product or a service is distinct if both (i) the customer can benefit from the product or the service either on its own or together with other resources that are readily available to the customer and (ii) our promise to transfer the product or the service to the customer is separately identifiable from other promises in the contract. Each distinct promise to transfer a product or a service is a unit of accounting for revenue recognition. If a promise to transfer a product or a service is not separately identifiable from other promises in the contract, such promises should be combined into a single performance obligation.

The transaction price is the amount of consideration we are entitled to receive in exchange for the transfer of control of a product or a service to a customer. To determine the transaction price, we consider the existence of any significant financing component, the effects of any variable elements, noncash considerations and consideration payable to the customer. If a significant financing component exists, the transaction price is adjusted for the time value of money. If an element of variability exists, we must estimate the consideration it expects to receive and uses that amount as the basis for recognizing revenue as the product or the service is transferred to the customer. There are two methods for determining the amount of variable consideration: (i) the expected value method, which is the sum of probability-weighted amounts in a range of possible consideration amounts, and (ii) the mostly likely amount method, which identifies the single most likely amount in a range of possible consideration amounts.

If a contract has multiple performance obligations, we allocate the transaction price to each distinct performance obligation in an amount that reflects the consideration we are entitled to receive in exchange for satisfying each distinct performance obligation. For each distinct performance obligation, revenue is recognized when (or as) we transfer control of the product or the service applicable to such performance obligation.

In those instances where we first receive consideration in advance of satisfying our performance obligation, we classify such consideration as deferred revenue until (or as) we satisfy such performance obligation. In those instances where we first satisfy our performance obligation prior to receipt of consideration, the consideration is recorded as accounts receivable.

We expense incremental costs of obtaining and fulfilling a contract as and when incurred if the expected amortization period of the asset that would be recognized is one year or less, or if the amount of the asset is immaterial. Otherwise, such costs are capitalized as contract assets if they are incremental to the contract and amortized to expense proportionate to revenue recognition of the underlying contract.

Profits interest liability

Before the LLC Conversion, we had a profits interest plan which we determined was a liability award plan in accordance with authoritative guidance. We measured the fair value of each award on the grant date and recognized such fair value over the requisite service period (usually the vesting period) on a straight-line basis, net of estimated forfeitures. The fair value of the award was remeasured at each reporting date until the award was settled, with a true-up of compensation cost for changes in fair value prorated for the portion of the requisite service period rendered. Once vested, any subsequent change in fair value was recognized immediately. The fair value of any awards that expired or were forfeited or cancelled for no value was adjusted to zero, such that any previously recorded compensation cost was fully reversed.

[Table of Contents](#)

We were required to estimate the fair value of the Class B units issued in connection with our profits interest plan. The fair value of our Class B units was determined on each reporting date by our management, taking into account input from independent third-party valuation analysis. In the absence of a public trading market for our Class B units, on each reporting date we developed an estimate of the fair value of our Class B units in order to calculate the profit interest liability. Our determinations of the fair value of our Class B units were made using methodologies, approaches and assumptions consistent with the American Institute of Certified Public Accountants *Audit and Accounting Practice Aid Series: Valuation of Privately Held Company Equity Securities Issued as Compensation*, or the Practice Aid.

We considered various objective and subjective factors to determine the fair value of our Class B units, including:

- contemporaneous valuations of our Class B units performed by independent third-party valuation specialists;
- our stage of development and business strategy, including the status of research and development efforts of our product candidates, and the material risks related to our business and industry;
- our results of operations and financial position, including our levels of available capital resources;
- the valuation of publicly traded companies in the life sciences and biopharmaceutical sectors, as well as recently completed mergers and acquisitions of peer companies;
- the lack of liquidity of our Class B units;
- the rights, preferences and privileges of our Class C Preferred units and Class A units relative to those of our Class B units;
- the likelihood and timing of achieving a liquidity event for the holders of our Class B units, given prevailing market conditions;
- trends and developments in our industry; and
- external market conditions affecting the life sciences and biopharmaceutical industry sectors.

In connection with the LLC Conversion, Himalaya Parent LLC assumed \$1.0 million of profits interest liability of BioAtla, LLC and subsequent to the Corporate Reorganization, we will continue to reflect compensation cost and a corresponding capital contribution associated with future vesting and the ongoing mark-to-market of the Class B profits interests held by Himalaya Parent LLC, as the equity-based payments are being provided to our employees by a stockholder. Any new profits interest awards granted by Himalaya Parent LLC to BioAtla, Inc.'s employees, or modifications to the existing awards made by Himalaya Parent LLC, will also result in additional compensation cost and a corresponding capital contribution in accordance with ASC Topic 718.

Valuation methodologies and methods used to allocate our enterprise value to classes of securities

Our valuations were prepared in accordance with the guidelines in the Practice Aid, which prescribes several valuation approaches for setting the value of an enterprise, such as the cost, income and market approaches, and various methodologies for allocating the value of an enterprise to its common stock. The cost approach establishes the value of an enterprise based on the cost of reproducing or replacing the property less depreciation and functional or economic obsolescence, if present. The income approach establishes the value of an enterprise based on the present value of future cash flows that are reasonably reflective of our company's future operations, discounting to the present value with an appropriate risk adjusted discount rate or capitalization rate. The market approach is based on the assumption that the value of an asset is equal to the

value of a substitute asset with the same characteristics. Each valuation methodology was considered in our valuations. We utilized a market approach in 2018, 2019 and 2020. In 2020, in connection with our Corporate Reorganization and Series D preferred stock financing, our market approach included the back-solve method that assigns an implied enterprise value based on the most recent round of funding or investment and allows for the incorporation of the implied future benefits and risks of the investment decision assigned by an outside investor. In accordance with the Practice Aid, we considered the various methods for allocating the enterprise value across our classes and series of equity to determine the fair value of our equity instruments at each valuation date. We applied a hybrid method of the probability weighted expected return method, or PWERM, where the non-IPO scenario is modeled using an option pricing model to reflect the full distribution of possible non-IPO outcomes. Under the option pricing model, units are valued by creating a series of call options with exercise prices based on the liquidation preferences and conversion terms of each equity class. The values of each class of units are inferred by analyzing these options. In the IPO scenario, we used the fully-diluted shares outstanding to allocate value to each class of units. The hybrid method is useful when certain discrete future outcomes can be predicted, but also accounts for uncertainty regarding the timing or likelihood of specific alternative exit events.

Following the completion of this offering, our board of directors will determine the fair value of our common stock based on its closing price as reported on the date of grant on the primary stock exchange on which our common stock is traded.

Variable interest entities

We consolidate entities in which we have a controlling financial interest. We determine whether we have a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity, or VIE. Voting interest entities are entities in which (i) the total equity investment at risk is sufficient to enable the entity to finance its activities independently, (ii) the equity holders have the power to direct the activities of the entity that most significantly impact its economic performance, the obligation to absorb the losses of the entity and the right to receive the residual returns of the entity and (iii) the legal entity is structured with substantive voting rights. A VIE is an entity that lacks one or more of the characteristics of a voting interest entity. We have a controlling financial interest in a VIE when we have a variable interest or interests that provide us with (i) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (ii) the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. We evaluate our relationships with our VIEs on an ongoing basis to determine whether or not we have a controlling financial interest.

Other company information

Emerging growth company status

We are an emerging growth company, as defined in the JOBS Act. Under the JOBS Act, emerging growth companies can delay adopting new or revised accounting standards issued subsequent to the enactment of the JOBS Act until such time as those standards apply to private companies. We have elected not to "opt out" of such extended transition period, which means that when a standard is issued or revised and it has different application dates for public or private companies, we can adopt the new or revised standard at the time private companies adopt the new or revised standard and may do so until such time that we either (i) irrevocably elect to "opt out" of such extended transition period or (ii) no longer qualify as an emerging growth company. We also intend to rely on other exemptions provided by the JOBS Act, including without limitation, providing an auditor's attestation report on our system of internal controls over financial reporting pursuant to

[Table of Contents](#)

Section 404(b) of the Sarbanes-Oxley Act. We will remain an emerging growth company until the earlier of (i) the last day of the fiscal year (a) following the fifth anniversary of the completion of this offering, (b) in which we have total annual gross revenue of at least \$1.07 billion, or (c) in which we are deemed to be a large accelerated filer, which means the market value of our common stock that is held by non-affiliates exceeds \$700.0 million as of the prior June 30th, and (ii) the date on which we have issued more than \$1.0 billion in non-convertible debt during the prior three-year period.

Off-balance sheet arrangements

We have not entered into any off-balance sheet arrangements, as defined in the rules and regulations of the SEC.

Recent accounting pronouncements

See Note 1 to our consolidated financial statements included elsewhere in this prospectus for information about recent account pronouncements, the timing of their adoption, and our assessment, if any, of their potential impact on our financial condition and results of operations.

Quantitative and qualitative disclosure about market risk

Interest rate risk

The primary objectives of our investment activities are to ensure liquidity and to preserve capital. Our cash and cash equivalents consist of cash and an interest-bearing money market fund. We do not hold any short-term investments. As a result, the fair value of our portfolio is relatively insensitive to interest rate changes.

Foreign currency exchange risk

There was no material foreign exchange risk during the periods presented.

Effects of inflation

We do not believe that inflation has had a material effect on our results of operations or financial condition during the periods presented.

Business

Overview

We are a clinical-stage biopharmaceutical company developing our novel class of highly specific and selective antibody-based therapeutics for the treatment of solid tumor cancer. Our CABs capitalize on our proprietary discoveries with respect to tumor biology, enabling us to target known and widely validated tumor antigens that have previously been difficult or impossible to target. Our novel CAB therapeutic candidates exploit characteristic pH differences between the tumor microenvironment and healthy tissue. Unlike healthy tissue, the tumor microenvironment is acidic, and we have designed our antibodies to selectively bind to their targets on tumor cells under acidic pH conditions but not on targets in normal tissues. Our approach is to identify the necessary targeting and potency required for cancer cell destruction, while aiming to eliminate or greatly reduce on-target, off-tumor toxicity—one of the fundamental challenges of existing cancer therapies.

The broad applicability of our CAB technology allows us to develop a wide array of product candidate modalities, such as monoclonal antibodies, antibody-drug conjugates, or ADCs, T cell-engaging bispecific antibodies and chimeric antigen receptor T cells, or CAR-T cells. A key advantage of our application of the CAB technology to antibodies is that it allows us to selectively target antigens on tumor cells and minimizes or eliminates binding to these antigens on normal cells, which reduces the toxicity associated with traditional approaches. We have initiated potentially registration-enabling Phase 2 trials for our two latest stage ADC product candidates, BA3011 (targeting AXL) and BA3021 (targeting ROR2) in multiple cancer indications, including sarcoma, NSCLC and melanoma. The FDA has reviewed the trial designs, but has not opined on whether the Phase 2 clinical trials will in fact be sufficient to support regulatory approval. However, the FDA is expected to consider this further at the interim data review point. We cannot assure you that the FDA will agree that such data will be sufficient to support approval. We are also supporting investigator-initiated trials for both BA3011 and BA3021 in platinum-resistant ovarian cancer. We have observed encouraging initial clinical signs of response to treatment and a wide therapeutic window, or range of dosage and duration. BA3011 and BA3021 have the potential to address large unmet medical needs in indications that together account for more than 350,000 new cases of solid tumor cancers and 150,000 deaths per year, in the United States alone. Additionally, we plan to work with our partner BeiGene to initiate Phase 1 trials in multiple cancer indications by year-end 2020 or early 2021 for our immuno-oncology antibody, BA3071 (targeting CTLA-4), which is designed to overcome the toxicity limitations of the currently approved anti-CTLA-4 antibody, to improve patient outcomes. We also have several candidates in our preclinical pipeline that include CAB bispecific antibodies targeting unmet medical needs in multiple types of solid tumors.

Our goal is to develop well-tolerated, novel cancer therapies that provide cures or extended survival to ensure patients' improved quality of life. Studies have shown that, as a drug class, antibodies have transformed oncology treatment and include some of the best-selling therapies on the biopharmaceutical market. While therapeutic antibodies have emerged as one of the most successful strategies for both solid and blood-based, or hematologic, malignancies, toxicity has narrowed the therapeutic window and ultimate potential of impacting disease, as many of the key targets on tumor cells are also prevalent on normal cells. By exploiting our novel understanding of tumor biology, including unique characteristics of pH in the tumor microenvironment, we believe that our CAB technology has the potential to transform antibody-based cancer therapy. We have created and patented our CAB technology to enable the development of antibodies that are active in the tumor microenvironment, but inactive under normal physiological conditions, while maintaining target-specific binding. The biology of tumor formation, or tumorigenesis, yields a unique microenvironment consisting of a complex mixture of tumor cells, stromal fibroblasts, endothelial cells and immune cells like microglia, macrophages and lymphocytes and the non-cellular components of extracellular matrix such as collagen, fibronectin, hyaluronan and laminin, among others. The process of tumor formation creates an

[Table of Contents](#)

altered, unique microenvironment in and around the tumor that is also physically and chemically distinct from healthy tissue, with regard to temperature, pressure, chemical composition and especially the acidity or pH. The tumorigenesis-driven shifts in microenvironment conditions further weaken the immune response and promote tumor growth. Our CAB technology aims to uniquely exploit the fundamental pH differences between the tumor and healthy tissue, increasing antibody binding selectivity and thereby potentially eliminating or greatly reducing healthy cell on-target, off-tumor toxicity. This enhanced selectivity has the potential to greatly improve the benefit-risk ratio for the patient and allows us to deliver desired drug levels either as monotherapy or utilizing unique multi-targeted or combination therapies that are currently difficult or impossible to develop. Additionally, the combination of reversible binding with the selective, precision capability of our CAB technology enables both increased antibody potency and reduced toxicity.

Initially, we applied the reversible binding and precision capability of our CAB technology to develop next-generation ADC therapies. Traditional ADCs are a class of biologic drugs that are designed by attaching a toxic small molecule payload to an antibody, which then targets a specific antigen expressed on the target cell, but unfortunately, in most cases, this target is also present on normal tissue. Binding to the target on normal tissue leads to high on-target, off-tumor toxicity, which reduces the utility of traditional ADCs. Our CAB ADCs are designed to selectively bind to the antigens found in acidic pH conditions found in the tumor microenvironment, which has the potential to reduce off-tumor toxicity and related consequences. In addition, we developed CAB antibodies to immuno-oncology targets such as CTLA-4 for antitumor activity. We believe that our CAB technology can reduce the limitations resulting from systemic toxicities and expand the utility of this immuno-oncology therapy. We are also creating bispecific, T cell engaging, CAB antibodies that are comprised of two different binding specificities, which allows the antibody to bind to two specific targets at the same time, generally one target on the tumor cell and one target on an immune system cell. This is a powerful approach to harness cytotoxic T cells to directly kill tumor cells with reduced toxicity.

Our pipeline

We believe that there is significant potential to improve therapeutics for our patients with our proprietary CAB antibody technology across well-validated oncology targets activated in solid tumors. The following table summarizes our current product candidate pipeline.

[Table of Contents](#)

Type	CAB Program	Target	Indications	Discovery	IND Enabling	Phase 1	Phase 2	Phase 3	Expected Upcoming Milestones

Abbreviations: STS = Soft Tissue Sarcoma, NSCLC = Non-small Cell Lung Cancer, RCC = Renal Cell Carcinoma, SCLC = Small Cell Lung Cancer, HCC = Hepatocellular Carcinoma, TNBC = Triple-Negative Breast Cancer, HNC = Head and Neck Cancer
 * Ph2 investigator-initiated trial for Ovarian Cancer expected to be initiated by the end of 2020 or early 2021
 ** Anticipated indications based upon tumor target expression

BA3011: Our lead product candidate, BA3011, is a CAB ADC that targets AXL, a protein that is highly expressed on the surface of many tumors, including soft tissue and bone sarcomas and NSCLC, as well as other tumor types. In preclinical studies, we have observed that BA3011 binds to AXL under conditions that reflect those in tumors. We have developed a quantitative biomarker assay that is called the AXL Tumor membrane Percent Score, or TmPS. The TmPS measures the level of target expression on the tumor membrane which, consistent with industry standard, we use to identify those patients who we believe will be the most likely to respond to our product candidates. We believe that the higher the level of target expression on the tumor membrane, the more likely it is that our product candidates may have the potential to produce a response. We have completed the Phase 1 dose escalation trial in advanced cancer patients, established a recommended Phase 2 dose and initiated dosing in a potentially registration-enabling Phase 2 clinical trial in soft tissue and bone sarcoma. We have also initiated a Phase 2 clinical trial in PD-1 refractory NSCLC patients. Interim analysis for both trials is anticipated in 2021 and the complete registrational data set expected in 2022. Additionally, we expect a multi-center investigator-initiated trial in platinum-resistant ovarian cancer will commence by the end of 2020 or early 2021.

BA3021: We are developing our second product candidate, BA3021, a CAB ADC targeting ROR2, a tumor target associated with tumor progression, metastasis and the development of resistance to conventional therapies and immuno-oncology agents. Employing a similar approach as with BA3011, we developed a TmPS quantitative assay based on ROR2 tumor membrane expression that we use to identify those patients who we believe will be the most likely to respond to our product candidates. We have completed the dose escalation part of a Phase 1 clinical trial in patients with locally advanced unresectable or metastatic solid tumors who were refractory or resistant to standard therapies, established a recommended Phase 2 dose and initiated a potentially registration-enabling Phase 2 clinical trial in PD-1 refractory melanoma and NSCLC with interim analysis anticipated in the second half of 2021 and the complete potential registrational data set expected in 2022. Additionally, we expect a multi-center investigator-initiated trial in platinum-resistant ovarian cancer will commence by the end of 2020 or early 2021.

BA3071: Our third product candidate, BA3071, is a CAB anti-CTLA-4 antibody, which our preclinical studies have shown to maintain the function of the checkpoint inhibitor ipilimumab, but with greatly reduced systemic toxicities. We have a global collaboration with BeiGene on this program through which we will receive development milestones and tiered royalties on sales worldwide. We expect to work with our partner BeiGene to support the initiation of a Phase 1 dose-escalation trial of BA3071 as monotherapy and in combination with tislelizumab, an anti-PD-1 antibody in late stage development by BeiGene, by the end of 2020 or early 2021. We anticipate Phase 1 data in 2021.

Bispecific antibody programs: We have also leveraged our CAB technology to develop bispecific antibodies, which bind both a tumor-specific antigen and a T cell receptor using CAB antigen-binding domains. A bispecific antibody is a type of engineered antibody that can simultaneously bind two separate and unique antigens, unlike conventional monospecific antibodies that only bind to one type of target. We have shown in preclinical experiments that our CAB bispecific molecules meet or exceed the activity of conventional bispecifics and reduce systemic activation of potentially fatal immune responses. We advanced two CAB bispecific antibody product candidates into IND-enabling studies in the second half of 2020. We expect to submit multiple US INDs in the second half of 2021 or sometime in 2022.

With respect to our potentially registration-enabling Phase 2 clinical trials, the FDA has reviewed the trial designs, but has not opined on whether the Phase 2 clinical trials will in fact be sufficient to support regulatory approval. However, the FDA is expected to consider this further at the interim data review point. We cannot assure you that the FDA will agree that such data will be sufficient to support approval.

We are led by a team of protein and antibody engineering experts, immunologists and experienced antibody clinical developers. Jay Short, Ph.D., our co-founder, Chairman and Chief Executive Officer, is an inventor of our CAB technology, has been issued more than 500 patents and has authored over 100 peer-reviewed publications. Dr. Short previously founded Diversa Corporation (now part of BASF), serving as its CEO, President and Chief Technology Officer, and he led its initial public offering and has over 35 years of experience in the biotechnology and biopharmaceutical industry. Scott Smith, our President, has over 30 years of biotechnology and biopharmaceutical industry experience and previously served as President and Chief Operating Officer at Celgene. At Celgene, he oversaw the clinical development and commercialization of Otezla®. Eric Sievers, MD, our Chief Medical Officer, was previously at Seattle Genetics where he led late stage clinical development and regulatory approval of Adcetris®, an ADC approved for a variety of lymphomas. Richard Waldron, our Chief Financial Officer, has more than 35 years of experience in financing biotechnology and biopharmaceutical companies. He started the healthcare investment banking practice at Cowen & Company and raised the early equity and R&D structured financing for Genzyme Corporation.

Since inception, we have raised \$166 million from the issuance of debt and equity securities, including from leading biopharmaceutical investors such as Soleus Capital, HBM Healthcare Investments, Cormorant Asset Management, Farallon Capital, Pappas Capital, funds managed by Janus Henderson, Boxer Capital and Pfizer.

Our strengths

Our novel CAB technology is underpinned by the following competitive strengths and is driven by the expertise and vision of our management team:

- **Our CAB technology has been studied in robust Phase 1 clinical trials for our two leading clinical programs.**
 - **Objective antitumor responses:** We observed multiple confirmed partial clinical responses (at least 30% reduction in tumor size for at least two consecutive time points) in our Phase 1 data for both BA3011 and BA3021, including in one patient tumor volume shrinkage of more than 90%, and several patients who are presently continuing on therapy without tumor progression.

- **Antitumor activity correlates with a proprietary biomarker:** The presence of the relevant target on a high percentage of tumor cells appeared to correlate with increased antitumor activity.
- **Safety and tolerability:** BA3011 and BA3021 were generally well-tolerated at the recommended Phase 2 dose range, which is positively differentiated from both preclinical and cross-trial trial results for a similar non-CAB ADC. Side effects have been generally manageable with our CAB ADC product candidates, with some patients able to receive more than a year of treatment.
- **Our CAB antibodies showcase strong drug-like characteristics, such as optimal exposure levels and low immunogenicity.** Therapeutic antibodies can trigger a strong negative immune system response from the body, also referred to as immunogenicity, which can induce anti-drug antibodies that can reduce efficacy or lead to severe infusion reactions. We have seen minimal immunogenicity with only one patient thus far potentially showing the formation of anti-drug antibodies and no infusion reactions reported to date.
- **We have demonstrated a proven ability to generate drug candidates for challenging or currently undruggable targets.** Our CAB technology enables us to generate antibodies that bind to their targets under conditions found in the tumor, but not in healthy tissue. Therefore, we are able to generate antibodies to targets which to this point have been undruggable due to the lack of sufficient therapeutic window with existing antibody technologies. We are also able to use these antibodies to engage targets that exist not only in tumors, but in healthy tissue as well. This has the potential to reduce side effects and toxicity, one of the fundamental challenges of cancer therapies today, thereby expanding the realm of potential therapeutic antibodies. To this end, we have generated three Phase 2 clinical programs, with multiple indications for each program, and we plan to submit up to four additional program INDs between the second half of 2021 and the end of 2022.
- **Our diverse pipeline addresses areas of high unmet need, with several near-term value inflection points, including two programs in Phase 2 for multiple indications.** Our clinical and preclinical pipeline addresses a variety of indications and targets. We believe our patented technology platform can be applied to a variety of therapeutic areas that would benefit from CABs, including a range of age-related diseases, as well as inflammatory, neurological and circulatory disorders, among others. Our broad pipeline provides multiple opportunities for success and value inflection points. We maintain exclusive development and commercialization rights in the major markets of the United States, Canada, Europe and Japan for all of our product candidates except for BA3071.
- **Our proprietary CAB technology is covered by multiple patents and patent applications applicable to a wide range of modalities.** Our CAB technology is covered by multiple patents and patent applications applicable to a wide range of modalities: 477 patents and patent applications with 257 issued, 8 allowed applications and 212 pending applications as of November 1, 2020 covering our CAB technology, product candidates and protein sequences. While our lead product candidates primarily exploit the differences in pH between the tumor microenvironment and healthy tissue, our CAB technology has the potential to use a variety of microenvironment triggers, including temperature, pressure and chemical composition.
- **Our talented and experienced management team drives the successful application of our novel CAB technology.** We are led by a team of protein and antibody engineering experts, immunologists and experienced antibody clinical developers. Our co-founder, Chairman and Chief Executive Officer is an inventor of our CAB technology, has been issued more than 500 patents and has authored over 100 peer-reviewed publications. Our President spent 10 years at Celgene, founding the Immunology division, and eventually was named President and Chief Operating Officer of Celgene. Our management team members have over 20 years on average of experience with leading biopharmaceutical companies.

Our strategy

Our mission is to develop and commercialize innovative antibody-based therapeutics for the treatment of solid tumors that depend on the physical and chemical properties of tumors and their microenvironment. We believe that our proprietary technology and approach have the potential to transform cancer therapy by decreasing systemic toxicities and improving efficacy. Our strategy to achieve this mission is as follows:

- **Advance BA3011 through regulatory approval and commercialization.** Clinical data from our Phase 1 trial with BA3011 are supportive of its development in sarcomas, a set of cancers with a high unmet clinical need. We have initiated a potentially registration-enabling Phase 2 trial for BA3011 in treatment refractory sarcoma patients (12 years of age or older) with an AXL TmPS of 70% or above and, if successful, we believe we can further advance BA3011 through regulatory approval and commercialization. In addition, we have initiated a potentially registration-enabling Phase 2 trial in NSCLC using an AXL TmPS of 50% or above. We will use a quantitative biomarker assay/TmPS score to identify likely responders and to help enrich our clinical trial programs.
- **Develop BA3021 in PD-1/L1 refractory tumors through regulatory approval and commercialization.** We have observed antitumor activity in PD-1 refractory NSCLC and melanoma patients in our Phase 1 trial and have initiated a Phase 2 trial of BA3021 in each of these indications. We will use a quantitative biomarker assay/TmPS score to identify likely responders and to help enrich our clinical trial programs.
- **Continue to capitalize on our unique technology to address areas of high unmet need in treating cancer.** We believe that, through the application of our CAB technology, we have the opportunity to develop a broad set of new molecules that include bispecific T cell engagers, immuno-oncology antibodies, as well as other therapies, to attack tumors through preferential activation in the tumor microenvironment.
- **Maintain and strengthen our intellectual property portfolio.** As of November 1, 2020, we have a total of 477 patents and patent applications with 257 issued patents, 8 allowed applications and 212 pending applications covering our CAB technology and product candidates. This broad patent coverage was designed such that protection of our product candidates is not dependent on any single patent but rather, each product candidate has multiple layers of protection. We plan to continue to maintain, enforce and defend our intellectual property.
- **Selectively enter into collaborations to maximize the value of our platform and pipeline, including the existing collaboration involving BA3071.** Given the potential of our technology to generate novel product candidates addressing a wide variety of solid tumors, we may opportunistically enter into strategic collaborations around specific geographic regions, indications, combinations and companion diagnostics. We may also explore collaboration arrangements to commercialize any product candidates where we believe the resources and expertise of the third party could be beneficial. These collaborations could advance and accelerate our programs to maximize their market potential and expand the worldwide commercial potential of our CAB technology.

Background on cancer and current treatment approaches

Cancer overview

Cancer is the name given to a collection of related diseases. In all types of cancer, some of the body's cells begin to divide without stopping and spread into surrounding tissues. Cancer can start almost anywhere in the human body, which is made up of trillions of cells, and unlike normal cells, cancer cells do not stop dividing when contacting neighboring cells, altering their metabolism for key nutrients and constantly devouring these and other nutrients for continuous growth. Most of these cancers form solid tumors, which are masses of cancerous

tissue. Cancers of the blood, or hematological cancers, such as leukemias, generally do not form solid tumors. Cancerous tumors are malignant, which means they can spread into or invade nearby tissues. In addition, as these tumors grow, some cancer cells can break off and travel to distant places in the body through the blood or the lymphatic system and form new tumors far from the original tumor. Primarily, we are targeting a series of indications across solid tumors, which represent approximately 90% of adult human cancers. According to the American Cancer Society, cancer is one of the most common causes of death in the United States and is expected to surpass heart disease as the leading cause of death in the next several years.

Despite profound advancements in oncology drug development that have expanded the treatment options available to patients, there remains a significant unmet need for such treatments. Collectively, our founders and management team have a decades-long heritage of identifying and characterizing resistance mechanisms in oncology, having discovered and developed important medicines.

There remains a significant need for novel approaches and improved treatment options for cancer patients. Cancer treatment has traditionally included chemotherapy, radiation, hormone therapy, surgery or a combination of these approaches. Small molecule chemotherapy agents and cytotoxic agents have demonstrated efficacy with some types of cancer; however, off-target and systemic toxicities have typically been observed with this kind of treatment, thus limiting dosing and, consequently, hampering any meaningful effectiveness for the treatment of solid tumors. Over the past 20 years, cancer research and treatment approach have shifted to more targeted therapies, notably monoclonal antibodies and immuno-oncology, a novel paradigm focused on boosting antitumor immune responses, which one of our advisors, Dr. Jim Allison, shared the Nobel Prize for in 2018.

Immune system and antibodies

Cancer immunotherapy uses the immune system and its components to mount an antitumor response. During the last decade, it has evolved from a promising therapy option to a robust clinical reality. Many immunotherapeutic modalities are already approved by the FDA for treating cancer patients, many others are in the pipeline for approval as standalone or combinatorial therapeutic interventions and several are also combined with standard treatments in clinical trials. One type of immunotherapy uses antibodies which exist in the immune system to identify foreign virus, bacteria and other foreign molecules by binding to specific proteins called antigens on the surface of cells.

Different types of antibodies include:

- **Naked Monoclonal Antibodies:** Naked monoclonal antibodies have no drug or radioactive material attached and are the most common type of antibodies in cancer treatment.
- **ADCs:** ADCs are targeted biopharmaceutical drugs that combine monoclonal antibodies with highly potent anti-cancer agents linked via a chemical linker.
- **Bispecific antibodies:** Bispecific antibodies can bind to two different antigens at the same time, most potently with one target on the tumor cell and one target on an immune system cell.

Therapeutic antibodies have become the predominant class of new drugs developed in recent years. Over the past five years, antibodies have become the best-selling drugs in the pharmaceutical market, and in 2018, eight of the top 10 best-selling drugs worldwide were biologics. The global therapeutic monoclonal antibody market is expected to generate revenue of \$300 billion by 2025.

Our technology

Challenges in developing antibody-based therapies for solid tumors

Monoclonal antibody therapeutics have been approved for over 30 targets for multiple diseases, most commonly cancer. Antibodies have become the new backbone of the pharmaceutical industry, which previously relied on small molecules. Treatment with monoclonal antibodies has established itself as one of the most successful therapeutic strategies for both hematologic malignancies and solid tumors. Oncology targets of safe, effective antibodies fall into two broad categories:

- Antibodies targeting antigens, usually proteins, preferentially expressed on the surface of cancer cells, against which antibodies are used to directly bind and inhibit or destroy these cells; and
- Antibodies targeting antigens affecting directly or indirectly tumor cells and non-tumor cells that activate the immune system or induce other changes in the tumor, such as limiting the growth of tumor-related blood vessels.

There are significant limitations of targeting important antigens with traditional antibodies that can result in reduced efficacy, difficulties related to dosing and decreased durability, all of which significantly limit the potential for cures with traditional antibodies:

- **Increased toxicity:** Antigens are typically expressed in many normal tissues, which for traditional antibodies, including ADCs, could lead to significant on-target, off-tumor toxicity.
- **Target-mediated drug disposition limitation:** Target-mediated drug disposition, or TMDD, is the phenomenon in which a drug binds to its pharmacological target on normal tissue, causing the antibody to attack a normal cell and depleting the antibody from circulation. As a consequence, the pharmacokinetic characteristics of the drug can be adversely impacted, leading to reduced half-life, lower tumor exposure, which requires more frequent dosing, increased toxicity and ultimately resulting in patient inconvenience, greater costs and necessitating higher doses of the drug.
- **Immunogenicity:** Antibodies also can be sensitive to modifications that can lead to immunogenicity, or a strong negative immune system response from the body, which can induce anti-drug antibodies that can reduce efficacy or lead to severe infusion reactions, thereby restricting the potential improvements that could be made with emerging technologies.

The fundamental specificity challenge with traditional monoclonal antibody-based therapy is that there are few known antigens that are specific to tumors and absent in non-cancerous tissues. Drug developers might develop an antibody that is exquisitely specific against its target, but due to the expression of the target on non-tumor cells, systemic administration can result in dose-limiting toxicities from on-target, off-tumor activity. However, clinicians are able to manage the consequences of these adverse events in most hematological cancer patients. In solid tumors, therapies such as cetuximab target an antigen that is highly expressed in colorectal cancer, but is also expressed in epidermal cells throughout the body, which are not restricted in lineage or tissue, nor can be easily regenerated as in the case of cells in the hematopoietic lineage. Consequently, solid tumor treatments may often result in on-target, off-tumor toxicities that are more difficult to manage than with treatments for hematological malignancy. As an example, treatment with cetuximab results in over 80% of patients developing skin toxicities that can severely impact patients' physical, psychological and social well-being and can lead to treatment discontinuation and dose reduction.

These examples, however, only represent antibodies where the therapeutic benefit clearly outweighs the consequences associated with the adverse events. There are many potential protein targets that do not offer such clear-cut therapeutic windows. The majority of anticancer antibody-based drug products are consequently

limited to a small subset of potential tumor antigens. We believe that our novel approach to increase the selectivity of antibody-based therapeutics while maintaining their potency may have the potential to fundamentally transform the development of anticancer therapeutics and expand the universe of targets for novel antibody-based therapies.

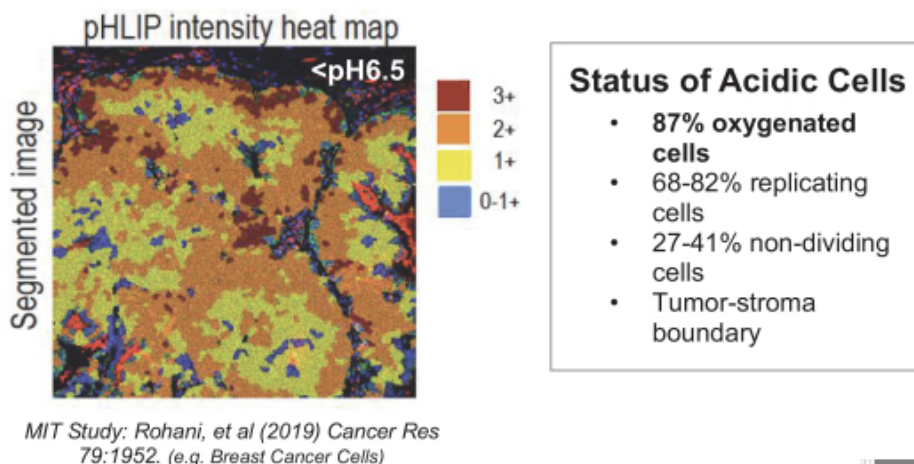

CAB leverages the low pH found in the tumor microenvironment

The tumor microenvironment has been widely implicated in tumorigenesis because it harbors tumor cells that interact with surrounding cells through the circulatory and lymphatic systems to influence the development and progression of cancer. The tumor microenvironment has conditions distinct from the normal cellular and extracellular environments found in non-cancerous tissue, blood or other parts of a normal body. It has been long appreciated that the extracellular milieu inside and surrounding the growing tumor mass is distinct and unique. One of the most profound physicochemical differences between the tumor microenvironment and normal cellular environment is an increase in lactic acid and an associated decrease in pH in the tumor microenvironment from the normal physiological pH of about 7.4 or higher.

While the tumor is acidic, some of the most acidic regions of tumors can be observed at the edge of the tumors, just at the interface with the surrounding tissue or blood, according to a paper published in 2019 in the journal *Cancer Research*. In this study, pH low insertion peptide, or pHLIP, a peptide that is taken up by cells at a pH below 6.5, was injected into human tumor-bearing mice. While nearly all tumors took up this peptide, normal tissues did not take up this peptide except in the liver and kidney, where it was metabolized and excreted. As shown in the figure below, certain regions within the tumor and in the cells at the edge of tumors took up some of the highest concentration of the probe, indicating that these areas had pH substantially lower than 6.5. These findings are important when considering the design of therapies for solid tumors because they point to the fact that while the overall tumor is acidic, the most accessible and rapidly growing portions of tumors are likely to have some of the lowest pHs.

Shown below is a tumor “heat” map identifying the tumor cells that are surrounded by an acid microenvironment. Exploiting the established ability of pHLIP to label the membrane of cells exclusively under acidic conditions (<pH 6.5) *in vivo*, the cells within the acidic areas of the tumor *in vivo* can be identified at the histological level. Mice harboring human breast tumor xenografts were administered Cy7-labeled, or dyed, pHLIP peptide and the tumor tissues were later removed and processed for imaging. Shown on the left is a micrograph of the tumor with the cell-based segmentation data overlaid, including positional information relative to tumor edge. The degree of positivity generated in the above analysis was used to identify a 0-3+ positive cells. Note that the acidic areas extend beyond the traditional hypoxic core of the tumor into the aerobic and oxygenated cells at the invasive fronts at the tumor–stroma interface *in vivo*. Shown on the right is the breakdown of cancer cells types that are identified by pHLIP acidic cell staining *in vivo*. A majority of the cells identified are oxygenated and actively replicating tumor cells, and even the non-dividing cancers cells still maintain an acidic environment.

Tumor “Heat” Map

Tumors are highly acidic based on the uptake of pHLIP, a pH-sensitive probe. While the entire tumor is acidic, the lowest pH cells are the replicating cells, which are glycolytic and often oxygenated, *i.e.*, the Warburg Effect.

One reason for the low pH in tumors compared to normal cells is that there are distinct differences in the metabolic processes found in normal and cancer cells. Normal cells generate the energy they need primarily through the oxygen-dependent process called oxidative phosphorylation. In comparison, cancer cells have switched their mechanism of energy production preferentially to the non-oxygen-dependent process known as glycolysis, even in the presence and availability of oxygen. This process switch was first described nearly a century ago and is the basis of modern tumor screening technologies. The dependence of a tumor cell on glycolysis results in the tumor cell metabolizing up to 200 times more glucose than a healthy cell and causing the secretion of significant levels of lactic acid into the tumor microenvironment. This inherent buildup of lactic acid in the tumor microenvironment has been shown to reduce immune cell function and modulate other defense mechanisms of the body, promoting tumor growth and tumor survival. The presence of lactic acid in the tumor microenvironment causes it to have a distinctly acidic pH of less than 6.8 and even lower at the tumor cell surface, a pH so low that it is rarely found in the body except in organs designed for low pH, such as the stomach, where antibodies in the blood do not access, and in special circumstances, such as cancer. In some cancers, the pH goes as low as 5.8, an extremely low level given the normal, slightly alkaline, pH in the body. The body holds its pH within a tight range around a pH of 7.4, even in the non-cancerous regions of tissues afflicted with cancer.

These pH differences provide a clear correlation between low pH and cancer, one that is borne out in the aforementioned experiments that measure the uptake by cells of the peptide pH tracer pHLIP. These cells are found to have high levels of lactate dehydrogenase, an enzyme that produces the sugar lactate, *i.e.*, lactic acid. Lactate production and secretion are known features of glycolysis. Similarly, there is a strong correlation between the uptake of pHLIP and the expression of markers of aggressive tumor growth such as Ki67.

Tumors not only have characteristically low pH, which assists them in reducing the body’s immune defenses, along with acidity they also generate other aberrant conditions and secrete other chemicals and proteins into the tumor microenvironment that may stimulate tumor growth, promote the development of new blood vessels or angiogenesis, degrade surrounding tissues allowing the tumor to spread or metastasize or actively suppress detection and destruction by the immune system. In view of our preclinical studies and clinical trials and the

substantial supporting scientific literature, we believe that there is an opportunity to develop cancer therapies with improved selectivity for tumors by taking advantage of changes in pH, as do our initial product candidates, as well as in the conditions and levels of temperature, pressure and chemical composition in the tumor microenvironment.

Our CAB technology

Our CABs are based on our patented protein discovery and engineering technology. We invented, developed and refined this technology which we believe selectively activates proteins and antibodies in the tumor microenvironment based on differences in local conditions such as pH, temperature, pressure or chemical composition compared to normal healthy tissue. We have shown that activation of our CAB biologics is reversible; not only are they activated due to the pH levels of the tumor microenvironment, but also, unlike prodrugs, they are reversibly inactivated when they leave the tumor microenvironment and are in a normal physiological environment.

We have used and continue to leverage our patented CAB technology to screen antibody candidates for multiple characteristics. By doing so, we can evolve specific regions on the antibody that will only bind in response to environmental conditions, either enhancing or eliminating binding. Our CAB technology allows us to select antibodies that preferentially bind to the target under the conditions of interest, such as high local acidity. CAB antibodies have human or humanized antibody sequences, a characteristic that reduces the risk of immunogenicity compared to emerging technologies in the field, which is supported by both our preclinical and clinical data.

Our cancer antibodies have been designed to be active in the acidic, lower pH of the tumor microenvironment and inactive under the slightly alkaline pH of 7.4 found in normal physiological conditions. In a quantitative *in vitro* binding assay we compared a CAB antibody and a non-CAB antibody that both bind to the target AXL with matched strength of binding to the target, or affinities, when measured at pH 6.0. As shown in the figure below, binding of the CAB antibody was highly sensitive to pH with binding becoming much weaker as it approached pH 7.0 and almost undetectable at a physiological pH of 7.4. In contrast, a non-CAB antibody to AXL showed indiscriminate and experimentally equivalent binding across the entire pH range tested, including at pH 7.4 of normal cells. Our CAB development process is capable of identifying CAB antibodies with a range of sensitivities to pH.

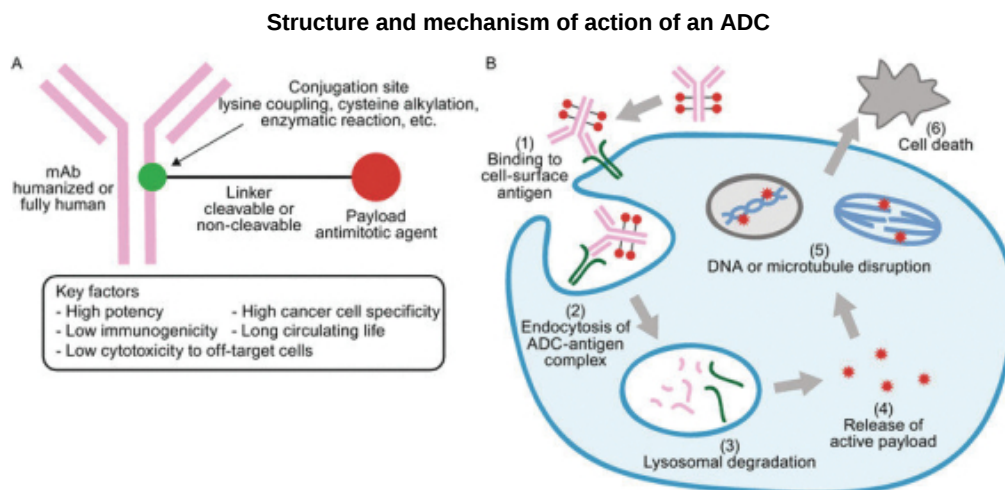

CAB antibodies have pH-dependent binding. Standard antibodies do not have pH-dependent binding in the pH range tested.

Low pH-dependent CAB antibodies are far less likely to bind to targets outside of tumors, resulting in antibodies generated by our CAB platform having a number of potential advantages over traditional antibodies:

- **Wide therapeutic window.** Reduced binding to target antigens outside of the tumor has the potential to reduce toxicities that arise from systemic exposure. We believe this may enable higher doses or increased potency to be safely delivered to patients with the potential for increased efficacy.
- **Opportunity to increase tumor-specific killing.** The wide therapeutic window imparted by tumor-specific targeting enables CAB antibodies to be modified with cytotoxic drugs to create ADCs. Similarly, bispecific antibodies can be developed using CAB antibody domains targeting pairs of targets that direct T cells to attack the tumor, which may exhibit unacceptable toxicities such as cytokine release syndrome and neurological toxicity if constructed using traditional antibody domains.
- **Increased drug exposure to tumors.** Limited binding to targets outside of tumors allows more of the administered CAB antibodies to be available to bind to target sites in the tumor, potentially increasing the concentrations and exposure of these antibodies in tumors.
- **Improved pharmacokinetics.** Limited binding to targets outside of tumors effectively increases their half-life in plasma. The phenomenon of TMDD is a well-known limitation facing the development of many biologics which CAB antibodies may be able to avoid.
- **Broader universe of tumor-specific antigens that can be targeted.** There are few highly prevalent tumor-specific antigens expressed on solid tumors that are not expressed at some level in normal tissues. While

some targets, such as EGFR, can be targeted by traditional antibodies with an acceptable level of toxicity in a subset of patients, many other potential targets cannot. CAB antibodies with pH-dependent binding have the potential to significantly reduce the potential risk of systemic toxicities caused by expression of targets on normal tissues.

An important emerging class of antibodies is ADCs. An ADC is a modified antibody that generally has a chemotherapy agent attached to the antibody to enable more targeted chemotherapy treatment of a tumor. Set forth below is a general structure of an ADC containing a humanized/human monoclonal antibody, or mAb, a cleavable/non-cleavable chemical linker and a cytotoxic payload. The linker is covalently linked to the mAb at the conjugation site. Also set forth below is the general mechanism of action of ADCs. The ADC binds to its target cell-surface antigen receptor (Step 1) to form an ADC-antigen complex, leading to endocytosis of the complex (Step 2). The internalized complex undergoes lysosomal degradation (Step 3) and the cytotoxic payload, e.g., the microtubulin inhibitor MMAE, is released inside the cell (Step 4). The released payload binds to its target (Step 5), leading to cell death (Step 6).

General structure of an ADC, and the general mechanism of action of ADCs.

Unfortunately, ADCs frequently bind to targets on normal cells and lead to severe toxicities. In order to evaluate the CAB technology's ability to eliminate the on-target, off-tumor toxicities, we generated two ADCs during our preclinical testing: one using a CAB antibody to AXL and another using a traditional AXL antibody. Within three days of dosing non-human primates with the traditional ADC, the levels of alanine aminotransferase, or ALT, a sign of liver toxicity, increased sharply. Dosing with the CAB ADC resulted in minimal increase in ALT, supporting that on-target, off-tumor toxicity is reduced with the CAB ADC.

Liver toxicity after injection of AXL-ADCs

Dosing with a CAB ADC resulted in minimal activation of ALT, a sign of liver toxicity, compared to an affinity matched, or AM, traditional antibody ADC.

We also observed that the plasma concentration and half-life of the CAB ADC were higher than that of the traditional ADC. As shown below, we demonstrated a dose dependency of this observation, which indicates that the primary driver of this absence of TMDD effect with CAB ADC is due to the reduced binding of the CAB ADC to AXL outside of the tumor microenvironment.

Pharmacokinetic profile of AXL ADCs following 1mg/kg dose in non-human primate

The CAB-ADC has increased plasma concentration in non-human primates when compared to affinity matched AXL control antibodies, or Non-CAB ADCs.

Through the use of our proprietary technology, we have developed CAB antibodies, which we believe have specificity for tumors, while avoiding binding to the same antigen target expressed on many normal tissues. This allows us to develop therapeutics against targets that are expressed at high levels on tumors cells but are also present on normal cells and tissues, without the toxicities associated with traditional antibodies.

Our product candidates

Expanding addressable market with high unmet needs

Our pipeline

Type	CAB Program	Target	Indications	Discovery	IND Enabling	Phase 1	Phase 2	Phase 3	Expected Upcoming Milestones

BA3011 – a CAB anti-AXL ADC

BA3011 is a CAB ADC product candidate directed against AXL. We are developing BA3011 as a potential therapeutic for multiple solid tumors, including soft tissue and bone sarcoma, NSCLC and others, such as ovarian cancer. We have completed a Phase 1 trial in patients with refractory solid tumors, established a recommended Phase 2 dose, and continue to dose patients that are responding to therapy. As of November 1, 2020, five patients have achieved a partial response and preliminary evidence of antitumor activity has been observed in additional patients. We have shown that there appears to be a correlation of antitumor activity with tumor membrane expression of AXL and have developed a robust, quantitative immunohistochemistry assay. We recently initiated dosing in a potentially registration-enabling Phase 2 clinical trial in soft tissue and bone sarcoma. We have also initiated a Phase 2 clinical trial in PD-1 refractory NSCLC patients. The FDA has reviewed the trial designs, but has not opined on whether the Phase 2 clinical trials will in fact be sufficient to support regulatory approval. However, the FDA is expected to consider this further at the interim data review point. We cannot assure you that the FDA will agree that such data will be sufficient to support approval. Additionally, we expect a multi-center investigator-initiated trial in platinum-resistant ovarian cancer will commence by the end of 2020 or early 2021.

BA3011 is an ADC consisting of a CAB humanized immunoglobulin G, or IgG1, anti-AXL monoclonal antibody. The core antibody is conjugated using a cleavable linker to the well-known and proven toxin monomethyl auristatin E, or MMAE. BA3011 was designed to specifically and reversibly bind to AXL in conditions found within

the tumor microenvironment, thus conferring a selectivity binding advantage for tumors over normal cells. Upon binding of BA3011 to AXL on the surface of tumor cells, it is internalized and the MMAE cytotoxin is released, leading to cell killing.

Target

AXL – a well-validated oncology target

AXL is a tyrosine kinase receptor that is highly expressed and activated in numerous human sarcomas, including aggressive subtypes of leiomyosarcoma, Ewing's sarcoma and liposarcoma. Increased expression of AXL has been shown in a number of human malignancies, including NSCLC, breast cancer, chronic lymphocytic leukemia, pancreatic cancer, glioblastoma, melanoma, renal cell carcinoma, or RCC, prostate cancer and esophageal cancer, where AXL's higher expression is associated with disease progression and shortened overall survival.

AXL expression is associated with resistance to chemotherapy, PD-1/L1 inhibitors, molecular targeted therapy and radiation therapy in tumors such as lung, prostate, breast, ovarian and colorectal cancers. Overexpression of AXL confers drug resistance in NSCLC. Further, in NSCLC, AXL expression has, to the extent relevant, been shown to correlate with an increase in the expression of PD-L1, an immune checkpoint. In gastrointestinal stromal tumors, expression of AXL leads to resistance to imatinib, a small molecule kinase inhibitor.

AXL is considered to be a driver of many cellular processes that are critical for the development, growth and spread of tumors, including proliferation, invasiveness and migration, stemness, which is related to core stem cell properties such as self-renewal and differentiation, angiogenesis, or the growth of blood vessels, and immune modulation. In NSCLC, AXL is over-expressed in EGFR resistant tumors. AXL is an oncogenic driver and enables tumor growth in EGFR resistant tumors. Genetic knockdown of AXL in preclinical models has been associated with decreased proliferation and increased apoptotic or programmed cell death, and decreased tumor invasiveness and migration. AXL has also been shown to be involved in the epithelial-mesenchymal transition, or EMT, a process by which epithelial cells lose their cell polarity and cell-cell adhesion, and gain migratory and invasive properties to become mesenchymal stem cells, or MSCs. MSCs are home to developing aggressive tumors, where they exacerbate cancer cell proliferation, motility, invasion and metastasis, foster angiogenesis, promote tumor fibrosis and suppress antitumor immune responses.

Therapeutic targeting of AXL: limitations of current therapies and therapeutic candidates

Multiple therapeutic agents that target AXL have been developed and investigated in clinical trials. A number of small-molecule AXL kinase inhibitors have been developed; however, the majority of these inhibitors that have been taken into the clinic, including one that has been approved, are not highly selective for AXL. Some anti-AXL antibodies in the clinic have shown encouraging signs of antitumor activity; however, adverse events, such as high-grade constipation and peripheral neuropathy, were particularly pronounced.

Indications

Sarcoma disease overview

Sarcomas are cancers that arise from bone, muscle, fat, nerves, fibrous tissues, blood vessels or deep skin tissues. Broadly categorized as bone and soft-tissue sarcomas, they can be found in any part of the body, including in the arms, legs or abdomen.

The National Cancer Institute estimates that there will be approximately 13,130 new cases of soft tissue sarcoma and 5,350 deaths in the United States in 2020. Five-year survival for all stages of soft tissue sarcoma is 64.7%, but this falls to 16.4% for patients with late-stage metastatic disease. Osteosarcoma is a rare cancer with 800 to 900 new cases diagnosed each year in the United States. Five-year survival rates for osteosarcoma

are on average approximately 60% for new diagnoses. However, those with metastatic bone sarcomas experience much worse outcomes. Importantly, Ewing and osteosarcomas represent a particularly compelling unmet need among sarcomas because of their relative prevalence and poor prognosis among adolescents and young adults. Teens aged 15 to 19 have a survival rate of about 56% for Ewing sarcoma. This type of tumor has a high unmet need with an estimated 16,730 patients per year in refractory sarcoma. The eligible population for 2nd line treatment is estimated to be approximately 10,000-15,000 patients, and we estimate that approximately 50% of those patients could have AXL positive tumors during their treatment. Thus, we estimate that approximately 5,000-7,500 patients from the existing patient pool may be appropriate for CAB therapy.

There are no targeted therapies for the treatment of most soft tissue sarcomas and osteosarcoma and bone sarcomas have no approved therapies after the failure of frontline regimens. Primary treatments include surgery with the goal of complete resection of the tumor while sparing the limb, cytotoxic chemotherapy, radiation therapy or combinations of these treatments. Approved therapies that have shown improvement in objective response rates, or ORRs, in second-line treatment demonstrated ORRs of less than about 15% in clinical trials. ORR is defined as the proportion of patients with tumor size reduction of a predefined amount and for a minimum time period and is comprised of complete responses and partial responses. Response duration usually is measured from the time of initial response until documented tumor progression. A response is considered "confirmed" if the criteria for response is achieved again in a subsequent scan. Our trials employed the standard RECIST 1.1 criteria (Eisenhauer, 2009).

There is a sizable market for new therapies for sarcomas. In 2016, olaratumab, an antibody against platelet derived growth factor alpha, or PDGFR α , was initially granted accelerated approval in combination with doxorubicin, a chemotherapy medication for the treatment of sarcoma based on an improved overall survival of 26.5 months compared to 14.7 months for doxorubicin alone. Olaratumab subsequently failed to demonstrate a significant benefit in a confirmatory Phase 3 trial and has been withdrawn from the market. However, in less than two years on the market from launch, olaratumab had total sales of \$562 million with a 50% CAGR.

NSCLC disease overview

Non-small cell lung cancer is a group of lung cancers that are named for the kinds of cells found in the cancer and how the cells look under a microscope. The three main types of non-small cell lung cancer are squamous cell carcinoma, large cell carcinoma and adenocarcinoma. Non-small cell lung cancer is the most common kind of lung cancer.

Despite the success of new immuno-oncology and targeted treatments, NSCLC continues to represent a profound unmet need. An estimated 1.8 million people die of lung cancer each year, the leading cause of cancer-related death, accounting for approximately 18% of all cancer deaths globally. There are an estimated 228,820 new cases of lung cancer diagnosed and 135,720 deaths in the United States annually. NSCLC accounts for 80 to 85% of lung cancer cases. Genetic profiling of tumors has identified a number of genes that are altered in NSCLC. Targeted therapies developed for the proteins encoded by some of these genes, such as the epidermal growth factor receptor, or EGFR, and anaplastic lymphoma kinase gene, or ALK, have been approved and are now part of the standard of care. However, less than 30% of NSCLC patients have alterations in these two genes. Up to two thirds of NSCLC patients who are ineligible for or resistant to treatment with EGFR or ALK targeted therapies have tumors that express PD-L1 and are candidates for checkpoint inhibitor therapies, which can lead to significant improvements in progression-free survival and overall survival compared to standard chemotherapy. In NSCLC, it is estimated that by 2024/2025 approximately 66,000 patients will be treated with a PD-1/L1 inhibitor. It is further estimated that the majority of patients (approximately 75%) will progress and switch to new therapy. We estimate that 30% of patients could have AXL or ROR2 positive tumors. Thus, we estimate that approximately 30,000 eligible patients may benefit from CAB therapy.

Despite the availability of these numerous therapies, very few patients are cured of their disease and the prognosis in NSCLC remains poor, with an overall five-year survival for all patients diagnosed with NSCLC of 19%.

Ovarian cancer disease overview

Ovarian cancer is a cancer that forms in tissues of the ovary, one of a pair of female reproductive glands in which the ova, or eggs, are formed. Most ovarian cancers are either ovarian epithelial cancers, which are cancers that begin in the cells on the surface of the ovary, or malignant germ cell tumors, which are cancers that begin in egg cells. Fallopian tube cancer and primary peritoneal cancer are similar to ovarian epithelial cancer and are staged and treated the same way.

Ovarian cancer is the fifth deadliest cancer in women and accounts for more deaths than any other gynecologic cancer in the United States. There are an estimated 21,750 new cases of ovarian cancer in the United States in 2020. Even though most patients will respond to 1st line therapy, approximately 85% of advanced ovarian cancer cases will recur after 1st line treatment. Platinum-based chemotherapy becomes less effective with each recurrence, the time during which the patient lives with the disease but it does not get worse, known as progression-free survival, becomes shorter and most patients eventually become platinum resistant. Patients who relapse within six months or less after initial chemotherapy are considered to be platinum resistant. Platinum resistant patients have few choices for treatment and often experience poor outcomes. By 2nd line treatment, it is estimated that approximately 12,000 patients will be either platinum refractory/resistant, and we estimate that approximately 30-40% of the patients may express AXL or ROR2 on their tumors. Of the existing patient pool, we estimate that approximately 8,000 patients could benefit from CAB therapy.

BA3021—a CAB anti-ROR2 ADC

BA3021 is a CAB antibody directed against ROR2, conjugated to MMAE. ROR2 is a receptor tyrosine kinase that is also known as Receptor Tyrosine Kinase Like Orphan Receptor 2. ROR2 is overexpressed across many different solid tumors and its tumoral expression is further enhanced among those treated with PD-1 checkpoint inhibitors. We have completed a Phase 1 dose-escalation trial with BA3021 where we observed two partial responses in advanced, treatment refractory NSCLC and one partial response in melanoma. We believe BA3021 has broad potential as a cancer therapy for patients with advanced solid tumors. We recently initiated Phase 2 enrollment in patients with PD-1 refractory NSCLC and melanoma. Additionally, we expect a multi-center investigator-initiated trial in platinum-resistant ovarian cancer will commence by the end of 2020 or early 2021.

BA3021 is a CAB anti-ROR2 ADC consisting of a CAB anti-ROR2 humanized IgG1 monoclonal antibody conjugated to MMAE using a cleavable linker. BA3021 binds potently and specifically to ROR2 under conditions found in the tumor microenvironment. Outside of these conditions, BA3021 loses its potency in a reversible manner such that it regains its ROR2 potency when it reenters conditions similar to those in the tumor microenvironment, thereby preventing elimination of ROR2-expressing normal cells.

Target

ROR2—an attractive target in multiple solid tumors

ROR2 is a receptor tyrosine kinase that is commonly overexpressed in multiple types of cancer including breast, lung, pancreatic, renal, colorectal, head and neck and melanoma. Cancer cell expression of ROR2 has been associated with enhanced cancer cell migration, EMT, increased associated risk for relapse, metastasis and unfavorable prognosis. In breast cancer, for example, ROR2 was found to be expressed in the majority of

patient samples, with those expressing ROR2 having decreased overall survival. A similar correlation between ROR2 expression level and overall survival was observed in NSCLC and metastatic melanoma.

ROR2 stimulates the Wnt cellular signaling pathway, a pathway that has long been associated with tumorigenesis and tumor-initiating cells. Wnt signaling has recently been implicated in tumor metabolic reprogramming and tumor immune evasion. Tumors resistant to PD-1 checkpoint inhibitors become increasingly dependent on certain receptor tyrosine kinases involved with EMT, including ROR2, the expression level of which is increased in melanoma tumors that survived PD-1 treatment. Genetic inactivation of ROR2 in metastatic melanoma cells was shown to prevent metastases of these tumor cells in mice.

ROR2 has essential roles in normal cells and in early development. Inactivation of ROR2 is lethal in mice with defects observed in the heart, nervous system and skeleton. Less severe mutations in ROR2 in humans is associated with skeletal diseases Robinow syndrome and brachydactyly type B.

Indication

NSCLC and ovarian cancer are the two initial indications and are described in the prior section.

Melanoma disease overview

Melanoma is a form of cancer that begins in melanocytes, which are cells that make the pigment melanin. It may begin in a mole as skin melanoma, but can also begin in other pigmented tissues, such as in the eye or in the intestines.

There are an estimated 100,350 new cases of metastatic melanoma in the United States in 2020, with 6,850 deaths in the United States annually. An estimated 25,000 patients are being treated with immune checkpoint inhibitors. It is estimated that most patients (approximately 75%) will progress and switch to a new therapy, and of those, approximately 20-30% are anticipated to have tumors that are ROR2 positive at some point in their treatment. Of the existing patient pool, it is estimated that approximately 5,000 patients may benefit from BA3021 CAB therapy.

BA3071—a CAB anti-CTLA-4 antibody

BA3071 is a CAB anti-CTLA-4 antibody that is being developed as an immuno-oncology agent with the goal of delivering the efficacy of approved CTLA-4 antibodies, such as ipilimumab, but with lower toxicities due to the CAB's tumor microenvironment-restricted activation. We have a global collaboration with BeiGene which, as amended, provides for the development, manufacturing and commercialization of BA3071. Under the terms of our BeiGene collaboration, BeiGene is generally responsible for developing BA3071 and is responsible for global regulatory filings and commercialization. Subject to the terms of the agreement, BeiGene holds an exclusive license with us to develop and manufacture the product candidate globally. BeiGene is responsible for all costs of development, manufacturing and commercialization globally. In addition, we may in the future seek third-party collaborators or joint venture partners for development and commercialization of additional CAB product candidates. We expect to work with our partner BeiGene to support the initiation of a Phase 1 dose-escalation trial of BA3071 as monotherapy and in combination with tislelizumab, an anti-PD-1 antibody in late stage development by BeiGene, by the end of 2020 or early 2021 with expansion cohorts to be enrolled upon identification of the recommended dose.

BA3071 is a CAB anti-CTLA-4 antibody which is activated under conditions similar to those found in the tumor microenvironment and inactive under conditions found elsewhere in the body.

Target

CTLA-4 overview

CTLA-4, or cytotoxic T-lymphocyte-associated antigen 4, is an immune checkpoint involved in regulating T-cell activation. The primary role of immune checkpoints is to prevent autoimmune attacks against normal tissue in the body; however, cancer cells often take advantage of this pathway to prevent immune destruction of the tumor.

Ipilimumab is an anti-CTLA-4 monoclonal antibody that is approved for the treatment of multiple solid tumors, including melanoma, RCC, colorectal cancer and in combination with an anti-PD-1 antibody, nivolumab in NSCLC. Patients treated with ipilimumab face a risk of a number of adverse events associated with inappropriate activation of the immune system beyond the tumor site including severe and sometimes fatal enterocolitis, hepatitis, dermatitis, neuropathy and endocrinopathy. The usage and dosage of ipilimumab is highly limited due to its safety profile, resulting in the average number of cycles on therapy not exceeding four cycles. Even in combination with nivolumab, at one-third to one-tenth of the monotherapy dosage level, treatment still results in high toxicity.

To maximize efficacy for the treatment of most cancers, combination treatments are often needed. In a Phase 3 trial in late stage refractory melanoma, the combination of treatment with nivolumab and ipilimumab led to a 57.6% ORR, including 11.5% of patients with a complete response, which means the eradication by treatment of all of a readily identifiable tumor. As of the most recent assessment, more than half of the patients continued to show a complete response. This response exceeded the results associated with either product when used as monotherapy. Overall survival increased from 6.9 months on nivolumab monotherapy to 11.5 months for the combination therapy. As shown below, this drug combination, however, increased the frequency of Grade 3 and 4 adverse events such that over half of treated patients were affected. The most frequent Grade 3 or Grade 4 events were diarrhea, colitis and elevation of liver enzymes. Over one-third of patients in the combination arm withdrew from the trial.

According to the FDA, the term “Grade” refers to the severity of the adverse event—Grade 1 Mild; asymptomatic or mild symptoms; clinical or diagnostic observations only; no intervention indicated—Grade 2 Moderate; minimal, local or noninvasive intervention indicated; limiting age-appropriate instrumental activities of daily living, or ADL—Grade 3 Severe or medically significant but not immediately life threatening; hospitalization or prolongation of hospitalization indicated; disabling; limiting self-care ADL—Grade 4 Life-threatening consequences; urgent intervention indicated—Grade 5 Death related to the adverse event.

Combining immune checkpoint inhibitors: the example of PD-1 and CTLA-4

Clinical Endpoint	Nivolumimab (PD-1) ⁽¹⁾	Nivolumimab (PD-1) + Ipilumimab (CTLA4) ⁽¹⁾
Progression Free Survival	6.9 months	11.5 months
Grade 3 or 4 Adverse Events	16.3%	55.0%
Discontinued Treatment	7.7%	36.4%

⁽¹⁾ Larkin et al., *New Eng. J. Med.*, 373: 23-34, 2015.

The combination of an anti-PD-1 and anti-CTLA-4 checkpoint inhibitor led to improved outcomes but was associated with a sharp increase in serious adverse events and treatment discontinuations.

We have designed our CTLA-4 targeted CABs to have reduced toxicity, by focusing the binding of anti-CTLA-4 antibodies to the vicinity of the tumor and draining lymph nodes.

Indications

Multiple solid tumor indications, including renal cell carcinoma, NSCLC, small cell lung cancer, hepatocellular carcinoma, melanoma, bladder cancer, gastric cancer and cervical cancer.

Bispecific antibody candidates with CAB antigen-binding domains

Bispecific antibodies are designed to simultaneously bind to two different target cell surface proteins or receptors and they represent an emerging class of high-potency therapeutics. A common design feature for a bispecific antibody is to include a T cell engager component (*i.e.*, CD3 receptor), such that one antigen-binding domain recognizes a surface-expressed tumor antigen and the other antigen-binding domain binds to and activates CD3+ T cells. With this design, bispecific antibodies can induce potent T cell responses against tumors expressing the tumor target antigen in a simplified manner relative to even off-the-shelf or allogeneic CAR-T therapies. The first FDA approved bispecific antibody was a T cell engager, blinatumomab, which contained antigen-binding domains for CD19, an antigen found on B-cell leukemias, and CD3, a T cell activating receptor.

There are multiple structural variants of antibodies and other antigen-binding domains being used to construct bispecific product candidates and tested clinically. However, similar to CAR-T cells and blinatumomab, many of these bispecific product candidates have increased risks of generating life-threatening cytokine release syndrome due to systemic immune activation.

We have applied our CAB antibody technology to develop bispecific CAB antibodies in which one or both antigen-binding domains are activated only in the tumor microenvironment. An example of this approach is our EpCAM x CD3 bispecific. EpCAM, or epithelial cell adhesion molecule, is a protein that is over-expressed in many cancers including carcinomas derived from colon, intestine, breast, lung and prostate. Expression of EpCAM has been associated with cell growth and proliferation of both healthy and cancer cells.

EpCAM was one of the first cancer-associated antigens discovered, however in the forty years since, its clinical impact as a target for therapeutic antibodies in cancer has been limited. One of the problems with targeting EpCAM is its broad expression in the basolateral membranes of normal epithelial cells. Conventional approaches of avoiding systemic toxicities including deliberately selecting antibodies with low affinity for EpCAM with the intention of generating some degree of selectivity for tumors that express very high levels of EpCAM, have not been successful. Bispecific constructs targeting EpCAM have also not lived up to expectations. Solitomab, an EpCAM x CD3 bispecific led to over 95% of patients in a Phase 1 dose-escalation trial to experience at least one Grade 3 or above adverse event. Over 20% of patients experienced dose-limiting toxicities and there was only one unconfirmed partial response observed among 65 patients at these low doses.

Clinical trials

BA3011

BA3011 Phase 1 clinical trial

We have completed a Phase 1 trial of BA3011 in patients with advanced solid tumors, including sarcoma, pancreatic cancer and NSCLC who were refractory or resistant to standard therapies. As shown below, cohorts were treated with doses of BA3011 ranging from 0.3 mg/kg to 3 mg/kg once every three weeks (Q3W) or doses ranging from 1.2 mg/kg to 1.8 mg/kg twice every three weeks on days 1 and 8 (2Q3W). As of the last data cut-off 55 subjects were enrolled into 9 dose cohorts: 0.3 mg/kg Q3W (3 subjects), 0.6 mg/kg Q3W (1 subject), 1.2 mg/kg Q3W (1 subject), 1.8 mg/kg Q3W (9 subjects), 2.4 mg/kg Q3W (9 subjects), 3.0 mg/kg Q3W (1 subject), 1.2 mg/kg 2Q3W (7 subjects), 1.5 mg/kg 2Q3W (4 subjects) and 1.8 mg/kg 2Q3W (20 subjects). The solid tumor types enrolled in this study were: soft tissue sarcoma (19 subjects), pancreatic (12 subjects), NSCLC (4 subjects), colorectal (4 subjects), melanoma (3 subjects), bladder (2 subjects), endometrial (2 subjects), non-TNBC, osteosarcoma, Ewing sarcoma, chondrosarcoma, myoepithelial carcinoma, adenoid cystic carcinoma, small cell lung, renal cell carcinoma and mesothelioma of the pleura (1 subject each).

The main goals of this trial were to evaluate the safety, tolerability, antitumor activity, pharmacokinetics and immunogenicity of BA3011 in solid tumor patients. Based upon the overall safety and response rates, the

[Table of Contents](#)

recommended Phase 2 dose is 1.8 mg/kg delivered every two weeks (Q2W). The trial's objectives were the following:

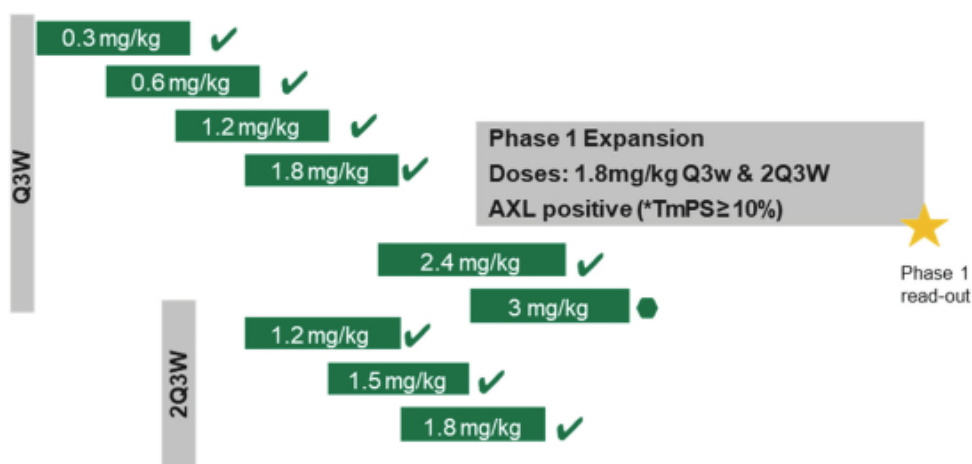

Primary

- To define the safety profile, including dose-limiting toxicity, or DLT, and determine the maximum tolerated dose, or MTD, and/or the recommend Phase 2 dose, or RP2D, and other safety parameters for BA3011 in patients with advanced solid tumors.

Secondary

- To assess antitumor activity of BA3011 including endpoints such as objective response, or OR, disease control, time-to-response, duration of response, or DOR, and change from baseline in tumor size, according to RECIST Version 1.1.
- To assess the pharmacokinetics of BA3011.
- To evaluate the immunogenicity of BA3011.

Design of the BA3011 Phase 1 trial

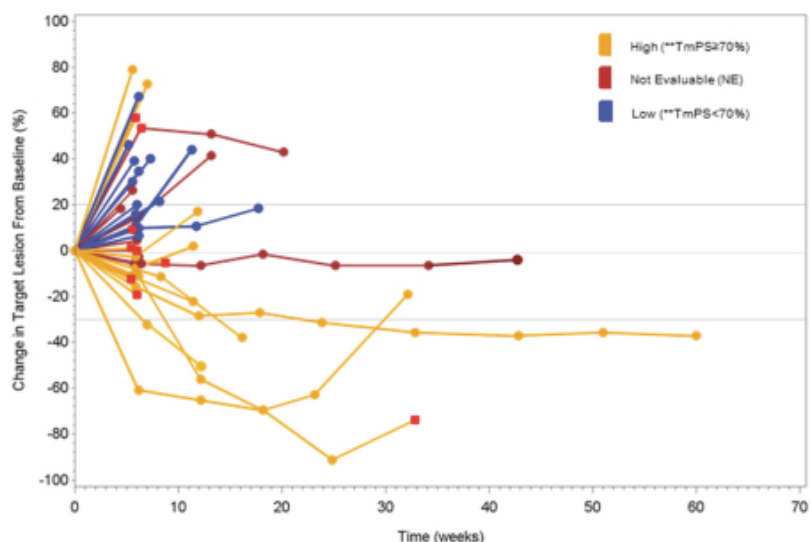

Based on the Phase 1 trial of BA3011, the recommended Phase 2 dose is 1.8 mg/kg delivered every two weeks. As of the last data cut-off, 55 patients have been dosed with BA3011.

Antitumor activity

As shown below, we have observed five confirmed partial responses (a reduction of at least 30% in the size of the tumor), four in patients with sarcomas and one with NSCLC. Additional patients have experienced prolonged progression-free intervals, a period of time where existing tumor did not measurably increase in size by more than 20% and no new tumors were known to develop. The toxicities observed were consistent with those described with MMAE-based ADCs and were well-tolerated at exposures planned for Phase 2. Importantly we have not observed adverse events that appeared to be related to on-target injury of normal, AXL expressing tissues, *i.e.*, on-target, off-tumor toxicity.

Percent change in sum of target lesions by visit and AXL for all patients

Antitumor response over time by AXL expression for patients enrolled in the Phase 1 dose escalation trial of BA3011 (a variety of tumor types were included).

We developed and CLIA-validated (the Clinical Laboratory Improvement Amendments, or CLIA, establishes federal quality standards for laboratory testing) an AXL immunohistochemical assay to quantify the level of target expression on the tumor membrane and cytoplasm. An independent board-certified pathologist scored all samples according to the scoring scheme determined by us during the CLIA validation phase, as well as during the Phase 1 trial. The pathologist determined the percent of tumor cells with positive membrane staining referred to as the TmPS.

We observed that approximately 57% of sarcoma patients screened for enrollment had an AXL TmPS of 70% or above (from a scale of 0% to 100%), as shown in the figure below. In addition, we identified a correlation between the expression of AXL on the membrane of tumor cells and the observed antitumor clinical response. Eight of 10 patients with a confirmed AXL TmPS of 70% or above who were dosed with 1.8 mg/kg of BA3011 Q3W or 2Q3W had a reduction in tumor volume and five patients of these eight achieved a confirmed partial response. Only two patients whose tumors expressed AXL with a TmPS of 70% or above did not respond to treatment. One of these was a pancreatic cancer patient with very advanced disease at time of trial entry and the other was a leiomyosarcoma patient for whom the archived tissue biopsy sample had been provided from a resection that was performed over one year prior to trial entry and thus may not have accurately represented AXL expression by tumor at the time of treatment.

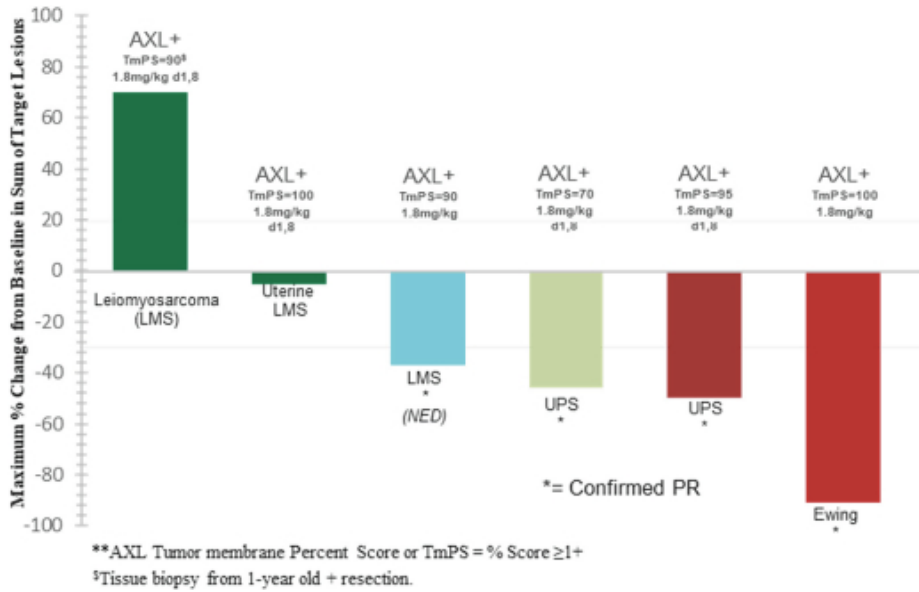

Best response for patients with TmPS of 70% or above administered 1.8mg/kg Q3W or 2Q3W

At a dose of 1.8mg/kg Q3W or 2Q3W; Five patients with an AXL TmPS ³70% achieved a partial response. Eight out of 10 patients with an AXL TmPS ³70% experienced a reduction in tumor volume.

Focusing on the sarcoma patient subset, we observed a correlation of the AXL TmPS and antitumor response. As shown below, five out of six patients with multiple subtypes of sarcoma who were dosed with 1.8 mg/kg Q3W or 2Q3W of BA3011 with TmPS ³70% experienced reductions in tumor volume and four of these five patients achieved confirmed partial responses (observed response for at least two consecutive time points). We intend to confirm this observed correlation and the TmPS cut-off of 70% or more in Phase 2.

Best response for sarcoma patients with confirmed TmPS of 70% or above administered 1.8mg/kg Q3W or 2Q3W

At a dose of 1.8mg/kg Q3W or 2Q3W; 5 out of 6 sarcoma patients with an AXL TmPS \geq 70% experienced a reduction in tumor volume and 4 out of 6 achieved a partial response.

One patient with leiomyosarcoma who had experienced failure of multiple prior treatments had a 37% reduction in tumor volume while receiving 1.8 mg/kg Q3W BA3011, as shown in the figure below. The figure below reflects the patient noted in blue in the figure above. After over a year of treatment with BA3011, the residual tumor mass was reduced to a sufficient degree, enabling a successful surgical resection.

CT scan of leiomyosarcoma patient after BA3011 treatment

Cohort 1.8 mg/kg Q3W									
Leiomyosarcoma	Baseline CT	1 st CT	2 nd CT	3 rd CT *	4 th CT	5 th CT	6 th CT	7 th CT	8 th CT
Tumor measurement	70 mm	16% Wk6	29% Wk12	27% Wk18	31% Wk24	36% Wk33	37% Wk42	36% Wk51	37% Wk60

**RECIST 1.1
Partial Response**

CT scan of a 70 mm leiomyosarcoma tumor which decreased in size with BA3011 treatment (confirmed PR) and after a year of therapy was removed by surgical resection.

Of the four patients with NSCLC enrolled in our Phase 1 clinical trial, two were AXL negative with a TmPS of 0%, one was not evaluable, and one was AXL positive with a TmPS of 80%. Prior to BA3011 treatment, the AXL positive patient with stage IV adenocarcinoma experienced failure from prior treatments, including treatment with a PD-1 inhibitor (pembrolizumab). As shown below, this patient experienced a partial response characterized by approximately 70% tumor shrinkage with BA3011 delivered at 1.8 mg/kg on days 1 and 8, every three weeks (2Q3W).

All evaluable NSCLC patients enrolled in Phase 1 BA3011 trial

One of four NSCLC patients enrolled in the Phase 1 BA3011 trial had a partial response. This patient was the only patient with an AXL TmPS ≥70%.

Safety

BA3011 was generally well-tolerated. We have not observed adverse events that appear to be related to on-target injury of normal, AXL-expressing tissues. We believe that toxicities observed at the maximally tolerated dose and lower were manageable and off-target effects of free MMAE were consistent with those described with other marketed MMAE-based ADCs. The estimated half-life of BA3011 was approximately four days, which is twice the 1.9-day half-life reported for enapotamab vedotin, a non-CAB ADC targeting AXL. We believe this difference may be due to the decreased TMDD resulting from the lack of binding of BA3011 to AXL outside of tumors.

In the Phase 1 trial, the Grade 3 or greater adverse events, or AEs, deemed related to BA3011 were consistent with MMAE-based toxicity and could generally be classified as either reversible myelosuppression (AEs: neutropenia and anemia), transient liver enzyme elevations (AEs: AST/ALT increased) or metabolic disturbances (AEs: hyponatremia, hypokalemia). At the anticipated Phase 2 exposure level (1.8mg/kg Q2W), BA3011 was well tolerated with few patients having treatment-related Grade 3-4 AEs (for 1.8 mg 1Q3W: 22% (2/9), vomiting and neutrophil count decrease; for 1.8 mg 2Q3W: 30% (6/20), neutropenia, hypokalemia, hyponatremia, anemia, neutropenia, blood bilirubin increase and lipase increase). Few patients had serious adverse events, or SAEs (1.8mg/kg Q3W: 4 SAEs (44%; neutrophil count decrease, intestinal obstruction, lower limb fracture, and sepsis caused by E.coli); 1.8mg/kg 2Q3W: 8 SAEs (40%; pyrexia, lipase increased, hyponatremia, syncope, corneal perforation, hypercalcaemia, gastritis and edema of lower extremities) and of these SAEs, even fewer were deemed related to treatment by the investigator (1.8mg/kg Q3W: 1 SAE (11.1%; neutrophil count decrease); 1.8mg/kg 2Q3W: 3 SAEs (15%; pyrexia, lipase increased and hyponatremia). None of the related AEs or SAEs led to treatment discontinuation.

Overview of adverse events in BA3011 Phase 1 trial for patients administered 1.8mg/kg Q3W (d1) or 2Q3W (d1,8) (safety population)

Characteristic	BA3011 1.8 mg/kg Q3W (N=9)	BA3011 1.8 mg/kg 2Q3W (N=20)
Any AEs	9 (100%)	17 (85%)
Related AEs with CTCAE ¹ Grade 3 or 4 ²	2 (22%)	6 (30%)
Any related serious AEs ²	1 (11%)	3 (15%)
AEs leading to death	1 (11%)	0
Related AEs leading to death ²	0	0
Related AEs leading to treatment discontinuation ²	0	0

1 CTCAE: Common Terminology Criteria for Adverse Events. The NCI Common Terminology Criteria for Adverse Events is a descriptive terminology which is utilized for AE reporting. A grading (severity) scale is provided for each AE term.

2 As assessed by the investigator. Missing responses are counted as related.

We believe that our CAB AXL ADC, BA3011, compares favorably to enapotamab vedotin, a non-CAB AXL ADC with regard to safety and key pharmacokinetic properties. Comparing across the two Phase 1 trials, both ADCs: (i) were designed to deliver 4 MMAE molecules per antibody (DAR4 loading), (ii) employed similar ADC doses and (iii) enrolled comparable patients with advanced cancer who had experienced treatment failure of prior regimens (see figure below). As a key difference, BA3011 was designed to only bind to the AXL target expressed by tumor while enapotamab vedotin would be anticipated to bind to the AXL target throughout the body.

Notably, the estimated half-life of BA3011 was approximately four days, which is twice the 1.9-day half-life reported for enapotamab vedotin. We believe this difference may be due to the decreased TMDD resulting from the lack of binding of BA3011 to AXL outside of tumors. With respect to reported toxicity comparisons, constipation is believed to be an on-target delivery of MMAE to normal gut tissues that express the AXL target. Despite including a risk mitigation plan in enapotamab vedotin’s trial protocol (a prophylactic stool-softener medication in all patients), the clinical data presented at ASCO 2019 showed that AEs of constipation Grade 1-2

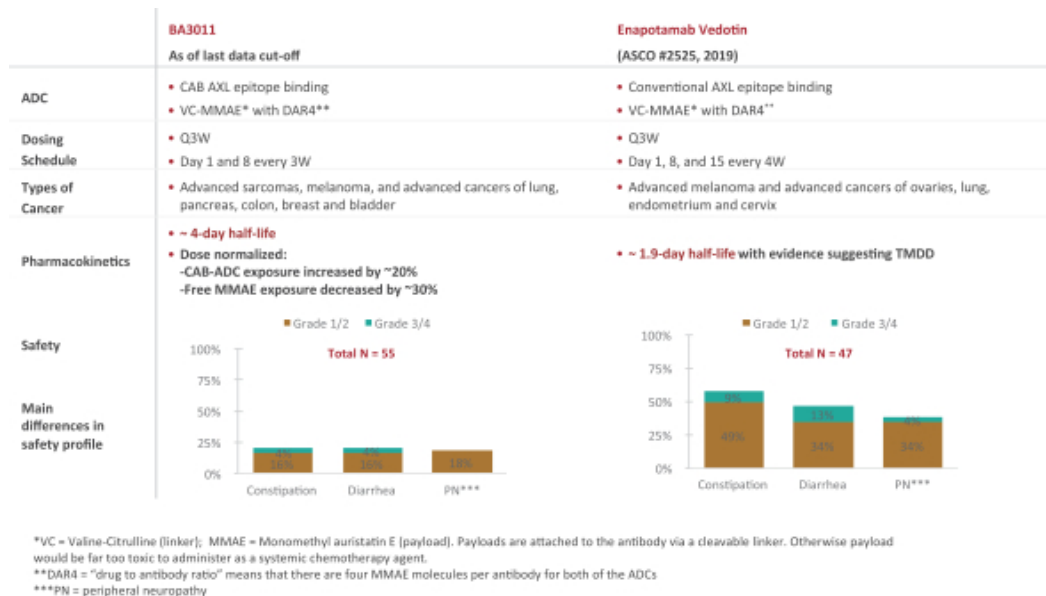

Table of Contents

were reported in 49% of the patients and Grade 3-4 in 9% of patients. The rate of constipation reported with BA3011 (16% Grade 1-2 and 4% Grade 3-4) was approximately 2 to 3-fold lower for both Grade 1-2 and Grade 3-4 TAEs. While supportive of a reduced toxicity benefit from CAB technology, these comparisons are derived from cross-trial analyses, and would not be included as part of our labeling.

Adverse events, such as peripheral neuropathy, are commonly seen with other ADCs and may be due to free circulating MMAE. Clinical data presented at ASCO 2019 for enapotamab vedotin showed that 38% of the patients had peripheral neuropathy (all Grades) with 2 patients reporting Grade 3-4 AEs. The rate of peripheral neuropathy (all Grade) reported for BA3011 (18%) was approximately half the rate reported with enapotamab vedotin and is believed to be due to the advantageous pharmacokinetic characteristics of a CAB ADC vs. a non-CAB ADC.

At a dose of 2.4 mg/kg Q3W BA3011, two patients experienced dose-limiting toxicities: one with Grade 3 febrile neutropenia and the other with Grade 4 hyperglycemia. Dosing continued at the 2.4 mg/kg with prophylactic administration of pegfilgrastim without any additional dose limiting toxicities. Dosing above 2.4 mg/kg was terminated due to one patient who experienced Grade 4 febrile neutropenia and cardio-respiratory arrest at 3 mg/kg likely related to delayed hepatic and renal excretion of MMAE.

Cross-Trial Comparison of BA3011 and Enapotamab Vedotin

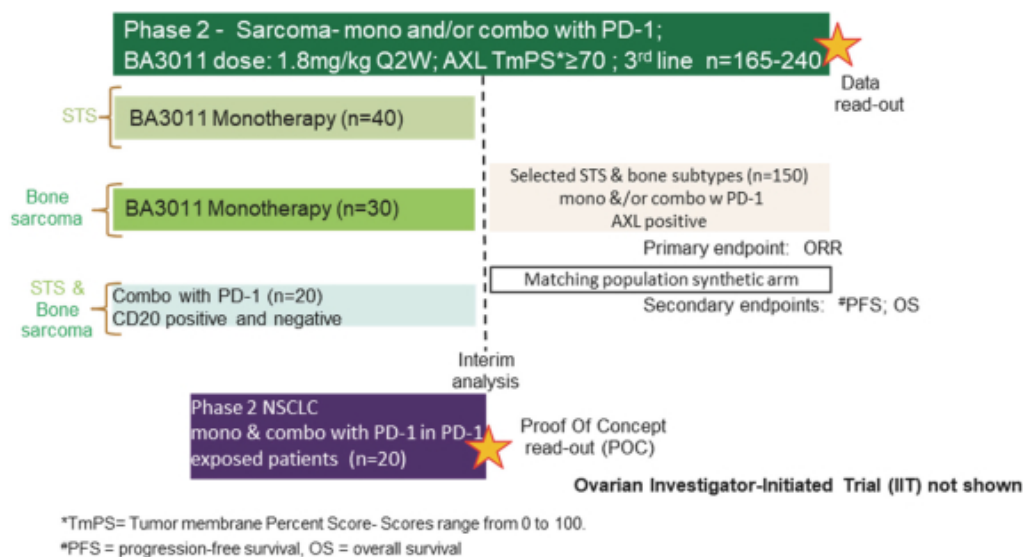

Clinical development plans

We have initiated a Phase 2, potentially registration-enabling trial with BA3011, enrolling soft-tissue and bone sarcoma patients, with interim analysis anticipated in 2021 and the complete registrational data set expected in 2022. In addition, we have initiated a Phase 2 trial in NSCLC with BA3011 as monotherapy and in combination with an anti-PD-1 agent in patients who have experienced prior disease progression on a PD-1/L1 inhibitor and have a TmPS of 50% or greater. The FDA has reviewed the trial designs, but has not opined on whether Phase 2 clinical trials will in fact be sufficient to support regulatory approval. However, the FDA is expected to consider this further at the interim data review point. We cannot assure you that the FDA will agree that such data will be sufficient to support approval. A summary of our clinical development plan for BA3011 is below.

Additionally, we expect a multi-center investigator-initiated trial of BA3011 led by the Canadian Cancer Trials Group, or CCTG, in platinum-resistant ovarian cancer patients to commence by the end of 2020 or early 2021.

Clinical development plan for BA3011, which includes multiple Phase 2 trials

BA3011 sarcoma Phase 2 trial design:

This Phase 2 trial is an open-label trial to evaluate the efficacy and safety of BA3011 alone and in combination with an anti-PD-1 agent in adult and adolescent patients with AXL-expressing TmPS ³ 70%, and advanced, refractory sarcoma who have measurable disease by Response Evaluation Criteria in Solid Tumors (RECIST) Version (v) 1.1 criteria and have documented progression according to RECIST v1.1 criteria within the six months prior to enrollment. To enroll, patients must either be ineligible for chemotherapy or have received at least one regimen containing anthracycline and a maximum of three previous lines of systemic therapy for metastatic disease (no more than two lines of combination regimens), including pazopanib, trabectedin, eribulin mesylate or tazemetostat, if applicable, per regional prescribing information. Patients who meet enrollment criteria will be assigned to receive either BA3011 alone or in combination with an anti-PD-1 agent (for patients 18 years old and above: 240 mg every two weeks (Q2W); for patients 12-17 years old: 3 mg/kg Q2W IV infusion). Patients with tumors showing B-cell infiltration (per immunohistochemistry, or IHC, assay) will be preferentially assigned to receive BA3011 in combination with an anti-PD-1 agent. Based on data from the Phase 1 part of the trial, the dose of BA3011 for Phase 2 is 1.8 mg/kg Q2W.

Enrollment will be staged, beginning with approximately 10 patients per sarcoma subtype in the monotherapy arm. Up to seven sarcoma subtype groups may be enrolled:

Soft tissue sarcoma:

- Leiomyosarcoma
- Synovial sarcoma
- Liposarcoma
- All other soft tissue sarcomas, except gastro intestinal stromal tumors, dermatofibrosarcoma protuberans, inflammatory myofibroblastic tumor and malignant mesothelioma

Bone sarcoma:

- Osteosarcoma
- Ewing sarcoma
- Other bone sarcomas, including undifferentiated pleomorphic sarcoma, malignant fibrous histiocytoma, and chondrosarcoma

In the combination arm (BA3011 with an anti-PD-1 agent) of the study, 20 patients of any sarcoma subtype will be enrolled. Among these 20 patients, approximately 10 patients will have a tumor showing B-cell infiltration and 10 patients will not.

Tumor assessment will occur approximately every 6 weeks from cycle 1 day 1 of treatment, or C1D1, until 12 weeks, and every 8 weeks thereafter. Pharmacokinetic, pharmacodynamic, immunogenicity and biomarker assessments will also be performed at various time points.

An interim analysis will be conducted for each subtype or treatment (i.e., BA3011 in combination with an anti-PD-1 agent in patients with tumors with B cell infiltration or BA3011 in combination with an anti-PD-1 agent in patients with tumors without B cell infiltration) after at least 10 patients in the subtype or treatment have the potential to be followed for at least 12 weeks after the initiation of investigational product. Following interim analysis, accrual to the subtype or to a treatment (i.e., BA3011 alone or in combination with an anti-PD-1 agent) may be put on hold if the number of patients with a response (i.e., confirmed or unconfirmed complete response or partial response) and progression-free rate at 12 weeks are below a pre-defined threshold. Approximately 150 additional patients may be enrolled for sarcoma subtypes that meet the threshold. The accrual of patients to a specific subtype or to one or both treatment regimen(s) (i.e., BA3011 alone and/or BA3011 in combination with an anti-PD-1 agent) can be put on hold at any time based on evaluation of available data or by the Independent Data Monitoring Committee, or IDMC, at any time upon review of safety data. Treatment for all enrolled patients will continue until disease progression, unacceptable toxicity, or other reason for treatment discontinuation.

BA3011 NSCLC Phase 2 trial design:

This is a multi-center, open-label, Phase 2 study designed to evaluate the efficacy and safety of BA3011 alone and in combination with an anti-PD-1 agent in patients with AXL-expressing TmPS³50%, metastatic NSCLC who have measurable disease by RECIST v1.1 criteria and have documented progression according to RECIST v1.1 criteria within the 6 months prior to enrollment. To enroll, patients must have prior disease progression on a PD-1/L1 inhibitor (either monotherapy or in combination with another therapy such as ipilimumab). Patients with EGFR or anaplastic lymphoma kinase (ALK) genomic tumor aberrations should have had disease progression on FDA-approved therapy for these aberrations.

Patients who meet enrollment criteria will be assigned to receive either BA3011 alone or in combination with an anti-PD-1 agent (240 mg every 2 weeks (Q2W)). For the first 20 patients (Part 1), treatment assignment will be determined by the sponsor and the medical monitor based on the patient's prior experience with PD-1/L1 treatment. To be eligible for the PD-1 combination arm, patients must have acceptably tolerated prior PD-1/L1 treatment. In Part 2, up to approximately 200 additional patients may be enrolled depending on observed efficacy at interim analysis. If both monotherapy and combination therapy are further pursued post interim analysis, patients that have acceptably tolerated prior PD-1/L1 treatment will be randomized 1:1 to receive either BA3011 alone or BA3011 in combination with an anti-PD-1 agent. Randomization will be stratified according to histology (squamous vs. non-squamous) and the number of prior systemic regimens (2 vs. 3). Patients that have not acceptably tolerated prior PD-1/L1 treatment will be assigned to the BA3011 monotherapy arm of the study. Based on data from the Phase 1 study, the dose of BA3011 for Phase 2 is 1.8 mg/kg Q2W. A dose reduction to 1.5 mg/kg Q2W may be implemented if deemed warranted by the IDMC.

Table of Contents

Tumor assessment will occur approximately every 6 weeks from C1D1 until 12 weeks, and every 8 weeks thereafter. Pharmacokinetic, pharmacodynamic, immunogenicity and biomarker assessments will be performed at various time points.

An interim analysis will be conducted after at least 20 patients (10 patients on BA3011 monotherapy arm and 10 patients in the BA3011 an anti-PD-1 agent combination arm) have the potential to be followed for at least 12 weeks after the initiation of investigational product. Following interim analysis, accrual to a treatment (i.e., BA3011 alone or in combination with an anti-PD-1 agent) may be put on hold if the number of patients with a response (i.e., confirmed or unconfirmed complete response or partial response) are below a pre-defined threshold. Depending on observed efficacy at the interim analysis, additional NSCLC patients may be enrolled for a total of up to approximately 200 patients (100 patients in each of the 2 treatment groups) with AXL-expressing, metastatic NSCLC. The accrual of patients to one or both treatment regimen(s) (i.e., BA3011 alone and/or BA3011 in combination with an anti-PD-1 agent) can be put on hold at any time based on evaluation of available data. Treatment for all enrolled patients will continue until disease progression, unacceptable toxicity, or other reason for treatment discontinuation.

BA3021

BA3021 Phase 1 clinical trial

We have completed the dose escalation part of a Phase 1 clinical trial of BA3021 in patients with locally-advanced unresectable or metastatic solid tumors including NSCLC and melanoma, who were refractory or resistant to standard therapies. As shown below, cohorts were treated with doses of BA3011 ranging from 0.3 mg/kg to 3.3 mg/kg once every three weeks (Q3W) or doses ranging from 1.5 mg/kg to 1.8 mg/kg twice every three weeks on days 1 and 8 (2Q3W). As of the data cut-off date, 59 subjects were enrolled into 9 dose cohorts: 0.3 mg/kg Q3W (1 subject), 0.6 mg/kg Q3W (1 subject), 1.2 mg/kg Q3W (1 subject), 1.8 mg/kg Q3W (3 subjects), 2.4 mg/kg Q3W (16 subjects), 3.0 mg/kg Q3W (19 subject), 3.3 mg/kg Q3W (5 subjects), 1.2 mg/kg 2Q3W (3 subjects), 1.5 mg/kg 2Q3W (3 subjects), and 1.8 mg/kg 2Q3W (7 subjects). The solid tumor types enrolled in this study were: soft tissue sarcoma (40 subjects), NSCLC (6 subjects), melanoma (2 subjects), pancreatic (2 subjects), non-TNBC (2 subjects), colorectal, breast TNBC, GIST, urachus, ampulla of vatter, rectal carcinoid and head and neck (1 subject each).

The main goals of this trial were to evaluate the safety, tolerability, antitumor activity, pharmacokinetic and immunogenicity of BA3021 in solid tumor patients. Based upon the overall safety and response rates, the recommended Phase 2 dose is 1.8 mg/kg delivered every two weeks (Q2W). The trial's objectives were the following:

Primary

- To define the safety profile, including DLT, and determine the MTD and/or RP2D and other safety parameters for BA3021 in patients with advanced solid tumors.

Secondary

- To assess antitumor activity of BA3021 including endpoints such as OR, disease control, time-to-response, DOR, and change from baseline in tumor size, according to RECIST Version 1.1.
- To assess the pharmacokinetics of BA3021.
- To evaluate the immunogenicity of BA3021.

As shown below, cohorts were treated with doses of BA3021 ranging from 0.3 mg/kg to 3.3 mg/kg once every three weeks (Q3W) or doses ranging from 1.5 mg/kg to 1.8 mg/kg twice every three weeks on days 1 and 8 (2Q3W).

Design of the BA3021 Phase 1 trial in solid tumor patients

*TmPS= Tumor membrane Percent Score- Tumor membrane target expression calculated by summing the percentages of intensities at either $\geq 1+$, $\geq 2+$ or $\geq 3+$. Scores range from 0 to 100.

Based on the Phase 1 trial of BA3021, the recommended Phase 2 dose is 1.8 mg/kg Q2W. To date, 59 patients have been dosed with BA3021.

Antitumor activity

At various dose levels, treatment with BA3021 has resulted in a total of four partial responses: 2 among patients with NSCLC (~31% and ~49% tumor reduction), 1 in a patient with metastatic melanoma (~80% tumor reduction) and 1 in a patient with advanced head and neck cancer (~54% tumor reduction).

Of the six NSCLC patients enrolled in the dose escalation phase, two patients achieved a durable partial response and a third experienced tumor reduction to a lesser degree. Similar to the observed correlation of antitumor activity with higher levels of tumoral membrane AXL expression, as shown below, the two NSCLC patients with partial responses to BA3021 had ROR2 TmPS of at least 70%. We were not able to characterize ROR2 TmPS for the third patient who also experienced tumor shrinkage. Another patient with late stage NSCLC and bone metastases and a ROR2 TmPS of 100%, treated with a suboptimal dose of BA3021 (1.2mg/kg 2Q3W), experienced tumor shrinkage prior to progression of their metastatic bone lesions. All NSCLC patients who enrolled in this trial had previously been treated with PD-1 therapy.

All evaluable NSCLC patients enrolled in BA3021 Phase 1 trial by ROR2 TmPS

Tumor membrane expression of ROR2 was associated with antitumor response in two of the five NSCLC patients with evaluable ROR2 TmPS

Two metastatic melanoma patients were enrolled in the initial part of the trial, as shown below. The patient in whom we were not able to characterize ROR2 surface expression achieved a durable partial response. This patient, who had previously experienced failure of both nivolumab and nivolumab plus ipilimumab, achieved an approximate 80% reduction in tumor volume and presently continues on BA3021 therapy for now more than a year.

All evaluable metastatic melanoma patients enrolled in BA3021 Phase 1 trial by ROR2 TmPS

One of two melanoma patients enrolled in the BA3021 Phase 1 dose escalation trial achieved a partial response.

The metastatic melanoma patient who achieved a partial response experienced clearance of metastatic lung lesions. Illustrated below is one of the two lung lesions that cleared. Moreover, a pretreatment biopsy of an involved, abnormally enlarged cervical lymph node showed active melanoma. Subsequently, an on-treatment biopsy of the same node demonstrated no evidence of melanoma.

Clearance of lung lesions in metastatic melanoma patient who received BA3021

Pre-treatment and post-treatment CT scans of one of two lung lesions that were both cleared in a metastatic melanoma patient who received BA3021.

Table of Contents

In addition, one head and neck cancer patient achieved a durable partial response with a 54% reduction in tumor size.

Safety

Similar to BA3011, BA3021 was generally well-tolerated. We have not observed adverse events that appear to be related to on-target injury of normal, ROR2-expressing tissues. We believe that reported toxicities were consistent with off-target effects of free MMAE consistent with those described with other marketed MMAE-based ADCs.

In the Phase 1 trial, the Grade 3 or greater AEs deemed related to BA3021 were consistent with MMAE-based toxicity and could generally be classified as either reversible myelosuppression (AEs: neutropenia, anemia), transient liver enzyme elevations (AEs: AST/ALT increased) or metabolic disturbances (AEs: hyponatremia, hypokalemia). At the anticipated Phase 2 exposure levels (1.8mg/kg Q2W), BA3021 was well tolerated with few patients having treatment-related Grade 3-4 AEs (for 1.8 mg 1Q3W: 33.3% (1/3) anemia; for 1.8 mg 2Q3W: 42.9% (3/7) fatigue, hyponatremia and hyperglycemia) and few patients having SAEs (1.8mg/kg Q3W: 0 SAE (0%); 1.8mg/kg 2Q3W: 3 SAEs (43%; infected biloma, pyrexia and hyperglycemia). Out of these SAEs, 2 (28.6%) were deemed related to treatment by the investigator (1.8mg/kg Q3W: 0 SAEs (0%); 1.8mg/kg 2Q3W: 2 SAEs (28.6%; pyrexia and hyperglycemia). None of the related AEs or SAEs led to treatment discontinuation.

Overview of adverse events in BA3021 Phase 1 trial for patients administered 1.8mg/kg Q3W (d1) or 2Q3W (d1,8) (safety population)

Characteristic	BA3021 1.8 mg/kg (Q3W) (N=3)	BA3021A 1.8 mg/kg (2Q3W) (N=7)
Any AEs	3 (100%)	7 (100%)
Related AEs with CTCAE Grade 3 or 4 ¹	1 (33%)	3 (43%)
Any related serious AEs ¹	0	2 (29%)
Related AEs leading to death ¹	0	0
Related AEs leading to treatment discontinuation ¹	0	0

¹ As assessed by the investigator. Missing responses are counted as related.

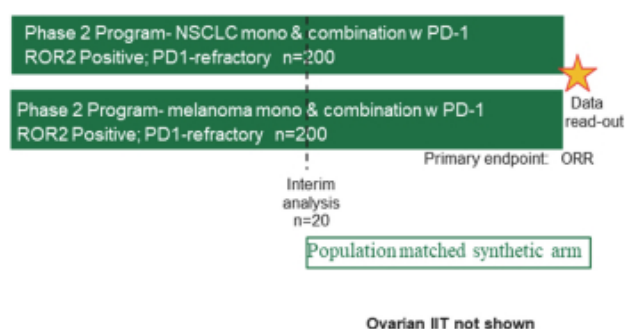

At a dose of 3mg/kg Q3W, two patients experienced dose-limiting toxicities: one with Grade 3 dyspnea (self-resolved without intervention) and the other with Grade 4 febrile neutropenia (in a subject that did not receive prophylactic pegfilgrastim as directed) which resolved on day 2 of hospitalization.

Clinical development plans

We have initiated a potentially registration-enabling Phase 2 trial for BA3021 monotherapy or in combination with a PD-1 inhibitor in melanoma and NSCLC patients that have experienced prior disease progression on a PD1/L1 inhibitor and have a ROR2 TmPS of 50% or more. However, we have not discussed with the FDA whether the Phase 2 clinical trials will in fact be sufficient to support regulatory approval and we cannot assure you that the FDA will agree that such data will be sufficient to support approval. We intend to perform an interim analysis when 20 evaluable patients in each indication have the potential to be followed for at least 12 weeks, which we expect to occur in the second half of 2021. Results from these analyses will drive the decision to expand enrollment in each indication to up to 200 patients, and we expect final registration data in 2022.

Additionally, we expect a multi-center investigator-initiated trial of BA3021 led by CCTG in platinum-resistant ovarian cancer patients to commence by the end of 2020 or early 2021.

Clinical development plan for BA3021, which includes two Phase 2 indications

Clinical development plan for BA3021 includes two Phase 2 indications.

BA3021 Phase 2 trial design in NSCLC and Melanoma

This Phase 2 trial is an open-label trial to evaluate the efficacy and safety of BA3021 alone and in combination with an anti-PD-1 agent in patients with ROR2-expressing TmPS³ 50% and metastatic NSCLC or melanoma who have measurable disease by RECIST v1.1 criteria and have documented progression according to RECIST v1.1 criteria within the 6 months prior to enrollment.

Patients who meet enrollment criteria will be assigned to receive either BA3021 alone or in combination with an anti-PD-1 agent (240 mg every 2 weeks (Q2W)). For the first 20 patients (10 patients in each of the 2 indications) (Part 1), treatment assignment will be determined by the sponsor and the medical monitor based on the patient's prior experience with PD-1/L1 treatment. To be eligible for the PD-1 combination arm, patients must have acceptably tolerated prior PD-1/L1 treatment. In Part 2, up to approximately 200 additional patients per indication may be enrolled depending on observed efficacy at interim analysis. For each indication, if both monotherapy and combination therapy are further pursued post interim analysis, patients that have acceptably tolerated prior PD-1/L1 treatment will be randomized 1:1 to receive either BA3021 alone or BA3021 in combination with an anti-PD-1 agent. For the NSCLC indication, randomization will be stratified according to histology (squamous vs. non-squamous) and the number of prior systemic regimens (≤ 2 vs. ≥ 3). For the melanoma indication, randomization will be stratified according to Eastern Cooperative Oncology Group performance status 0 vs. 1 and the number of prior systemic regimens (≤ 2 vs. ≥ 3). For both indications, patients that have not acceptably tolerated prior PD-1/L1 treatment will be assigned to the BA3021 monotherapy arm of the study. Based on data from the Phase 1 part of the study, the dose of BA3021 for Phase 2 is 1.8 mg/kg Q2W. A dose reduction to 1.5 mg/kg Q2W may be implemented if deemed warranted by the IDMC.

Tumor assessment will occur approximately every 6 weeks from C1D1 until 12 weeks, and every 8 weeks thereafter. Pharmacokinetic, pharmacodynamic, immunogenicity and biomarker assessments will be performed at various time points.

For each indication, an interim analysis will be conducted after at least 20 patients (10 patients in each treatment group) have the potential to be followed for at least 12 weeks after the initiation of investigational product. Following interim analysis, accrual to a treatment (i.e., BA3021 alone or in combination with an anti-PD-1 agent) may be put on hold if the number of patients with a response (i.e., confirmed or unconfirmed complete response or partial response) are below a pre-defined threshold. Depending on observed efficacy at

the interim analysis, additional NSCLC and/or melanoma patients may be enrolled for a total of up to approximately 200 patients (100 patients in each of the 2 treatment groups) with ROR2-expressing, metastatic NSCLC and a total of up to approximately 200 patients with ROR2-expressing, metastatic melanoma. The accrual of patients to a treatment regimen(s) (i.e., BA3021 alone and/or BA3021 in combination with an anti-PD-1 agent) can be put on hold by the sponsor at any time based on evaluation of available data or by the IDMC at any time upon review of safety data. Treatment for all enrolled patients will continue until disease progression, unacceptable toxicity or other reason for treatment discontinuation.

BA3071

BA3071 preclinical studies

In a mouse colon adenocarcinoma, or MC38, xenograft model in which the human CTLA-4 gene had been introduced, we found that BA3071 had similar antitumor efficacy as a traditional anti-CTLA-4 antibody that is an analog of ipilimumab, or an Ipi-analog. As shown below, BA3071 led to equivalent tumor regression to ipilimumab out of eight treated mice and in two instances we saw a complete response, or no detectable tumor remaining.

Efficacy in human CTLA-4 engineered mouse model

BA3071 had potent antitumor activity and led to two complete responses in an MC38 tumor cell line model in mice containing the human CTLA-4 gene.

As shown below, examination of the immune cell composition of treated tumors found that those treated with either of two CAB anti-CTLA-4 antibodies had increased numbers of CD8 T cells than IgG control mice. CD8 T cells are effector cells that mediate tumor cell killing. These levels were similar to those observed in tumors treated with the ipilimumab analog.

Tumor infiltrating lymphocytes of human CTLA-4 engineered mice

CAB anti-CTLA-4 antibodies functioned similar to ipilimumab in stimulating CD8 T cells in tumors

In contrast, the CAB anti-CTLA-4 antibodies did not lead to changes in the T cell subsets in peripheral blood, as set forth in the figure below. The percentage of CD4 effector cells in CAB-treated mice were similar to those observed with the controls. The percentage of CD4 effector cells in ipilimumab analog-treated mice more than doubled, consistent with systemic inhibition of the CTLA-4 checkpoint. We believe that the observed tumor-restricted activity of CAB anti-CTLA4 antibodies will be associated with fewer systemic target-based toxicities.

Normal peripheral blood lymphocytes of human CTLA-4 engineered mice

Unlike the ipilimumab analog, CAB anti-CTLA-4 antibodies did not lead to stimulation of T cells in peripheral blood

Safety

Our preclinical toxicity study of BA3071 in non-human primates compares its safety profile to that of ipilimumab. Specifically, as shown in the figure below, we examined the gastrointestinal toxicities associated with combination therapy with nivolumab. To examine toxicities, these animals were dosed with high levels of both agents. Dosing of non-human primates with BA3071 in combination with nivolumab was associated with fewer occurrences of events associated with gastrointestinal toxicity than the combination of ipilimumab and nivolumab. These animals received 20 mg/kg nivolumab, which represents 12 times the human dose, and either

Table of Contents

15 mg/kg of ipilimumab or 15 mg/kg of BA3071, which we estimate is 45 to 60 times the current human dose. There were 33 gastrointestinal events such as liquid feces, non-formed feces and other gastrointestinal symptoms in the ipilimumab plus nivolumab combination across 29 days and five animals. There was only a single case of liquid feces in one animal on one day in the BA3071 plus nivolumab treatment group.

Treatment of non-human primates with a combination of BA3071 and nivolumab resulted in fewer gastrointestinal adverse events than treatment with ipilimumab and nivolumab.

These results were consistent with the preclinical results shown two and three figures above that demonstrated that CAB anti-CTLA-4 antibodies had insignificant target-based activity outside of tumors. We believe that this non-human primate study provides support for assessing the safety and tolerability of BA3071 in clinical trials. We anticipate that BA3071 will have a wider therapeutic window than ipilimumab, which may enable it to be better tolerated when used in combination with nivolumab, with the potential to further increase efficacy by allowing administration of higher doses.

Clinical development plans

We obtained U.S. IND in November 2019, and we plan to work with our partner BeiGene to initiate a Phase 1 dose-escalation trial of BA3071 in advanced solid tumor patients by year-end 2020. This trial will examine the safety and tolerability of BA3071 at doses ranging from 7mg Q3W to 700mg Q3W (equivalent to 10mg/kg of ipilimumab) as monotherapy and in combination with tislelizumab, an anti-PD-1 antibody in late-stage development by BeiGene.

Bispecific candidates

Bispecific candidates preclinical studies

We examined the antitumor potential of multiple EpCAM x CD3 bispecific candidates, including some with a conventional EpCAM binding domain, a CAB CD3 binding domain and others with both binding domains with

CAB activity. Dosage was 2.5mg per kilogram twice per week in mice, which is roughly equivalent to 0.2 mg per kilogram in non-human primates. As shown below, we found that all of these constructs had long half-lives with potent antitumor activity in a HCT116, a human colorectal carcinoma cell line, xenograft model in mice with a humanized immune system. All of the EpCAM x CD3 bispecifics, including those with CAB antigen binding domains, resulted in tumor shrinkage.

EpCAM x CD3 bispecific antibodies all had potent antitumor activity in a xenograft model, regardless of whether the antigen-binding domains were from CAB or conventional antibodies.

Safety

While there was no observable difference in antitumor efficacy between antibodies with CAB domains and those with conventional antigen-binding domains, a conventional EpCAM x CD3 bispecific antibody led to a much higher level of systemic immune activation than an EpCAM x CAB CD3 bispecific antibody in non-human primates. As shown below, at a dose of 0.025 mg/kg, the plasma level of interleukin 6, or IL-6, an inflammatory cytokine associated with cytokine release syndrome, was elevated above baseline in primates treated with a conventional bispecific with no detectable increase in the CAB bispecific-antibody-treated primates. Doubling the dose to 0.05 mg/kg led to a further increase in IL-6 production in conventional bispecific treated primates with significant gastrointestinal and renal toxicities and the death of one of two treated primates. Only a minor increase in IL-6 was observed with the CAB bispecific antibody and both treated primates were healthy. An increase in dose to 0.25 mg/kg resulted in a large increase in IL-6 levels in primates treated with the conventional bispecific and the death of both animals. In contrast, 0.25 mg/kg of the CAB bispecific antibody led to a much lower level of IL-6 and no deaths.

Systemic immune activation of EpCAM x CAB CD3 bispecific antibody vs. conventional EpCAM x CD3 bispecific antibody

EpCAM x CAB CD3 bispecific antibodies led to much lower expression of IL-6 in non-human primates than conventional EpCAM x CD3 bispecific antibodies

Clinical Development Plans

We have advanced two CAB bispecific antibody product candidates into IND-enabling studies in the second half of 2020 chosen from a number of preclinical. This includes an EpCAM x CD3 as well as a B7H3 x CD3 bispecific antibody. Additionally, two bispecific antibody product candidates (EGFR x CD3 and Nectin-4 x CD3) have reached the late discovery stage of development and we anticipate they have the potential to reach the IND enabling studies stage by 2021. We expect to submit multiple U.S. INDs in the second half of 2021 or sometime in 2022. We believe that our CAB technology opens up the opportunity for the creation of a broad set of bispecific product candidates with antitumor potential. Through these CAB bispecific antibodies, we believe we can activate T cells directly in tumors using CAB domains targeting tumor-specific antigens. Our CAB bispecific antibodies are not expected to lead to systemic immune activation, which we believe may allow for increased efficacy through more potent T cell activation, higher doses or administration in combination with other immunology therapies, such as checkpoint inhibitors.

Competition

The biotechnology and biopharmaceutical industries, including the oncology subsector, are characterized by rapid evolution of technologies, competition and strong defense of intellectual property. Any product candidates that we successfully develop and commercialize may have to compete with existing therapies and new therapies that may become available in the future. While we believe that our patented technology platform, intellectual property, know-how and scientific expertise in the field of biologics and immuno-oncology provide us with certain competitive advantages, including the ability of our product candidates to be active under conditions representative of the tumor microenvironment and not in normal cell conditions, we face potential competition from a wide variety of institutions, including large biopharmaceutical companies, specialty biotechnology companies, academic research departments and public and private research institutions. In immuno-oncology, we face substantial competition in the form of competing approaches to targeted antibody therapy in general, as well as competing treatments for the same types of cancer that we would plan to address with our pipeline of product candidates.

[Table of Contents](#)

There are numerous companies in various stages of clinical development of ADCs, a key feature of our product candidates BA3011, BA3021 and BA3071. Currently, there are 10 approved ADCs and as of February 2020, there were approximately 60 ADCs in clinical development, the vast majority of which were being developed for the treatment of cancer. Certain other companies are also pursuing antibody therapies in immuno-oncology, such as Seattle Genetics. Although we do not believe competing companies have selective CAB technology, there is a wide array of activity in multiple areas of immune-based cellular therapies for oncology. We also face competition on specific targets, including on antibody-based therapies for AXL, the target of our lead product candidate, BA3011, from Genmab A/S and on antibody-based therapies for ROR2, the target of our second product candidate, BA3021, from NBE-Therapeutics AG.

In addition, if any of our product candidates are approved in oncology indications such as pancreatic, breast and other cancers, they may compete with existing biologics and small molecule therapies, or may be used in combination with existing therapies. There are also many other therapies under development that are intended to treat the same cancers that we are targeting or may target with our CAB technology platform, including through approaches that could prove to be more effective, have fewer side effects, be cheaper to manufacture, be more convenient to administer or have other advantages over any products resulting from our technology.

Many of our competitors, either alone or with strategic partners, have substantially greater financial resources and expertise in research and development, manufacturing, preclinical testing, conducting clinical trials, obtaining regulatory approvals and marketing approved products than we do. Accordingly, our competitors may be more successful than us in obtaining approval for treatments and achieving widespread market acceptance, rendering our treatments obsolete or non-competitive. Accelerated merger and acquisition activity in the biotechnology and biopharmaceutical industries may result in even more resources being concentrated among a smaller number of our competitors. These companies also compete with us in recruiting and retaining qualified scientific and management personnel, establishing clinical trial sites and patient registration for clinical trials and acquiring technologies complementary to, or necessary for, our programs. Smaller or early-stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. The level of generic competition and the availability of reimbursement from government and other third-party payors will also significantly affect the pricing and competitiveness of our products. In addition, our competitors also may obtain FDA or other regulatory approval for their products more rapidly than we may obtain approval for ours, which could result in our competitors establishing a strong market position before we are able to enter the market.

Our commercial opportunity could be substantially limited in the event that our competitors develop and commercialize products that are more effective, safer, less toxic or more convenient than products we may develop. In geographies that are critical to our commercial success, competitors may also obtain regulatory approvals before us, resulting in our competitors building a strong market position in advance of our products' entry.

Manufacturing

Our CAB antibodies are designed and produced using our patented Comprehensive Integrated Antibody Optimization, or CIAO!, technology. The successful evolution, design and development of a CAB antibody with specific characteristics and qualities require that the development and manufacturing processes result in the CAB antibody with the desired properties. We have developed our patented process of CIAO! that integrates into the design process the critical features for subsequent development steps and manufacturing. A key element of the CIAO! process is that all design and development of the antibody is conducted in a mammalian cell line such as Chinese hamster ovary. This host cell is essentially identical to that used for manufacturing the majority of antibodies. This integrated and efficient approach is designed to provide consistency of the folding,

glycosylation and other critical features throughout the development and commercialization process for improved activity, selectivity and yields in manufacturing.

We currently do not own or operate any manufacturing facilities. We rely, and expect to continue to rely for the foreseeable future, on third-party contract manufacturing organizations to produce our product candidates for preclinical and clinical testing, as well as for commercial manufacture if our product candidates receive marketing approval. We also expect to rely on third parties for the design, development and manufacture of companion diagnostic tests for our product candidates that require such tests. Furthermore, the raw materials for our product candidates may be sourced, in some cases, from a single-source supplier. As part of the manufacture and design process for our product candidates, we rely on internal, scientific and manufacturing know-how and trade secrets and the know-how and trade secrets of third-party manufacturers. We also contract with additional third parties for the filling, labeling, packaging, storage and distribution of investigational drug products. We believe that this strategy allows us to maintain a more efficient infrastructure by eliminating the need for us to invest in our own manufacturing facilities, equipment and personnel while also enabling us to focus our expertise and resources on the development of our product candidates. We maintain agreements with our manufacturers that include confidentiality and intellectual property provisions to protect our proprietary rights related to our product candidates. We have personnel with significant technical, manufacturing, analytical, quality, including cGMP, and project management experience to oversee our third-party manufacturers and to manage manufacturing and quality data and information for regulatory compliance purposes.

Collaborations

We intend to selectively enter into collaborations to maximize the value of our platform and pipeline, including our existing collaboration involving BA3071.

Global Co-Development and Collaboration Agreement with BeiGene, Ltd.

In April 2019, we entered into a Global Co-Development and Collaboration Agreement with BeiGene, Ltd. which, as amended in December 2019 and October 2020, provides for the development, manufacturing and commercialization of BioAtla's investigational CAB CTLA-4 antibody, BA3071. Under the terms of our BeiGene collaboration, BeiGene is generally responsible for developing the CAB-CTLA-4 antibody and is responsible for global regulatory filings and commercialization. Subject to the terms of the agreement, BeiGene holds an exclusive license with BioAtla to develop and manufacture the product candidate globally. BeiGene is responsible for all costs of development, manufacturing and commercialization globally. At the time of execution of the BeiGene collaboration, we received a \$20 million upfront payment and in December 2019, we received an additional \$5 million for the reimbursement of manufacturing costs. We are eligible to receive up to \$225.5 million in subsequent development and regulatory milestones globally and commercial milestones in the BeiGene territory, together with tiered royalties, ranging from the high-single digits to low twenties, on sales worldwide.

Subject to certain opt-out clauses, the agreement shall remain in effect until the earlier of 10 years following commercial sale or upon such time that the parties cease pursuing commercialization. Unless terminated early, at the expiration date BeiGene retains all licensing rights in the applicable territories. BeiGene may terminate the agreement at any time after the one-year anniversary of the agreement subject to 90 days written notice, or any time subject to 45 days notice if it is determined that the proof of concept milestone or technological or scientific feasibility will not be achieved. The agreement also contains customary provisions for termination by either party, including in the event of breach, subject to cure.

License Agreements

Exclusive License Agreement with Inversagen, LLC

In March 2019, we entered into an Exclusive License Agreement with Inversagen, LLC, as amended in July 2020, under which Inversagen acquired the rights to CAB-antibodies for the field of diseases associated with aging, outside of cancer, and an immuno-oncology antibody. We may perform development services under the agreement and will be reimbursed by Inversagen for its costs. Commencing on the first commercial sale of the CAB-antibodies and immuno-oncology antibody subject to the agreement, Inversagen will pay us milestone payments and royalties, which represents a variable interest held by us. We have an option for a period of 10 years to acquire the immuno-oncology antibody in return for royalty payments in the low-single digits during the applicable royalty term. Unless earlier terminated, the agreement continues in effect so long as Inversagen or any of its affiliates, licensees or sublicensees are developing or commercializing the CAB-antibodies or immuno-oncology antibody in the field or we or any of our affiliates, licensees or sublicensees are developing or commercializing the CAB-antibodies or immuno-oncology antibody outside the field. We can also terminate the agreement with 30 days prior written notice for Inversagen's failure to pay. No payments have been made to date.

Amended and Restated Exclusive Rights Agreement with Himalaya Therapeutics SEZC

In January 2020, we entered into an Amended and Restated Exclusive Rights Agreement with Himalaya Therapeutics SEZC. Under the terms of the agreement, Himalaya Therapeutics SEZC acquired the rights to 10 CAB-antibodies for the territory of China, Macao, Hong Kong and Taiwan, global rights to a CAB-HER2-bispecific-antibody and global co-development rights with us to an IL-22 non-CAB-antibody. The term of the agreement continues unless terminated by mutual written consent of the parties and also contains customary provisions for termination by either party. Payments to us may include upfront payments, milestone payments and double-digit royalties, which represent a variable interest held by us, but no payments have been made to date.

Exclusive License Agreement with BioAtla Holdings, LLC

In January 2020, we entered into an Exclusive License Agreement with BioAtla Holdings, LLC, as amended in July 2020, under which BioAtla Holdings acquired the rights to CAB antibodies for certain targets in the field of Adoptive Cell Therapy, or ACT (CAR-T). We have an option for a period of 10 years to acquire the ACT preparations and ACT treatments in return for royalty payments in the low-single digits during the applicable royalty term. Unless earlier terminated, the agreement continues in effect so long as BioAtla Holdings or any of its affiliates, licensees or sublicensees are developing or commercializing the ACT preparations and treatments in the ACT field or we or any of our affiliates, licensees or sublicensees are developing or commercializing any CAB non-ACT product for any indication outside the ACT field. The agreement may be terminated only by the mutual written agreement of the parties. No payments have been made to date.

In addition, effective January 2020, we entered into a Royalty Sharing Agreement whereby we agreed to share with BioAtla Holdings 50% of the royalties we receive under the license agreement with F1 Oncology, Inc. described below.

Amended and Restated Exclusive License Agreement with F1 Oncology, Inc.

In May 2016, we entered into an Exclusive License Agreement with F1 Oncology, Inc. and its affiliates, which, as amended in July 2016 and November 2017 and as amended and restated in November 2019, granted an exclusive, worldwide, sublicensable license under certain patents and know-how controlled by us to develop, manufacture and commercialize four CAB ACT (CAR-T) preparations and treatments for cancer. F1 Oncology granted us an exclusive, worldwide, royalty free, fully paid-up, sublicensable license under certain patents and

know-how controlled by F1 Oncology and F1 Oncology's interest in technology jointly developed under the agreement to develop, manufacture and commercialize non-ACT CAB products for any indication.

F1 Oncology is obligated to pay us during the royalty term, on a product-by-product basis and country-by-country basis, mid-single-digit royalties based on annual net sales of certain F1 Oncology ACT products, subject to certain adjustments. The term during which F1 Oncology is obligated to pay royalties under the agreement with respect to any particular product in any particular country, will begin on the first commercial sale of such product in such country and will end on the date of expiration of the last-to-expire of certain product-related patent rights in such country.

Unless earlier terminated, the agreement continues in effect so long as F1 Oncology or any of its affiliates, licensees or sublicensees are developing or commercializing any F1 Oncology products in the ACT field or we or any of our affiliates, licensees or sublicensees are developing or commercializing any CAB products for any indication outside the ACT field. The agreement may be terminated only by the mutual written agreement of the parties.

In connection with the agreement, we received common and preferred stock of F1 Oncology. These holdings of F1 Oncology common and preferred stock were retained by BioAtla Holdings in connection with the LLC Division.

In November 22, 2019, we entered into an Amended and Restated Exclusive License Agreement with F1 Oncology, which curtailed the rights to certain CAB intellectual property previously licensed to F1 Oncology in exchange for a one-time, non-refundable, non-creditable license fee of \$10,000, but does not change F1 Oncology's obligation to pay us royalties on licensed products. In connection with the Amended and Restated Exclusive License Agreement, BioAtla Holdings sold its F1 Oncology common and preferred holdings back to F1 Oncology for consideration of \$25,000.

CHO-S Cell Line License Agreement with Life Technologies Corporation

On June 28, 2018, we entered into the CHO-S Cell Line License Agreement with Life Technologies Corporation. Under the terms of the agreement, Life Technologies Corporation provides and grants to us a worldwide, non-exclusive, royalty-free, non-sublicensable license to use certain CHO-S cells to make, or have made, recombinant proteins for clinical or commercial purposes and to seek regulatory approval for the sale of such recombinant proteins in exchange for a one-time, non-refundable, non-creditable license fee of \$400,000. No royalties are due by us to Life Technologies Corporation under the agreement. Additional specific lots of Life Technologies Corporation's recombinant proteins may be ordered by us for an additional fee of \$50,000 per lot. The term of the agreement continues in perpetuity unless terminated by either party.

Intellectual property

Since inception, we have recognized the value of strong, defensible and relevant intellectual property protection. We seek to protect our technologies and products and the potential market for such technologies and products. To accomplish this goal, we apply for patents covering our processes and compositions. We also apply for patents covering developments and technologies for purpose of preventing third parties from developing competing products. Inventions related to various aspects of our core technologies have already been protected by issued and pending patent applications. As of November 1, 2020, we have 477 patents and patent applications with 257 issued, 8 allowed applications and 212 pending applications.

The objectives of our IP strategy are to increase shareholder value by adequately protecting our platform technologies and compositions of matter, discerning and maximizing the value of our patent portfolio, providing a flexible portfolio that is aligned with our business model and maintaining a cost-effective strategy. We achieve these goals by creating a defensible patent shield, employing most-likely-to-succeed strategies, patenting

[Table of Contents](#)

strategically to reinforce the value of our IP and to minimize costs related to patenting while maximizing value, and by understanding the technology landscape to ensure patentability and freedom to operate. For our CAB products, we act strategically to maximize patent term by timely filing our patent applications.

We recognize that the ability to obtain patent protection and the degree of such protection depends on a number of factors, including the extent of the prior art, the novelty of the invention, the obviousness of the invention and the ability to satisfy the enablement and written description requirements of the patent laws. We file all relevant types of patent applications to protect our intellectual property, including patent applications with claims directed to our processes and products, and applications and uses thereof.

We file our applications with the U.S. Patent and Trademark Office to establish a priority filing date. Generally, we initially file provisional applications. Provisional applications are designed to provide a lower-cost first patent application filing in the United States. Corresponding non-provisional patent applications must be filed not later than 12 months after the filing date of the first provisional application filed for an invention. In some cases, multiple provisional applications have been filed within a 12-month period to capture incremental developments within the 12-month priority period while obtaining an early filing date for each development. The corresponding non-provisional patent applications benefit from the provisional application(s) since the priority date(s) of these non-provisional patent applications is/are the earlier provisional application filing date(s), and because the patent term of the finally issued patents are calculated from the later, non-provisional patent application filing dates. This system allows us to obtain an early priority date, add material to the patent application(s) during the priority year, obtain a later start to the patent term and delay prosecution costs, which may save costs in the event that we decide not to pursue examination in an application.

Subsequently, when appropriate, we pursue patent applications in foreign countries. The PCT system for filing international patent applications is used. This system allows a single application to be filed within 12 months of the original priority date of the patent application designating all 153 PCT member states (including countries in South, Central and North America, Africa, Europe, Asia and Australia) in which national/regional patent applications can later be pursued based on the international patent application filed under the PCT. The PCT searching authority performs a patentability search and issues a non-binding patentability opinion which can be used to evaluate the chances of success for future the national/regional patent applications in foreign countries prior to having to incur the filing and translation costs for such applications. At the end of a period of 2 1/2 years from the first priority date of the PCT patent application, separate patent applications can be pursued in any of the 153 PCT member states either by direct national filing or, in some cases, by filing through a regional patent organization such as the European Patent Organization. The PCT system delays expenses, allows a limited evaluation of the chances of success for national/regional patent applications and enables substantial cost savings where applications are abandoned within the first 2 1/2 years of filing.

For all patent applications, we determine the claiming strategy on a case-by-case basis. Advice of counsel and our business model and needs are always considered. We file patents containing claims for protection of all useful applications of our proprietary technologies and any products, as well as all new applications or uses we discover for existing technologies and products, assuming these are strategically valuable. We continuously reassess the number and type of patent applications, as well as the pending and issued patent claims to ensure that maximum patent coverage and value are obtained for our processes, and compositions, given existing patent office rules and regulations. Further, pending patent claims may be modified during patent prosecution to meet our intellectual property and business needs.

We are attentive to the need to avoid the unauthorized use of patented technology belonging to third parties. We perform non-infringement searches and analyses for our existing technologies and will continue to do so for future commercial processes and products. For our new developments, we regularly perform expert searches and reviews, and monitor patents and patent applications by third-party competitors. Our policy of avoiding

patent infringement is diligently executed. To the best of our knowledge as of the date of this prospectus, we have freedom to operate on all of our technologies and product candidates.

The patent positions of biotechnology and biopharmaceutical companies like ours are generally uncertain and involve complex legal, scientific and factual issues. In addition, the coverage claimed in a patent application can be significantly reduced before the patent is issued, and the scope of an issued patent can be reinterpreted or further altered even after patent issuance. Consequently, we may not obtain or maintain adequate patent protection for any of our product candidates or for our technology platform. We cannot predict whether the patent applications we are currently pursuing will issue as patents in any particular jurisdiction or whether the claims of any issued patents will provide sufficient proprietary protection from competitors. Any patents that we hold may be challenged, circumvented or invalidated by third parties. For a more comprehensive discussion of the risks related to our patents, please see “Risk factors—Risks related to our intellectual property.”

The term of individual patents depends upon the legal term of the patents in the countries in which they are obtained. In most countries in which we file, the patent term is 20 years from the earliest date of filing a non-provisional patent application related to the patent. A U.S. patent may be accorded a patent term adjustment, or PTA, under certain circumstances to compensate for delays in granting the patent caused by the United States Patent and Trademark Office. In some instances, such a PTA may result in a U.S. patent term extending beyond 20 years from the earliest date of filing a non-provisional patent application related to the U.S. patent. In addition, in the United States, the term of a U.S. patent that covers an FDA-approved drug may be eligible for a patent term extension, which permits patent term restoration as compensation for the patent term lost during the FDA regulatory review process. The Hatch-Waxman Act permits a patent term extension of up to five years beyond the expiration of the patent. The length of the patent term extension is related to the length of time the drug is under regulatory review. Patent term extension cannot extend the remaining term of a patent beyond a total of 14 years from the date of product approval and only one patent applicable to an approved drug may be extended. Similar provisions are available in Europe and other foreign jurisdictions to extend the term of a patent that covers an approved drug. In the future, if and when our products receive regulatory approval, we expect to apply for patent term extensions on patents covering those products. We plan to seek patent term extensions to any of our issued patents in any jurisdiction where these are available; however, there is no guarantee that the applicable authorities, including the FDA in the United States, will agree with our assessment of whether such extensions should be granted, and, if granted, the length of such extensions.

We further own trade secrets relating to our technology platform and product candidates, and we maintain the confidentiality of proprietary information to protect aspects of our business that are not amenable to, or that we do not consider appropriate for, patent protection. Although we take steps to protect our proprietary information and trade secrets, including through contractual means with our employees and consultants, third parties may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets or disclose our technology. Thus, we may not be able to meaningfully protect our trade secrets. It is our policy to require our employees, consultants, outside scientific collaborators, sponsored researchers and other advisors to execute confidentiality agreements upon the commencement of employment or consulting relationships with us. These agreements provide that all confidential information concerning our business or financial affairs developed or made known to the individual during the course of the individual's relationship with us are to be kept confidential and not disclosed to third parties except in specific circumstances. Our agreements with employees and consultants also provide that all inventions conceived by the employee in the course of employment or work with us or from the employee's or consultant's use of our confidential information are our exclusive property. For a more comprehensive discussion of the risks related to our trade secrets, please see “Risk factors—Risks related to our intellectual property.”

Company-owned patents

BA3011 is covered by a number of filings, including a published PCT application filed in 2017 that entered the national phase in 2018. National phase applications have been granted in Australia and Japan and are pending in 13 jurisdictions in addition to the United States, including most major market countries. Composition of matter claims issuing from this application would not expire before 2037.

BA3021 is covered by a number of filings, including a published PCT application filed in 2017 that entered the national phase in 2018. National phase applications are pending in 13 jurisdictions in addition to the United States, including most major market countries. Composition of matter claims issuing from this application would not expire before 2037.

BA3071 is covered by a number of filings, including a published PCT application filed in 2019 that will enter the national phase in 2021. Additional filings were made in the non-PCT countries of Argentina and Taiwan. Composition of matter claims issuing from this application would not expire before 2039.

Our pre-clinical stage CAB antibody programs, including CAB-anti-EpCAM antibodies and CAB-anti-Nectin-4 antibodies, are covered by a number of filings, including, as of November 1, 2020, pending provisional applications that are due for conversion to a non-provisional applications in 2020 and 2021. Composition of matter claims issuing from these applications would not expire before either 2040 or 2041.

Core components of our product candidates are protected by company-owned platform applications directed to novel methods of protein evolution, methods of making conditionally active biologics, integrated selection and evolution of antibodies and proteins in expression production hosts, multi-specific antibodies and methods of making, modified antibody regions, conditionally active biological proteins, proteins targeting orthologs, discovery of and production of conditionally active biologic proteins in eukaryotic cell production hosts, conditionally active chimeric antigen receptors for modified T-cells, diagnostics using conditionally active antibodies, conditionally active polypeptides, antibodies targeted to senescent cells, conditionally active proteins for neurodegenerative diseases, and conditionally active proteins with pH selectivity. We also have 14 issued U.S. patents covering various aspects of the manufacturing methods used to generate CAB antibodies that have patent terms expiring from 2030 to 2036. We also have an issued patent in the U.S. protecting our method of manufacturing conditionally active multi-specific antibodies that has a patent term expiring in 2033.

Out-licensed patents

Himalaya Therapeutics SEZC has exclusive rights to patents/patent applications in China, Macao, Hong Kong and Taiwan relating to ROR2 (Patent applications 2017800294276 (China), and patent application 106115891 (Taiwan), both titled Anti-ROR2 antibodies and their immunoconjugates and uses thereof) and relating to AXL (Patent applications 201780023876X (China), and patent application 106112687 (Taiwan), both titled Anti-AXL antibodies and their immunoconjugates and uses thereof). Additionally, Himalaya Therapeutics SEZC has exclusive worldwide rights to patents/patent applications relating to IL-22 (Patent applications 108119613 and PCT/US19/35395, both titled Anti-IL-22 antibodies, antibody fragments and their immunoconjugates and uses thereof) and relating to HER2 (Patent application USP 62/964,747 titled Conditionally active anti-HER2 antibodies).

BioAtla Holdings, LLC has exclusive worldwide rights to all patents for the field of ACT (CAR-T), excluding the targets licensed to F1 Oncology, Inc.

Inversagen, LLC has exclusive worldwide rights to all patents solely in the field of diseases associated with aging (outside of cancer), diagnostics related thereto and an immuno-oncology antibody.

F1 Oncology, Inc. has an exclusive worldwide license to all patents solely to develop, make, have made, use, sell, have sold, offer for sale and import adoptive cell therapy (CAR-T) products to four named targets for the treatment of cancer. F1 Oncology, Inc.'s rights under the agreement exclude the right to grant sublicenses to third parties to discover, develop or manufacture any CAB ACT or any component of our CAB ACT technology, except as used in or incorporated into F1 Oncology, Inc.'s ACTs for cancer.

Government regulation and product approval

Government authorities in the United States, at the federal, state and local level and in other countries and jurisdictions, including the European Union, extensively regulate, among other things, the research, development, testing, manufacture, quality control, import, export, safety, effectiveness, labeling, packaging, storage, distribution, record keeping, approval, advertising, promotion, marketing, post-approval monitoring and post-approval reporting of biological product candidates such as those we are developing. The process of obtaining regulatory approvals and the subsequent compliance with appropriate federal, state, local and foreign statutes and regulations require the expenditure of substantial time and financial resources and we may not be able to obtain the required regulatory approvals.

Licensure and regulation of biologics in the United States

In the United States, the FDA regulates biologic products under the Federal Food, Drug, and Cosmetic Act, or the FDCA, the Public Health Service Act, or the PHSA, and regulations and guidance implementing these laws. The FDCA, PHSA and their corresponding regulations govern, among other things, the testing, manufacturing, safety, purity, potency, labeling, packaging, storage, record keeping, distribution, reporting, advertising and other promotional practices involving biologic products. Biological products used for the prevention, treatment or cure of a disease or condition of a human being are subject to regulation under the FDCA, except the section of the FDCA that governs the approval of new drug applications, or NDAs. Biological products are approved for marketing under provisions of the PHSA, via a Biologic License Application, or BLA. However, the application process and requirements for approval of BLAs are very similar to those for NDAs, and biologics are associated with similar approval risks and costs as drugs. Failure to comply with applicable U.S. requirements may subject a company to a variety of administrative or judicial sanctions, such as clinical hold, FDA refusal to approve pending NDAs or BLAs, warning or untitled letters, product recalls, product seizures, total or partial suspension of production or distribution, injunctions, fines, civil penalties and criminal prosecution.

U.S. biologic products development process

Biological product candidates must be approved by the FDA pursuant to a BLA before they may be legally marketed in the United States. The process generally involves the following:

- Completion of extensive preclinical laboratory tests and *in vivo* studies in accordance with the FDA's current GLP regulations and applicable requirements for the humane use of laboratory animals or other applicable regulations;
- Submission to the FDA of an IND, which must become effective before clinical trials may begin;
- Approval by an independent institutional review board, or IRB, reviewing each clinical site before each clinical trial may be initiated;
- Performance of adequate and well-controlled clinical trials in accordance with the FDA's GCP regulations, and any additional requirements for the protection of human research subjects and their health information, to establish the safety and efficacy of the proposed biologic product candidate for its intended use;

[Table of Contents](#)

- Preparation and submission to the FDA of a BLA for marketing approval that includes substantial evidence of safety, purity and potency from results of nonclinical testing and clinical trials;
- Review of the product by an FDA advisory committee, if applicable;
- A determination by the FDA within 60 days of its receipt of a BLA to file an application;
- Satisfactory completion of an FDA inspection of the manufacturing facility or facilities where the biologic product candidate is produced to assess compliance with current cGMPs and to assure that the facilities, methods and controls are adequate to preserve the biologic product candidate's identity, safety, strength, quality, potency and purity;
- Potential FDA audit of the nonclinical and clinical trial sites that generated the data in support of the BLA to assure compliance with GCPs and integrity of the clinical data;
- Payment of user fees and FDA review and approval, or licensure, of the BLA; and
- Compliance with any post-approval requirements, including a Risk Evaluation and Mitigation Strategy, or REMS, where applicable, and post-approval studies required by the FDA as a condition of approval.

Preclinical studies

Before testing any biologic product candidate in humans, the product candidate must undergo rigorous preclinical testing. Preclinical tests, also referred to as nonclinical studies, include laboratory evaluations of product chemistry, toxicity and formulation, as well as *in vivo* studies to assess the potential safety and activity of the product candidate and to establish a rationale for therapeutic use. The conduct of the preclinical tests must comply with federal regulations and requirements including GLPs.

The clinical trial sponsor must submit the results of the preclinical tests, together with manufacturing information, analytical data, any available clinical data or literature and a proposed clinical protocol, among other things, to the FDA as part of an IND. An IND is a request for authorization from the FDA to administer an investigational product to humans and must become effective before human clinical trials may begin. Some preclinical testing may continue even after the IND is submitted. An IND automatically becomes effective 30 days after receipt by the FDA, unless before that time the FDA raises concerns or questions related to a proposed clinical trial and places the trial on clinical hold, including concerns that human research subjects will be exposed to unreasonable health risks. In such a case, the IND sponsor and the FDA must resolve any outstanding concerns before the clinical trial can begin. Accordingly, submission of an IND may or may not result in the FDA allowing clinical trials to commence.

Clinical trials under an IND

Clinical trials involve the administration of the biologic product candidate to healthy volunteers or patients under the supervision of qualified investigators, which generally are physicians not employed by, or under, the control of the trial sponsor. Clinical trials must be conducted: (i) in compliance with federal regulations; (ii) in compliance with GCPs, an international standard meant to protect the rights and health of patients and to define the roles of clinical trial sponsors, administrators and monitors and (iii) under protocols detailing, among other things, the objectives of the trial, the parameters to be used in monitoring safety and the effectiveness criteria to be evaluated in the trial. Further, each clinical trial must be reviewed and approved by an IRB at or servicing each institution at which the clinical trial will be conducted. An IRB is charged with protecting the welfare and rights of trial participants and considers items such as whether the risks to individuals participating in the clinical trials are minimized and are reasonable in relation to anticipated benefits. The IRB also approves the form and content

of the informed consent that must be signed by each clinical trial subject, or his or her legal representative, reviews and approves the study protocol, and must monitor the clinical trial until completed.

Clinical trials typically are conducted in three sequential phases that may overlap or be combined:

- **Phase 1.** The biologic product candidate initially is introduced into a small number of healthy human subjects and tested for safety, dosage tolerance, absorption, metabolism, distribution or excretion. If possible, a Phase 1 clinical trial may also seek to gain an early understanding of the product candidate's effectiveness. In the case of some product candidates for severe or life-threatening diseases, especially when the product candidate may be too inherently toxic to ethically administer to healthy volunteers, the initial human testing is often conducted in patients.
- **Phase 2.** The biologic product candidate is evaluated in a limited patient population to identify possible adverse effects and safety risks, to preliminarily evaluate the efficacy of the product candidate for specific targeted diseases and to determine dosage tolerance, optimal dosage and dosing schedule. Multiple Phase 2 clinical trials may be conducted to obtain information prior to beginning larger and more expensive Phase 3 clinical trials.
- **Phase 3.** The biologic product candidate is administered to an expanded patient population to further evaluate dosage, to provide statistically significant evidence of clinical efficacy and to further test for safety, generally at multiple geographically dispersed clinical trial sites. These clinical trials are intended to establish the overall risk/benefit ratio of the investigational product and to provide an adequate basis for product approval.

Post-approval clinical trials, sometimes referred to as Phase 4 clinical trials, may be conducted after initial approval. These clinical trials are used to gain additional experience from the treatment of patients in the intended therapeutic indication, particularly for long-term safety follow-up.

These phases may overlap or be combined. For example, a Phase 1/2 clinical trial may contain both a dose-escalation stage and a dose-expansion stage, the latter of which may confirm tolerability at the recommended dose for expansion in future clinical trials (as in traditional Phase 1 clinical trials) and provide insight into the antitumor effects of the investigational therapy in selected subpopulation(s).

Typically, during the development of oncology therapies, all subjects enrolled in Phase 1 clinical trials are disease-affected patients and, as a result, considerably more information on clinical activity may be collected during such trials than during Phase 1 clinical trials for non-oncology therapies. A single Phase 3 or Phase 2 trial may be sufficient in rare instances, including (i) where the trial is a large, multicenter trial demonstrating internal consistency and a statistically very persuasive finding of a clinically meaningful effect on mortality, irreversible morbidity or prevention of a disease with a potentially serious outcome and confirmation of the result in a second trial would be practically or ethically impossible or (ii) when in conjunction with other confirmatory evidence. Approval on the basis of a single trial may be subject to the requirement of additional post-approval studies.

Phase 1, Phase 2, Phase 3 and other types of clinical trials may not be completed successfully within any specified period, if at all. The FDA, the IRB, or the sponsor may suspend or terminate a clinical trial at any time on various grounds, including non-compliance with regulatory requirements or a finding that the patients are being exposed to an unacceptable health risk. Similarly, an IRB can suspend or terminate approval of a clinical trial at its institution if the clinical trial is not being conducted in accordance with the IRB's requirements or if the drug or biologic has been associated with unexpected serious harm to patients. Additionally, some clinical trials are overseen by an independent group of qualified experts organized by the clinical trial sponsor, known as a data safety monitoring board or committee. This group provides authorization for whether a trial may move forward at designated checkpoints based on access to certain data from the trial.

Concurrent with clinical trials, companies usually must complete some long-term preclinical testing, such as animal tests of reproductive adverse events and carcinogenicity, and must also develop additional information about the chemistry and physical characteristics of the drug and finalize a process for manufacturing the drug in commercial quantities in accordance with cGMP requirements. The manufacturing process must be capable of consistently producing quality batches of the drug candidate and, among other things, the manufacturer must develop methods for testing the identity, strength, quality and purity of the final drug product. Additionally, appropriate packaging must be selected and tested and stability studies must be conducted to demonstrate that the drug candidate does not undergo unacceptable deterioration over its shelf life.

There are also requirements governing the reporting of ongoing clinical trials and completed clinical trial results to public registries. Sponsors of clinical trials of FDA-regulated products, including biologics, are required to register and disclose certain clinical trial information, which is publicly available at www.clinicaltrials.gov. Information related to the product, patient population, phase of investigation, study sites and investigators, and other aspects of the clinical trial is then made public as part of the registration. Sponsors are also obligated to discuss the results of their clinical trials after completion. Disclosure of the results of these trials can be delayed in certain circumstances for up to two years after the date of completion of the trial. Competitors may use this publicly available information to gain knowledge regarding the progress of development programs.

U.S. review and approval processes

FDA approval of a BLA must be obtained before commercial marketing of the biologic product. The results of the preclinical tests and clinical trials, together with detailed information relating to the product's CMC and proposed labeling, among other things, are submitted to the FDA as part of the BLA requesting approval to market the product for one or more indications.

The cost of preparing and submitting a BLA is substantial. Under the Prescription Drug User Fee Act, or PDUFA, each BLA must be accompanied by a significant user fee. The FDA adjusts the PDUFA user fees on an annual basis. The PDUFA also imposes an annual prescription drug program. Fee waivers or reductions are available in certain circumstances, including a waiver of the application fee for the first application filed by a small business. Additionally, no user fees are assessed on BLAs for products designated as orphan drugs, unless the product also includes a non-orphan indication.

The FDA reviews a BLA within 60 days of submission to determine if it is substantially complete before the agency files. The FDA may refuse to file any BLA that it deems incomplete or not properly reviewable at the time of submission and may request additional information. In that event, the BLA must be resubmitted with the additional information. The resubmitted application also is subject to review before the FDA files it. Once the submission is filed by the FDA, the FDA begins an in-depth, substantive review of the BLA.

The FDA reviews the BLA to determine, among other things, whether the proposed product candidate is safe and effective, for its intended use, has an acceptable purity profile and whether the product candidate is being manufactured in accordance with cGMPs to assure and preserve the product candidate's identity, safety, strength, quality, potency and purity. The FDA may refer applications for novel biologic products or biologic products that present difficult questions of safety or efficacy to an advisory committee, typically a panel that includes clinicians and other experts, for review, evaluation and a recommendation as to whether the application should be approved and under what conditions. The FDA is not bound by the recommendations of an advisory committee, but it considers such recommendations carefully when making decisions. During the product approval process, the FDA also will determine whether a REMS is necessary to assure the safe use of the product candidate. REMS involve additional risk minimization strategies to ensure that the benefits of the

product outweigh the potential risks. A REMS can include medication guides, communication plans for healthcare professionals, and elements to assure safe use, or ETASU. ETASU can include, but are not limited to, special training or certification for prescribing or dispensing the product, dispensing the product only under certain circumstances, special monitoring, and the use of patient-specific registries. If the FDA concludes a REMS is needed, the sponsor of the BLA must submit a proposed REMS; the FDA will not approve the BLA without a REMS, if required.

Before approving a BLA, the FDA will inspect the facilities at which the product candidate is manufactured. The FDA will not approve the product candidate unless it determines that the manufacturing processes and facilities are in compliance with cGMP requirements and adequate to assure consistent production of the product candidate within required specifications. Additionally, before approving a BLA, the FDA typically will inspect one or more clinical sites to assure that the clinical trials were conducted in compliance with IND trial requirements and GCP requirements.

On the basis of the BLA and accompanying information, including the results of the inspection of the manufacturing facilities, the FDA may issue an approval letter or a complete response letter. An approval letter authorizes commercial marketing of the biologic product with specific prescribing information for specific indications. A complete response letter generally outlines the deficiencies in the submission and may require substantial additional testing or information in order for the FDA to reconsider the application. If a complete response letter is issued, the applicant may either resubmit the BLA, addressing all of the deficiencies identified in the letter, or withdraw the application or request an opportunity for a hearing. The FDA has committed to reviewing such resubmissions in two or six months, depending on the type of information included. Even if such data and information are submitted, the FDA may decide that the BLA does not satisfy the criteria for approval.

If a product candidate receives regulatory approval, the FDA may require post-marketing clinical trials, sometimes referred to as Phase 4 clinical trials, designed to further assess a biologic product's safety and effectiveness, and testing and surveillance programs to monitor the safety of approved products that have been commercialized.

The FDA has agreed to specified performance goals in the review of BLAs under the PDUFA. One such goal is to review standard BLAs in 10 months after the FDA files the BLA, and priority BLAs in six months, whereupon a review decision is to be made. The review process and the PDUFA goal date may be extended by three months if the FDA requests or the BLA sponsor otherwise provides additional information or clarification regarding information already provided in the submission within the last three months before the PDUFA goal date.

Compliance with cGMP requirements

Manufacturers of biologics must comply with applicable cGMP regulations, including quality control and quality assurance and maintenance of records and documentation. Manufacturers and others involved in the manufacture and distribution of such products also must register their establishments with the FDA and certain state agencies. Both domestic and foreign manufacturing establishments must register and provide additional information to the FDA upon their initial participation in the manufacturing process. Establishments may be subject to periodic, unannounced inspections by government authorities to ensure compliance with cGMP requirements and other laws. Discovery of problems may result in a government entity placing restrictions on a product, manufacturer or holder of an approved BLA, and may extend to requiring withdrawal of the product from the market. The FDA will not approve a BLA unless it determines that the manufacturing processes and facilities are in compliance with cGMP requirements and adequate to assure consistent production of the product within required specification.

Expedited development and review programs

The FDA is authorized to designate certain products for expedited review if they are intended to address an unmet medical need in the treatment of a serious or life-threatening disease or condition.

Fast track designation may be granted for products that are intended to treat a serious or life-threatening disease or condition for which there is no effective treatment and preclinical or clinical data demonstrate the potential to address unmet medical needs for the condition. Fast track designation applies to both the product and the specific indication for which it is being studied. The sponsor of a new biologic candidate can request the FDA to designate the candidate for a specific indication for fast track status concurrent with, or after, the submission of the IND for the candidate. The FDA must determine if the biologic candidate qualifies for fast track designation within 60 days of receipt of the sponsor's request. For fast track products, sponsors may have greater interactions with the FDA and the FDA may initiate review of sections of a fast track product's BLA before the application is complete. This "rolling review" is available if the FDA determines, after preliminary evaluation of clinical data submitted by the sponsor, that a fast track product may be effective. The sponsor must also provide, and the FDA must approve, a schedule for the submission of the remaining information and the sponsor must pay applicable user fees. Any product submitted to the FDA for marketing, including under a fast track program, may be eligible for other types of FDA programs intended to expedite development and review, such as priority review and accelerated approval.

Breakthrough therapy designation may be granted for products that are intended, alone or in combination with one or more other products, to treat a serious or life-threatening condition and preliminary clinical evidence indicates that the product may demonstrate substantial improvement over currently approved therapies on one or more clinically significant endpoints. Under the breakthrough therapy program, the sponsor of a new biologic candidate may request that the FDA designate the candidate for a specific indication as a breakthrough therapy concurrent with, or after, the submission of the IND for the biologic candidate. The FDA must determine if the biological product qualifies for breakthrough therapy designation within 60 days of receipt of the sponsor's request. The FDA may take certain actions with respect to breakthrough therapies, including holding meetings with the sponsor throughout the development process, providing timely advice to the product sponsor regarding development and approval, involving more senior staff in the review process, assigning a cross-disciplinary project lead for the review team and taking other steps to design the clinical trials in an efficient manner.

Priority review may be granted for products that are intended to treat a serious or life-threatening condition and, if approved, would provide a significant improvement in safety and effectiveness compared to available therapies. The FDA will attempt to direct additional resources to the evaluation of an application designated for priority review in an effort to facilitate the review.

Accelerated approval may be granted for products that are intended to treat a serious or life-threatening condition and that generally provide a meaningful therapeutic advantage to patients over existing treatments. A product eligible for accelerated approval may be approved on the basis of either a surrogate endpoint that is reasonably likely to predict clinical benefit, or on a clinical endpoint that can be measured earlier than irreversible morbidity or mortality, that is reasonably likely to predict an effect on irreversible morbidity or mortality or other clinical benefit, taking into account the severity, rarity or prevalence of the condition and the availability or lack of alternative treatments. In clinical trials, a surrogate endpoint is a measurement of laboratory or clinical signs of a disease or condition that substitutes for a direct measurement of how a patient feels, functions or survives. The accelerated approval pathway is most often used in settings in which the course of a disease is long and an extended period of time is required to measure the intended clinical benefit of a product, even if the effect on the surrogate or intermediate clinical endpoint occurs rapidly. Thus, accelerated approval has been used extensively in the development and approval of products for treatment of a variety of cancers in which the goal of therapy is generally to improve survival or decrease morbidity and the duration of

the typical disease course requires lengthy and sometimes large studies to demonstrate a clinical or survival benefit. The accelerated approval pathway is contingent on a sponsor's agreement to conduct additional post-approval confirmatory studies to verify and describe the product's clinical benefit. These confirmatory trials must be completed with due diligence and, in some cases, the FDA may require that the trial be designed, initiated and/or fully enrolled prior to submission of the application or approval. Failure to conduct required post-approval studies, or to confirm a clinical benefit during post-marketing studies, would allow the FDA to withdraw the product from the market on an expedited basis. All promotional materials for product candidates approved under accelerated regulations are subject to prior review by the FDA.

Even if a product qualifies for one or more of these programs, the FDA may later decide that the product no longer meets the conditions for qualification or the time period for FDA review or approval may not be shortened. Furthermore, fast track designation, breakthrough therapy designation, priority review and accelerated approval do not change the standards for approval, but may expedite the development or approval process.

Post-approval requirements

Rigorous and extensive FDA regulation of biologic products continues after approval, particularly with respect to cGMP requirements. Manufacturers are required to comply with applicable requirements in the cGMP regulations, including quality control and quality assurance and maintenance of records and documentation, and are subject to periodic inspections by the FDA. In addition, changes to the manufacturing process or facility generally require prior FDA approval before being implemented and other types of changes to the approved product, such as adding new indications and additional labeling claims, are also subject to further FDA review and approval. Other post-approval requirements applicable to biologic products include reporting of cGMP deviations that may affect the identity, potency, purity and overall safety of a distributed product, record-keeping requirements, reporting of adverse effects, reporting updated safety and efficacy information and complying with electronic record and signature requirements. A sponsor also must comply with the FDA's advertising and promotion requirements, such as those related to direct-to-consumer advertising, the prohibition on promoting products for uses or in patient populations that are not described in the product's approved labeling (known as "off-label use"), industry-sponsored scientific and educational activities and promotional activities involving the internet. Discovery of previously unknown problems or the failure to comply with the applicable regulatory requirements may result in restrictions on the marketing of a product or withdrawal of the product from the market as well as possible civil or criminal sanctions.

Failure to comply with the applicable U.S. requirements at any time during the product development process, approval process or after approval, may subject an applicant or manufacturer to administrative or judicial civil or criminal sanctions and adverse publicity. These actions could include refusal to approve pending applications or supplemental applications, withdrawal of an approval, clinical hold, suspension or termination of clinical trials by an IRB, warning or untitled letters, product recalls, product seizures, total or partial suspension of production or distribution, injunctions, fines or other monetary penalties, refusals of government contracts, mandated corrective advertising or communications with healthcare providers, debarment, restitution, disgorgement of profits or other civil or criminal penalties.

Orphan drug designation

Orphan drug designation in the United States is designed to encourage sponsors to develop products intended for treatment of rare diseases or conditions. In the United States, pursuant to the Orphan Drug Act, the FDA may grant orphan designation to a biological product intended to treat a rare disease or condition, which is statutorily defined as a condition that affects fewer than 200,000 individuals in the United States or that affects more than 200,000 individuals in the United States and for which there is no reasonable expectation

that the cost of developing and making available the biologic for the disease or condition will be recovered from sales of the product in the United States.

Orphan drug designation qualifies a company for tax credits and market exclusivity for seven years following the date of the product's marketing approval if granted by the FDA. An application for designation as an orphan product can be made any time prior to the filing of an application for approval to market the product. A product becomes an orphan when it receives orphan drug designation from the Office of Orphan Products Development at the FDA based on acceptable confidential requests made under the regulatory provisions. The product must then go through the review and approval process like any other product. Orphan drug designation on its own does not convey any advantage in or shorten the duration of the regulatory review and approval process.

A sponsor may request orphan drug designation of a previously unapproved product or new orphan indication for an already marketed product. In addition, a sponsor of a product that is otherwise the same product as an already approved orphan drug may seek and obtain orphan drug designation for the subsequent product for the same rare disease or condition if it can present a plausible hypothesis that its product may be clinically superior to the first drug. More than one sponsor may receive orphan drug designation for the same product for the same rare disease or condition, but each sponsor seeking orphan drug designation must file a complete request for designation.

If a product with orphan designation receives the first FDA approval for the disease or condition for which it has such designation or for a select indication or use within the rare disease or condition for which it was designated, the product generally will receive orphan drug exclusivity. Orphan drug exclusivity means that the FDA may not approve another sponsor's marketing application for the same product for the same indication for seven years, except in certain limited circumstances. If a product designated as an orphan drug ultimately receives marketing approval for an indication broader than what was designated in its orphan drug application, it may not be entitled to exclusivity.

The period of exclusivity begins on the date that the marketing application is approved by the FDA and applies only to the indication for which the product has been designated. The FDA may approve a second application for the same product for a different use or a second application for a clinically superior version of the product for the same use. Because healthcare professionals are free to prescribe products for off-label uses, the competitor's product could be used for the orphan indication despite another product's orphan exclusivity. The FDA cannot, however, approve the same product made by another manufacturer for the same indication during the market exclusivity period unless it has the consent of the sponsor or the sponsor is unable to provide sufficient quantities.

The FDA's determination of whether two ADCs are the same product for purposes of orphan drug exclusivity is based on a determination of sameness of the monoclonal antibody element and the functional element of the conjugated molecule. Two ADCs are deemed to be the same product if the complementarity determining region sequences of the antibody and the functional element of the conjugated molecule are the same. A difference in either of those two elements can result in a determination that the molecules are different.

FDA approval and regulation of companion diagnostics

If safe and effective use of our products depends on an *in vitro* diagnostic, then the FDA generally will require approval or clearance of that diagnostic, known as a companion diagnostic, at the same time that the FDA approves our product. In August 2014, the FDA issued final guidance clarifying the requirements that will apply to approval of therapeutic products and *in vitro* companion diagnostics. According to the guidance, if the FDA determines that a companion diagnostic device is essential to the safe and effective use of a biologic product or indication, the FDA generally will not approve the biologic product or new biologic product indication if the companion diagnostic device is not approved or cleared for that indication.

[Table of Contents](#)

Approval or clearance of the companion diagnostic device will ensure that the device has been adequately evaluated and has adequate performance characteristics in the intended population. The review of *in vitro* companion diagnostics in conjunction with the review of our products will, therefore, likely involve coordination of review by CDER and the FDA's Office of In Vitro Diagnostics and Radiological Health.

Under the FDCA, *in vitro* diagnostics, including companion diagnostics, are regulated as medical devices. In the United States, the FDCA and its implementing regulations, and other federal and state statutes and regulations govern, among other things, medical device design and development, preclinical and clinical testing, premarket clearance or approval, registration and listing, manufacturing, labeling, storage, advertising and promotion, sales and distribution, export and import, and post-market surveillance. Unless an exemption applies, diagnostic tests require marketing clearance or approval from the FDA prior to commercial distribution. The two primary types of FDA marketing authorization applicable to a medical device are premarket notification, also called 510(k) clearance, and premarket approval, or PMA approval.

The PMA process, including the gathering of clinical and preclinical data and the submission to and review by the FDA, can take several years or longer. It involves a rigorous premarket review during which the applicant must prepare and provide the FDA with reasonable assurance of the device's safety and effectiveness and information about the device and its components regarding, among other things, device design, manufacturing and labeling. PMA applications are subject to an application fee. In addition, PMAs for certain devices must generally include the results from extensive preclinical and adequate and well-controlled clinical trials to establish the safety and effectiveness of the device for each indication for which FDA approval is sought. In particular, for a diagnostic, a PMA application typically requires data regarding analytical and clinical validation studies. As part of the PMA review, the FDA will typically inspect the manufacturer's facilities for compliance with the Quality System Regulation, or QSR, which imposes elaborate testing, control, documentation and other quality assurance requirements.

PMA approval is not guaranteed, and the FDA may ultimately respond to a PMA submission with a not approvable determination based on deficiencies in the application and require additional clinical trial or other data that may be expensive and time-consuming to generate and that can substantially delay approval. If the FDA's evaluation of the PMA application is favorable, the FDA typically issues an approvable letter requiring the applicant's agreement to specific conditions, such as changes in labeling, or specific additional information, such as submission of final labeling, in order to secure final approval of the PMA. If the FDA's evaluation of the PMA or manufacturing facilities is not favorable, the FDA will deny approval of the PMA or issue a not approvable letter. A not approvable letter will outline the deficiencies in the application and, where practical, will identify what is necessary to make the PMA approvable. The FDA may also determine that additional clinical trials are necessary, in which case the PMA approval may be delayed for several months or years while the trials are conducted and then the data submitted in an amendment to the PMA. If the FDA concludes that the applicable criteria have been met, the FDA will issue a PMA for the approved indications, which can be more limited than those originally sought by the applicant. The PMA can include post-approval conditions that the FDA believes necessary to ensure the safety and effectiveness of the device, including, among other things, restrictions on labeling, promotion, sale and distribution. Once granted, PMA approval may be withdrawn by the FDA if compliance with post approval requirements, conditions of approval or other regulatory standards are not maintained or problems are identified following initial marketing.

After a device is placed on the market, it remains subject to significant regulatory requirements. Medical devices may be marketed only for the uses and indications for which they are cleared or approved. Device manufacturers must also register their establishments and list their devices with the FDA. A medical device manufacturer's manufacturing processes and those of its suppliers are required to comply with the applicable portions of the QSR, which cover the methods and documentation of the design, testing, production, processes,

controls, quality assurance, labeling, packaging and shipping of medical devices. Domestic and foreign facility records and manufacturing processes are subject to periodic unscheduled inspections by the FDA.

Pediatric information

Under the Pediatric Research Equity Act, or PREA, a BLA or supplement to a BLA must contain data to assess the safety and effectiveness of the biologic product candidate for the claimed indications in all relevant pediatric subpopulations and to support dosing and administration for each pediatric subpopulation for which the product candidate is safe and effective. The FDA may grant deferrals for submission of data or full or partial waivers. Unless otherwise required by regulation, the PREA generally does not apply to any biologic product candidate for an indication for which orphan designation has been granted. However, beginning in 2020, PREA applies to BLAs for orphan-designated biologics if the biologic is a molecularly targeted cancer product intended for the treatment of an adult cancer and is directed at a molecular target that FDA has determined is substantially relevant to the growth or progression of a pediatric cancer.

The Best Pharmaceuticals for Children Act, or BPCA, provides a six-month extension of any exclusivity-patent or non-patent-for a biologic if certain conditions are met. Conditions for exclusivity include the FDA's determination that information relating to the use of a new biologic in the pediatric population may produce health benefits in that population, the FDA making a written request for pediatric studies, and the applicant agreeing to perform, and reporting on, the requested studies within the statutory timeframe. Applications under the BPCA are treated as priority applications, with all of the benefits that designation confers.

Biosimilars and exclusivity

The ACA includes a subtitle called the Biologics Price Competition and Innovation Act of 2009, or BPCIA, which created an abbreviated approval pathway for biological products that are biosimilar to or interchangeable with an FDA-licensed reference biological product. The FDA has licensed numerous biosimilars under the BPCIA, and has issued several guidance documents outlining an approach to review and approval of biosimilars.

Biosimilarity, which requires that there be no clinically meaningful differences between the proposed biosimilar biological product and the reference product in terms of safety, purity and potency, can be shown through analytical studies, animal studies and a clinical trial or studies though the FDA has broad discretion to set biosimilar licensure data requirements. Interchangeability requires that a product is biosimilar to the reference product and the product must demonstrate that it can be expected to produce the same clinical results as the reference product in any given patient and, for products that are administered multiple times to an individual, the biologic and the reference biologic may be alternated or switched after one has been previously administered without increasing safety risks or risks of diminished efficacy relative to exclusive use of the reference biologic. However, complexities associated with the larger, and often more complex, structures of biological products, as well as the processes by which such products are manufactured, pose significant hurdles to implementation of the abbreviated approval pathway that are still being developed by the FDA.

Under the BPCIA, an application for a biosimilar product may not be submitted to the FDA until four years following the date that the reference product was first licensed by the FDA. In addition, the approval of a biosimilar product may not be made effective by the FDA until 12 years from the date on which the reference product was first licensed. During this 12-year period of exclusivity, another company may still market a competing version of the reference product if the FDA approves a full BLA for the competing product containing the applicant's own preclinical data and data from adequate and well-controlled clinical trials to demonstrate the safety, purity and potency of its product. The BPCIA also created an exclusivity period for biosimilars approved as interchangeable products. At this juncture, it is unclear whether products deemed "interchangeable" by the FDA will, in fact, be readily substituted by pharmacies, which are governed by state pharmacy law.

The BPCIA is complex and only beginning to be interpreted and implemented by the FDA. In addition, recent government proposals have sought to reduce the 12-year reference product exclusivity period. Other aspects of the BPCIA, some of which may impact the BPCIA exclusivity provisions, have also been the subject of recent litigation. As a result, the ultimate impact, implementation and meaning of the BPCIA is subject to significant uncertainty.

Patent term restoration and extension

In the United States, a patent claiming a new biologic product, its method of use or its method of manufacture may be eligible for a limited patent term extension under the Hatch-Waxman Act, which permits a patent extension of up to five years for patent term lost during product development and FDA regulatory review. Assuming grant of the patent for which the extension is sought, the restoration period for a patent covering a product is typically one-half the time between the effective date of the IND involving human beings and the submission date of the BLA, plus the time between the submission date of the BLA and the ultimate approval date. Patent term restoration cannot be used to extend the remaining term of a patent past a total of 14 years from the product's approval date in the United States. Only one patent applicable to an approved product is eligible for the extension, and the application for the extension must be submitted prior to the expiration of the patent for which extension is sought. A patent that covers multiple products for which approval is sought can only be extended in connection with one of the approvals. The USPTO reviews and approves the application for any patent term extension in consultation with the FDA.

Regulation and procedures governing approval of medicinal products in the European Union

In order to market any product outside of the United States, a company must also comply with numerous and varying regulatory requirements of other countries and jurisdictions regarding quality, safety and efficacy and governing, among other things, clinical trials, marketing authorization, commercial sales, post-market surveillance and distribution of products. Whether or not it obtains FDA approval for a product, an applicant will need to obtain the necessary approvals by the comparable foreign regulatory authorities before it can commence clinical trials or marketing of the product in those countries or jurisdictions. Specifically, the process governing approval of medicinal products in the European Union generally follows the same lines as in the United States. It entails satisfactory completion of preclinical studies and adequate and well-controlled clinical trials to establish the safety and efficacy of the product for each proposed indication. Except in limited cases of compassionate use, it also requires the submission to the relevant competent authorities of a marketing authorization application, or MAA, and granting of a marketing authorization by these authorities before the product can be marketed and sold in the European Union.

Clinical trial approval

Pursuant to the currently applicable Clinical Trials Directive 2001/20/EC and the Directive 2005/28/EC on GCP, a system for the approval of clinical trials (excluding non-interventional trials) conducted in the European Union has been implemented through national legislation of the member states. Under this system, the sponsor of a clinical trial must submit a request for authorization to the competent national authority of the European Union member state in which the clinical trial is to be conducted, or in multiple member states if the clinical trial is to be conducted in a number of member states. Furthermore, the applicant must obtain a favorable opinion from the competent ethics committee before starting a clinical trial. The clinical trial application must be accompanied by an investigational medicinal product dossier with supporting information prescribed by Directive 2001/20/EC and Directive 2005/28/EC and corresponding national laws of the member states and further detailed in applicable guidance documents.

In April 2014, the European Union adopted a new Clinical Trials Regulation (EU) No 536/2014, but it has not yet become effective. Its application is subject to the full functionality of the European Union clinical trials portal and database. According to the most recent official communications, the audit aiming to confirm the full functionality of the portal and database will be conducted in December 2020. The new Clinical Trials Regulation will overhaul the current system of approvals for clinical trials in the European Union. Specifically, the new legislation, which will be directly applicable in all member states, aims at simplifying and streamlining the approval of clinical trials in the European Union. For instance, the new Clinical Trials Regulation provides for a streamlined application procedure via a single-entry point and shorter deadlines for the assessment of clinical trial applications. The scientific assessment of a clinical trial to be conducted in more than one Member State would be carried out once for all the concerned Member States while other aspects (e.g., informed consent requirements) are assessed by each Member State for its territory. In addition, sponsors must post clinical trial information (e.g., a summary of trial results) at the EudraCT website.

PRIME designation in the European Union

In March 2016, the EMA launched an initiative to facilitate development of product candidates of major interest from the point of view of public health and in particular from the point of view of therapeutic innovation. The PRiority MEdicines, or PRIME, scheme is intended to encourage drug development in areas of unmet medical need and provides accelerated assessment of products representing substantial innovation reviewed under the centralized procedure. Eligibility for the PRIME scheme depends on the availability of adequate preclinical and clinical data to justify a potential major public health interest prior to the initiation of confirmatory clinical trials at the proof of concept stage. Products from micro, small and medium-sized enterprises may qualify for earlier entry into the PRIME scheme than larger companies and benefit from fee reductions with the EMA. Many benefits accrue to sponsors of product candidates with PRIME designation, including early and proactive regulatory dialogue with the EMA, frequent discussions on clinical trial designs and other development program elements, scientific advice on key decision points for the preparation of the MAA and accelerated MAA assessment once a dossier has been submitted. More specifically, a kick-off meeting initiates these relationships and includes a team of multidisciplinary experts at the EMA to provide guidance on the overall development and regulatory strategies. Importantly, a dedicated EMA contact (rapporteur) from the Committee for Human Medicinal Products, or CHMP, or Committee for Advanced Therapies in the case of an advanced therapy, are appointed early in the PRIME scheme to provide continuous support and help to build knowledge ahead of a MAA.

Marketing authorization

To obtain a marketing authorization for a product under the European Union regulatory system, an applicant must submit an MAA, either under a centralized procedure administered by the EMA or one of the procedures administered by competent authorities in European Union Member States (decentralized procedure, national procedure, or mutual recognition procedure). A marketing authorization may be granted only to an applicant established in the European Union. In order to support the authorization of medicinal products for children, Regulation (EC) No 1901/2006 provides that prior to obtaining a marketing authorization in the European Union, an applicant must demonstrate compliance with all measures included in an EMA-approved Pediatric Investigation Plan, or PIP, covering all subsets of the pediatric population, unless the EMA has granted a product-specific waiver, class waiver or a deferral for one or more of the measures included in the PIP. The requirement for a PIP also applies to applications for new indications, pharmaceutical forms or routes of administration for medicinal products that are already authorized.

The centralized procedure provides for the grant of a single marketing authorization by the European Commission that is valid for all European Union Member States. Pursuant to Regulation (EC) No. 726/2004, the

centralized procedure is compulsory for specific products, including for medicines produced by certain biotechnological processes, products designated as orphan medicinal products, advanced therapy products and products with a new active substance indicated for the treatment of certain diseases, including products for the treatment of cancer. For products with a new active substance indicated for the treatment of other diseases and products that are highly innovative or for which a centralized process is in the interest of patients, the centralized procedure is optional. Manufacturers must demonstrate the quality, safety and efficacy of their products to the EMA, which provides an opinion regarding the MAA through the CHMP responsible for conducting an initial assessment of the product.

The maximum timeframe for the evaluation of an MAA by the CHMP is 210 days, excluding clock stops when additional information or written or oral explanation is to be provided by the applicant in response to questions of the CHMP. Accelerated evaluation may be granted by the CHMP in exceptional cases, when a medicinal product is of major interest from the point of view of public health and, in particular, from the viewpoint of therapeutic innovation. If the CHMP accepts such a request, the time limit of 210 days will be reduced to 150 days, but it is possible that the CHMP may revert to the standard time limit for the centralized procedure if it determines that it is no longer appropriate to conduct an accelerated assessment. The final decision on the MAA is issued by the European Commission, in light of the opinion delivered by the EMA, and after the Member States have had an opportunity to comment on it.

With respect to medicinal products for which a centralized authorization is not mandatory, the applicant may choose between: (i) the national procedure provided for by a specific Member State, for the marketing of the product in its territory, (ii) the decentralized procedure, for drug candidates that are not marketed in any of the Member States but the applicant wishes to market them on more than one EU national territories or (iii) the mutual recognition procedure, which applies to products already authorized in a Member State and whose marketing in other Member States' territories is sought.

Regulatory data protection in the European Union

In the European Union, new chemical entities approved on the basis of a complete independent data package qualify for eight years of data exclusivity upon marketing authorization and an additional two years of market exclusivity pursuant to Regulation (EC) No 726/2004, as amended, and Directive 2001/83/EC, as amended. These exclusivity periods apply only once from the first authorization granted to an applicant for a given active substance and they cannot be renewed when the same marketing authorization holder is granted new authorizations for new indications, strengths, pharmaceutical forms, administration routes or presentations of the same active substance. Data exclusivity prevents regulatory authorities in the European Union from referencing the innovator's data to assess another product (either generic, hybrid or biosimilar) application for a period of eight years. During the additional two-year period of market exclusivity, a generic, hybrid or biosimilar marketing authorization application can be submitted, and the innovator's data may be referenced, but no generic, hybrid or biosimilar medicinal product can be marketed until the expiration of the market exclusivity. The overall 10-year period will be extended to a maximum of 11 years if, during the first eight years of those 10 years, the marketing authorization holder obtains an authorization for one or more new therapeutic indications which, during the scientific evaluation prior to authorization, is held to bring a significant clinical benefit in comparison with existing therapies. Even if a compound is considered to be a new chemical entity so that the innovator gains the prescribed period of data exclusivity, another company may market another version of the product if such company obtained marketing authorization based on an MAA with a complete independent data package of pharmaceutical tests, preclinical tests and clinical trials.

Patent term extensions in the European Union and other jurisdictions

The European Union also provides for patent term extension through Supplementary Protection Certificates, or SPCs. The rules and requirements for obtaining a SPC are similar to those in the United States. An SPC may extend the term of a patent for up to five years after its originally scheduled expiration date. In certain circumstances, these periods may be extended for six additional months if pediatric exclusivity is obtained. Although SPCs are available throughout the European Union, sponsors must apply on a country-by-country basis. Similar patent term extension rights exist in certain other foreign jurisdictions outside the European Union.

Periods of authorization and renewals

A marketing authorization is valid for five years, in principle, and it may be renewed after five years on the basis of a reevaluation of the risk-benefit balance by the EMA or by the competent authority of the authorizing member state, depending on the procedure through which the marketing authorization has been granted. To that end, the marketing authorization holder must provide the EMA or the competent authority with a consolidated version of the file in respect of quality, safety and efficacy, including all variations introduced since the marketing authorization was granted, at least nine months before the marketing authorization ceases to be valid. Once renewed, the marketing authorization is valid for an unlimited period, unless the European Commission or the competent authority decides, on justified grounds relating to pharmacovigilance, to proceed with one additional five-year renewal period. Any authorization that is not followed by the placement of the drug on the European Union market (in the case of the centralized procedure) or on the market of the authorizing member state within three years after authorization is granted ceases to be valid.

Regulatory requirements after marketing authorization

Following approval, the holder of the marketing authorization is required to comply with a range of requirements applicable to the manufacturing, marketing, promotion and sale of the medicinal product. These include compliance with the European Union's stringent pharmacovigilance or safety reporting rules, pursuant to which post-authorization studies and additional monitoring obligations can be imposed. In addition, the manufacturing of authorized products, for which a separate manufacturer's license is mandatory, must also be conducted in strict compliance with the EMA's GMP requirements and comparable requirements of other regulatory bodies in the European Union, which mandate the methods, facilities and controls used in the manufacturing, processing and packing of drugs to assure their safety and identity. Finally, the marketing and promotion of authorized products, including industry-sponsored continuing medical education and advertising directed toward the prescribers of drugs and/or the general public, are strictly regulated in the European Union under Directive 2001/83EC, as amended.

Orphan drug designation and exclusivity

Regulation (EC) No 141/2000 and Regulation (EC) No. 847/2000 provide that a product can be designated as an orphan drug by the European Commission if its sponsor can establish: that the product is intended for the diagnosis, prevention or treatment of (i) a life-threatening or chronically debilitating condition affecting not more than five in ten thousand persons in the European Union when the application is made, or (ii) a life-threatening, seriously debilitating or serious and chronic condition in the European Union and that without incentives it is unlikely that the marketing of the drug in the European Union would generate sufficient return to justify the necessary investment. For either of these conditions, the applicant must demonstrate that there exists no satisfactory method of diagnosis, prevention or treatment of the condition in question that has been authorized in the European Union or, if such method exists, the drug for which the orphan designation is requested will be of significant benefit to those affected by that condition.

An orphan drug designation provides a number of benefits, including fee reductions, regulatory and scientific assistance and the possibility to apply for a centralized European Union marketing authorization. In particular, an orphan drug designation leads to a 10-year period of market exclusivity from the granting of the concerned medicinal product marketing authorization for the particular indication. During this market exclusivity period, neither the EMA nor the member states can accept an application or grant a marketing authorization for a “similar medicinal product.” A “similar medicinal product” is defined as a medicinal product containing a similar or identical active substance, or substances as contained in an authorized orphan medicinal product, and which is intended for the same therapeutic indication. The market exclusivity period for the authorized therapeutic indication may, however, be reduced to six years if, at the end of the fifth year, it is established that the product no longer meets the criteria for orphan drug designation because, for example, the product is sufficiently profitable so as to not to justify market exclusivity.

General Data Protection Regulation

The collection, use, disclosure, transfer or other processing of personal data regarding individuals in the European Union, including personal health data, is subject to the Regulation (EU) No. 2016/679, the GDPR, which became effective on May 25, 2018. The GDPR is wide-ranging in scope and imposes numerous requirements on companies that process personal data, including requirements relating to processing health and other sensitive data, obtaining consent of the individuals to whom the personal data relates, providing information to individuals regarding data processing activities, implementing safeguards to protect the security and confidentiality of personal data, providing notification of data breaches and taking certain measures when engaging third-party processors. The GDPR also imposes strict rules on the transfer of personal data to countries outside the European Union, including the United States, and permits data protection authorities to impose large penalties for violations of the GDPR, including potential fines of up to €20 million or 4% of annual global turnover of the preceding financial year, whichever is greater. The GDPR also confers a private right of action on data subjects and consumer associations to lodge complaints with supervisory authorities, seek judicial remedies and obtain compensation for damages resulting from violations of the GDPR. Compliance with the GDPR will be a rigorous and time-intensive process that may increase the cost of doing business or require companies to change their business practices to ensure full compliance.

Brexit and the regulatory framework in the United Kingdom

On June 23, 2016, the electorate in the United Kingdom voted in favor of leaving the European Union, commonly referred to as Brexit. Following protracted negotiations, the United Kingdom left the European Union on January 31, 2020. Under the withdrawal agreement, there is a transitional period until December 31, 2020, which is extendable up to two years. Discussions between the United Kingdom and the European Union have so far mainly focused on finalizing withdrawal issues and transition agreements but have been extremely difficult to date. To date, only an outline of a trade agreement has been reached. Much remains open but the Prime Minister has indicated that the United Kingdom will not seek to extend the transitional period beyond the end of 2020. If no trade agreement has been reached before the end of the transitional period, there may be significant market and economic disruption. The Prime Minister has also indicated that the United Kingdom will not accept high regulatory alignment with the European Union.

Since the regulatory framework for pharmaceutical products in the United Kingdom covering quality, safety and efficacy of pharmaceutical products, clinical trials, marketing authorization, commercial sales and distribution of pharmaceutical products is derived from European Union directives and regulations, Brexit could materially impact the future regulatory regime that applies to products and the approval of product candidates in the United Kingdom although the United Kingdom has committed for recognition of EU laws. Any delay in obtaining, or an inability to obtain, any marketing approvals, as a result of Brexit or otherwise, may force us to restrict or

delay efforts to seek regulatory approval in the United Kingdom for any product candidates we may develop, which could significantly and materially harm our business.

Furthermore, while the Data Protection Act of 2018 in the United Kingdom that “implements” and complements the GDPR achieved Royal Assent on May 23, 2018 and is now effective in the United Kingdom, it is still unclear whether transfer of data from the European Economic Area, or EEA, to the United Kingdom will remain lawful under GDPR. During the period of “transition” (i.e., until December 31, 2020), European Union law will continue to apply in the United Kingdom, including the GDPR, after which the GDPR will be converted into United Kingdom law. Beginning in 2021, the United Kingdom will be a “third country” under the GDPR. We may, however, incur liabilities, expenses, costs and other operational losses under GDPR and applicable European Union Member States and the United Kingdom privacy laws in connection with any measures we take to comply with them.

Coverage and reimbursement

Sales of our product candidates, if approved, will depend, in part, on the extent to which such products will be covered by third-party payors, such as government healthcare programs, commercial insurance and managed healthcare organizations. These third-party payors are increasingly limiting coverage or reducing reimbursements for medical products and services. In the United States, no uniform policy of coverage and reimbursement for products exists among third-party payors. Therefore, coverage and reimbursement for products can differ significantly from payor to payor. In addition, the U.S. government, state legislatures and foreign governments have continued implementing cost-containment programs, including price controls, restrictions on reimbursement and requirements for substitution of generic products. Adoption of price controls and cost-containment measures, and adoption of more restrictive policies in jurisdictions with existing controls and measures, could further limit our net revenue and results. Decreases in third-party reimbursement for our product candidates or a decision by a third-party payor to not cover our product candidates could reduce physician usage of our product candidates, once approved, and have a material adverse effect on our sales, results of operations and financial condition.

Federal and state data privacy and security laws

Under HIPAA, the U.S. Department of Health and Human Services, or HHS, has issued regulations to protect the privacy and security of protected health information used or disclosed by covered entities including certain healthcare providers, health plans and healthcare clearinghouses. HIPAA also regulates standardization of data content, codes and formats used in healthcare transactions and standardization of identifiers for health plans and providers. HIPAA, as amended by HITECH, and their regulations, including the final omnibus rule published on January 25, 2013, also imposes certain obligations on the business associates of covered entities that obtain protected health information in providing services to or on behalf of covered entities. In addition to federal privacy regulations, there are a number of state laws governing confidentiality and security of health information that are applicable to our business. In addition to possible federal administrative, civil and criminal penalties for HIPAA violations, state attorneys general are authorized to file civil actions for damages or injunctions in federal courts to enforce HIPAA and seek attorney’s fees and costs associated with pursuing federal civil actions. Accordingly, state attorneys general have brought civil actions seeking injunctions and damages resulting from alleged violations of HIPAA’s privacy and security rules. New laws and regulations governing privacy and security may be adopted in the future as well.

Additionally, California recently enacted legislation that has been dubbed the first “GDPR-like” law in the United States. Known as the California Consumer Privacy Act, or CCPA, it creates new individual privacy rights for consumers (as that word is broadly defined in the law) and places increased privacy and security obligations on entities handling personal data of consumers or households. The CCPA went into effect on January 1, 2020 and

requires covered companies to provide new disclosures to California consumers, provide such consumers new ways to opt-out of certain sales of personal information, and allow for a new cause of action for data breaches. The CCPA could impact our business activities depending on how it is interpreted and exemplifies the vulnerability of our business to not only cyber threats but also the evolving regulatory environment related to personal data and protected health information.

Because of the breadth of these laws and the narrowness of the statutory exceptions and regulatory safe harbors available under such laws, it is possible that some of our current or future business activities, including certain clinical research, sales and marketing practices and the provision of certain items and services to our customers, could be subject to challenge under one or more of such privacy and data security laws. The heightening compliance environment and the need to build and maintain robust and secure systems to comply with different privacy compliance and reporting requirements in multiple jurisdictions could increase the possibility that a healthcare company may fail to comply fully with one or more of these requirements. If our operations are found to be in violation of any of the privacy or data security laws or regulations described above that are applicable to us, or any other laws that apply to us, we may be subject to penalties, including potentially significant criminal, civil and administrative penalties, damages, fines, imprisonment, contractual damages, reputational harm, diminished profits and future earnings, additional reporting requirements and oversight if we become subject to a consent decree or similar agreement to resolve allegations of non-compliance with these laws, and the curtailment or restructuring of our operations, any of which could adversely affect our ability to operate our business and our results of operations. To the extent that any product candidates we may develop, once approved, are sold in a foreign country, we may be subject to similar foreign laws.

Healthcare reform

In the United States and certain foreign jurisdictions, there have been, and we expect there will continue to be, a number of legislative and regulatory changes to the healthcare system. In March 2010, the ACA was signed into law, which substantially changed the way healthcare is financed by both governmental and private insurers in the United States. By way of example, the ACA increased the minimum level of Medicaid rebates payable by manufacturers of brand name drugs from 15.1% to 23.1%; required collection of rebates for drugs paid by Medicaid managed care organizations; imposed a non-deductible annual fee on pharmaceutical manufacturers or importers who sell certain “branded prescription drugs” to specified federal government programs; implemented a new methodology by which rebates owed by manufacturers under the Medicaid Drug Rebate Program are calculated for drugs that are inhaled, infused, instilled, implanted or injected; expanded eligibility criteria for Medicaid programs; created a new Patient-Centered Outcomes Research Institute to oversee, identify priorities in, and conduct comparative clinical effectiveness research, along with funding for such research; and established the CMS to test innovative payment and service delivery models to lower Medicare and Medicaid spending, potentially including prescription drug spending.

Since its enactment, there have been judicial and Congressional challenges to certain aspects of the ACA, and we expect there will be additional challenges and amendments to the ACA in the future. Since January 2017, President Trump has signed several Executive Orders and other directives designed to delay the implementation of certain provisions of the ACA or otherwise circumvent some of the requirements for health insurance mandated by the ACA. Concurrently, Congress has considered legislation that would repeal or repeal and replace all or part of the ACA. While Congress has not passed comprehensive repeal legislation, two bills affecting the implementation of certain taxes under the ACA have passed. For example, in 2017, Congress enacted the TCJA, which eliminated the tax-based shared responsibility payment imposed by the ACA on certain individuals who fail to maintain qualifying health coverage for all or part of a year that is commonly referred to as the “individual mandate.” In addition, the 2020 federal spending package permanently eliminates, effective

[Table of Contents](#)

January 1, 2020, the ACA-mandated “Cadillac” tax on high-cost employer-sponsored health coverage and medical device tax and, effective January 1, 2021, also eliminates the health insurer tax. On December 14, 2018, a Texas U.S. District Court Judge ruled that the individual mandate is a critical and inseparable feature of the ACA, and therefore, because it was repealed as part of the TCJA, the remaining provisions of the ACA are invalid as well. On December 18, 2019, the U.S. Court of Appeals for the Fifth Circuit ruled that the individual mandate was unconstitutional and remanded the case back to the District Court to determine whether the remaining provisions of the ACA are invalid as well. On March 2, 2020, the U.S. Supreme Court granted the petitions for writs of certiorari to review the case, and oral arguments were held on November 10, 2020, although it is unclear when a decision will be made or how the Supreme Court will rule. In addition, there may be other efforts to challenge, repeal or replace the ACA. We are continuing to monitor any changes to the ACA that, in turn, may potentially impact our business in the future.

Other legislative changes have been proposed and adopted since the ACA was enacted, including aggregate reductions of Medicare payments to providers of 2% per fiscal year and reduced payments to several types of Medicare providers, which will remain in effect through 2030 absent additional congressional action. In addition, the CARES Act suspended the 2% Medicare sequester from May 1, 2020 to December 31, 2020. Moreover, there has recently been heightened governmental scrutiny over the manner in which manufacturers set prices for their marketed products, which has resulted in several Congressional inquiries and proposed and enacted legislation designed, among other things, to bring more transparency to product pricing, review the relationship between pricing and manufacturer patient programs and reform government program reimbursement methodologies for pharmaceutical products. For example, at the federal level, the Trump administration released a “Blueprint” to lower drug prices and reduce out of pocket costs of drugs that contains additional proposals to increase manufacturer competition, increase the negotiating power of certain federal healthcare programs, incentivize manufacturers to lower the list price of their products and reduce the other out of pocket costs of drug products paid by consumers. On March 10, 2020, the Trump administration sent “principles” for drug pricing to Congress, calling for legislation that would, among other things, cap Medicare Part D beneficiary out-of-pocket pharmacy expenses, provide an option to cap Medicare Part D beneficiary monthly out-of-pocket expenses and place limits on pharmaceutical price increases. Additionally, the Trump administration’s budget proposal for the fiscal year 2020 contains further drug price control measures that could be enacted during the budget process or in future legislation, including, for example, measures to permit Medicare Part D plans to negotiate the price of certain drugs under Medicare Part B, to allow some states to negotiate prices under Medicaid, and to eliminate cost sharing for generic drugs for low-income patients. Although a number of these and other measures may require additional authorization to become effective, Congress and the Trump administration have each indicated that it will continue to seek new legislative and/or administrative measures to control drug costs. In addition, individual states in the United States have also become increasingly active in implementing regulations designed to control pharmaceutical product pricing, including price or patient reimbursement constraints, discounts, restrictions on certain product access and marketing cost disclosure and transparency measures and, in some cases, mechanisms to encourage importation from other countries and bulk purchasing. Furthermore, there has been increased interest by third-party payors and governmental authorities in reference pricing systems and publication of discounts and list prices.

Employees

As of November 1, 2020, we employed 35 employees. Of those 35 employees, 32 were full-time, 10 hold Ph.D. degrees, one an M.D. degree, 19 were engaged in research and development activities and 16 were engaged in business development, finance, information systems, facilities, human resources or administrative support. We also engaged 18 independent contractors located in China as of November 1, 2020 pursuant to our relationship with BioDuro, a U.S.-based provider of preclinical development services. None of our employees are subject to a collective bargaining agreement. We consider our relationship with our employees to be good.

Facilities

Our headquarters are located at 11085 Torreyana Road, San Diego, California 92121, where we lease approximately 43,377 square feet of office and laboratory space under a lease that terminates on February 28, 2025. We believe that our existing facilities are adequate to meet our current needs, and that suitable additional alternative spaces will be available in the future on commercially reasonable terms.

Legal proceedings

From time to time, we may be subject to various claims and suits arising in the ordinary course of business. We are not currently a party to any legal proceedings the outcome of which we believe, if determined adversely to us, would individually or in the aggregate have a material adverse effect on our business, operating results or financial condition.

Management

Executive officers, significant employees and directors

The following table sets forth certain information regarding our current executive officers, significant employees and directors as of November 1, 2020:

Name	Age	Position(s)
Executive Officers		
Jay M. Short, Ph.D.	62	Chairman and Chief Executive Officer
Scott Smith	58	President and Director
Richard A. Waldron	67	Chief Financial Officer
Carolyn Anderson Short	56	Chief of Intellectual Property and Strategy and Assistant Secretary
Eric Sievers, M.D.	56	Chief Medical Officer
Christian Vasquez	44	Vice President of Finance, Corporate Controller and Secretary
Significant Employees		
William Boyle, Ph.D.	64	Research Fellow
Hwai Wen (Cathy) Chang, Ph.D.	55	Vice President of Research & Development, Asia
Philippe Martin	45	Chief of Clinical Development & Operations
Non-Employee Directors		
Priyanka Belawat, Ph.D.	41	Director
Guy Levy	39	Director
Lawrence Steinman, M.D.	72	Director

Executive officers

Jay M. Short, Ph.D.

Dr. Short cofounded BioAtla in March 2007 and has served as Chairman and Chief Executive Officer since that time. He founded the E.O. Wilson Biodiversity Foundation, a public charity, and served as its President and Chairman from its inception in October 2005 through July 2008. From February 1999 to October 2005, Dr. Short was the President and Chief Executive Officer of Diversa Corporation (now BASF Corporation), a biotechnology company focusing on enzyme and antibody development which he cofounded. In 1998, he was named President of Diversa, and from 1994 to 2005, he served as Chief Technology Officer. From 1994 to 2008, Dr. Short served as a director of Invitrogen (now Life Technologies). From its founding until 1994, Dr. Short served as President of Stratacyte Corporation, an antibody engineering company and subsidiary of Stratagene Cloning Systems, Inc. (now Agilent Technologies, Inc.), a biotechnology company. From 1985 through 1994, he also served in various roles including as Vice President of Research & Development and Operations for Stratagene. In 2006, Dr. Short was shortlisted by the editors of Nature Biotechnology as a personality making the most significant contribution to biotech in the past decade. In 2001 Dr. Short received San Diego's 2001 E&Y Entrepreneur of the Year Award and was the recipient of the two first place awards granted by UCSD, Connect Innovative Product Program, for pioneering cloning of human antibodies in bacteria and transgenic genotoxicity assay systems. He has authored more than 100 peer reviewed publications and is named inventor of over 500 issued patents. Dr. Short received his Ph.D. in Biochemistry from Case Western Reserve University in Cleveland, Ohio and his B.A. with honors in Chemistry from Taylor University in Upland, Indiana. Dr. Short has also attended and received Director Certification from the UCLA Anderson School of Business.

[Table of Contents](#)

Our board of directors believes Dr. Short's perspective and experience as our co-founder and Chief Executive Officer, as well as his depth of operating and senior management experience in our industry, provide him with the qualifications and skills to serve on our board of directors as Chairman.

Dr. Short is married to our Chief of Intellectual Property and Strategy and Assistant Secretary, Ms. Anderson Short.

Scott Smith

Mr. Smith has served as President of BioAtla since September 2018 and has 30 years of biotechnology and biopharmaceutical industry experience. In his 10 years at Celgene, a global biopharmaceutical company, from September 2008 to April 2018, his leadership role expanded from Vice President of Global Marketing for Inflammation & Immunology, to Global Head of that division, to President of the Inflammation & Immunology Franchise to his appointment in 2017 as Celgene's President and Chief Operating Officer. With a particular emphasis and interest in immunology, Mr. Smith drove the growth of Celgene's Inflammation and Immunology division from 13 to more than 1,300 persons worldwide and oversaw the clinical development, global registration and commercial success of the blockbuster drug Otezla®. Mr. Smith served in various positions at Pharmacia, a pharmaceutical company, from August 1987 until it was acquired by Pfizer in 2003. He also served in various positions including General Manager Canada, General Manager US and Vice President and Head of Global Commercial Operations from July 2003 to August 2008 at Biovail, where he was responsible for sales and marketing, creating and executing commercial and business development strategies and contributing to regulatory and clinical development strategies. Mr. Smith also serves on the board of directors of Titan Pharmaceuticals, Triumvira Immunologics and Spring Bank Pharmaceuticals. Mr. Smith received both his BSc degree in Chemistry and Biology and his HBS degree in Pharmacology and Toxicology from the University of Western Ontario and his Masters of International Business Management from the Thunderbird School of Global Management.

Our board of directors believes Mr. Smith's broad experience in the biotechnology and biopharmaceutical industry, as well as his proven management experience in our industry, provide him with the qualifications and skills to serve on our board of directors.

Richard A. Waldron

Mr. Waldron has served as the Senior Vice President and Chief Financial Officer of BioAtla since November 2013. Prior to joining us, from January 2011 until his appointment at BioAtla, Mr. Waldron served as an independent consultant to biotechnology, biopharmaceutical and information technology companies, advising management in the areas of finance, strategic planning, corporate partnering and mergers and acquisitions. Prior to his time as an independent consultant, he served as Chief Financial Officer of the Protein Production Division of Intrexon Corporation, a synthetic biology company, from December 2009 to December 2010. Before Intrexon Corporation, Mr. Waldron served as the Chief Financial Officer of SciClone Pharmaceuticals, Inc., a publicly-traded specialty pharmaceutical company, from March 2001 to April 2008. Prior to SciClone, he served as the Chief Financial Officer of Genelabs, Inc., a publicly-traded biotechnology company, from June 1999 to August 2000, and as the Chief Financial Officer of GeneMedicine, Inc., a publicly-traded biotechnology company, from July 1995 to March 1999. GeneMedicine was acquired by Valentis Inc. in 1999. Prior to GeneMedicine, from May 1990 to July 1995, Mr. Waldron served as a Managing Director of Rauscher Pierce Refsnes, Inc., a brokerage and investment banking firm, which merged with Dain Bosworth Inc. in 1997. Prior to Rauscher, Mr. Waldron served as a senior healthcare investment banker at Cowen & Company, LLC from 1985 to 1990. He graduated with honors from Harvard Business School, and magna cum laude from Princeton University.

Carolyn Anderson Short

Ms. Anderson Short cofounded BioAtla in March 2007 and is Chief of Intellectual Property and Strategy for the company. She also founded Capia IP LLC, a company specializing in business and intellectual property strategy for customers in healthcare and clean energy, in February 2006, serving as President since its founding. From 1994 until 2006, Ms. Anderson Short held several positions with Diversa Corporation (now BASF Corporation), including Vice President of Intellectual Property. From 1988 to 1994, she held various roles in sales, business development, marketing and product management at Stratagene Cloning Systems, Inc. (now Agilent Technologies, Inc.). Prior to that, Ms. Anderson Short was a QA scientist at Pacific Biotech. Ms. Anderson Short holds a degree in Biochemistry & Cell Biology from the University of California, San Diego, and is a registered patent agent with the United States Patent & Trademark Office.

Ms. Anderson Short is married to our Chief Executive Officer, Dr. Short.

Christian Vasquez

Mr. Vasquez has served as Corporate Controller and Secretary of BioAtla since November 2015, and as Vice President of Finance of BioAtla since July 2020. Mr. Vasquez has over 20 years of finance and business experience working with both public and private companies. Prior to joining BioAtla, he spent seven years at Cricket Communications through its acquisition by AT&T, from October 2008 to October 2015, where his leadership role expanded to Associate Director of Accounting. He began his career with KPMG in their San Diego office's audit practice. Mr. Vasquez received his BS degree in Accountancy from San Diego State University and is a Certified Public Accountant in the state of California.

Eric Sievers, M.D.

Dr. Sievers has served as Chief Medical Officer of BioAtla since June 2019 and has over 25 years of clinical and translational biomedical research experience in multiple settings, including the biotechnology industry, hospital- and clinic-based clinical practice and academia. Dr. Sievers' most recent position prior to joining us was Chief Medical Officer at Symvivo Corporation, a biotechnology company, from April 2018 to June 2019 where he continues as an advisor. He was Chief Medical Officer at Trillium Therapeutics, an immuno-oncology company, from March 2015 to January 2018, where he developed clinical trial strategies and oversaw all clinical development employing a decoy receptor to block the CD47 "do not eat" signal overexpressed by cancer cells. He spent nine years at Seattle Genetics, a biotechnology company, from May 2006 to March 2015, where his leadership role expanded from Senior Medical Director to Senior Vice President of Clinical Development. At Seattle Genetics, Dr. Sievers was closely involved with the development and regulatory approval of ADCETRIS (brentuximab vedotin), an ADC, and led the clinical team and worked closely with Takeda (Millennium) as development partner to design, initiate and enroll four randomized Phase 3 registration trials for ADCETRIS, each of which ultimately resulted in new indications approved by the FDA. Prior to his career at Seattle Genetics, Dr. Sievers was Medical Director at ZymoGenetics, a biopharmaceutical company, from 2003 to May 2006 where he designed and supervised clinical trials of recombinant human interleukin 21 and TACI-Fc5 for patients with cancer and evaluated new oncology opportunities. Before ZymoGenetics, Dr. Sievers was with the Fred Hutchinson Cancer Research Center and the University of Washington for 12 years, from June 1992 to June 2003, where he attained the positions of Assistant Member and Assistant Professor of Pediatrics, respectively, from July 1999 to June 2003. During this time, he served as the lead investigator of Phase 1 and pivotal trials that resulted in the approval of an antibody drug conjugate MYLOTARG[®] indicated for patients with acute myeloid leukemia. Dr. Sievers performed his pediatrics training at the University of Washington from June 1988 to July 1991. Dr. Sievers received both his medical degree and his B.A. degree from Brown University.

Significant employees

William Boyle, Ph.D.

Dr. Boyle has served as Research Fellow of BioAtla since September 2020, and prior to that served in various roles at BioAtla from 2013 to 2020, most recently as Chief of Translational Medicine. Dr. Boyle has over 25 years of pharmaceutical and biotechnology industry experience including leadership roles in private start-up and multinational companies. Dr. Boyle was most recently President of VivaMab from December 2010 to August 2012, a historical drug development division of BioAtla involved in the discovery and development of therapeutic antibodies. Prior to that he was President and Chief Science Officer at AnaptysBio, and former Director of Research at Amgen, Inc. where he led the discovery and early preclinical development of Denosumab, a RANKL-targeted therapeutic antibody approved for the treatment of osteoporosis (Prolia) and cancer (Xgeva). Dr. Boyle holds a Doctoral degree in Experimental Pathology from the UCLA School of Medicine and was a Howard Hughes Medical Institute Postdoctoral Fellow of the Life Sciences Research Foundation at the Salk Institute in La Jolla.

Hwai Wen (Cathy) Chang, Ph.D.

Dr. Chang has served as Vice President of Research & Development, Asia since April 2007. Dr. Chang's expertise is in the areas of molecular virology, metagenomics and gene expression. She was formerly a Director at Synthetic Genomics, Inc., where she helped to establish its La Jolla laboratory. Before joining the research management team at Synthetic Genomics, Dr. Chang was a Director at Diversa Corporation where she led the Molecular Diversity group and was responsible for the discovery and recovery of novel enzymes and microorganisms from environmental samples. Prior to working at Diversa, Dr. Chang was an Associate Director at Digital Gene Technologies, Inc., where she managed the TOGA Technology group that produced gene expression data for their corporate partners. Dr. Chang started her biotechnology career at Stratagene as a Staff Scientist, where she engineered the first mammalian cell line that could be infected by bacteriophage lambda for efficient gene delivery. Dr. Chang earned her B.S. in Chemistry at the California Institute of Technology, and her Ph.D. in Molecular and Cellular Biology at Arizona State University. Dr. Chang received her postdoctoral training as a Damon Runyon Fellow at The Scripps Research Institute where she discovered the oncogene p3k with Dr. Peter Vogt.

Philippe Martin

Mr. Martin has served as our Chief of Clinical Development & Operations since January 2020 and previously served as our Vice President of Alliance Management & Project Leadership from November 2018 to December 2019. Mr. Martin has 20 years of biotechnology and pharmaceutical industry experience developing and commercializing innovative therapies in the fields of immunology, oncology and neurology. In his ten years at Celgene from April 2008 to June 2018 his leadership role expanded from Executive Director, Project Leadership where he led the development and commercialization of the blockbuster drug Otezla[®], to Corporate Vice President where he oversaw the development and operations in the inflammation and immunology area. Prior to his tenure at Celgene, Mr. Martin held multiple positions of increasing responsibility at Schering-Plough (acquired by Merck) where he oversaw the anti-TNF alpha collaboration with Johnson & Johnson and led the REMICADE lifecycle strategy and operations, as well as SIMPONI development, regulatory approvals and preparation for launch in multiple indications. Prior to Schering-Plough, Mr. Martin held multiple positions at Aventis/Chirex Inc. Mr. Martin received his MS degree in Organic Chemistry from the PARIS VI University in France and his Masters of Business Management from E.M Lyon business school in Lyon, France.

Non-employee directors

Priyanka Belawat, Ph.D.

Dr. Belawat has served as a member of our board of directors since July 2020. Dr. Belawat has over 13 years of experience in venture and private equity investing in the healthcare space and has served as an Investment Advisor at HBM Partners AG since February 2007. Dr. Belawat actively manages investments in the biopharmaceutical industry, especially drug development in oncology, neurology, sepsis and fibrosis in geographies like the US, Europe and selected emerging markets like China and India. Dr. Belawat holds a Ph.D. in molecular biology and genetics from the University of Zurich and completed her post-doctorate work at the Hong Kong University of Science and Technology. Dr. Belawat is a board member of Neurelis Inc., iTeos and Adrenomed AG and a board observer to Forbius and Sai Lifesciences.

Our board of directors believes Dr. Belawat's expertise and experience in the life sciences industry, her experience as a director of other companies in our industry and her educational background provide her with the qualifications and skills to serve on our board of directors.

Guy Levy

Guy Levy has served as a member of our board of directors since July 2020. Mr. Levy is the founder and has served as Managing Member of Soleus Capital since September 2017. His career spans 18 years in healthcare and life sciences. Prior to founding Soleus, Mr. Levy worked at Paulson & Co. from 2010 to September 2017, where he was most recently a partner and portfolio manager. Prior to that, Mr. Levy worked as an investment analyst at Shumway Capital and Warburg Pincus. Mr. Levy began his career at Morgan Stanley, where he worked in the mergers & acquisitions and healthcare investment banking divisions. Mr. Levy holds a B.A. from Yale University, where he graduated *summa cum laude*.

Our board of directors believes Mr. Levy's expertise and experience in the life sciences industry, as well as his educational background provide him with the qualifications and skills to serve on our board of directors.

Lawrence Steinman, M.D.

Dr. Steinman served as a member of the advisory board of BioAtla, LLC from April 2016 to July 2020, and has served on our board of directors since July 2020. Previously, Dr. Steinman served as a scientific advisor from April 2014 to May 2016. He is a professor of neurology and neurological sciences, pediatrics and genetics at Stanford University, where he has been a professor since 1980. Dr. Steinman's research focuses on the causes of relapses and remissions in multiple sclerosis, or MS, the molecules that serve as a constraint on brain inflammation and the search for vaccines for autoimmune diseases. To date, Dr. Steinman has developed two antigen-specific therapies, using DNA vaccines, for MS and type 1 diabetes. Specifically, research in Dr. Steinman's laboratory led to the development of the drug Tysabri (natalizumab), which is used to treat patients with Crohn's Disease. He has received a host of awards for his research and has been elected to the National Academy of Sciences and the National Academy of Medicine. Dr. Steinman served on the board of directors of Atreca, Inc., a biotechnology company focusing on developing novel therapeutics for applications in cancer treatment from January 2012 to August 2019. Dr. Steinman received his B.A. from Dartmouth College and his M.D. from Harvard University.

Our board of directors believes Dr. Steinman's extensive scientific research and experience as a director of various biotechnology companies, combined with his world-renowned expertise in biological molecules and immunology, provide him with the qualifications and skills to serve on our board of directors.

Board composition

Our business and affairs are overseen by our board of directors, which we expect to consist of seven members: Dr. Short, Mr. Smith, Dr. Belawat, Mr. Levy, Dr. Steinman, and . The primary responsibilities of our board of directors will be to provide oversight, strategic guidance, counseling and direction to our management. Our board of directors will meet on a regular basis and additionally as required.

In accordance with the terms of our amended and restated certificate of incorporation and amended and restated bylaws, which will be effective upon completion of this offering, our board of directors will be divided into three classes, class I, class II and class III, with members of each class serving staggered three-year terms.

Effective upon the completion of this offering, our board of directors will be comprised of the following classes:

- Class I, which will consist of , and , whose terms will expire at our annual meeting of stockholders to be held in 2021;
- Class II, which will consist of , and , whose terms will expire at our annual meeting of stockholders to be held in 2022; and
- Class III, which will consist of , and , whose terms will expire at our annual meeting of stockholders to be held in 2023.

At each annual meeting of stockholders to be held after the initial classification, the successors to directors whose terms then expire will serve until the third annual meeting following their election and until their successors are duly elected and qualified. The authorized size of our board of directors is currently members. The authorized number of directors may be changed only by resolution by a majority of the board of directors. This classification of the board of directors may have the effect of delaying or preventing changes in our control or management. Our directors may be removed for cause by the affirmative vote of the holders of at least 66 2/3% of our voting stock.

Director independence

Upon the completion of this offering, we anticipate that our common stock will be listed on the Nasdaq Global Select Market. Under the rules of Nasdaq, independent directors must comprise a majority of a listed company's board of directors within one year of the completion of this offering. In addition, the rules of Nasdaq require that, subject to specified exceptions, each member of a listed company's audit, compensation and corporate governance and nominating committees be independent. Audit committee members and compensation committee members must also satisfy the independence criteria set forth in Rule 10A-3 and Rule 10C-1, respectively, under the Exchange Act. Under the rules of Nasdaq, a director will only qualify as an "independent director" if, in the opinion of that company's board of directors, that person does not have a relationship that would interfere with the exercise of independent judgment in carrying out the responsibilities of a director. To be considered to be independent for purposes of Rule 10A-3 and under the rules of Nasdaq, a member of an audit committee of a listed company may not, other than in his or her capacity as a member of the audit committee, the board of directors or any other board committee: (i) accept, directly or indirectly, any consulting, advisory or other compensatory fee from the listed company or any of its subsidiaries or (ii) be an affiliated person of the listed company or any of its subsidiaries.

Our board of directors has determined that all of our directors, except Dr. Short and Mr. Smith, are independent directors, as defined by Rule 5605(a)(2) of the Nasdaq Listing Rules.

Voting arrangements

The election of the members of our board of directors is currently governed by the voting agreement that we entered into with certain holders of our common stock and Series D preferred stock and the related provisions of our certificate of incorporation. Pursuant to our voting agreement and certificate of incorporation, our current directors were elected as follows:

- Dr. Belawat and Mr. Levy were elected as the designees of HBM Healthcare Investments (Cayman) Ltd. and Soleus Private Equity Fund I, L.P., respectively;
- Dr. Short was elected and designated as our then-serving and current Chairman or officer of us;
- Mr. Smith was elected and designated as a then-serving and current officer of us; and
- Dr. Steinman, as a person who previously served on the board of managers of BioAtla, LLC, was designated by Dr. Short and approved by the designees of HBM Healthcare Investments (Cayman) Ltd. and Soleus Private Equity Fund I, L.P.

Our voting agreement will terminate and the provisions of our current certificate of incorporation by which our directors were elected will be amended and restated in connection with the completion of this offering. After this offering, the number of directors will be fixed by our board of directors, subject to the terms of our amended and restated certificate of incorporation and amended and restated bylaws that will become effective upon the completion of this offering. Each of our current directors will continue to serve as a director until the election and qualification of his or her successor, or until his or her earlier death, resignation or removal.

Leadership structure and risk oversight

Our board of directors is currently chaired by Jay M. Short, Ph.D., who also serves as our Chief Executive Officer. Our board of directors does not have a policy regarding the separation of the roles of Chief Executive Officer and Chairman of the board of directors, as our board of directors believes it is in our best interest to make that determination based on our position and direction and the membership of the board of directors. Our board of directors has determined that having an employee director serve as Chairman is in the best interest of our stockholders at this time because of the efficiencies achieved in having the role of Chief Executive Officer and Chairman combined, and because the detailed knowledge of our day-to-day operations and business that the Chief Executive Officer possesses greatly enhances the decision-making processes of our board of directors as a whole. We have a governance structure in place, including independent directors, designed to ensure the powers and duties of the dual role are handled responsibly. We do not have a lead independent director.

Our board of directors oversees the management of risks inherent in the operation of our business and the implementation of our business strategies. Our board of directors performs this oversight role by using several different levels of review. In connection with its reviews of our operations and corporate functions, our board of directors addresses the primary risks associated with those operations and corporate functions. In addition, our board of directors reviews the risks associated with our business strategies periodically throughout the year as part of its consideration of undertaking any such business strategies.

Upon the completion of this offering, each of our board committees will also oversee the management of our risks that fall within the committee's areas of responsibility. In performing this function, each committee will have full access to management, as well as the ability to engage advisors. Our Chief Executive Officer will report to the audit committee and will be responsible for identifying, evaluating and implementing risk management controls and methodologies to address any identified risks. In connection with its risk management role, our audit committee will meet privately with representatives from our independent registered public accounting firm and our Chief Executive Officer. The audit committee will oversee the operation of our risk management

program, including the identification of the primary risks associated with our business and periodic updates to such risks, and will report to our board of directors regarding these activities.

Board committees

Prior to the completion of this offering, our board of directors will have an audit committee, a compensation committee and a corporate governance and nominating committee, each of which will have the composition and the responsibilities described below.

Audit committee

Upon the effectiveness of the registration statement of which this prospectus forms a part, the members of our audit committee will consist of _____, _____ and _____. Our board of directors has determined that each of _____, _____ and _____ satisfies the Nasdaq Stock Market and SEC independence requirements. Each member of our audit committee will be able to read and understand fundamental financial statements in accordance with Nasdaq audit committee requirements.

_____ will serve as the chair of our audit committee. Our board of directors has determined that _____ qualifies as an audit committee financial expert within the meaning of SEC regulations and meets the financial sophistication requirements of the Nasdaq Listing Rules. In making this determination, our board has considered _____ formal education and previous and current experience in financial roles. Both our independent registered public accounting firm and management periodically will meet privately with our audit committee.

The functions of this committee will include, among other things:

- evaluating the performance, independence and qualifications of our independent auditors and determining whether to retain our existing independent auditors or engage new independent auditors;
- reviewing and approving the engagement of our independent auditors to perform audit services and any permissible non-audit services;
- monitoring the rotation of partners of our independent auditors on our engagement team as required by law;
- prior to engagement of any independent auditor, and at least annually thereafter, reviewing relationships that may reasonably be thought to bear on their independence, and assessing and otherwise taking the appropriate action to oversee the independence of our independent auditor;
- reviewing our annual and quarterly financial statements and reports, including the disclosures contained under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations," and discussing the statements and reports with our independent auditors and management;
- reviewing with our independent auditors and management significant issues that arise regarding accounting principles and financial statement presentation and matters concerning the scope, adequacy and effectiveness of our financial controls;
- reviewing with management and our auditors any earnings announcements and other public announcements regarding material developments;
- establishing procedures for the receipt, retention and treatment of complaints received by us regarding financial controls, accounting or auditing matters and other matters;
- preparing the audit committee report that the SEC requires in our annual proxy statement;

[Table of Contents](#)

- reviewing and providing oversight of any related-person transactions in accordance with our related-person transaction policy and reviewing and monitoring compliance with legal and regulatory responsibilities, including our code of business conduct and ethics;
- reviewing our major financial risk exposures, including the guidelines and policies to govern the process by which risk assessment and risk management is implemented;
- reviewing on a periodic basis our investment policy; and
- reviewing and evaluating on an annual basis the performance of the audit committee, including compliance of the audit committee with its charter.

We believe that the composition and functioning of our audit committee will comply with all applicable requirements of the Sarbanes-Oxley Act, and all applicable SEC and Nasdaq rules and regulations.

Compensation committee

Upon the effectiveness of the registration statement of which this prospectus forms a part, the members of our compensation committee will consist of _____, _____ and _____ will serve as the chair of our compensation committee. Our board of directors has determined that each of the members of our compensation committee will be a non-employee director, as defined in Rule 16b-3 promulgated under the Exchange Act, and satisfies the Nasdaq Stock Market independence requirements. The functions of this committee will include, among other things:

- reviewing, modifying and approving (or if it deems appropriate, making recommendations to the full board of directors regarding) our overall compensation strategy and policies;
- making recommendations to the full board of directors regarding the compensation and other terms of employment of our executive officers;
- reviewing and making recommendations to the full board of directors regarding performance goals and objectives relevant to the compensation of our executive officers and assessing their performance against these goals and objectives;
- reviewing and approving (or if it deems it appropriate, making recommendations to the full board of directors regarding) the equity incentive plans, compensation plans and similar programs advisable for us, as well as modifying, amending or terminating existing plans and programs;
- evaluating risks associated with our compensation policies and practices and assessing whether risks arising from our compensation policies and practices for our employees are reasonably likely to have a material adverse effect on us;
- reviewing and making recommendations to the full board of directors regarding the type and amount of compensation to be paid or awarded to our non-employee board members;
- establishing policies with respect to votes by our stockholders to approve executive compensation to the extent required by Section 14A of the Exchange Act and, if applicable, determining our recommendations regarding the frequency of advisory votes on executive compensation;
- reviewing and assessing the independence of compensation consultants, legal counsel and other advisors as required by Section 10C of the Exchange Act;
- administering our equity incentive plans;
- establishing policies with respect to equity compensation arrangements;

[Table of Contents](#)

- reviewing the competitiveness of our executive compensation programs and evaluating the effectiveness of our compensation policy and strategy in achieving expected benefits to us;
- reviewing and making recommendations to the full board of directors regarding the terms of any employment agreements, severance arrangements, change in control protections and any other compensatory arrangements for our executive officers;
- reviewing the adequacy of its charter on a periodic basis;
- reviewing with management and approving our disclosures under the caption “Compensation Discussion and Analysis” in our periodic reports or proxy statements to be filed with the SEC, to the extent such caption is included in any such report or proxy statement;
- preparing the report that the SEC requires in our annual proxy statement; and
- reviewing and assessing on an annual basis the performance of the compensation committee.

We believe that the composition and functioning of our compensation committee will comply with all applicable requirements of the Sarbanes-Oxley Act, and all applicable SEC and Nasdaq rules and regulations.

Nominating and corporate governance committee

Upon the effectiveness of the registration statement of which this prospectus forms a part, the members of our nominating and corporate governance committee will consist of _____, _____ and _____. Our board of directors has determined that each of the members of this committee will satisfy the Nasdaq Stock Market independence requirements. _____ will serve as the chair of our nominating and corporate governance committee. The functions of this committee will include, among other things:

- identifying, reviewing and evaluating candidates to serve on our board of directors consistent with criteria approved by our board of directors;
- determining the minimum qualifications for service on our board of directors;
- evaluating director performance on the board and applicable committees of the board and determining whether continued service on our board is appropriate;
- evaluating, nominating and recommending individuals for membership on our board of directors;
- evaluating nominations by stockholders of candidates for election to our board of directors;
- considering and assessing the independence of members of our board of directors;
- developing a set of corporate governance policies and principles, including a code of business conduct and ethics, periodically reviewing and assessing these policies and principles and their application and recommending to our board of directors any changes to such policies and principles;
- considering questions of possible conflicts of interest of directors as such questions arise;
- reviewing the adequacy of its charter on an annual basis; and
- annually evaluating the performance of the nominating and corporate governance committee.

We believe that the composition and functioning of our nominating and corporate governance committee will comply with all applicable requirements of the Sarbanes-Oxley Act, and all applicable SEC and Nasdaq rules and regulations.

Compensation committee interlocks and insider participation

None of the individuals serving on our compensation committee will have ever been an executive officer or employee of ours. None of our executive officers currently serves, or has served during the last completed fiscal year, on the compensation committee or board of directors of any other entity that has one or more executive officers serving as a member of our board of directors or compensation committee.

Limitation on liability and indemnification of directors and officers

Our amended and restated certificate of incorporation and amended and restated bylaws, which will be effective upon the completion of this offering, limit our directors' and officers' liability to the fullest extent permitted under Delaware corporate law. Delaware corporate law provides that directors of a corporation will not be personally liable for monetary damages for breach of their fiduciary duties as directors, except for liability:

- for any transaction from which the director derives an improper personal benefit;
- for any act or omission not in good faith or that involves intentional misconduct or a knowing violation of law;
- under Section 174 of the Delaware General Corporation Law (unlawful payment of dividends or redemption of shares); or
- for any breach of a director's duty of loyalty to the corporation or its stockholders.

If the Delaware General Corporation Law is amended to authorize corporate action further eliminating or limiting the personal liability of directors or officers, then the liability of our directors or officers shall be eliminated or limited to the fullest extent permitted by the Delaware General Corporation Law, as so amended.

Delaware law and our amended and restated bylaws provide that we will, in certain situations, indemnify any person made or threatened to be made a party to a proceeding by reason of that person's former or present official capacity with us against judgments, penalties, fines, settlements and reasonable expenses. Any such person is also entitled, subject to certain limitations, to payment or reimbursement of reasonable expenses (including attorneys' fees and disbursements) in advance of the final disposition of the proceeding.

In addition, we have entered, and intend to continue to enter, into separate indemnification agreements with our directors and executive officers. These agreements, among other things, require us to indemnify our directors and executive officers for certain expenses, including attorneys' fees, judgments, fines and settlement amounts incurred by a director or executive officer in any action or proceeding arising out of their services as one of our directors or executive officers or any other company or enterprise to which the person provides services at our request.

We maintain a directors' and officers' insurance policy pursuant to which our directors and officers are insured against liability for actions taken in their capacities as directors and officers. We believe that these provisions in our amended and restated certificate of incorporation and amended and restated bylaws and these indemnification agreements are necessary to attract and retain qualified persons as directors and officers.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers or control persons, in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act and is therefore unenforceable.

Executive and director compensation

Our named executive officers for the year ended December 31, 2019, which consist of our principal executive officer and our two other most highly compensated executive officers, are:

- Jay M. Short, Ph.D., our Chairman and Chief Executive Officer;
- Scott Smith, our President and Director; and
- Carolyn Anderson Short, our Executive Vice President and Chief of Intellectual Property and Strategy.

Summary compensation table

The following table provides information regarding the compensation of our named executive officers during the year ended December 31, 2019.

Name and principal position	Year	Salary (\$)	Bonus (\$)	Stock awards (\$)	Nonqualified deferred compensation earnings (\$)	All other compensation (\$)	Total (\$)
Jay M. Short, Ph.D. <i>Chairman and Chief Executive Officer</i>	2019	609,840	348,480	—	—	—	958,320
Scott Smith <i>President and Director</i>	2019	508,750	67,876	— ⁽¹⁾	—	—	576,626
Carolyn Anderson Short <i>Executive Vice President and Chief of Intellectual Property and Strategy and Assistant Secretary</i>	2019	510,426 ⁽²⁾	193,206	—	—	—	703,632

(1) In connection with the LLC Division in March 2019, Mr. Smith's previously existing profits interests awards were converted into equivalent awards in each of BioAtla Holdings, LLC, Inversagen, LLC and BioAtla LLC. See "Related party transactions—LLC Division".

(2) Reflects salary received on a 95% schedule during nine months of 2019.

Annual base salary

Prior to the LLC Conversion, the compensation of our named executive officers was generally determined and approved by our managers, based on the recommendation of our advisory board. The 2019 base salaries that were in effect as of December 31, 2019 were as follows:

Name	2019 base salary (\$)
Jay M. Short, Ph.D.	609,840
Scott Smith	508,750
Carolyn Anderson Short	530,232

Bonus opportunity

In addition to base salaries, our named executive officers are eligible to receive discretionary cash bonuses, which, prior to the LLC Conversion, have been approved by our managers after consultation with and upon the

recommendation of the compensation committee of our advisory board. Target bonus percentages for each of our named executive officers are set in each officer's offer letter or by us at the beginning of each fiscal year, but no pre-established performance goals and no minimum bonus amounts have been established for our named executive officers. Instead, bonuses have been paid after the close of the fiscal year solely on a discretionary basis. No bonus amount is guaranteed, and the bonus amounts vary from year to year at the discretion of our managers in consultation with the compensation committee of our advisory board.

Equity-based incentive awards

Our executives generally are awarded an initial new hire grant upon commencement of employment. Additional grants may occur periodically in order to specifically incentivize executives with respect to achieving certain corporate goals or to reward executives for exceptional performance.

Profits interest awards

Our equity-based incentive awards are designed to align the interests of our employees and consultants, including our named executive officers, with our interests. Prior to the LLC Conversion, our managers were responsible for approving grants under the BioAtla, LLC profits interest plan. Upon the LLC Conversion all individuals' grants under the profits interest plan were replaced by equivalent awards in Himalaya Parent LLC and grants in BioAtla LLC are no longer outstanding. See Note 7 to the consolidated financial statements included elsewhere in this prospectus.

Agreements with our named executive officers

We have entered into offer letter agreements or employment agreements with each of our named executive officers, as further described below. Each of our named executive officers' employment is "at-will" and may be terminated at any time.

Dr. Short. In March 2007, we entered into a verbal agreement with Dr. Short, which was later memorialized by an employment letter agreement. Pursuant to the employment letter agreement, beginning April 2, 2007, Dr. Short was entitled to an annual base salary of \$250,000, which was increased to \$609,840 in 2019 and \$634,233 in 2020. In July 2018, we entered into a severance agreement with Dr. Short which provides that, in the event that Dr. Short's employment is terminated following a Change in Control (as defined in the severance agreement) for any reason then, subject to his execution of a release of claims in favor of us, Dr. Short will receive severance payments equal to 24 months of his then-current base salary, a pro-rated bonus payment equal to his target bonus for the year in which the termination occurred, and, if applicable, his time-based vesting equity awards will vest in full. The severance and bonus payments to Dr. Short are paid as a lump sum within 20 days of the effective date of his release or such later date as required under Section 409A of the U.S. Internal Revenue Code of 1986, as amended, or the Code.

Mr. Smith. On August 2, 2018, we entered into an offer letter agreement with Mr. Smith, whereby Mr. Smith agreed to serve as our President. Pursuant to the agreement, Mr. Smith was entitled to an annual base salary of \$500,000 and a target discretionary bonus amount of 50% of his base salary, which was increased to \$508,750 in 2019 and \$529,100 in 2020. Pursuant to the agreement, Mr. Smith also received 1,750,000 time-vesting profits interest awards and 1,750,000 performance-based profits interest awards pursuant to the profits interest plan and 1,750,000 units in BioAtla Holdings, LLC. In connection with the LLC Conversion, all of Mr. Smith's profits interest awards were replaced by equivalent awards in Himalaya Parent LLC. In August 2018, we entered into a severance agreement with Mr. Smith which provides that, in the event that Mr. Smith's employment is terminated without Cause (as defined in the severance agreement) or he resigns for Good Reason (as defined in the severance agreement) within the time period beginning three months before a

[Table of Contents](#)

Change of Control (as defined in the severance agreement) and ending 12 months after a Change of Control, then subject to his execution of a release of claims in favor of us, Mr. Smith will receive severance payments equal to 12 months of his then-current base salary, a pro-rated bonus payment equal to his target bonus for the year in which the termination occurred, and accelerated vesting of all outstanding units, shares or options and continuation of exercise period for all units, shares or options under a separate consulting agreement between us and Mr. Smith. The severance and bonus payments to Mr. Smith are paid as a lump sum within 20 days of the effective date of his release.

Ms. Anderson Short. On November 30, 2015, we entered into an offer letter agreement with Ms. Anderson Short, whereby Ms. Anderson Short agreed to serve as our Chief of Intellectual Property and Strategy. Pursuant to the agreement, Ms. Anderson Short was required to dedicate 75% of her time to the business and entitled to an annual base salary of \$320,000, which was increased to \$530,232 in 2019 and \$551,441 in 2020, and a target discretionary bonus amount of 50% of her base salary. In April 2020, we entered into a severance agreement with Ms. Anderson Short which provides that, in the event that Ms. Short's employment is terminated prior to a Change of Control (as defined in the severance agreement) for any reason other than for Cause (as defined in the severance agreement) then, subject to her execution of a release of claims in favor of us, Ms. Anderson Short will receive severance payments equal to 24 months of her then-current base salary, subject to certain adjustments, a bonus payment equal to her target bonus for the year in which the termination occurred, and, if applicable, her time-based vesting equity awards will vest in full. The severance payment to Ms. Anderson Short is payable in 24 monthly payments beginning on the effective date of her release, and the bonus payment is payable in 12 monthly payments within 20 days of the effective date of her release.

Outstanding equity awards at fiscal year-end

The following table sets forth certain information regarding equity awards granted to our named executive officers that remain outstanding as of December 31, 2019.

Name	Grant date	Stock awards ⁽¹⁾	
		Number of shares or units of stock that have not vested (#)	Market value of shares or units of stock that have not vested (\$) ⁽²⁾
Jay M. Short, Ph.D.	—	—	—
Scott Smith	11/9/18 ⁽³⁾	2,916,667	233,333
Carolyn Anderson Short	—	—	—

(1) The stock awards reflect profits interests granted under BioAtla LLC's Profits Interest Plan.

(2) Market value is based on an estimate of the fair market value of the profits interests on December 31, 2019, as determined by multiplying the number of units underlying each of the profits interests by the estimated fair value per unit as of such date. See "Management's discussion and analysis of financial condition and results of operations".

(3) Units vest as follows (a) 1,750,000 of the units vest over a period of four years, with 25% vesting on the first anniversary of August 23, 2018 ("Vesting Commencement Date") and the remaining 75% vesting in equal monthly installments of each of the first 36 months after such first anniversary and (b) 1,750,000 of the units vest as follows: (i) if Mr. Smith is appointed CEO and President on or before the first anniversary of the Vesting Commencement Date (the date of such appointment, the "Appointment Date"), on the first anniversary of the Vesting Commencement Date, 25% of such units vest, and the remaining 75% of such units vest in equal monthly installments on each of the first 36 months after such first anniversary; (ii) if the Appointment Date occurs after the first anniversary of the Vesting Commencement Date, a number of such units equal to the product of (x) 1/48 and (y) the number of months elapsed between the Vesting Commencement Date and the Appointment Date vest on the Appointment Date, and thereafter the remaining units vest in equal monthly installments on the first day of each month during the period from the Appointment Date until the fourth anniversary of the Vesting Commencement Date and (iii) if the Appointment Date does not occur prior to the fourth anniversary of the Vesting Commencement Date, all such units vest on the fourth anniversary of the Vesting Commencement Date. In connection with the LLC Conversion, all of Mr. Smith's profits interest awards were replaced by equivalent awards in Himalaya Parent LLC.

Perquisites, health, welfare and retirement benefits

All of our current named executive officers are eligible to participate in our employee benefit plans, including our medical, dental, vision, life, disability and accidental death and dismemberment insurance plans, in each case on the same basis as all of our other employees. We pay the premiums for the life, disability, accidental death and dismemberment insurance for all of our employees, including our named executive officers. In addition, we provide a 401(k) plan to our employees, including our named executive officers, as discussed in “—401(k) plan.” We do not provide perquisites or personal benefits to our named executive officers.

401(k) plan

We maintain a defined contribution employee retirement plan, or 401(k) plan, for our employees. Our named executive officers are also eligible to participate in the 401(k) plan on the same basis as our other employees. The 401(k) plan is intended to qualify as a tax-qualified plan under Section 401(k) of the Code. The plan provides that each participant may contribute 100% of his or her eligible compensation or the statutory limit, which was \$19,000 for calendar year 2019. Participants that are 50 years or older can also make “catch-up” contributions, which in calendar year 2019 may be up to an additional \$6,000 above the statutory limit. We may also elect to provide for discretionary profit sharing contributions, but we did not provide any such contributions in 2019. The 401(k) plan currently does not offer the ability to invest in our securities.

Except as described above, none of our named executive officers participate in or have account balances in nonqualified defined contribution plans or other nonqualified deferred compensation plans maintained by us. Our board of directors may elect to provide our officers and other employees with nonqualified defined contribution or other nonqualified deferred compensation benefits in the future if it determines that doing so is in our best interests.

Equity benefit plans

2020 Equity Incentive Plan

Our board of directors adopted the 2020 Plan in October 2020 and our stockholders approved the 2020 Plan in _____, which became effective in _____ and was amended in _____. Under the 2020 Plan, we may grant awards in respect of our common shares to our employees, consultants and non-employee directors and our subsidiaries pursuant to option awards, stock appreciation rights, or SAR, awards, restricted stock awards, restricted stock unit, or RSU, awards, performance stock awards, performance stock unit, or PSU, awards, and other stock-based awards.

Eligibility

Any employee, consultant or non-employee director of BioAtla and its subsidiaries, if any, is eligible to receive awards under the 2020 Plan. As of November 1, 2020, we employed 35 people, had 18 independent contractors and had three non-employee members of the Board of Directors.

Administration

The 2020 Plan is administered by our compensation committee. The compensation committee has full and final authority in its discretion to: (i) select the employees, non-employee members of the Board of Directors and consultants who will receive awards under the 2020 Plan, provided that awards to non-employee members of the Board of Directors will be subject to ratification by the full Board of Directors; (ii) determine the type or types of awards to be granted to each participant; (iii) determine the number of common shares to which an award will relate, the terms and conditions of any award granted under the 2020 Plan (including restrictions as

to vesting, performance goals relating to an award, transferability or forfeiture, exercisability or settlement of an award, waivers or accelerations thereof and waivers of or modifications to performance goals relating to an award) and all other matters to be determined in connection with an award; (iv) determine the exercise price or purchase price (if any) of an award; (v) determine whether, to what extent, and under what circumstances an award may be cancelled, forfeited, or surrendered; (vi) determine whether, and to certify that, performance goals to which an award is subject are satisfied; (vii) determine whether participants will be permitted to defer the settlement of certain awards; (viii) correct any defect or supply any omission or reconcile any inconsistency in the 2020 Plan and award agreements, and to adopt, amend and rescind such rules, regulations, guidelines, forms of agreements and instruments as, in its opinion, may be advisable; (ix) construe and interpret the 2020 Plan and award agreements and (x) make all other determinations as it may deem necessary or advisable for the administration of the 2020 Plan and award agreements. No awards may be repriced without stockholder approval.

The compensation committee may delegate some or all of its authority to any of our executive officers or any other person or persons designated by the compensation committee. However, the compensation committee may not delegate its authority to grant awards to the following persons: (i) employees subject to the requirements of Rule 16b-3 of the Securities Exchange Act of 1934; (ii) employees who have been delegated authority under the preceding sentence or (iii) members of the Board of Directors.

Common shares available under the 2020 plan

The total number of common shares available for awards under the 2020 Plan is . No more than common shares issued under the 2020 Plan may be issued pursuant to the exercise of incentive stock options. Common shares issued by us in connection with the assumption or substitution of outstanding grants, under a stockholder approved plan from an acquired company or subject to a forfeited award shall not reduce the number of common shares available for awards under the 2020 Plan.

Awards—Generally

Awards may be granted on the terms and conditions described below. In addition, the compensation committee may impose on any award or the settlement or exercise thereof, at the date of grant or thereafter, such additional terms and conditions, not inconsistent with the provisions of the 2020 Plan, as the compensation committee shall determine, including without limitation terms requiring forfeiture of awards in the event of the termination of service of the participant. The right of a participant to exercise or receive a grant or settlement of any Award, and the timing thereof, may be subject to such performance goals as may be determined by the compensation committee. Each award, and the terms and conditions applicable thereto, shall be evidenced by an award agreement.

Awards—Performance goals

In the discretion of the compensation committee, the vesting, earning and/or settlement of any award may be conditioned upon the achievement of specified performance goals. Performance goals may be described in terms of company-wide objectives or objectives that are related to the performance of the individual participant or a subsidiary, division, department or function within the company or a subsidiary. Performance goals may be measured on an absolute or relative basis. Relative performance may be measured by a group of peer companies or by a financial market index. Performance goals may include: achievement of specified research and development, publication, clinical and/or regulatory milestones, total shareholder return, earnings before interest, taxes, depreciation and amortization, net income (loss) (either before or after interest,

taxes, depreciation and/or amortization), changes in the market price of the common shares, economic value-added, funds from operations or similar measure, sales or revenue, acquisitions or strategic transactions, operating income (loss), cash flow (including operating cash flow and free cash flow), return on capital, assets, equity or investment, return on sales, gross or net profit levels, productivity, expense, margins, operating efficiency, customer satisfaction, working capital, earnings (loss) per share, sales or market share and number of customers, any of which may be measured either in absolute terms or as compared to any incremental increase or as compared to results of a peer group, and any combination of any of the foregoing criteria.

If the compensation committee determines that a change in the business, operations, corporate structure or capital structure of the Company or a subsidiary, or the manner in which it conducts its business, or other events or circumstances render the performance goals unsuitable, then the compensation committee may modify such performance goals and/or the related minimum, target, maximum and/or other acceptable levels of achievement as the compensation committee deems appropriate and equitable.

Awards—Types of awards

Options. Options give a participant the right to purchase a specified number of common shares from us for a specified time period at a fixed exercise price. Options granted under the 2020 Plan may be either incentive stock options, or ISOs, or non-qualified stock options. The price at which common shares may be purchased upon exercise shall be determined by the compensation committee, but shall not be less than the fair market value of one common share on the date of grant, or, in the case of an ISO granted to a ten-percent stockholder, less than 110% of the fair market value of a common share on the date of grant. The compensation committee may grant options that have a term of up to 10 years, or, in the case of an ISO granted to a ten-percent stockholder, five years. The award agreement shall specify the exercise price, term, vesting requirements, including any performance goals, and any other terms and conditions applicable to the granted option.

Unless otherwise provided in an award agreement or an effective employment, consulting, severance or similar agreement with us or a subsidiary, upon a participant's termination of service for any reason, the unvested portion of each award of options granted generally will be forfeited with no compensation due the participant.

Stock Appreciation Rights. A grant of a SAR entitles a participant to receive, upon exercise of the SAR, the excess of (i) the fair market value of one common share on the date of exercise, over (ii) the grant price of the SAR as determined by the compensation committee. No payment from the participant is required upon the exercise of a SAR. The compensation committee shall determine and specify in each award agreement the number of SARs granted, the grant price of the SAR (which shall not be less than 100% of the fair market value of a common share on the date of grant), the time or times at which a SAR may be exercised in whole or in part, the method by which common shares will be delivered or deemed to be delivered to a participant, the term of the SAR (which shall not be greater than 10 years) and any other terms and conditions of the SAR.

Unless otherwise provided in an award agreement or an effective employment, consulting, severance or similar agreement with us or a subsidiary, upon a participant's termination of service for any reason, the unvested portion of each award of SARs granted generally will be forfeited with no compensation due the participant.

Restricted Stock. An award of restricted stock is a grant of a specified number of common shares, which common shares are subject to forfeiture upon the happening of certain events during a specified restriction period. Each award of restricted stock shall specify the duration of the restriction period, the conditions under which the common shares may be forfeited, and the amount, if any, the participant must pay to receive the common shares. During the restriction period, the participant shall have all of the rights of a stockholder with respect to the restricted stock, including to vote the common shares of restricted stock and to receive dividends. However, dividends may, at the discretion of the compensation committee, be paid currently or subject to the same restrictions as the underlying stock (and the compensation committee may withhold cash

[Table of Contents](#)

dividends paid on restricted stock until the applicable restrictions have lapsed), provided that, dividends paid on unvested restricted stock that is subject to performance goals shall not be paid or released until the applicable performance goals have been achieved. Provided that the restrictions, including any applicable performance goals, on such award have lapsed, and that the restricted stock subject to the award has not previously been forfeited, common shares (or cash, if applicable) shall be released to the participant at the end of the restriction period.

Unless otherwise provided in an award agreement or an effective employment, consulting, severance or similar agreement with us or a subsidiary, upon a participant's termination of service for any reason, the unvested portion of each award of restricted stock granted generally will be forfeited with no compensation due the participant.

Restricted Stock Units. An RSU award is a grant of the right to receive a payment in common shares or cash, or a combination thereof, equal to the fair market value of a common share on the expiration of the applicable restriction period. RSUs are solely a device for determining amounts to be paid to a participant, do not constitute shares and will not be treated as a trust fund of any kind. During the restriction period, the participant will have no rights as a stockholder with respect to any such common shares. Notwithstanding the previous sentence, the compensation committee may provide in an award agreement that amounts equal to dividends declared during the restriction period on the common shares covered by the award will be credited to the participant's account and settled in common shares at the same time as the RSUs to which such dividend equivalents relate. Awards of RSUs will be settled in common shares, unless otherwise provided in an award agreement. Provided that the restrictions, including any applicable performance goals, on such award have lapsed, the participant shall receive common shares covered by the award at the end of the restriction period.

Unless otherwise provided in an award agreement or an effective employment, consulting, severance or similar agreement with us or a subsidiary, upon a participant's termination of service for any reason, the unvested portion of each award of RSUs generally will be forfeited with no compensation due the participant.

Performance Stock. An award of performance stock is a grant of a specified number of common shares to a participant, which common shares are conditional on the achievement of performance goals during a performance period and subject to forfeiture upon the occurrence of certain events during a restriction period. Each award agreement shall specify the duration of the performance period and restriction period (if any), performance goals applicable to the performance stock, the conditions under which the performance stock may be forfeited and the amount (if any) that the participant must pay to receive the performance stock. Provided that the restrictions, including any applicable performance goals, on such award have lapsed, and that the performance stock subject to the award has not previously been forfeited, common shares shall be released to the participant at the end of the performance period as specified in the award agreement. Unless otherwise provided in an award agreement, during the restriction period, the participant will have all the rights of a stockholder with respect to the performance stock, including, without limitation, the right to receive dividends and to vote with respect to the underlying common shares, provided that dividends shall be subject to the same restrictions (and performance goals) as the underlying performance stock and the compensation committee shall withhold any cash dividends paid on performance stock until the performance goals are achieved and restrictions applicable to such performance stock have lapsed.

Unless otherwise provided in an award agreement or an effective employment, consulting, severance or other agreement with us or a subsidiary, upon a participant's termination of service for any reason, the unvested portion of each award of performance stock generally will be forfeited with no compensation due the participant.

Performance Stock Units. A PSU award is a grant of the right to receive a payment in common shares or cash, or a combination thereof, equal to the fair market value of a common share on the expiration of the applicable

restriction period conditioned on the achievement of performance goals. PSUs are solely a device for determining amounts to be paid to a participant, do not constitute shares, and will not be treated as a trust fund of any kind. During such period, the participant will have no rights as a stockholder with respect to any such common shares. Notwithstanding the previous sentence, the compensation committee may provide in an award agreement that amounts equal to dividends declared during the restriction period on the common shares covered by the award will be credited to the participant's account and settled in cash or common shares at the same time or a different time (and subject to the same forfeiture restrictions and performance goals) as the PSUs to which such dividend equivalents relate. Awards of PSUs will be settled in common shares, unless otherwise provided in an award agreement. Provided that the participant is continuously employed from the grant date through the expiration of the restriction period, the vested portion of an award of PSUs shall be settled in common shares or cash, as applicable, within 60 days after the expiration of the restriction period as specified in the applicable award agreement.

Unless otherwise provided in an award agreement or an effective employment, consulting, severance or similar agreement with us or a subsidiary, upon a participant's termination of service for any reason, the unvested portion of each award of PSUs generally will be forfeited with no compensation due the participant.

Other Stock-Based Awards. The compensation committee may grant, subject to applicable law, any other type of award under the 2020 Plan that is payable in, or valued in whole or in part by reference to, common shares, and that is deemed by the compensation committee to be consistent with the purposes of the 2020 Plan, including, without limitation, fully vested common shares and dividend equivalents.

Change in control and other corporate transactions

Unless otherwise provided in an award agreement or an effective employment, consulting, severance or other similar agreement with us or one of our subsidiaries, a change in control shall not, in and of itself, accelerate the vesting, settlement, or exercisability of outstanding awards. Notwithstanding the foregoing and unless otherwise provided in an award agreement or an effective employment, consulting or similar agreement with us or a subsidiary, if (i) the successor corporation (or its direct or indirect parent) does not agree to assume an outstanding award or does not agree to substitute or replace such award with an award involving the ordinary equity securities of such successor corporation (or its direct or indirect parent) on terms and conditions necessary to preserve the rights of the applicable participant with respect to such award, (ii) the securities of the company or the successor corporation (or its direct or indirect parent) will not be publicly traded on a U.S. securities exchange immediately following such change in control or (iii) the change in control is not approved by a majority of the Board of Directors immediately prior to such change in control, then the compensation committee, in its sole discretion, may take one or more of the following actions with respect to all, some or any such awards: (a) accelerate the vesting and, if applicable, exercisability of such awards such that the awards are fully vested and, if applicable, exercisable (effective immediately prior to such change in control); (b) with respect to any awards that do not constitute "non-qualified deferred compensation" within the meaning of Section 409A of the Code, accelerate the settlement of such awards upon such change in control; (c) with respect to awards that constitute "non-qualified deferred compensation" within the meaning of Section 409A of the Code, terminate all such awards and settle all such awards for a cash payment equal to the fair market value of the common shares underlying such awards less the amount the participant is required to pay for such common shares, if any, provided that (I) such change in control satisfies the requirements of Treasury Regulation Section 1.409A-3(i)(5)(v), (vi) or (vii) and (II) all other arrangements that would be aggregated with such awards under Section 409A of the Code are terminated and liquidated within 30 days before or 12 months after such change in control; (d) cancel outstanding options or SARs in exchange for a cash payment in an amount equal to the excess, if any, of the fair market value of the common shares underlying the unexercised portion of the option or SAR as of the date of the change in control over the exercise price or grant price, as the

[Table of Contents](#)

case may be, of such portion, provided that any option or SAR with a per common share exercise price or grant price, as the case may be, that equals or exceeds the fair market value of one common share on the date of the change in control shall be cancelled with no payment due the participant and (e) take such other actions as the compensation committee deems appropriate. With respect to any action described above, any applicable performance goals will be deemed satisfied based on actual performance as of date of the change in control or, if determined by the compensation committee, at target level performance.

Unless provided otherwise in an award agreement, or an effective employment, consulting or other similar agreement, or as otherwise may be determined by the compensation committee prior to a change in control, in the event that awards are assumed in connection with a change in control or substituted with new awards, and a participant's employment or other service with the company and its subsidiaries is terminated without cause or as the result of the participant's death or disability, in any case, within 24 months following a change in control, (i) the unvested portion of such participant's awards shall vest in full (with any applicable performance goals being deemed to have been achieved at target or, if greater, actual levels of performance), (ii) awards of options and SARs shall remain exercisable by the participant or the participant's beneficiary or legal representative, as the case may be, for a period of one-year (but not beyond the stated term of the option or SAR), (iii) all RSUs and PSUs shall be settled within 30 days after such termination and (iv) all other stock-based awards shall be settled within 30 days after such termination.

In the event of a common share dividend, recapitalization, forward share split or reverse share split, reorganization, division, merger, consolidation, amalgamation, spin-off, combination, repurchase or share exchange, extraordinary or unusual cash distribution or other similar corporate transaction or event, the compensation committee shall make equitable adjustments in (i) the number and/or kind of shares which may thereafter be issued in connection with awards, (ii) the number and kind of shares issuable in respect of outstanding awards, (iii) the aggregate number and kind of shares available under the 2020 Plan and (iv) the exercise or grant price relating to any award, or, if deemed appropriate, the compensation committee may also make provision for a cash payment with respect to any outstanding award. In addition, the compensation committee is authorized to make adjustments in the terms and conditions of, and the criteria included in, awards, including any performance goals, in recognition of unusual or nonrecurring events affecting the Company or its subsidiaries or in response to changes in applicable laws, regulations or accounting principles.

Clawback and recoupment

Any award granted under the 2020 Plan (and all shares acquired thereunder) shall be subject to mandatory repayment and clawback pursuant to the terms of our corporate governance guidelines, as in effect from time to time, and as may otherwise be required by any federal or state laws or listing requirements of any applicable securities exchange. Additional recoupment and clawback policies may be provided in an award agreement.

Share ownership

All awards granted under the 2020 Plan (and all shares acquired thereunder) shall be subject to the holding periods set forth in our stock ownership guidelines, as in effect from time to time.

Amendment and termination

The Board of Directors has the power to amend, alter, suspend, discontinue or terminate the 2020 Plan, provided that, except for adjustments upon certain changes to the corporate structure of the Company affecting the shares (as described above), the Board of Directors must obtain stockholder approval for actions which would: (i) increase the number of shares subject to the 2020 Plan; (ii) decrease the price at which awards may

be granted or (iii) require stockholder approval under any applicable federal, state or foreign law or regulation or the rules of any stock exchange or automated quotation system on which the shares may then be listed or quoted. No award of options or SARs may be repriced, replaced or regranted through cancellation without the approval of the Company's stockholders.

The compensation committee may waive any conditions or rights under, or amend, alter, suspend, discontinue or terminate any award without the consent of any affected participant, provided, that no such amendment, alteration, suspension, discontinuation or termination that adversely affects the rights of a participant shall be effective without such participant's consent.

Unless earlier terminated, the 2020 Plan shall terminate with respect to the grant of new awards on _____.

2020 Employee Stock Purchase Plan

Our board of directors adopted the ESPP in _____ and our stockholders approved the ESPP in _____. The ESPP will become effective immediately upon the execution and delivery of the underwriting agreement related to this offering. The purpose of the ESPP is to retain the services of new employees and secure the services of new and existing employees while providing incentives for such individuals to exert maximum efforts toward our success and that of our affiliates.

Share Reserve. Following this offering, the ESPP authorizes the issuance of _____ common shares of our common stock pursuant to purchase rights granted to our employees or to employees of any of our designated affiliates. The number of shares of our common stock reserved for issuance will automatically increase on January 1 of each calendar year, from January 1, 2020 through January 1, 2029 by the least of (i) _____ % of the total number of common shares of our common stock outstanding on December 31 of the preceding calendar year, (ii) _____ common shares or (iii) a number determined by our board of directors that is less than (i) and (ii). The ESPP is intended to qualify as an "employee stock purchase plan" within the meaning of Section 423 of the Code. As of the date hereof, no shares of our common stock have been purchased under the ESPP.

Administration. Our board of directors has delegated its authority to administer the ESPP to our compensation committee. The ESPP is implemented through a series of offerings of purchase rights to eligible employees. Under the ESPP, we may specify offerings with durations of not more than 27 months, and may specify shorter purchase periods within each offering. Each offering will have one or more purchase dates on which shares of our common stock will be purchased for employees participating in the offering. An offering may be terminated under certain circumstances.

Payroll Deductions. Generally, all regular employees, including executive officers, employed by us or by any of our designated affiliates, may participate in the ESPP and may contribute, normally through payroll deductions, up to _____ % of their earnings for the purchase of our common stock under the ESPP. Unless otherwise determined by our board of directors, common stock will be purchased for accounts of employees participating in the ESPP at a price per share equal to the lower of (i) _____ % of the fair market value of a share of our common stock on the first date of an offering or (ii) _____ % of the fair market value of a share of our common stock on the date of purchase.

Limitations. Employees may have to satisfy one or more of the following service requirements before participating in the ESPP, as determined by our board of directors: (i) customarily employed for more than 20 hours per week, (ii) customarily employed for more than five months per calendar year or (iii) continuous employment with us or one of our affiliates for a period of time (not to exceed two years). No employee may purchase common shares under the ESPP at a rate in excess of \$25,000 worth of our common stock based on the fair market value per share of our common stock at the beginning of an offering for each year such a purchase right is outstanding. Finally, no employee will be eligible for the grant of any purchase rights under _____.

[Table of Contents](#)

the ESPP, if immediately after such rights are granted, such employee has voting power over 5% or more of our outstanding capital stock measured by vote or value pursuant to Section 424(d) of the Code.

Changes to Capital Structure. In the event that there occurs a change in our capital structure through such actions as a stock split, merger, consolidation, reorganization, recapitalization, reincorporation, stock dividend, dividend in property other than cash, large nonrecurring cash dividend, liquidating dividend, combination of shares, exchange of shares or change in corporate structure or similar transaction, the board of directors will make appropriate adjustments to (i) the number of shares reserved under the ESPP, (ii) the maximum number of shares by which the share reserve may increase automatically each year and (iii) the number of shares and purchase price of all outstanding purchase rights.

Corporate Transactions. In the event of certain significant corporate transactions, including the consummation of: (i) a sale of all our assets, (ii) the sale or disposition of more than 50% of our outstanding securities, (iii) a merger or consolidation where we do not survive the transaction and (iv) a merger or consolidation where we do survive the transaction but the shares of our common stock outstanding immediately prior to such transaction are converted or exchanged into other property by virtue of the transaction, any then-outstanding rights to purchase our stock under the ESPP may be assumed, continued or substituted for by any surviving or acquiring entity (or its parent company). If the surviving or acquiring entity (or its parent company) elects not to assume, continue or substitute for such purchase rights, then the participants' accumulated payroll contributions will be used to purchase shares of our common stock within 10 business days prior to such corporate transaction, and such purchase rights will terminate immediately.

Plan Amendments, Termination. Our board of directors has the authority to amend or terminate the ESPP, provided that except in certain circumstances any such amendment or termination may not materially impair any outstanding purchase rights without the holder's consent. We will obtain stockholder approval of any amendment to the ESPP as required by applicable law or listing requirements.

Potential payments upon termination or change in control

We do not have a formal plan with respect to severance benefits payable to our named executive officers and other key employees. From time to time, we entered into severance agreement with certain key employees, including our named executive officers, that provide for bonus payments or accelerated vesting of equity awards in the event such key employee's employment was terminated under certain circumstances. For additional information regarding these severance agreements, see "Agreements with our named executive officers" above.

Non-employee director compensation

Dr. Short and Ms. Anderson Short were the only members of our board of managers during 2019. See "—Summary compensation table" for a discussion of their compensation earned during 2019.

Our board of directors adopted a new compensation policy in _____ that will become effective upon the execution and delivery of the underwriting agreement related to this offering and will be applicable to all of our non-employee directors. This compensation policy provides that each such non-employee director will receive the following compensation for service on our board of directors:

- an annual cash retainer of \$ _____ ;
- an additional annual cash retainer of \$ _____ , \$ _____ and \$ _____ for service as a member of each of the audit committee, compensation committee and the nominating and corporate governance committee;

[Table of Contents](#)

- an additional annual cash retainer of \$, \$ and \$ for service as chairman of the audit committee, compensation committee and the nominating and corporate governance committee, respectively;
- an initial option grant to purchase shares of our common stock on the date of each such non-employee director's appointment to our board of directors; and
- an annual option grant to purchase shares of our common stock on the date of each of our annual stockholder meetings.

Certain relationships and related party transactions

The following includes a summary of transactions since January 1, 2017 to which we have been a party, in which the amount involved in the transaction exceeded \$120,000, and in which any of our directors, executive officers or, to our knowledge, beneficial owners of more than 5% of our capital stock or any member of the immediate family of any of the foregoing persons had or will have a direct or indirect material interest, other than equity and other compensation, termination, change of control and other arrangements, which are described under “Executive and director compensation.”

Series D preferred stock financing

In July 2020, we sold an aggregate of 140,626,711 shares of our Series D preferred stock at a purchase price of \$0.51554931 per share for an aggregate amount of \$72,500,003.82.

Purchasers of our Series D preferred stock include venture capital funds that beneficially own more than 5% of our outstanding capital stock and/or are represented on our board of directors. The following table summarizes the number of shares and the total purchase price paid by these entities:

Purchaser ⁽¹⁾	Shares of Series D preferred stock purchased	Aggregate purchase price(\$)
Himalaya Parent LLC ⁽²⁾	32,009,307	—
Pfizer Ventures (US) LLC ⁽³⁾	29,095,180	1,000,000
Soleus Private Equity Fund I, L.P. ⁽⁴⁾	23,276,145	12,000,000
HBM Healthcare Investments (Cayman) Ltd. ⁽⁵⁾	22,306,305	11,500,000
Entities affiliated with Baker Bros. Advisors LP	19,396,788	10,000,001
Entities affiliated with Cormorant Asset Management	19,396,788	10,000,001
Zone II Healthcare Holdings, LLC	19,396,787	10,000,000

(1) For additional information regarding these stockholders and their equity holdings, see “Principal stockholders.”

(2) Himalaya Parent LLC was issued 59,164,808 Series D preferred stock upon the conversion of BioAtla, LLC to BioAtla, Inc., and subsequently distributed 27,155,501 shares of Series D preferred stock to Pfizer Ventures (US) LLC, one of its members. The owners of Himalaya Parent LLC include Dr. Jay Short, Ms. Carolyn Anderson Short, Scott Smith, members of our board of directors, other employees of us and other equity holder of BioAtla, LLC prior to the LLC Conversion. See “LLC conversion” for more information. Dr. Jay Short, our Chairman and Chief Executive Officer, and Carolyn Anderson Short, our Chief of Intellectual Property and Strategy and Assistant Secretary, serve as managers of Himalaya Parent LLC.

(3) Pfizer Ventures (US) LLC purchased 1,939,679 shares of Series D preferred stock but subsequently received a distribution of 27,155,501 shares of Series D preferred stock from Himalaya Parent LLC.

(4) Mr. Guy Levy was designated to serve as a member of our board of directors by Soleus Private Equity Fund I, L.P. Mr. Levy is the Managing Member of Soleus Capital, and, in such capacity, employed by a corporation that is an affiliate of Soleus Private Equity Fund I, L.P.

(5) Dr. Priyanka Belawat was designated to serve as a member of our board of directors by HBM Healthcare Investments (Cayman) Ltd. Dr. Belawat is an Investment Advisor of HBM Partners AG, and, in such capacity, employed by a corporation that is an affiliate of HBM Healthcare Investments (Cayman) Ltd.

In connection with our Series D preferred stock financing, we entered into an Investor Rights Agreement, a Voting Agreement, and a Right of First Refusal and Co-Sale Agreement with certain holders of our Series D preferred stock and certain holders of our common stock.

Our Right of First Refusal and Co-Sale Agreement provides for rights of first refusal and co-sale and drag-along rights in respect of sales by certain holders of our capital stock. Our Voting Agreement also contains provisions with respect to the elections of our board of directors and its composition. Upon the consummation of this offering, the Right of First Refusal and Co-Sale Agreement and the Voting Agreement each will terminate. Additionally, the Investor Rights Agreement provides for certain registration rights which will survive the completion of this offering, as more fully described in “Description of capital stock—registration rights.”

Convertible promissory notes

From December 2015 to March 2020, BioAtla, LLC issued convertible promissory notes to certain investors for gross proceeds of \$21.8 million, including to Dr. Jay Short and Carolyn Anderson Short, Pfizer Ventures (US) LLC and Biotech Investment Group LLC, or BIG. Dr. Jay Short and Carolyn Anderson Short currently serve as our executive officers and Dr. Short currently serves as a member of our board of directors. Pfizer Ventures (US) LLC is a beneficial owner of more than 5% of our capital stock and, at the time of the transaction, BIG was a beneficial owner of more than 5% of our capital stock. In July 2020, upon our LLC Conversion and in connection with the closing of the Series D preferred stock financing, the convertible promissory notes were amended so that they automatically converted into a number of Class D Units of Himalaya Parent LLC equal to the quotient of (x) the outstanding principal balance of the convertible promissory note, together with all accrued and unpaid interest thereon, divided by (y) eighty-percent (80%) of the purchase price per share for each share of Series D preferred stock sold pursuant to the Series D preferred stock financing, except in the case of the convertible promissory note issued to Pfizer Ventures (US) LLC. The convertible promissory note issued to Pfizer Ventures (US) LLC was amended in March 2019 to provide the lender additional accrued interest upon conversion, and converted into a number of Class D Units of Himalaya Parent LLC equal to the quotient of (x) the outstanding principal balance of the convertible promissory note, together with all accrued and unpaid interest thereon, divided by (y) one hundred percent (100%) of the purchase price per share for each share of Series D preferred stock sold pursuant to the Series D preferred stock financing. In connection with the Series D preferred stock financing in July 2020, all principal and accrued interest under the convertible notes was converted into our Series D preferred stock, and we were not required to repay any principal or interest in cash.

Lease agreement with Alliance Diversified Holdings LLC

From August 2014 to February 2018, we were party to a lease agreement with Alliance Diversified Holdings LLC, or ADH. ADH is majority owned and controlled by BIG. We incurred expenses of \$0.6 million and \$0.1 million in 2017 and 2018, respectively, related to rent, including common area maintenance, for a combined 10,440 square feet of lab and office space, and also paid certain pass-through expenses to ADH, such as utilities. The lease agreement with ADH was completed in February 2018, and as of December 31, 2018, we had no outstanding accounts payable and accrued expenses due to ADH.

BioDuro, LLC contract research services agreement

In March 2007, we entered into a master contract research services agreement with BioDuro, LLC, or BioDuro, a preclinical research organization that provides biopharmaceutical clients with drug discovery services. BioDuro was previously a wholly owned subsidiary of Bridgewest Business Group LLC, or Bridgewest. Bridgewest's Chief Executive Officer is Masood Tayebi, Ph.D., who is affiliated with BIG. Dr. Tayebi beneficially owned 50% of Bridgewest. In 2019, Bridgewest sold its ownership interest, such that we no longer consider BioDuro to be a related party as of January 1, 2020.

Under the agreement, BioDuro provides us with preclinical research labor and supplies in China in exchange for a quarterly fee. The fees we pay to BioDuro are based on the number of full-time equivalent contractors assigned under the agreement to perform services to us, and such fees include the cost of labor for the contractors and lab supplies needed to perform lab work on designated projects. The rates paid to BioDuro per full-time equivalent contractor and associated materials costs are fixed for the contract term and are re-negotiated every two years. As of November 1, 2020, we had 18 full-time equivalent independent contractors assigned under the BioDuro agreement. During the two-year period ended December 31, 2019, we incurred expenses of approximately \$4.3 million in connection with services provided by BioDuro under the agreement.

Sinobioway and SWTIC

In March 2015, we entered into a Collaboration and License Agreement with Sinobioway to develop and commercialize CAB antibody products in China, Hong Kong, Macau and Taiwan, or the Sinobioway Territory. The agreement was amended several times between 2015 and 2017. In March 2017, we also entered into an Amended and Restated Master Services Agreement with Sinobioway for certain development and manufacturing services to be performed by Sinobioway.

In 2018, we entered into an agreement to terminate the Amended and Restated Collaboration Agreement and the Amended and Restated Master Services Agreement with Sinobioway, or the Sinobioway Termination Agreement. Under the Sinobioway Termination Agreement, Sinobioway terminated its rights to develop and commercialize CAB antibody products in the Sinobioway Territory, and we are no longer obligated to present new CAB antibodies to Sinobioway for selection, funding and development in the Sinobioway Territory. As consideration for the Termination Agreement, we issued a noncontrolling interest in Himalaya Therapeutics SEZC to Sinobioway in the form of 34,976,744 ordinary shares with a fair value of \$0. See "Himalaya Therapeutics SEZC" below for more information about this entity.

In May 2017, we entered into a Services and Unit Purchase Agreement with Shanghai Weitong Investment Center Limited Partnership, or SWTIC, whereby we issued 2,946,253 Class C Preferred Units of BioAtla, LLC to SWTIC as payment for advisory services to be rendered by SWTIC during the 24-month period following the date of the agreement. In connection with the LLC Conversion, the Class C Preferred Units of BioAtla, LLC issued to SWTIC were converted into Class C Units of Himalaya Parent LLC.

F1 Oncology, Inc.

In September 2017, we provided a \$250,000 non-interest bearing loan to Brevicar KY, a Cayman Islands company jointly owned at the time by us and F1 Oncology, Inc. The loan was fully repaid in November 2017. F1 Oncology was previously a related party of ours. As of December 31, 2019, we and F1 Oncology are no longer related parties since we no longer hold any common or preferred stock of F1 Oncology.

Himalaya Therapeutics SEZC

On January 1, 2020, we entered into an Amended and Restated Exclusive Rights Agreement with Himalaya Therapeutics SEZC, a Cayman Islands exempted company. Under the terms of the agreement, Himalaya Therapeutics SEZC acquired the rights to 10 CAB-antibodies for the territory of China, Macao, Hong Kong and Taiwan, global rights to a CAB-HER2-bispecific-antibody and global co-development rights with us to an IL-22 non-CAB-antibody. Payments to us may include upfront payments, milestone payments and double digit royalties, but no payments have been made to date. Dr. Jay Short and Carolyn Anderson Short serve as directors of Himalaya Therapeutics SEZC, and Carolyn Anderson Short serves as an officer of such entity. Prior to July 10, 2020, Himalaya Therapeutics SEZC was a majority-owned subsidiary of BioAtla, LLC, after which BioAtla, LLC distributed to Himalaya Parent LLC all of its equity interests in Himalaya Therapeutics SEZC. See "LLC conversion" for more information.

Inversagen, LLC

On March 15, 2019, we entered into an Exclusive License Agreement with Inversagen, LLC. Under the terms of the agreement, Inversagen acquired the rights to CAB-antibodies for the field of diseases associated with aging, outside of cancer, and a immuno-oncology antibody. Commencing on the first commercial sale of the CAB-antibodies and immuno-oncology antibody subject to the Exclusive License Agreement, Inversagen, LLC will pay us milestone payments and royalties. On July 7, 2020, we and Inversagen, LLC entered into the First

Amendment to Exclusive License Agreement, which grants us an option for a period of 10 years to acquire the immuno-oncology antibody in return for royalty payments in the low-single digits during the applicable royalty term. No payments have been made to date. Dr. Jay Short and Carolyn Anderson Short serve as managers of Inversagen, LLC.

LLC Division

In March 2019, our predecessor, BioAtla, LLC was divided into three separate and distinct Delaware limited liability companies, which we refer to as the LLC Division. In connection with the LLC Division, our predecessor BioAtla, LLC was renamed to BioAtla Holdings, LLC and new legal entities Inversagen, LLC and BioAtla, LLC were formed. After the LLC Division, each LLC had substantially the same form of operating agreement and capital structure as our predecessor, with certain exceptions. In connection with the LLC Division, our predecessor's holdings of F1 Oncology, Inc. common and preferred stock remained in BioAtla Holdings and certain rights related to the application of CAB technology in senescent cell therapy were transferred to us and simultaneously licensed to Inversagen. The remaining assets and liabilities of our predecessor, including all existing employees, were transferred to us. Each of our predecessor's members at the time of the LLC Division continued as a member in us, BioAtla Holdings and Inversagen and each entity has Mr. Short and Ms. Anderson Short as its LLC managers. See Note 1 to our consolidated financial statements included elsewhere in this prospectus for further discussion of the LLC Division.

BioAtla Holdings, LLC

Effective January 1, 2020, we entered into an Exclusive License Agreement with BioAtla Holdings, LLC. Under the terms of the agreement, BioAtla Holdings, LLC acquired the rights to CAB antibodies for certain targets in the field of Adoptive Cell Therapy (CAR-T format). On July 7, 2020, we and BioAtla Holdings entered into the First Amendment to Exclusive License Agreement, which grants us an option for a period of 10 years to acquire the ACT Preparations and ACT Treatments in return for royalty payments in the low-single digits during the applicable royalty term. No payments have been made to date. Dr. Jay Short and Carolyn Anderson Short serve as managers of BioAtla Holdings, LLC.

LLC conversion

See "LLC conversion" for a description of the LLC Conversion.

Employment agreements

We have entered into employment agreements or consulting agreements with each of our executive officers. See "Executive compensation—Employment agreements with our named executive officers" for a further discussion of these arrangements.

Indemnification agreements

In connection with this offering, we intend to enter into separate indemnification agreements with our directors and executive officers, in addition to the indemnification provided for in our amended and restated bylaws. These agreements, among other things, will require us to indemnify our directors and executive officers for certain expenses, including attorneys' fees, judgments, fines and settlement amounts incurred by a director or executive officer in any action or proceeding arising out of their services as one of our directors or executive officers or as a director or executive officer of any other company or enterprise to which the person provides services at our request. For more information regarding these indemnification arrangements, see

“Management—Limitation on liability and indemnification of directors and officers.” We believe that these bylaw provisions and indemnification agreements are necessary to attract and retain qualified persons as directors and officers.

The limitation of liability and indemnification provisions in our amended and restated certificate of incorporation and amended and restated bylaws that will be in effect upon the completion of this offering may discourage stockholders from bringing a lawsuit against directors for breach of their fiduciary duties. They may also reduce the likelihood of derivative litigation against directors and officers, even though an action, if successful, might benefit us and our stockholders. A stockholder’s investment may decline in value to the extent we pay the costs of settlement and damage awards against directors and officers pursuant to these indemnification provisions.

Policies and procedures for transactions with related persons

We will adopt a written related-person transactions policy that sets forth our policies and procedures regarding the identification, review, consideration and oversight of “related-person transactions” in connection with the completion of this offering. For purposes of our policy only, a “related-person transaction” is a transaction, arrangement or relationship (or any series of similar transactions, arrangements or relationships) in which we and any “related person” are participants involving an amount that exceeds \$120,000.

Transactions involving compensation for services provided to us as an employee, consultant or director are not considered related-person transactions under this policy. A related person is any executive officer, director or a holder of more than 5% of our common stock, including any of their immediate family members and any entity owned or controlled by such persons.

Under the policy, where a transaction has been identified as a related-person transaction, management must present information regarding the proposed related-person transaction to our audit committee (or, where review by our audit committee would be inappropriate, to another independent body of our board of directors) for review. The presentation must include a description of, among other things, the material facts, the direct and indirect interests of the related persons, the benefits of the transaction to us and whether any alternative transactions are available. To identify related-person transactions in advance, we rely on information supplied by our executive officers, directors and certain significant stockholders. In considering related-person transactions, our audit committee or another independent body of our board of directors takes into account the relevant available facts and circumstances including:

- the risks, costs and benefits to us;
- the impact on a director’s independence in the event the related person is a director, immediate family member of a director or an entity with which a director is affiliated;
- the terms of the transaction;
- the availability of other sources for comparable services or products; and
- the terms available to or from, as the case may be, unrelated third parties or to or from our employees generally.

In the event a director has an interest in the proposed transaction, the director must recuse himself or herself from the deliberations and approval.

Principal stockholders

The following table sets forth information regarding beneficial ownership of our common stock as of November 1, 2020:

- each person, or group of affiliated persons, known by us to beneficially own more than 5% of our common stock;
- each of our directors;
- each of our named executive officers; and
- all of our current executive officers and directors as a group.

Information with respect to beneficial ownership has been furnished by each director, officer or beneficial owner of more than 5% of our common stock. We have determined beneficial ownership in accordance with the rules of the SEC. These rules generally attribute beneficial ownership of securities to persons who possess sole or shared voting power or investment power with respect to those securities. Unless otherwise indicated, the persons or entities identified in this table have sole voting and investment power with respect to all shares shown as beneficially owned by them, subject to applicable community property laws.

Applicable percentage ownership immediately prior to the completion of this offering is based on 280,652,170 shares of common stock outstanding immediately prior to the completion of this offering, after giving effect to the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock. Applicable percentage ownership after this offering is based on _____ shares of common stock outstanding that will be outstanding upon the completion of this offering, after giving effect to (i) the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock and (ii) the issuance of _____ shares of our common stock in this offering. In computing the number of shares of common stock beneficially owned by a person and the percentage ownership of such person, we do not take into account the issuance of any shares of common stock upon the exercise of warrants to purchase up to 9,329,799 shares of Common Stock that are outstanding.

Table of Contents

Except as otherwise noted below, the address for each person or entity listed in the table is c/o BioAtla Corporation, 11085 Torreyana Road, San Diego, California 92121.

Dr. Short and Ms. Anderson Short disclaim beneficial ownership of the shares listed, except to the extent of his or her pecuniary interest therein, if any.

Description of capital stock

The following is a summary of the rights of our common and preferred stock and some of the provisions of our amended and restated certificate of incorporation and amended and restated bylaws, which will become effective upon the completion of this offering, and of the Delaware General Corporation Law. This summary is not complete. For more detailed information, please see our amended and restated certificate of incorporation and amended and restated bylaws, which are filed as exhibits to the registration statement of which this prospectus is a part, as well as the relevant provisions of the Delaware General Corporation Law.

General

As of September 30, 2020, there were 280,652,170 shares of our common stock outstanding, held by approximately _____ stockholders of record, and no shares of our preferred stock outstanding, assuming (i) the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock, and (ii) no issuances of shares of non-voting Class B common stock upon the completion of this offering.

Common stock and class B common stock

We are authorized to issue up to a total of _____ shares of common stock, par value \$0.0001 per share and up to a total of _____ shares of Class B common stock, par value \$0.0001 per share. The holders of our common stock and Class B common stock have identical rights, provided that (i) except as otherwise expressly provided in our amended and restated certificate of incorporation or as required by applicable law, on any matter that is submitted to a vote by our stockholders, holders of our common stock are entitled to one vote per share of common stock, and holders of our Class B common stock are not entitled to any votes per share of Class B common stock, including for the election of directors and (ii) holders of our common stock have no conversion rights, while holders of our Class B common stock shall have the right to convert each share of our Class B common stock into one share of common stock at such holder's election, provided that as a result of such conversion, such holder would not beneficially own in excess of 4.99% of any class of our securities registered under the Exchange Act, unless otherwise as expressly provided for in our amended and restated certificate of incorporation. However, this ownership limitation may be increased or decreased to any other percentage designated by such holder of Class B common stock upon 61 days' notice to us.

Our common stock and Class B common stock have no preemptive rights or other subscription rights or redemption or sinking fund provisions. Upon our liquidation, dissolution or winding-up, holders of our common stock and Class B common stock are entitled to share ratably in all assets remaining after payment of all liabilities and the liquidation preferences of any of our outstanding shares of preferred stock. Subject to preferences that may be applicable to any outstanding shares of preferred stock, holders of our common stock and Class B common stock are entitled to receive dividends only if declared from time to time by our board of directors out of assets which are legally available.

As of September 30, 2020, there were 80,860,651 shares of common stock issued and outstanding and there was one holder of record of our common stock. As of September 30, 2020, there were no shares of Class B common stock issued and outstanding. All of the shares of common stock to be issued in this offering will be, fully paid and nonassessable.

Preferred stock

Under our amended and restated certificate of incorporation that will be in effect upon the completion of this offering, our board of directors has the authority, without further action by the stockholders, to issue up to

[Table of Contents](#)

200,000,000 shares of preferred stock in one or more series, to establish from time to time the number of shares to be included in each such series, to fix the rights, preferences and privileges of the shares of each wholly unissued series and any qualifications, limitations or restrictions thereon and to increase or decrease the number of shares of any such series, but not below the number of shares of such series then outstanding.

Our board of directors may authorize the issuance of preferred stock with voting or conversion rights that could adversely affect the voting power or other rights of the holders of the common stock. The issuance of preferred stock, while providing flexibility in connection with possible acquisitions and other corporate purposes, could, among other things, have the effect of delaying, deferring or preventing a change in our control that may otherwise benefit holders of our common stock and may adversely affect the market price of the common stock and the voting and other rights of the holders of common stock.

As of September 30, 2020, there were 199,791,519 shares of Series D preferred stock issued and outstanding and there were approximately 16 holders of record of our Series D preferred stock. All of our outstanding Series D Preferred Stock will automatically convert into common stock upon the completion of this offering.

Warrants

As of September 30, 2020, we had 9,329,799 outstanding warrants.

On February 29, 2016, we issued a warrant to purchase 4,419,379 shares of common stock at an exercise price of \$6.788284 per share, which warrant was subsequently amended and restated. The warrant is exercisable during the period commencing on the first day following the completion of this offering and ending on the 365th day following the completion of this offering, and provides for cashless exercise at the option of the warrant holder.

On March 24, 2016, we issued warrants to purchase an aggregate of 2,946,252 shares of common stock at an exercise price of \$6.788284 per share, which warrants were subsequently amended and restated. The warrants are exercisable during the period commencing on the first day following the completion of this offering and ending on the 365th day following the completion of this offering, and provide for cashless exercise at the option of the warrant holder.

On June 6, 2016, we issued warrants to purchase an aggregate of 1,964,168 shares of common stock at an exercise price of \$10.182426 per share, which warrants were subsequently amended and restated. The warrants are exercisable during the period commencing on the first day following the completion of this offering and ending on the 450th day following the completion of this offering, and provide for cashless exercise at the option of the warrant holder.

Registration rights

Upon the completion of this offering and subject to the lock-up agreements entered into in connection with this offering and federal securities laws, certain holders of shares of our common stock, including those shares of our common stock that will be issued upon the conversion of our Series D preferred stock in connection with this offering, will initially be entitled to certain rights with respect to registration of such shares under the Securities Act. These shares are referred to as registrable securities. The holders of these registrable securities possess registration rights pursuant to the terms of our Investor Rights Agreement and are described in additional detail below. The registration of shares of our common stock pursuant to the exercise of the registration rights described below would enable the holders to trade these shares without restriction under the Securities Act when the applicable registration statement is declared effective. We will pay the registration expenses, other than underwriting discounts, selling commissions and stock transfer taxes, of the shares registered pursuant to the demand, piggyback and Form S-3 registrations described below.

Generally, in an underwritten offering, the managing underwriter, if any, has the right, subject to specified conditions and limitations, to limit the number of shares the holders may include. The demand, piggyback and Form S-3 registration rights described below will terminate upon the earliest of (i) with respect to each stockholder, such date, on or after the completion of this offering, on which all registrable shares held by such stockholder may immediately be sold during any three month period pursuant to Rule 144, (ii) the occurrence of a deemed liquidation event, as defined in our certificate of incorporation, as currently in effect and (iii) the fifth anniversary of the completion of this offering.

Demand registration rights

Upon the completion of this offering, holders of approximately 167,782,212 shares of our common stock issuable upon conversion of outstanding Series D preferred stock will be entitled to certain demand registration rights. Beginning 180 days following the effectiveness of the registration statement of which this prospectus is a part, investors holding, collectively, a majority of registrable securities having an anticipated aggregate offering price of at least \$5.0 million may, on not more than two occasions, request that we register all or a portion of their shares, subject to certain specified exceptions. If any of these holders exercises its demand registration rights, then holders of approximately 140,626,711 shares of our common stock issuable upon the conversion of our Series D preferred stock in connection with this offering will be entitled to register their shares, subject to specified conditions and limitations in the corresponding offering.

Piggyback registration rights

In connection with this offering, holders of approximately 167,782,212 shares of our common stock issuable upon conversion of outstanding Series D preferred stock are entitled to their rights to notice of this offering and to include their shares of registrable securities in this offering. The requisite percentage of these stockholders are expected to waive all such stockholders' rights to notice of this offering and to include their shares of registrable securities in this offering. In the event that we propose to register any of our securities under the Securities Act in another offering, either for our own account or for the account of other security holders, the holders of registrable securities will be entitled to certain "piggyback" registration rights allowing them to include their shares in such registration, subject to specified conditions and limitations.

S-3 registration rights

Upon the completion of this offering, the holders of approximately 167,782,212 shares of our common stock issuable upon conversion of outstanding Series D preferred stock will initially be entitled to certain Form S-3 registration rights. Certain major investors holding at least 10% of registrable securities may, on not more than two registrations on Form S-3 within any 12-month period, request that we register all or a portion of their shares on Form S-3 if we are qualified to file a registration statement on Form S-3, subject to specified exceptions. Such request for registration on Form S-3 must cover securities with an aggregate offering price which equals or exceeds \$3.0 million, net of selling expenses. The right to have such shares registered on Form S-3 is further subject to other specified conditions and limitations.

Anti-takeover effects of provisions of our certificate of incorporation, our bylaws and Delaware law

Certain provisions of Delaware law and certain provisions included in the amended and restated certificate of incorporation and amended and restated bylaws to be in effect upon the completion of this offering, summarized below, may be deemed to have an anti-takeover effect and may delay or discourage transactions involving an actual or potential change in our control or change in our management, including transactions in

which stockholders might otherwise receive a premium for their shares or transactions that our stockholders might otherwise deem to be in their best interests. Therefore, these provisions could adversely affect the price of our common stock.

Delaware anti-takeover law

We are subject to Section 203 of the Delaware General Corporation Law, or Section 203. Section 203 generally prohibits a public Delaware corporation from engaging in a “business combination” with an “interested stockholder” for a period of three years after the date of the transaction in which the person became an interested stockholder, unless:

- prior to the date of the transaction, the board of directors of the corporation approved either the business combination or the transaction which resulted in the stockholder becoming an interested stockholder;
- the interested stockholder owned at least 85% of the voting stock of the corporation outstanding upon consummation of the transaction, excluding for purposes of determining the number of shares outstanding (a) shares owned by persons who are directors and also officers and (b) shares owned by employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or
- on or subsequent to the consummation of the transaction, the business combination is approved by the board and authorized at an annual or special meeting of stockholders, and not by written consent, by the affirmative vote of at least 66 2/3% of the outstanding voting stock which is not owned by the interested stockholder.

Section 203 defines a business combination to include:

- any merger or consolidation involving the corporation and the interested stockholder;
- any sale, transfer, pledge or other disposition involving the interested stockholder of 10% or more of the assets of the corporation;
- subject to exceptions, any transaction involving the corporation that has the effect of increasing the proportionate share of the stock of any class or series of the corporation beneficially owned by the interested stockholder;
- subject to exceptions, any transaction that results in the issuance or transfer by the corporation of any stock of the corporation to the interested stockholder; and
- the receipt by the interested stockholder of the benefit of any loans, advances, guarantees, pledges or other financial benefits provided by or through the corporation.

In general, Section 203 defines an interested stockholder as any entity or person beneficially owning 15% or more of the outstanding voting stock of the corporation and any entity or person affiliated with or controlling or controlled by the entity or person.

Preferred stock

The amended and restated certificate of incorporation that will be in effect upon the completion of this offering will contain provisions that permit our board of directors to issue, without any further vote or action by the stockholders, shares of preferred stock in one or more series and, with respect to each such series, to fix the number of shares constituting the series and the designation of the series, the voting rights (if any) of the shares of the series and the powers, preferences or relative, participation, optional and other special rights, if any, and any qualifications, limitations or restrictions, of the shares of such series.

Classified board

The amended and restated certificate of incorporation that will be in effect upon the completion of this offering will provide that our board of directors is divided into three classes, designated Class I, Class II and Class III. Each class will be an equal number of directors, as nearly as possible, consisting of one third of the total number of directors constituting the entire board of directors.

Removal of directors

The amended and restated certificate of incorporation that will be in effect upon the completion of this offering will provide that stockholders may only remove a director for cause by a vote of at least 66 2/3% of the voting power of all of our then outstanding common stock and that the authorized number of directors may be changed only by resolution adopted by a majority of the board of directors.

Director vacancies

The amended and restated certificate of incorporation that will be in effect upon the completion of this offering will provide that all vacancies, including newly created directorships, may, except as otherwise required by law or subject to the rights of holders of preferred stock as designated from time to time, be filled by the affirmative vote of a majority of directors then in office, even if less than a quorum.

Special meetings of stockholders

The amended and restated certificate of incorporation and our amended and restated bylaws that will be in effect upon the completion of this offering will provide that, except as otherwise required by law, special meetings of our stockholders may be called only by the chairman of the board, our Chief Executive Officer or by the board of directors pursuant to a resolution adopted by a majority of the total number of authorized directors (whether or not there exists any vacancies).

Advance notice procedures for director nominations

The amended and restated certificate of incorporation and amended and restated bylaws that will be in effect upon the completion of this offering will provide that stockholders seeking to nominate candidates for election as directors at an annual or special meeting of stockholders must provide timely notice thereof in writing and also specify requirements as to the form and content of a stockholder's notice.

Action by written consent

The amended and restated certificate of incorporation and amended and restated bylaws that will be in effect upon the completion of this offering will require that any action to be taken by our stockholders must be effected at a duly called annual or special meeting of stockholders and not be taken by written consent.

Cumulative voting

The amended and restated certificate of incorporation that will be in effect upon the completion of this offering will not provide for cumulative voting rights (therefore allowing the holders of a majority of the shares of common stock entitled to vote in any election of directors to elect all of the directors standing for election, if they should so choose).

Amending our certificate of incorporation and bylaws

The amendment of any of the provisions in our amended and restated certificate of incorporation that will be in effect upon the completion of this offering, with the exception of the ability of our board of directors to issue shares of preferred stock and designate any rights, preferences and privileges thereto, would require the affirmative vote of the holders of at least 66 2/3% of the voting power of all of our then outstanding common stock. Additionally, our amended and restated certificate of incorporation will provide that our bylaws may be amended, altered or repealed by the board of directors.

Exclusive forum provision

Our amended and restated certificate of incorporation to be effective upon the completion of this offering provides that, unless we consent in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware (or, if the Court of Chancery of the State of Delaware does not have jurisdiction, the federal district court for the District of Delaware) shall be the sole and exclusive forum for the following types of proceedings: (i) any derivative action or proceeding brought on behalf of our company, (ii) any action asserting a claim of breach of a fiduciary duty owed by any of our directors, officers, employees or stockholders to our company or our stockholders, (iii) any action asserting a claim arising pursuant to any provision of the General Corporation Law of the State of Delaware or as to which the General Corporation Law of the State of Delaware confers jurisdiction on the Court of Chancery of the State of Delaware or (iv) any action asserting a claim arising pursuant to any provision of our amended and restated certificate of incorporation or amended and restated bylaws (in each case, as they may be amended from time to time) or governed by the internal affairs doctrine. This provision would not apply to suits brought to enforce a duty or liability created by the Exchange Act or any other claim for which the U.S. federal courts have exclusive jurisdiction. Furthermore, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all such Securities Act actions. Accordingly, both state and federal courts have jurisdiction to entertain such claims. Our amended and restated bylaws further provide that the federal district courts of the United States of America will be the exclusive forum to the fullest extent permitted by law, for resolving any complaint asserting a cause of action arising under the Securities Act. This choice of forum provision may limit a stockholder's ability to bring a claim in a judicial forum that it finds favorable for disputes with us or our directors, officers or other employees, which may discourage such lawsuits against us and our directors, officers and employees. Alternatively, if a court were to find these provisions of our amended and restated certificate of incorporation and amended and restated bylaws inapplicable to, or unenforceable in respect of, one or more of the specified types of actions or proceedings, we may incur additional costs associated with resolving such matters in other jurisdictions, which could adversely affect our business and financial condition. Any person or entity purchasing or otherwise acquiring any interest in shares of our capital stock shall be deemed to have notice of and to have consented to the provisions of our amended and restated certificate of incorporation and amended and restated bylaws described above.

Nasdaq Global Market listing

We have applied for listing of our common stock on The Nasdaq Global Market under the symbol "BCAB."

Transfer agent and registrar

The transfer agent and registrar for our common stock and Class B common stock is . The transfer agent and registrar's address is

Shares eligible for future sale

Prior to this offering, there has been no public market for our common stock, and a liquid trading market for our common stock may not develop or be sustained after this offering. As described below, only a limited number of shares will be available for sale shortly after this offering due to contractual and legal restrictions on resale. Future sales of substantial amounts of common stock in the public market after the completion of this offering, or the perception that those sales may occur, could adversely affect the prevailing market price for our common stock from time to time and could impair our ability to raise capital through sales of equity securities.

Based on the number of shares of common stock outstanding as of _____, 2020, upon the completion of this offering, assuming (i) the LLC Conversion and (ii) the conversion upon completion of this offering of all of our outstanding shares of Series D preferred stock, shares of common stock will be outstanding, assuming no exercise of the underwriters' option to purchase additional shares and no exercise of options or warrants. All of the shares sold in this offering will be freely tradable unless held by an "affiliate" of ours, as that term is defined in Rule 144 under the Securities Act. Except as set forth below, the remaining _____ shares of common stock outstanding after this offering will be restricted as a result of securities laws or lock-up agreements. In addition, any shares sold in this offering to entities affiliated with our existing stockholders and directors will be subject to lock-up agreements. These remaining shares will generally become available for sale in the public market as follows:

- No restricted shares will be eligible for immediate sale upon the completion of this offering;
- Up to _____ restricted shares will be eligible for sale under Rule 144 or Rule 701, subject to the volume limitations, manner of sale and notice provisions described below under "Rule 144," upon expiration of lock-up agreements at least 180 days after the date of this offering; and
- The remainder of the restricted shares will be eligible for sale from time to time thereafter upon expiration of their respective holding periods under Rule 144, but could be sold earlier if the holders exercise any available registration rights.

Rule 144

In general, under Rule 144 as currently in effect, beginning 90 days after the effective date of the registration statement of which this prospectus is a part, any person who is not an affiliate of ours and has held their shares for at least six months, including the holding period of any prior owner other than one of our affiliates, may sell shares without restriction, provided current public information about us is available. In addition, under Rule 144, any person who is not an affiliate of ours and has held their shares for at least one year, including the holding period of any prior owner other than one of our affiliates, would be entitled to sell an unlimited number of shares immediately upon the completion of this offering without regard to whether current public information about us is available.

Beginning 90 days after the effective date of the registration statement of which this prospectus is a part, a person who is an affiliate of ours and who has beneficially owned restricted securities for at least six months, including the holding period of any prior owner other than one of our affiliates, is entitled to sell a number of restricted shares within any three-month period that does not exceed the greater of:

- 1% of the number of shares of our common stock then outstanding, which will equal approximately _____ shares immediately after this offering; or
- the average weekly trading volume of our common stock on The Nasdaq Global Market during the four calendar weeks preceding the filing of a notice on Form 144 with respect to the sale.

[Table of Contents](#)

Sales of restricted shares under Rule 144 held by our affiliates are also subject to requirements regarding the manner of sale, notice and the availability of current public information about us. Rule 144 also provides that affiliates relying on Rule 144 to sell shares of our common stock that are not restricted shares must nonetheless comply with the same restrictions applicable to restricted shares, other than the holding period requirement.

Notwithstanding the availability of Rule 144, the holders of substantially all of our restricted shares have entered into lock-up agreements as described below and their restricted shares will become eligible for sale at the expiration of the restrictions set forth in those agreements.

Rule 701

Under Rule 701, shares of our common stock acquired upon the exercise of options or pursuant to other rights granted under our stock plans may be resold by:

- persons other than affiliates, beginning 90 days after the effective date of the registration statement of which this prospectus is a part, subject only to the manner-of-sale provisions of Rule 144; and
- our affiliates, beginning 90 days after the effective date of the registration statement of which this prospectus is a part, subject to the manner-of-sale and volume limitations and current public information and filing requirements of Rule 144, in each case, without compliance with the six-month holding period requirement of Rule 144.

Lock-up agreements

We, along with our directors, executive officers and substantially all of our shareholders, have agreed with the underwriters that for a period of 180 days, after the date of this prospectus, subject to specified exceptions, we or they will not offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, lend or otherwise transfer or dispose of, directly or indirectly, any shares of common stock or any securities convertible into or exercisable or exchangeable for shares of common stock or enter into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership of the common stock. These agreements are described in "Underwriting."

After this offering, certain of our employees, including our executive officers and/or directors, may enter into written trading plans that are intended to comply with Rule 10b5-1 under the Exchange Act. Sales under these trading plans would not be permitted until the expiration of the lock-up agreements relating to the offering described above.

In addition to the restrictions contained in the lock-up agreements described above, we have entered into agreements with certain security holders, including the Investor Right Agreement, Right of First Refusal and Co-Sale Agreement that contain market stand-off provisions imposing restrictions on the ability of such security holders to offer, sell or transfer our equity securities for a period of 180 days following the date of this prospectus.

Equity incentive plans

We intend to file with the SEC a registration statement on Form S-8 under the Securities Act covering the shares of common stock reserved for issuance under the 2020 Plan and the ESPP. The registration statement is expected to be filed and become effective as soon as practicable after the completion of this offering.

Accordingly, shares registered under the registration statement will be available for sale in the open market following the registration statement's effective date, subject to Rule 144 volume limitations and the lock-up agreements described above, if applicable.

Registration rights

Upon the completion of this offering, the holders of shares of common stock will have rights, subject to certain conditions, to require us to file registration statements covering their shares or to include their shares in registration statements that we may file for ourselves or other stockholders. After registration pursuant to these rights, these shares will become freely tradable without restriction under the Securities Act. The requisite percentage of these stockholders will waive all such stockholders' rights to notice of this offering and to include their shares of registrable securities in this offering. See "Description of capital stock—Registration rights" for additional information regarding these registration rights.

Material U.S. federal income tax consequences to non-U.S. holders of common stock

The following summary describes the material U.S. federal income tax consequences of the acquisition, ownership and disposition of our common stock acquired in this offering by Non-U.S. Holders (as defined below). This discussion does not address all aspects of U.S. federal income tax law that may be relevant to Non-U.S. Holders in light of their particular circumstances, does not consider the potential application of the alternative minimum or Medicare contribution tax, and does not deal with foreign, state, local, estate or gift tax consequences. Special rules different from those described below may apply to certain Non-U.S. Holders that are subject to special treatment under the Code, such as banks, financial institutions, insurance companies, tax-qualified retirement plans and qualified foreign pension funds, regulated investment companies, tax-exempt organizations, foreign governments, international organizations, broker-dealers and traders in securities, U.S. expatriates, controlled foreign corporations, passive foreign investment companies, corporations that accumulate earnings to avoid U.S. federal income tax, persons that hold our common stock as part of a straddle, hedge, conversion transaction, synthetic security or integrated investment or other risk reduction strategy, partnerships and other pass-through entities, and investors in such pass-through entities or an entity that is treated as a disregarded entity for U.S. federal income tax purposes (regardless of its place of organization or formation). Such Non-U.S. Holders are urged to consult their own tax advisors to determine the U.S. federal, state, local and other tax consequences that may be relevant to them. Furthermore, the discussion below is based upon the provisions of the Code, and Treasury regulations, rulings and judicial decisions thereunder as of the date hereof, and such authorities may be repealed, revoked or modified, perhaps retroactively, so as to result in U.S. federal income tax consequences different from those discussed below. We have not requested a ruling from the U.S. Internal Revenue Service, or IRS, with respect to the statements made and the conclusions reached in the following summary, and we cannot assure you that the IRS will agree with such statements and conclusions. This discussion assumes that the Non-U.S. Holder holds our common stock as a "capital asset" within the meaning of Section 1221 of the Code (generally, property held for investment).

The following discussion is for general information only and is not tax advice. Persons considering the purchase of our common stock pursuant to this offering should consult their own tax advisors concerning the U.S. federal income tax consequences of acquiring, owning and disposing of our common stock in light of their particular situations as well as any consequences arising under other U.S. federal tax laws or the laws of any other taxing jurisdiction, including any state, local or foreign tax consequences.

For the purposes of this discussion, a "Non-U.S. Holder" is, for U.S. federal income tax purposes, a beneficial owner of common stock that has not been excluded from this discussion and is not a U.S. Holder. A "U.S. Holder" means a beneficial owner of our common stock that is for U.S. federal income tax purposes (a) an individual who is a citizen or resident of the United States, (b) a corporation or other entity treated as a corporation created or organized in or under the laws of the United States, any state thereof or the District of Columbia, (c) an estate the income of which is subject to U.S. federal income taxation regardless of its source or (d) a trust if it (i) is subject to the primary supervision of a court within the United States and one or more U.S. persons have the authority to control all substantial decisions of the trust or (ii) has a valid election in effect under applicable U.S. Treasury regulations to be treated as a U.S. person.

Distributions

Subject to the discussion below, distributions, if any, made on our common stock to a Non-U.S. Holder of our common stock to the extent made out of our current or accumulated earnings and profits (as determined under U.S. federal income tax principles) generally will constitute dividends for U.S. tax purposes and, provided such dividends are not effectively connected with the Non-U.S. Holder's conduct of a trade or business within the

United States, will be subject to withholding tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. To obtain a reduced rate of withholding under a treaty, a Non-U.S. Holder generally will be required to provide us with a properly executed IRS Form W-8BEN, W-8BEN-E or other appropriate form, certifying the Non-U.S. Holder's entitlement to benefits under that treaty. In the case of a Non-U.S. Holder that is an entity, Treasury regulations and the relevant tax treaty provide rules to determine whether, for purposes of determining the applicability of a tax treaty, dividends will be treated as paid to the entity or to those holding an interest in that entity. If a Non-U.S. Holder holds stock through a financial institution or other agent acting on the holder's behalf, the holder will be required to provide appropriate documentation to such agent. The holder's agent will then be required to provide certification to us or our paying agent, either directly or through other intermediaries. If you are eligible for a reduced rate of U.S. federal withholding tax under an income tax treaty, you should consult with your own tax advisor to determine if you are able to obtain a refund or credit of any excess amounts withheld by timely filing an appropriate claim for a refund with the IRS.

We generally are not required to withhold tax on dividends paid to a Non-U.S. Holder that are effectively connected with the Non-U.S. Holder's conduct of a trade or business within the United States (and, if required by an applicable income tax treaty, are attributable to a permanent establishment that such holder maintains in the United States) if a properly executed IRS Form W-8ECI, stating that the dividends are so connected, is furnished to us (or, if stock is held through a financial institution or other agent, to such agent). In general, such effectively connected dividends will be subject to U.S. federal income tax, on a net income basis at the regular graduated rates, unless a specific treaty exemption applies. A Non-U.S. Holder that is a corporation for U.S. federal income tax purposes that receives effectively connected dividends may also be subject to an additional "branch profits tax," which is imposed, under certain circumstances, at a rate of 30% (or such lower rate as may be specified by an applicable treaty) on the corporate Non-U.S. Holder's effectively connected earnings and profits, subject to certain adjustments.

To the extent distributions on our common stock, if any, exceed our current and accumulated earnings and profits, they will constitute a non-taxable return of capital and will first reduce your adjusted basis in our common stock, but not below zero, and then will be treated as gain and taxed in the same manner as gain realized from a sale or other disposition of common stock as described in the next section.

Gain on disposition of our common stock

Subject to the discussion below regarding backup withholding and foreign accounts, a Non-U.S. Holder generally will not be subject to U.S. federal income tax with respect to gain realized on a sale or other disposition of our common stock unless (a) the gain is effectively connected with a trade or business of such holder in the United States (and, if required by an applicable income tax treaty, is attributable to a permanent establishment that such holder maintains in the United States), (b) the Non-U.S. Holder is a nonresident alien individual and is present in the United States for 183 or more days in the taxable year of the disposition and certain other conditions are met, or (c) we are or have been a "United States real property holding corporation" within the meaning of Code Section 897(c)(2) at any time within the shorter of the five-year period preceding such disposition or such holder's holding period. In general, we would be a United States real property holding corporation if interests in U.S. real estate comprised (by fair market value) at least half of our total worldwide interests in real property plus our business assets. We believe that we are not, and do not anticipate becoming, a United States real property holding corporation. Even if we are treated as a United States real property holding corporation, such treatment will not cause gain realized by a Non-U.S. Holder on a disposition of our common stock to be subject to U.S. federal income tax so long as (1) the Non-U.S. Holder owned, directly, indirectly and constructively, no more than 5% of our common stock at all times within the shorter of (i) the five-year period preceding the disposition or (ii) the holder's holding period and (2) our common stock is

regularly traded on an established securities market. We cannot assure you that our common stock will qualify or continue to qualify as regularly traded on an established securities market.

If you are a Non-U.S. Holder described in (a) above, you will be required to pay tax on the net gain derived from the sale at regular graduated U.S. federal income tax rates, unless a specific treaty exemption applies, and corporate Non-U.S. Holders described in (a) above may be subject to the additional branch profits tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. If you are an individual Non-U.S. Holder described in (b) above, you will be required to pay a flat 30% tax on the gain derived from the sale, which gain may be offset by U.S. source capital losses (even though you are not considered a resident of the United States).

Information reporting requirements and backup withholding

Generally, we or certain financial middlemen must report information to the IRS with respect to any dividends we pay on our common stock including the amount of any such dividends, the name and address of the recipient, and the amount, if any, of tax withheld. A similar report is sent to the holder to whom any such dividends are paid. Pursuant to tax treaties or certain other agreements, the IRS may make its reports available to tax authorities in the recipient's country of residence.

Dividends paid by us (or our paying agents) to a Non-U.S. Holder may also be subject to U.S. backup withholding. U.S. backup withholding generally will not apply to a Non-U.S. Holder who provides a properly executed appropriate IRS Form W-8 or otherwise establishes an exemption. The current backup withholding rate is 24%.

Under current U.S. federal income tax law, U.S. information reporting and backup withholding requirements generally will apply to the proceeds from a disposition of our common stock effected by or through a U.S. office of any broker, U.S. or foreign, except that information reporting and such requirements may be avoided if the holder provides a properly executed appropriate IRS Form W-8 or otherwise meets documentary evidence requirements for establishing Non-U.S. Holder status or otherwise establishes an exemption. Generally, U.S. information reporting and backup withholding requirements will not apply to a payment of disposition proceeds to a Non-U.S. Holder where the transaction is considered effected outside the United States through a non-U.S. office of a non-U.S. broker. Information reporting and backup withholding requirements may, however, apply to a payment of disposition proceeds if the broker has actual knowledge, or reason to know, that the holder is, in fact, a U.S. person. For information reporting purposes, certain non-U.S. brokers with substantial U.S. ownership or operations will generally be treated in a manner similar to U.S. brokers.

If backup withholding is applied to you, you should consult with your own tax advisor to determine if you are able to obtain a refund or credit with respect to such backup withholding.

Additional withholding tax on payments made to foreign accounts

Withholding taxes may be imposed under Sections 1471 to 1474 of the Code (such Sections commonly referred to as the Foreign Account Tax Compliance Act, or FATCA) on certain types of payments made to non-U.S. financial institutions and certain other non-U.S. entities. Specifically, a 30% withholding tax may be imposed on dividends on, or gross proceeds from the sale or other disposition of, our common stock paid to a "foreign financial institution" or a "non-financial foreign entity" (each as defined in the Code), unless (i) the foreign financial institution undertakes certain diligence and reporting obligations, (ii) the non-financial foreign entity either certifies it does not have any "substantial United States owners" (as defined in the Code) or furnishes identifying information regarding each substantial United States owner, or (iii) the foreign financial institution or non-financial foreign entity otherwise qualifies for an exemption from these rules. If the payee is a foreign

[Table of Contents](#)

financial institution and is subject to the diligence and reporting requirements in (i) above, it must enter into an agreement with the U.S. Department of the Treasury requiring, among other things, that it undertake to identify accounts held by certain "specified United States persons" or "United States owned foreign entities" (each as defined in the Code), annually report certain information about such accounts, and withhold 30% on certain payments to non-compliant foreign financial institutions and certain other account holders. Foreign financial institutions located in jurisdictions that have an intergovernmental agreement with the United States governing FATCA may be subject to different rules.

Under the applicable Treasury Regulations and administrative guidance, withholding under FATCA generally applies to payments of dividends on our common stock. Under proposed Treasury Regulations, withholding under FATCA does not apply to gross proceeds from any sale or disposition of our common stock. While taxpayers may generally rely on those proposed regulations until final regulations are issued, prospective investors should consult their tax advisors regarding the potential application of withholding under FATCA to their investment in our common stock.

THE PRECEDING DISCUSSION OF U.S. FEDERAL INCOME TAX CONSIDERATIONS IS FOR GENERAL INFORMATION ONLY. IT IS NOT TAX ADVICE. EACH PROSPECTIVE INVESTOR SHOULD CONSULT ITS OWN TAX ADVISOR REGARDING THE TAX CONSEQUENCES OF PURCHASING, HOLDING AND DISPOSING OF OUR COMMON STOCK, INCLUDING THE CONSEQUENCES OF ANY APPLICABLE INCOME TAX TREATY, ANY PROPOSED CHANGE IN APPLICABLE LAW, AND ANY STATE, LOCAL, NON-U.S. OR U.S. FEDERAL NON-INCOME TAX LAWS.

Underwriting

We are offering the shares of common stock described in this prospectus through a number of underwriters. J.P. Morgan Securities LLC, Jefferies LLC and Credit Suisse Securities (USA) LLC are acting as joint book-running managers of the offering and as representatives of the underwriters. We have entered into an underwriting agreement with the underwriters. Subject to the terms and conditions of the underwriting agreement, we have agreed to sell to the underwriters, and each underwriter has severally agreed to purchase, at the public offering price less the underwriting discounts and commissions set forth on the cover page of this prospectus, the number of shares of common stock listed next to its name in the following table:

Name	Number of shares
J.P. Morgan Securities LLC	
Jefferies LLC	
Credit Suisse Securities (USA) LLC	
BTIG, LLC	
Total	

The underwriters are committed to purchase all the shares of common stock offered by us if they purchase any shares. The underwriting agreement also provides that if an underwriter defaults, the purchase commitments of non-defaulting underwriters may also be increased or the offering may be terminated.

The underwriters propose to offer the shares of common stock directly to the public at the initial public offering price set forth on the cover page of this prospectus and to certain dealers at that price less a concession not in excess of \$ _____ per share. After the initial offering of the shares to the public, if all of the shares of common stock are not sold at the initial public offering price, the underwriters may change the offering price and the other selling terms. Sales of any shares made outside of the United States may be made by affiliates of the underwriters.

The underwriters have an option to buy up to _____ additional shares of common stock from us to cover sales of shares by the underwriters which exceed the number of shares specified in the table above. The underwriters have 30 days from the date of this prospectus to exercise this option to purchase additional shares. If any shares are purchased with this option to purchase additional shares, the underwriters will purchase shares in approximately the same proportion as shown in the table above. If any additional shares of common stock are purchased, the underwriters will offer the additional shares on the same terms as those on which the shares are being offered.

The underwriting fee is equal to the public offering price per share of common stock less the amount paid by the underwriters to us per share of common stock. The underwriting fee is \$ _____ per share. The following table shows the per share and total underwriting discounts and commissions to be paid to the underwriters assuming both no exercise and full exercise of the underwriters' option to purchase additional shares.

	Without option to purchase additional shares exercise	With full option to purchase additional shares exercise
Per Share	\$	\$
Total	\$	\$

We estimate that the total expenses of this offering, including registration, filing and listing fees, printing fees and legal and accounting expenses, but excluding the underwriting discounts and commissions, will be

[Table of Contents](#)

approximately \$. We have agreed to reimburse the underwriters for certain expenses related to clearance of this offering with the Financial Industry Regulatory Authority, Inc. in an amount up to \$.

A prospectus in electronic format may be made available on the web sites maintained by one or more underwriters, or selling group members, if any, participating in the offering. The underwriters may agree to allocate a number of shares to underwriters and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the representatives to underwriters and selling group members that may make Internet distributions on the same basis as other allocations.

We have agreed that we will not (i) offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, lend, or otherwise transfer or dispose of, directly or indirectly, or submit to, or file with, the SEC a registration statement under the Securities Act relating to, any shares of our common stock or securities convertible into or exercisable or exchangeable for any shares of our common stock, or publicly disclose the intention to undertake any of the foregoing, or (ii) enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of any shares of common stock or any such other securities (regardless of whether any such transaction described in clause (i) or (ii) above is to be settled by delivery of shares of common stock or such other securities, in cash or otherwise), in each case without the prior written consent of J.P. Morgan Securities LLC, Jefferies LLC and Credit Suisse Securities (USA) LLC for a period of 180 days after the date of this prospectus, other than the shares of our common stock to be sold in this offering.

The restrictions on our actions, as described above, do not apply to certain transactions, including (i) the issuance of shares of common stock or securities convertible into or exercisable for shares of our common stock pursuant to the conversion or exchange of convertible or exchangeable securities or the exercise of warrants or options (including net exercise) or the settlement of RSUs (including net settlement), in each case outstanding on the date of the underwriting agreement and described in this prospectus; (ii) grants of stock options, stock awards, restricted stock, RSUs, or other equity awards and the issuance of shares of our common stock or securities convertible into or exercisable or exchangeable for shares of our common stock (whether upon the exercise of stock options or otherwise) to our employees, officers, directors, advisors, or consultants pursuant to the terms of an equity compensation plan in effect as of the completion of this offering and described in this prospectus, provided that such recipients enter into a lock-up agreement with the underwriters for the remainder of the 180-day lock-up period; (iii) the issuance of up to 5% of the outstanding shares of our common stock, or securities convertible into, exercisable for, or which are otherwise exchangeable for, our common stock, immediately following the completion of this offering, in connection with one or more acquisitions of a company or business, assets or technology of another person or entity, joint ventures, commercial relationships or strategic alliances (including marketing or distribution arrangements, collaboration agreements or intellectual property licensing agreements) or other similar strategic transactions, provided that such recipients enter into a lock-up agreement with the underwriters for the remainder of the 180-day lock-up period or (iv) our filing of any registration statement on Form S-8 relating to securities granted or to be granted pursuant to any plan in effect on the date of the underwriting agreement and described in this prospectus or any assumed benefit plan pursuant to an acquisition or similar strategic transaction.

Our directors and executive officers, and substantially all of our shareholders (such persons, the “lock-up parties”) have entered into lock-up agreements with the underwriters prior to the commencement of this offering pursuant to which each lock-up party, with limited exceptions, for a period of 180 days after the date of this prospectus (such period, the “restricted period”), may not (and may not cause any of their direct or indirect affiliates to), without the prior written consent of J.P. Morgan Securities LLC, Jefferies LLC and Credit Suisse Securities (USA) LLC, (i) offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, lend or otherwise transfer or dispose of, directly or indirectly, any shares of our common stock or any securities convertible into or exercisable or

exchangeable for our common stock (including without limitation, common stock or such other securities which may be deemed to be beneficially owned by such lock-up parties in accordance with the rules and regulations of the SEC and securities which may be issued upon exercise of a stock option or warrant (collectively with the common stock, the "lock-up securities")), (ii) enter into any hedging, swap or other agreement or transaction that transfers, in whole or in part, any of the economic consequences of ownership of the lock-up securities, whether any such transaction described in clause (i) or (ii) above is to be settled by delivery of lock-up securities, in cash or otherwise, (iii) make any demand for, or exercise any right with respect to, the registration of any lock-up securities or (iv) publicly disclose the intention to do any of the foregoing. Such persons or entities have further acknowledged that these undertakings preclude them from engaging in any hedging or other transactions or arrangements (including, without limitation, any short sale or the purchase or sale of, or entry into, any put or call option, or combination thereof, forward, swap or any other derivative transaction or instrument, however described or defined) designed or intended, or which could reasonably be expected to lead to or result in, a sale or disposition or transfer (by any person or entity, whether or not a signatory to such agreement) of any economic consequences of ownership, in whole or in part, directly or indirectly, of any lock-up securities, whether any such transaction or arrangement (or instrument provided for thereunder) would be settled by delivery of lock-up securities, in cash or otherwise.

The restrictions described in the immediately preceding paragraph and contained in the lock-up agreements between the underwriters and the lock-up parties do not apply, subject in certain cases to various conditions, to certain transactions, including (a) transfers or disposals of lock-up securities: (i) as bona fide gifts, or for bona fide estate planning purposes, (ii) by will, other testamentary document or intestacy, (iii) to any trust for the direct or indirect benefit of the lock-up party or any immediate family member, (iv) to a corporation, partnership, limited liability company, trust or other entity of which the lock-up party and its immediate family members are directly or indirectly the legal and beneficial owner of all of the outstanding equity securities or similar interests, (v) to a nominee or custodian of a person or entity to whom a disposition or transfer would be permissible under clauses (i) through (iv), (vi) in the case of a corporation, partnership, limited liability company, trust or other business entity, (A) to another corporation, partnership, limited liability company, trust or other business entity that is an affiliate of the lock-up party, or to any investment fund or other entity controlling, controlled by, managing or managed by or under common control with the lock-up party or its affiliates or (B) as part of a distribution or other transfer to general or limited partners, members or stockholders of, or other holders of equity in, the lock-up party; (vii) by operation of law, (viii) to us from an employee or other service provider upon death, disability or termination of employment or service relationship, in each case, of such employee or service provider, (ix) as part of a sale of lock-up securities acquired in open market transactions after the completion of this offering, (x) to us in connection with the vesting, settlement or exercise of restricted stock units, options, warrants or other rights to purchase shares of our common stock (including "net" or "cashless" exercise), including for the payment of exercise price and tax and remittance payments, or (xi) pursuant to a bona fide third-party tender offer, merger, consolidation or other similar transaction approved by our board of directors and made to all shareholders involving a change in control, provided that if such transaction is not completed, all such lock-up securities would remain subject to the restrictions in the immediately preceding paragraph; (b) exercise of the options, settlement of RSUs or other equity awards, or the exercise of warrants granted pursuant to plans described in this prospectus, provided that any lock-up securities received upon such exercise, vesting or settlement would be subject to restrictions similar to those in the immediately preceding paragraph; (c) the conversion of outstanding preferred stock, warrants to acquire preferred stock, or convertible securities into shares of our common stock or warrants to acquire shares of our common stock, provided that any common stock or warrant received upon such conversion would be subject to restrictions similar to those in the immediately preceding paragraph and (d) the establishment by lock-up parties of trading plans under Rule 10b5-1 under the Exchange Act, provided that such plan does not provide for the transfer of lock-up securities during the restricted period.

[Table of Contents](#)

J.P. Morgan Securities LLC, Jefferies LLC and Credit Suisse Securities (USA) LLC, in their sole discretion, may release the securities subject to any of the lock-up agreements with the underwriters described above, in whole or in part at any time.

We have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act.

We have applied to list our common stock on The Nasdaq Global Market under the symbol "BCAB".

In connection with this offering, the underwriters may engage in stabilizing transactions, which involves making bids for, purchasing and selling shares of common stock in the open market for the purpose of preventing or retarding a decline in the market price of the common stock while this offering is in progress. These stabilizing transactions may include making short sales of common stock, which involves the sale by the underwriters of a greater number of shares of common stock than they are required to purchase in this offering, and purchasing shares of common stock on the open market to cover positions created by short sales. Short sales may be "covered" shorts, which are short positions in an amount not greater than the underwriters' option to purchase additional shares referred to above, or may be "naked" shorts, which are short positions in excess of that amount. The underwriters may close out any covered short position either by exercising their option to purchase additional shares, in whole or in part, or by purchasing shares in the open market. In making this determination, the underwriters will consider, among other things, the price of shares available for purchase in the open market compared to the price at which the underwriters may purchase shares through the option to purchase additional shares. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the common stock in the open market that could adversely affect investors who purchase in this offering. To the extent that the underwriters create a naked short position, they will purchase shares in the open market to cover the position.

The underwriters have advised us that, pursuant to Regulation M of the Securities Act, they may also engage in other activities that stabilize, maintain or otherwise affect the price of the common stock, including the imposition of penalty bids. This means that if the representatives of the underwriters purchase common stock in the open market in stabilizing transactions or to cover short sales, the representatives can require the underwriters that sold those shares as part of this offering to repay the underwriting discount received by them.

These activities may have the effect of raising or maintaining the market price of the common stock or preventing or retarding a decline in the market price of the common stock, and, as a result, the price of the common stock may be higher than the price that otherwise might exist in the open market. If the underwriters commence these activities, they may discontinue them at any time. The underwriters may carry out these transactions on The Nasdaq Global Market, in the over-the-counter market or otherwise.

Prior to this offering, there has been no public market for our common stock. The initial public offering price will be determined by negotiations between us and the representatives of the underwriters. In determining the initial public offering price, we and the representatives of the underwriters expect to consider a number of factors including:

- the information set forth in this prospectus and otherwise available to the representatives;
- our prospects and the history and prospects for the industry in which we compete;
- an assessment of our management;
- our prospects for future earnings;
- the general condition of the securities markets at the time of this offering;

[Table of Contents](#)

- the recent market prices of, and demand for, publicly traded common stock of generally comparable companies; and
- other factors deemed relevant by the underwriters and us.

Neither we nor the underwriters can assure investors that an active trading market will develop for our common shares, or that the shares will trade in the public market at or above the initial public offering price.

Other relationships

Certain of the underwriters and their affiliates have provided in the past to us and our affiliates and may provide from time to time in the future certain commercial banking, financial advisory, investment banking and other services for us and such affiliates in the ordinary course of their business, for which they have received and may continue to receive customary fees and commissions. In addition, from time to time, certain of the underwriters and their affiliates may effect transactions for their own account or the account of customers, and hold on behalf of themselves or their customers, long or short positions in our debt or equity securities or loans, and may do so in the future.

Selling restrictions

Other than in the United States, no action has been taken by us or the underwriters that would permit a public offering of the securities offered by this prospectus in any jurisdiction where action for that purpose is required. The securities offered by this prospectus may not be offered or sold, directly or indirectly, nor may this prospectus or any other offering material or advertisements in connection with the offer and sale of any such securities be distributed or published in any jurisdiction, except under circumstances that will result in compliance with the applicable rules and regulations of that jurisdiction. Persons into whose possession this prospectus comes are advised to inform themselves about and to observe any restrictions relating to the offering and the distribution of this prospectus. This prospectus does not constitute an offer to sell or a solicitation of an offer to buy any securities offered by this prospectus in any jurisdiction in which such an offer or a solicitation is unlawful.

Notice to prospective investors in Canada

The shares may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the shares must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

Notice to prospective investors in the European Economic Area and the United Kingdom

In relation to each Member State of the European Economic Area and the United Kingdom, or each, a Relevant State, no shares have been offered or will be offered pursuant to this offering to the public in that Relevant State prior to the publication of a prospectus in relation to the shares which has been approved by the competent authority in that Relevant State or, where appropriate, approved in another Relevant State and notified to the competent authority in that Relevant State, all in accordance with the Prospectus Regulation, except that offers of shares may be made to the public in that Relevant State at any time under the following exemptions under the Prospectus Regulation:

- (i) to any legal entity which is a qualified investor as defined under the Prospectus Regulation;
- (ii) to fewer than 150 natural or legal persons (other than qualified investors as defined under the Prospectus Regulation), subject to obtaining the prior consent of the underwriters; or
- (iii) in any other circumstances falling within Article 1(4) of the Prospectus Regulation,

provided that no such offer of shares shall require us or any underwriter to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation and each person who initially acquires any shares or to whom any offer is made will be deemed to have represented, acknowledged and agreed to and with each of the underwriters and the Company that it is a “qualified investor” within the meaning of Article 2(e) of the Prospectus Regulation. In the case of any shares being offered to a financial intermediary as that term is used in the Prospectus Regulation, each such financial intermediary will be deemed to have represented, acknowledged and agreed that the shares acquired by it in the offer have not been acquired on a non-discretionary basis on behalf of, nor have they been acquired with a view to their offer or resale to, persons in circumstances which may give rise to an offer of any shares to the public other than their offer or resale in a Relevant State to qualified investors as so defined or in circumstances in which the prior consent of the underwriters have been obtained to each such proposed offer or resale.

For the purposes of this provision, the expression an “offer to the public” in relation to shares in any Relevant State means the communication in any form and by any means of sufficient information on the terms of the offer and any shares to be offered so as to enable an investor to decide to purchase or subscribe for any shares, and the expression “Prospectus Regulation” means Regulation (EU) 2017/1129.

Notice to prospective investors in the United Kingdom

In addition, in the United Kingdom, this document is being distributed only to, and is directed only at, and any offer subsequently made may only be directed at persons who are “qualified investors” (as defined in the Prospectus Regulation) (i) who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended, or the Order, and/or (ii) who are high net worth companies (or persons to whom it may otherwise be lawfully communicated) falling within Article 49(2)(a) to (d) of the Order (all such persons together being referred to as “relevant persons”) or otherwise in circumstances which have not resulted and will not result in an offer to the public of the shares in the United Kingdom within the meaning of the Financial Services and Markets Act 2000, as amended.

Any person in the United Kingdom that is not a relevant person should not act or rely on the information included in this document or use it as basis for taking any action. In the United Kingdom, any investment or investment activity that this document relates to may be made or taken exclusively by relevant persons.

Notice to prospective investors in Switzerland

This prospectus is not intended to constitute an offer or solicitation to purchase or invest in the shares. The shares may not be publicly offered, directly or indirectly, in Switzerland within the meaning of the Swiss Financial Services Act, or FinSA, and no application has or will be made to admit the shares to trading on any trading venue (exchange or multilateral trading facility) in Switzerland. Neither this prospectus nor any other offering or marketing material relating to the shares constitutes a prospectus pursuant to the FinSA, and neither this prospectus nor any other offering or marketing material relating to the shares may be publicly distributed or otherwise made publicly available in Switzerland.

Notice to prospective investors in the Dubai International Financial Centre

This document relates to an Exempt Offer in accordance with the Markets Rules 2012 of the Dubai Financial Services Authority, or DFSA. This document is intended for distribution only to persons of a type specified in the Markets Rules 2012 of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this prospectus supplement nor taken steps to verify the information set forth herein and has no responsibility for this document. The securities to which this document relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the securities offered should conduct their own due diligence on the securities. If you do not understand the contents of this document you should consult an authorized financial advisor.

In relation to its use in the Dubai International Financial Centre, or DIFC, this document is strictly private and confidential and is being distributed to a limited number of investors and must not be provided to any person other than the original recipient, and may not be reproduced or used for any other purpose. The interests in the securities may not be offered or sold directly or indirectly to the public in the DIFC.

Notice to prospective investors in the United Arab Emirates

The shares have not been, and are not being, publicly offered, sold, promoted or advertised in the United Arab Emirates (including the DIFC) other than in compliance with the laws of the United Arab Emirates (and the DIFC) governing the issue, offering and sale of securities. Further, this prospectus does not constitute a public offer of securities in the United Arab Emirates (including the DIFC) and is not intended to be a public offer. This prospectus has not been approved by or filed with the Central Bank of the United Arab Emirates, the Securities and Commodities Authority or the DFSA.

Notice to prospective investors in Australia

This prospectus:

- does not constitute a disclosure document or a prospectus under Chapter 6D.2 of the Corporations Act 2001 (Cth), or the Corporations Act;
- has not been, and will not be, lodged with the Australian Securities and Investments Commission, or ASIC, as a disclosure document for the purposes of the Corporations Act and does not purport to include the information required of a disclosure document for the purposes of the Corporations Act; and
- may only be provided in Australia to select investors who are able to demonstrate that they fall within one or more of the categories of investors, available under section 708 of the Corporations Act, or Exempt Investors.

The shares may not be directly or indirectly offered for subscription or purchased or sold, and no invitations to subscribe for or buy the shares may be issued, and no draft or definitive offering memorandum, advertisement

or other offering material relating to any shares may be distributed in Australia, except where disclosure to investors is not required under Chapter 6D of the Corporations Act or is otherwise in compliance with all applicable Australian laws and regulations. By submitting an application for the shares, you represent and warrant to us that you are an Exempt Investor.

As any offer of shares under this document will be made without disclosure in Australia under Chapter 6D.2 of the Corporations Act, the offer of those securities for resale in Australia within 12 months may, under section 707 of the Corporations Act, require disclosure to investors under Chapter 6D.2 if none of the exemptions in section 708 applies to that resale. By applying for the shares you undertake to us that you will not, for a period of 12 months from the date of issue of the shares, offer, transfer, assign or otherwise alienate those shares to investors in Australia except in circumstances where disclosure to investors is not required under Chapter 6D.2 of the Corporations Act or where a compliant disclosure document is prepared and lodged with ASIC.

Notice to prospective investors in Japan

The shares have not been and will not be registered pursuant to Article 4, Paragraph 1 of the Financial Instruments and Exchange Act. Accordingly, none of the shares nor any interest therein may be offered or sold, directly or indirectly, in Japan or to, or for the benefit of, any “resident” of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of Japan), or to others for re-offering or resale, directly or indirectly, in Japan or to or for the benefit of a resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Financial Instruments and Exchange Act and any other applicable laws, regulations and ministerial guidelines of Japan in effect at the relevant time.

Notice to prospective investors in Hong Kong

The shares have not been offered or sold and will not be offered or sold in Hong Kong, by means of any document, other than (i) to “professional investors” as defined in the Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong), or the SFO, of Hong Kong and any rules made thereunder; or (ii) in other circumstances which do not result in the document being a “prospectus” as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong, or the CO, or which do not constitute an offer to the public within the meaning of the CO. No advertisement, invitation or document relating to the shares has been or may be issued or has been or may be in the possession of any person for the purposes of issue, whether in Hong Kong or elsewhere, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” as defined in the SFO and any rules made thereunder.

Notice to prospective investors in Singapore

Each representative has acknowledged that this prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, each representative has represented and agreed that it has not offered or sold any shares or caused the shares to be made the subject of an invitation for subscription or purchase and will not offer or sell any shares or cause the shares to be made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this prospectus or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the shares, whether directly or indirectly, to any person in Singapore other than:

- (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act (Chapter 289) of Singapore, as modified or amended from time to time, or the SFA) pursuant to Section 274 of the SFA;

[Table of Contents](#)

- (ii) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA; or
- (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the shares are subscribed or purchased under Section 275 of the SFA by a relevant person which is:

- (i) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or
- (ii) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor,

securities or securities-based derivatives contracts (each term as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the shares pursuant to an offer made under Section 275 of the SFA except:

- (A) to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the SFA;
- (B) where no consideration is or will be given for the transfer;
- (C) where the transfer is by operation of law;
- (D) as specified in Section 276(7) of the SFA; or
- (E) as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018.

Singapore SFA Product Classification — In connection with Section 309B of the SFA and the CMP Regulations 2018, unless otherwise specified before an offer of Notes, the Issuer has determined, and hereby notifies all relevant persons (as defined in Section 309A(1) of the SFA), that the Notes are “prescribed capital markets products” (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Notice to prospective investors in Bermuda

Shares may be offered or sold in Bermuda only in compliance with the provisions of the Investment Business Act of 2003 of Bermuda which regulates the sale of securities in Bermuda. Additionally, non-Bermudian persons (including companies) may not carry on or engage in any trade or business in Bermuda unless such persons are permitted to do so under applicable Bermuda legislation.

Notice to prospective investors in Qatar

The shares described in this prospectus have not been, and will not be, offered, sold or delivered, at any time, directly or indirectly in the State of Qatar in a manner that would constitute a public offering. This prospectus has not been, and will not be, registered with or approved by the Qatar Financial Markets Authority or Qatar Central Bank and may not be publicly distributed. This prospectus is intended for the original recipient only and must not be provided to any other person. It is not for general circulation in the State of Qatar and may not be reproduced or used for any other purpose.

Notice to prospective investors in Kuwait

Unless all necessary approvals from the Kuwait Capital Markets Authority pursuant to Law No. 7/2010, its Executive Regulations, and the various Resolutions and Announcements issued pursuant thereto or in connection therewith have been given in relation to the marketing of and sale of the shares, these may not be offered for sale, nor sold in the State of Kuwait, or Kuwait. Neither this prospectus nor any of the information contained herein is intended to lead to the conclusion of any contract of whatsoever nature within Kuwait. With regard to the contents of this document we recommend that you consult a licensee as per the law and specialized in giving advice about the purchase of shares and other securities before making the subscription decision.

Notice to prospective investors in Saudi Arabia

This document may not be distributed in the Kingdom of Saudi Arabia except to such persons as are permitted under the Offers of Securities Regulations as issued by the board of the Saudi Arabian Capital Market Authority, or CMA, pursuant to resolution number 2-11-2004 dated 4 October 2004 as amended by resolution number 1-28-2008, as amended. The CMA does not make any representation as to the accuracy or completeness of this document and expressly disclaims any liability whatsoever for any loss arising from, or incurred in reliance upon, any part of this document. Prospective purchasers of the securities offered hereby should conduct their own due diligence on the accuracy of the information relating to the securities. If you do not understand the contents of this document, you should consult an authorized financial adviser.

Notice to prospective investors in the British Virgin Islands

The shares are not being, and may not be offered to the public or to any person in the British Virgin Islands for purchase or subscription by or on our behalf. The shares may be offered to companies incorporated under the BVI Business Companies Act, 2004 (British Virgin Islands), or BVI Companies, but only where the offer will be made to, and received by, the relevant BVI Company entirely outside of the British Virgin Islands.

Notice to prospective investors in China

This prospectus will not be circulated or distributed in the PRC and the shares will not be offered or sold, and will not be offered or sold to any person for re-offering or resale directly or indirectly to any residents of the PRC except pursuant to any applicable laws and regulations of the PRC. Neither this prospectus nor any advertisement or other offering material may be distributed or published in the PRC, except under circumstances that will result in compliance with applicable laws and regulations.

Notice to prospective investors in Korea

The shares have not been and will not be registered under the Financial Investments Services and Capital Markets Act of Korea and the decrees and regulations thereunder, or the FSCMA, and the shares have been and will be offered in Korea as a private placement under the FSCMA. None of the shares may be offered, sold or delivered directly or indirectly, or offered or sold to any person for re-offering or resale, directly or indirectly, in Korea or to any resident of Korea except pursuant to the applicable laws and regulations of Korea, including the FSCMA and the Foreign Exchange Transaction Law of Korea and the decrees and regulations thereunder, or the FETL. The shares have not been listed on any of the securities exchanges in the world including, without limitation, the Korea Exchange in Korea. Furthermore, the purchaser of the shares shall comply with all applicable regulatory requirements (including requirements under the FETL) in connection with the purchase of the shares. By the purchase of the shares, the relevant holder thereof will be deemed to represent and warrant

that if it is in Korea or is a resident of Korea, it purchased the shares pursuant to the applicable laws and regulations of Korea.

Notice to prospective investors in Malaysia

No prospectus or other offering material or document in connection with the offer and sale of the shares has been or will be registered with the Securities Commission of Malaysia, or Commission, for the Commission's approval pursuant to the Capital Markets and Services Act 2007. Accordingly, this prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the shares may not be circulated or distributed, nor may the shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Malaysia other than (i) a closed end fund approved by the Commission; (ii) a holder of a Capital Markets Services License; (iii) a person who acquires the shares, as principal, if the offer is on terms that the shares may only be acquired at a consideration of not less than RM250,000 (or its equivalent in foreign currencies) for each transaction; (iv) an individual whose total net personal assets or total net joint assets with his or her spouse exceeds RM3 million (or its equivalent in foreign currencies), excluding the value of the primary residence of the individual; (v) an individual who has a gross annual income exceeding RM300,000 (or its equivalent in foreign currencies) per annum in the preceding twelve months; (vi) an individual who, jointly with his or her spouse, has a gross annual income of RM400,000 (or its equivalent in foreign currencies), per annum in the preceding twelve months; (vii) a corporation with total net assets exceeding RM10 million (or its equivalent in a foreign currencies) based on the last audited accounts; (viii) a partnership with total net assets exceeding RM10 million (or its equivalent in foreign currencies); (ix) a bank licensee or insurance licensee as defined in the Labuan Financial Services and Securities Act 2010; (x) an Islamic bank licensee or takaful licensee as defined in the Labuan Financial Services and Securities Act 2010; and (xi) any other person as may be specified by the Commission; provided that, in the each of the preceding categories (i) to (xi), the distribution of the shares is made by a holder of a Capital Markets Services License who carries on the business of dealing in securities. The distribution in Malaysia of this prospectus is subject to Malaysian laws. This prospectus does not constitute and may not be used for the purpose of public offering or an issue, offer for subscription or purchase, invitation to subscribe for or purchase any securities requiring the registration of a prospectus with the Commission under the Capital Markets and Services Act 2007.

Notice to prospective investors in Taiwan

The shares have not been and will not be registered with the Financial Supervisory Commission of Taiwan pursuant to relevant securities laws and regulations and may not be sold, issued or offered within Taiwan through a public offering or in circumstances which constitutes an offer within the meaning of the Securities and Exchange Act of Taiwan that requires a registration or approval of the Financial Supervisory Commission of Taiwan. No person or entity in Taiwan has been authorized to offer, sell, give advice regarding or otherwise intermediate the offering and sale of the shares in Taiwan.

Notice to prospective investors in South Africa

Due to restrictions under the securities laws of South Africa, no "offer to the public" (as such term is defined in the South African Companies Act, No. 71 of 2008 (as amended or re-enacted), or the South African Companies Act) is being made in connection with the issue of the shares in South Africa. Accordingly, this document does not, nor is it intended to, constitute a "registered prospectus" (as that term is defined in the South African Companies Act) prepared and registered under the South African Companies Act and has not been approved by, and/or filed with, the South African Companies and Intellectual Property Commission or any other regulatory

Table of Contents

authority in South Africa. The shares are not offered, and the offer shall not be transferred, sold, renounced or delivered, in South Africa or to a person with an address in South Africa, unless one or other of the following exemptions stipulated in section 96 (1) applies:

Section 96 (1)(a) the offer, transfer, sale, renunciation or delivery is to:

- (i) persons whose ordinary business, or part of whose ordinary business, is to deal in securities, as principal or agent;
- (ii) the South African Public Investment Corporation;
- (iii) persons or entities regulated by the Reserve Bank of South Africa;
- (iv) authorized financial service providers under South African law;
- (v) financial institutions recognized as such under South African law;
- (vi) a wholly owned subsidiary of any person or entity contemplated in (c), (d) or (e), acting as agent in the capacity of an authorized portfolio manager for a pension fund, or as manager for a collective investment scheme (in each case duly registered as such under South African law); or
- (vii) any combination of the person in (i) to (vi); or

Section 96 (1)(b) the total contemplated acquisition cost of the securities, for any single addressee acting as principal is equal to or greater than ZAR1,000,000 or such higher amount as may be promulgated by notice in the Government Gazette of South Africa pursuant to section 96(2)(a) of the South African Companies Act.

Information made available in this prospectus should not be considered as “advice” as defined in the South African Financial Advisory and Intermediary Services Act, 2002.

Notice to prospective investors in Israel

This document does not constitute a prospectus under the Israeli Securities Law, 5728-1968, or the Israeli Securities Law, and has not been filed with or approved by the Israel Securities Authority. In Israel, this prospectus is being distributed only to, and is directed only at, and any offer of the shares of common stock is directed only at, (i) a limited number of persons in accordance with the Israeli Securities Law and (ii) investors listed in the first addendum, or the Addendum, to the Israeli Securities Law, consisting primarily of joint investment in trust funds, provident funds, insurance companies, banks, portfolio managers, investment advisors, members of the Tel Aviv Stock Exchange, underwriters, venture capital funds, entities with equity in excess of NIS 50 million and “qualified individuals,” each as defined in the Addendum (as it may be amended from time to time), collectively referred to as qualified investors (in each case, purchasing for their own account or, where permitted under the Addendum, for the accounts of their clients who are investors listed in the Addendum). Qualified investors are required to submit written confirmation that they fall within the scope of the Addendum, are aware of the meaning of same and agree to it.

Notice to prospective investors in Chile

The shares are not registered in the Securities Registry (Registro de Valores) or subject to the control of the Chilean Securities and Exchange Commission (Superintendencia de Valores y Seguros de Chile). This prospectus and other offering materials relating to the offer of the shares do not constitute a public offer of, or an

[Table of Contents](#)

invitation to subscribe for or purchase, the shares in the Republic of Chile, other than to individually identified purchasers pursuant to a private offering within the meaning of Article 4 of the Chilean Securities Market Act (Ley de Mercado de Valores) (an offer that is not “addressed to the public at large or to a certain sector or specific group of the public”).

Notice to prospective investors in Brazil

The shares have not been, and will not be, registered with the Brazilian Securities Commission (Comissão de Valores Mobiliários), or the CVM. The shares may not be offered or sold in Brazil, except in circumstances that do not constitute a public offering or unauthorized distribution under Brazilian laws and regulations. The shares are not being offered into Brazil. Documents relating to the offering of the shares, as well as information contained therein, may not be supplied to the public in Brazil, nor be used in connection with any public offer for subscription or sale of the shares to the public in Brazil.

Notice to prospective investors in the Cayman Islands

No invitation, whether directly or indirectly, may be made to the public in the Cayman Islands to subscribe for our securities.

Legal matters

The validity of the shares of common stock being offered by this prospectus will be passed upon for us by Dechert LLP, Washington, D.C. The underwriters are being represented by Cravath, Swaine & Moore LLP, New York, New York.

Experts

Ernst & Young LLP, independent registered public accounting firm, has audited our consolidated financial statements at December 31, 2019 and 2018, and for each of the two years in the period ended December 31, 2019, as set forth in their report. We've included our financial statements in the prospectus and elsewhere in the registration statement in reliance on Ernst & Young LLP's report, given on their authority as experts in accounting and auditing.

Where you can find additional information

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to the shares of common stock being offered by this prospectus. This prospectus, which constitutes part of the registration statement, does not include all of the information contained in the registration statement or the exhibits, schedules and amendments to the registration statement. For further information with respect to us and our common stock, we refer you to the registration statement and to the exhibits and schedules to the registration statement. Statements contained in this prospectus as to the contents of any contract or any other document referred to are not necessarily complete. If a contract or other document has been filed as an exhibit to the registration statement, please see the copy of the contract or other document that has been filed. Each statement in this prospectus relating to a contract or other document filed as an exhibit is qualified in all respects by the filed exhibit.

Upon the completion of this offering, we will be subject to the information reporting requirements of the Exchange Act, and we will file annual, quarterly and current reports, proxy statements and other information with the SEC. The SEC maintains an Internet website that contains reports, proxy statements and other information about registrants, like us, that file electronically with the SEC. The address of that site is www.sec.gov. We also maintain a website at www.bioatla.com, at which, following the completion of this offering, you may access these materials free of charge as soon as reasonably practicable after they are electronically filed with, or furnished to, the SEC. Information contained on or accessible through our website is not a part of this prospectus, and the inclusion of our website address in this prospectus is an inactive textual reference only.

Report of independent registered public accounting firm

To the Stockholders and the Board of Directors of
BioAtla, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of BioAtla, LLC. (the Company, renamed BioAtla, Inc. after the Corporate Reorganization as discussed in Note 1 to the financial statements) as of December 31, 2018 and 2019, the related consolidated statements of operations and comprehensive loss, members' deficit and cash flows, for each of the two years in the period ended December 31, 2019, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2018 and 2019, and the results of its operations and its cash flows for each of the two years in the period ended December 31, 2019, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Company's auditor since 2016

BioAtla, Inc.

Notes to consolidated financial statements

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

1. Organization and summary of significant accounting policies

Organization

BioAtla, LLC (the “Pre-Division Predecessor”) was formed in Delaware in March 2007. In March 2019, as part of the LLC Division defined and described below, BioAtla, LLC divided into three separate and distinct Delaware limited liability companies. The successor entity, also named BioAtla, LLC (the “Post-Division Successor”) converted to a Delaware corporation in July 2020 as part of the Corporate Reorganization defined and described below, and was renamed BioAtla, Inc. BioAtla, Inc. is the final successor to the Pre-Division Predecessor and the Post-Division Successor, and collectively these entities are referred to as “the Company.” The historical financial statements of the Company prior to the Corporate Reorganization are those of the Pre-Division Predecessor and the Post-Division Successor without adjustment. The Company has a proprietary platform for creating biologics, including its conditionally active biologics (“CAB” or “CABs”). CABs have been designed to be active only under certain conditions found in diseased tissue, while remaining inactive in normal tissue. The Company is currently in clinical development of its two lead CAB antibody drug conjugates (“CAB ADC”) targeting AXL and ROR2 receptors.

LLC Division

In March 2019, BioAtla, LLC (the Pre-Division Predecessor) was divided into three separate and distinct Delaware limited liability companies (the “Division”) as follows: 1) BioAtla, LLC renamed to BioAtla Holdings, LLC (“BioAtla Holdings”), 2) a new legal entity named Inversagen, LLC (“Inversagen”), and 3) a new legal entity named BioAtla, LLC (and together with BioAtla Holdings and Inversagen, the “Post-Division LLCs”). Subsequent to the Division, each Post-Division LLC had substantially the same form of operating agreement and capital structure as the Pre-Division Predecessor, with certain exceptions described below. In connection with the Division, the Pre-Division Predecessor’s holdings of F1 Oncology, Inc. (“F1 Oncology”) common and preferred stock (see Note 11) remained in BioAtla Holdings and certain rights related to the application of CAB technology in senescent cell therapy were transferred to the Post-Division Successor and simultaneously licensed to Inversagen (see Note 9). The remaining assets and liabilities of the Pre-Division Predecessor, including all existing employees, were transferred to the Post-Division Successor. Each of the Pre-Division Predecessor’s members at the time of the Division continued as a member in the Post-Division Successor, BioAtla Holdings and Inversagen, and each entity has Dr. Jay Short and Carolyn Anderson Short as its LLC managers. There are no shared services agreements between the Company and BioAtla Holdings or Inversagen. The Company has determined that Inversagen is a variable interest entity (“VIE”), the Company is not the primary beneficiary of Inversagen, and that the Post-Division LLCs are under the common control of Jay and Carolyn Short. The Company does not consolidate either BioAtla Holdings or Inversagen (see Note 9). In addition, the Company has no direct equity investment in either BioAtla Holdings or Inversagen that require either equity method or cost method accounting.

The assets, liabilities, and employees transferred to the Post-Division Successor in the Division met the definition of a business and the transfer qualifies as a change in reporting entity under Accounting Standards Codification (“ASC”) 250-10-45-21. As such, the historical financial statements of the Pre-Division Predecessor are deemed to be those of the Post-Division Successor, even for periods prior to its formation. As a transfer of a business to an entity under common control, the assets and liabilities of the Pre-Division Predecessor were transferred to the

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Post-Division Successor at historical carrying values. At the Division date, the Pre-Division Predecessor's investment in F1 Oncology and the assets licensed to Inversagen had a zero carrying value and neither F1 Oncology nor Inversagen had material operations. As such, the Pre-Division historical financial statements presented herein are the historical financial statements of the Pre-Division Predecessor without adjustment.

In connection with the Division, certain modifications were made to then outstanding debt agreements and units, including: i) the participation threshold of each Class B unit in each Post-Division LLC was adjusted for the impact of the Division (see Note 7), ii) the amendment of the Pfizer Note and 2018 Notes (as defined and described in Note 4), and iii) the issuance, to both Pfizer and the holders of the 2018 Notes, of conditional warrants by BioAtla Holdings and Inversagen which become exercisable upon the conversion of the Pfizer Note and 2018 Notes into capital stock of the Post-Division Successor (see Note 4). At the time of the Division, the operating agreements of each Post-Division LLC were similar except as described below, and each Post-Division LLC had the same number of outstanding Class A units, Class B units and Class C units, with the exception of 1,750,000 Class B units issued by the Post-Division Successor but not by BioAtla Holdings or Inversagen. The outstanding warrants of the Pre-Division Predecessor at the Division date were transferred to the Post-Division Successor (see Note 6). The Class C units of the Post-Division Successor had liquidation preferences and a preferred return not included in the operating agreements of BioAtla Holdings and Inversagen.

Corporate reorganization and Series D financing

In July 2020, BioAtla, LLC (the Post-Division Successor) completed a series of transactions (the "Corporate Reorganization") in connection with converting from a limited liability company into a Delaware corporation and completing a Series D convertible preferred stock financing. The Corporate Reorganization involved the formation of Himalaya Parent LLC as a wholly owned subsidiary of BioAtla, LLC and the formation of BioAtla MergerSub LLC, as a wholly owned subsidiary of Himalaya Parent LLC. Under the Agreement and Plan of Merger (the "Merger Agreement"), BioAtla, LLC was merged into and with BioAtla MergerSub LLC, with BioAtla, LLC surviving, and the members of BioAtla, LLC immediately prior to the effective time of the Merger Agreement received membership interests, on a one-for-one basis, of Himalaya Parent LLC as consideration, and the then-outstanding warrants to purchase equity of BioAtla, LLC were converted into warrants to purchase common shares of common stock of BioAtla, Inc. (see Note 6). The Himalaya Parent LLC operating agreement provided identical equity rights for the then outstanding units of BioAtla, LLC. In addition: (i) the membership interests of BioAtla, LLC were exchanged for 80,860,651 shares of BioAtla, Inc. common stock, (ii) BioAtla, Inc. issued an aggregate of 59,164,808 shares of Series D convertible preferred stock to Himalaya Parent LLC and Himalaya Parent LLC issued an aggregate of 59,164,808 Class D units in connection with the holders of convertible notes of BioAtla, LLC converting their convertible notes into Class D units of Himalaya Parent LLC (see Note 4), (iii) BioAtla, LLC distributed to Himalaya Parent LLC its equity interests in Himalaya Therapeutics SEZC, a majority-owned subsidiary which is engaged in the development of a set of antibodies in the field of oncology primarily in Greater China, (iv) Himalaya Parent LLC assumed the profits interest liability of BioAtla, LLC (see Note 7) and (v) BioAtla, LLC converted into a Delaware corporation pursuant to a statutory conversion and changed its name to BioAtla, Inc. Following the Corporate Reorganization, Himalaya Parent LLC owned 59,164,808 shares of BioAtla, Inc. Series D convertible preferred stock and 80,860,651 shares of BioAtla, Inc. common stock, and BioAtla, Inc. assumed all property, assets and obligations of BioAtla, LLC (exclusive of the profits interest liability) upon completion of the Corporate Reorganization.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Principles of consolidation and deconsolidation

Prior to the Corporate Reorganization in July 2020, the consolidated financial statements included the accounts of BioAtla, LLC and those of its majority owned subsidiary Himalaya Therapeutics SEZC that had no material operations. Himalaya Therapeutics SEZC also had a wholly owned subsidiary, Himalaya Therapeutics HK Limited that had no material operations. All intercompany balances were eliminated in consolidation. In connection with the Corporate Reorganization, Himalaya Therapeutics SEZC was deconsolidated without material impact to the consolidated financial statements. Subsequent to the Corporate Reorganization, Himalaya Parent LLC and Himalaya Therapeutics SEZC are not under common control with BioAtla, Inc. and are not consolidated with BioAtla, Inc. (see Note 9).

Liquidity and going concern

The Company has incurred cumulative operating losses and negative cash flows from operations since its inception and expects to continue to incur significant expenses and operating losses for the foreseeable future as it continues the development of its product candidates. As of December 31, 2019 and September 30, 2020, the Company had an accumulated deficit of \$148.4 million and \$167.8 million, respectively. The Company plans to continue to fund its losses from operations and capital funding needs through public or private equity or debt financings or other sources. If the Company is not able to secure adequate additional funding, the Company may be forced to make reductions in spending, extend payment terms with suppliers, liquidate assets where possible, or suspend or curtail planned programs. Any of these actions could materially harm the Company's business, results of operations and future prospects.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business, and do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or amounts and classification of liabilities that may result should the Company not continue as a going concern. Management is required to perform a two-step analysis of the Company's ability to continue as a going concern. Management must first evaluate whether there are conditions and events that raise substantial doubt about the Company's ability to continue as a going concern (Step 1). If management concludes that substantial doubt is raised, management is also required to consider whether its plans alleviate that doubt (Step 2). Management's assessment included the preparation of cash flow forecasts resulting in management's conclusion that there is not substantial doubt about the Company's ability to continue as a going concern for 12 months after the respective dates the consolidated financial statements for the year ended December 31, 2019 and the nine months ended September 30, 2020 were issued.

Variable interest entities

The Company consolidates entities in which it has a controlling financial interest. The Company determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity ("VIE"). Voting interest entities are entities in which (i) the total equity investment at risk is sufficient to enable the entity to finance its activities independently, (ii) the equity holders have the power to direct the activities of the entity that most significantly impact its economic performance, the obligation to

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

absorb the losses of the entity and the right to receive the residual returns of the entity and (iii) the legal entity is structured with substantive voting rights. A VIE is an entity that lacks one or more of the characteristics of a voting interest entity. The Company has a controlling financial interest in a VIE when the Company has a variable interest or interests that provide it with (i) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and (ii) the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE. The Company evaluates its relationships with its VIEs on an ongoing basis to determine whether or not it has a controlling financial interest (see Notes 9 and 11).

Use of estimates

The Company's consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). The preparation of the Company's consolidated financial statements requires it to make estimates and assumptions that impact the reported amounts of assets, liabilities, revenues and expenses and the disclosure of contingent assets and liabilities in the Company's consolidated financial statements and accompanying notes. The most significant estimates in the Company's consolidated financial statements relate to revenue recognition, accruals for research and development costs, equity-based compensation and fair value measurements. These estimates and assumptions are based on current facts, historical experience and various other factors believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the recording of revenue and expenses that are not readily apparent from other sources. Actual results may differ materially and adversely from these estimates. To the extent there are material differences between the estimates and actual results, the Company's future results of operations will be affected.

Unaudited interim financial information

The accompanying interim balance sheet as of September 30, 2020, the consolidated statements of operations and comprehensive loss, consolidated statements of convertible preferred stock and members'/stockholders' deficit and consolidated statements of cash flows for the nine months ended September 30, 2019 and 2020 and the related footnote disclosures are unaudited. In management's opinion, the unaudited interim financial statements have been prepared on the same basis as the audited financial statements and include all adjustments, which include only normal recurring adjustments, necessary for the fair presentation of the Company's financial position as of September 30, 2020 and its results of operations and cash flows for the nine months ended September 30, 2019 and 2020 in accordance with GAAP. The results for the nine months ended September 30, 2020 are not necessarily indicative of the results expected for the full fiscal year or any other interim period.

Segment reporting

Operating segments are identified as components of an enterprise about which separate discrete financial information is available for evaluation by the chief operating decision-maker in making decisions regarding resource allocation and assessing performance. The Company views its operations and manages its business in one operating segment.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Cash and cash equivalents

The Company considers all highly liquid investments with original maturities of three months or less when purchased to be cash equivalents.

Concentrations of risk

Financial instruments that potentially subject the Company to a significant concentration of credit risk consist primarily of cash and cash equivalents. The Company maintains deposits in federally insured financial institutions in excess of federally insured limits. The Company has not experienced any losses in such accounts and management believes that the Company is not exposed to significant credit risk due to the financial position of the depository institutions in which those deposits are held.

For the year ended December 31, 2018, Beijing Sinobioway Group Co., Ltd (“Sinobioway”), a related party as further described in Note 8, represented approximately 98% of total revenues. For the year ended December 31, 2019, BeiGene, as defined and described in Note 8, represented approximately 91% of total revenues. For the nine months ended September 30, 2019, BeiGene and Pfizer represented 85% and 15%, respectively, of total revenues. For the nine months ended September 20, 2020, BeiGene represented 100% of total revenues.

Property and equipment

Property and equipment are stated at cost and depreciated on a straight-line basis over the estimated useful life of the related assets. Leasehold improvements are stated at cost and amortized on a straight-line basis over the lesser of the remaining term of the related lease or the estimated useful life of the leasehold improvements. Repairs and maintenance costs are charged to expense as incurred and expenditures that materially extend the useful lives of assets are capitalized.

Impairment of long-lived assets

The Company reviews long-lived assets, such as property and equipment, for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the assets exceeds the fair value of the assets. Fair value would be assessed using discounted cash flows or other appropriate measures of fair value. The Company has not recognized any impairment losses for the years ended December 31, 2018 and 2019 and the nine months ended September 30, 2019 and 2020.

Deferred offering costs

The Company has deferred offering costs consisting of legal, accounting and other fees and costs directly attributable to its planned IPO. The deferred offering costs will be offset against the proceeds received upon the completion of the planned IPO. In the event the planned IPO is terminated, all of the deferred offering costs will be expensed within the Company's consolidated statements of operations and comprehensive loss. As of September 30, 2020, \$1.1 million of deferred offering costs were recorded within other assets in the accompanying consolidated balance sheets. As of December 31, 2018 and 2019, no such costs were deferred.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Deferred rent

Rent expense is recognized using the straight-line method over the lease term, which includes the period of time from when the Company takes possession of the leased space until leasehold improvements are completed and the space is occupied. The difference between rent expense and amounts paid under the lease agreement is deferred in the accompanying consolidated balance sheets. Tenant improvement allowances and other lease incentives are recorded as liabilities and are amortized on the straight-line basis over the lease term as reductions to rent expense.

Beneficial conversion features

A beneficial conversion feature is a non-detachable conversion feature that is “in the money” at the commitment date, which requires recognition of interest expense for underlying debt instruments and a deemed dividend for underlying equity instruments. A conversion option is “in the money” if the effective conversion price is lower than the commitment date fair value of the share into which it is convertible.

Accounting for derivatives

The Company evaluates its convertible instruments and other contracts to determine if those contracts or embedded components of those contracts are required to be recognized under Accounting Standards Codification (“ASC”) Topic 815, *Derivatives and Hedging*. The result of this accounting treatment is that the derivative is carried at fair value as an asset or liability with changes in fair value recognized in earnings as they occur. Although separately measured at fair value, the fair value of bifurcated embedded derivatives is presented with the host contract in the consolidated balance sheet. Changes in the fair value of derivatives are recorded in the accompanying consolidated statements of operations and comprehensive loss as a component of other income (expense).

Revenue recognition

Effective January 1, 2019, the Company adopted Accounting Standards Update (“ASU”) 2014-09, *Revenue from Contracts with Customers (Topic 606)* (“Topic 606”) using the modified retrospective method. Topic 606 supersedes the revenue recognition requirements in ASC Topic 605, *Revenue Recognition* (“Topic 605”). There was no material cumulative effect of adopting Topic 606. All periods prior to the adoption date of Topic 606 have not been restated to reflect the impact of the adoption of Topic 606, but are accounted for and presented under Topic 605.

Revenue recognition under Topic 606

The Company recognizes revenue in a manner that depicts the transfer of control of a product or a service to a customer and reflects the amount of the consideration the Company is entitled to receive in exchange for such product or service. In doing so, the Company follows a five-step approach: (i) identify the contract with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations, and (v) recognize revenue when (or as) the customer obtains control of the product or service. The Company considers the terms of a contract and all relevant facts and circumstances when applying the revenue recognition standard.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

A customer is a party that has entered into a contract with the Company, where the purpose of the contract is to obtain a product or a service that is an output of the Company's ordinary activities in exchange for consideration. To be considered a contract, (i) the contract must be approved (in writing, orally, or in accordance with other customary business practices), (ii) each party's rights regarding the product or the service to be transferred can be identified, (iii) the payment terms for the product or the service to be transferred can be identified, (iv) the contract must have commercial substance (that is, the risk, timing or amount of future cash flows is expected to change as a result of the contract), and (v) it is probable that the Company will collect substantially all of the consideration to which it is entitled to receive in exchange for the transfer of the product or the service.

A performance obligation is defined as a promise to transfer a product or a service to a customer. The Company identifies each promise to transfer a product or a service (or a bundle of products or services, or a series of products and services that are substantially the same and have the same pattern of transfer) that is distinct. A product or a service is distinct if both (i) the customer can benefit from the product or the service either on its own or together with other resources that are readily available to the customer and (ii) the Company's promise to transfer the product or the service to the customer is separately identifiable from other promises in the contract. Each distinct promise to transfer a product or a service is a unit of accounting for revenue recognition. If a promise to transfer a product or a service is not separately identifiable from other promises in the contract, such promises should be combined into a single performance obligation.

The transaction price is the amount of consideration the Company is entitled to receive in exchange for the transfer of control of a product or a service to a customer. To determine the transaction price, the Company considers the existence of any significant financing component, the effects of any variable elements, noncash considerations and consideration payable to the customer. If a significant financing component exists, the transaction price is adjusted for the time value of money. If an element of variability exists, the Company must estimate the consideration it expects to receive and uses that amount as the basis for recognizing revenue as the product or the service is transferred to the customer. There are two methods for determining the amount of variable consideration: (i) the expected value method, which is the sum of probability-weighted amounts in a range of possible consideration amounts, and (ii) the mostly likely amount method, which identifies the single most likely amount in a range of possible consideration amounts.

If a contract has multiple performance obligations, the Company allocates the transaction price to each distinct performance obligation in an amount that reflects the consideration the Company is entitled to receive in exchange for satisfying each distinct performance obligation. For each distinct performance obligation, revenue is recognized when (or as) the Company transfers control of the product or the service applicable to such performance obligation.

In those instances where the Company first receives consideration in advance of satisfying its performance obligation, the Company classifies such consideration as deferred revenue until (or as) the Company satisfies such performance obligation. In those instances where the Company first satisfies its performance obligation prior to its receipt of consideration, the consideration is recorded as accounts receivable.

The Company expenses incremental costs of obtaining and fulfilling a contract as and when incurred if the expected amortization period of the asset that would be recognized is one year or less, or if the amount of the

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

asset is immaterial. Otherwise, such costs are capitalized as contract assets if they are incremental to the contract and amortized to expense proportionate to revenue recognition of the underlying contract.

Revenue recognition under Topic 605

Prior to the adoption of Topic 606, the Company recognized revenue under Topic 605 when all four of the following criteria were met: (1) there was persuasive evidence that an arrangement existed; (2) delivery of the products and/or services had occurred; (3) the selling price was fixed or determinable; and (4) collectibility was reasonably assured. Amounts received prior to satisfying the revenue recognition criteria were recorded as deferred revenue. Amounts not expected to be recognized as revenue within the 12 months following the balance sheet date were classified as long-term deferred revenue.

The Company evaluated multiple-element arrangements, including service contracts and collaboration and license agreements, to determine: (1) the deliverables included in the arrangement and (2) whether the individual deliverables represented separate units of accounting or whether they must be accounted for as a combined unit of accounting.

Arrangement consideration that was fixed or determinable was allocated among the separate units of accounting using the relative selling price method. The Company used the following hierarchy of values to estimate the selling price of each deliverable: (1) vendor-specific objective evidence of fair value; (2) third-party evidence of selling price; and (3) best estimate of selling price ("BESP"). The BESP reflected the Company's best estimate of what the selling price would be if the Company regularly sold the deliverable on a standalone basis.

The Company applied the applicable revenue recognition criteria to each of the separate units of accounting in determining the appropriate period and pattern of recognition. If there was no discernible pattern of performance and/or objectively measurable performance measures did not exist, then the Company recognized revenue under the arrangement on a straight-line basis over the period the Company expected to complete its performance obligations.

Research and development expenses

The Company's research and development expenses consist primarily of salaries, payroll taxes, employee benefits, and equity-based compensation charges for those individuals involved in ongoing research and development efforts; as well as consulting expenses, laboratory supplies, third party research and development expenses, animal studies and overhead, including facilities and depreciation costs. Research and development expenses are charged to expense as incurred.

The Company has entered into various research and development contracts with research institutions, clinical research organizations, clinical manufacturing organizations and other companies. Payments for these activities are based on the terms of the individual agreements, which may differ from the pattern of costs incurred, and are reflected in the accompanying consolidated balance sheets as prepaid or accrued expenses. The Company records accruals for estimated ongoing research and development costs. When evaluating the adequacy of the accrued liabilities, the Company analyzes progress of the services, including the phase or completion of events, invoices received and contracted costs. Significant judgments and estimates may be made

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

in determining the accrued balances at the end of any reporting period. Actual results could differ from the Company's estimates.

Patent costs

Costs related to filing and pursuing patent applications are recorded as general and administrative expenses and expensed as incurred since recoverability of such expenditures is uncertain.

Equity-based compensation

Prior to the Corporate Reorganization in July 2020, the Company had a profits interest plan that was a liability award plan in accordance with ASC Topic 718, *Compensation – Stock Compensation (Topic 718)*. The Company measured the fair value of each award on the grant date and recognized such fair value over the requisite service period (usually the vesting period) on a straight-line basis. The fair value of the award was remeasured at each reporting date until the award was settled, with a true-up of compensation cost for changes in fair value prorated for the portion of the requisite service period rendered. Once vested, any subsequent change in fair value was recognized immediately. The fair value of any awards that expired or were forfeited or canceled for no value were adjusted to zero, as they occur, such that any previously recorded compensation cost would be fully reversed. Subsequent to the Corporate Reorganization, the Company will continue to reflect compensation cost and a corresponding capital contribution associated with future vesting and the ongoing mark-to-market of the Class B profits interests held by Himalaya Parent LLC, as the equity-based payments are being provided to the Company's employees by a stockholder. Any new profits interest awards granted by Himalaya Parent LLC to BioAtla, Inc.'s employees, or modifications to the existing awards made by Himalaya Parent LLC, will also result in additional compensation cost and a corresponding capital contribution in accordance with ASC Topic 718.

Income taxes

The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the consolidated financial statements. Under this method, deferred tax assets and liabilities are determined on the basis of the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized as income in the period that includes the enactment date.

The Company recognizes net deferred tax assets to the extent that the Company believes these assets are more likely than not to be realized. In making such a determination, management considers all available positive and negative evidence, including future reversals of existing taxable temporary differences, projected future taxable income, exclusive of reversing temporary difference, tax-planning strategies and the results of recent operations. If management determines that the Company would be able to realize its deferred tax assets in the future in excess of their net recorded amount, management would make an adjustment to the deferred tax asset valuation allowance, which would reduce the provision for income taxes.

The Company records uncertain tax positions on the basis of a two-step process whereby (1) management determines whether it is more likely than not that the tax positions will be sustained on the basis of the technical

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

merits of the position and (2) for those tax positions that meet the more-likely-than-not recognition threshold, management recognizes the largest amount of tax benefit that is more than 50% likely to be realized upon ultimate settlement with the related tax authority. The Company recognizes interest and penalties related to unrecognized tax benefits within income tax expense. Any accrued interest and penalties are included within the related tax liability.

In connection with the Company's conversion to a Delaware corporation pursuant to a statutory conversion, BioAtla, Inc. became subject to US federal and state income tax, and recorded a net deferred tax asset based on the difference between the book value and tax basis of its assets and liabilities as of the date of the conversion. BioAtla, Inc. recorded a full valuation allowance against its net deferred tax asset based on the determination that it was not more likely than not that the net deferred tax assets would be realized. Prior to the conversion in July 2020, BioAtla, LLC had elected to be treated as a partnership for U.S. federal income tax purposes. Accordingly, all income and deductions of the LLC were reported on the LLC member's individual income tax returns. The LLC was subject to certain immaterial state income taxes. No provision or benefit for U.S. federal or state income taxes has been included in the accompanying consolidated statements of operations and comprehensive loss for the year ended December 31, 2019 and the nine months ended September 30, 2020 and prior periods.

The Company has analyzed its inventory of tax positions taken with respect to all applicable income tax issues for all open tax years (in each respective jurisdiction) and has concluded that no material uncertain tax positions exist as of December 31, 2018 and 2019. The Company has not been, nor is it currently, under examination by the U.S. federal or any state or foreign tax authority. The Company's federal returns from 2017 forward, state returns from 2016 forward, and foreign returns from 2014 forward remain open to examination by tax authorities.

Comprehensive loss

Comprehensive loss is defined as a change in equity during a period from transactions and other events and circumstances from non-owner sources. There have been no items qualifying as other comprehensive loss and, therefore, for all periods presented, the Company's comprehensive loss was the same as its reported net loss.

Net loss per unit/share

The Company applies the two-class method for calculating and presenting net loss per unit/share. In applying the two-class method, earnings are hypothetically allocated between the common, preferred, and other participating securities based on their respective rights to receive non-forfeitable distributions, whether or not declared.

Prior to the Corporate Reorganization, the Company considered its Class A units to be its "common units" since Class A units were the most subordinate class of equity with respect to preference in liquidation. In addition, the Class C units were entitled to a preferred return equal to 10% per annum, simple interest, on the Class C issuance price. The Company's Class B units were excluded from the net loss per unit calculations based on the presumption that the units would be settled in cash pursuant to the terms of the Company's operating agreement. Basic net loss per Class A unit was calculated by dividing net loss allocable to Class A unit holders (after adjustment for Class C preferred return and allocation of net losses to Class C units) by the weighted-

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

average number of Class A units outstanding during the period. The Company calculated diluted net loss per unit using the more dilutive of 1) the treasury stock method, if-converted method, or contingently issuable share method, as applicable, or 2) the two-class method. For the years ended December 31, 2018 and 2019 and the nine months ended September 30, 2019, the basic and diluted net loss per unit were the same as the inclusion of outstanding warrants, convertible debt or Class C preferred units would be antidilutive.

Subsequent to the Corporate Reorganization, basic net loss per share is computed by dividing the net loss by the weighted-average number of common shares outstanding for the period, without consideration for potentially dilutive securities. For the nine months ended September 30, 2020, the basic and diluted net loss per share were the same as the inclusion of the outstanding convertible preferred stock or common stock warrants would be antidilutive.

For the nine months ended September 30, 2020, the Company determined that the attribution of pre-Corporate Reorganization net losses based on the post-Corporate Reorganization capital structure would not meaningfully represent the economic rights of the unit holders. As a result, the Company presents net loss per share information only for the period subsequent to the Corporate Reorganization. The basic and diluted net loss per share for the nine months ended September 30, 2020 represents only the period from July 10, 2020 to September 30, 2020, the period where the Company had outstanding common stock.

The following table presents the calculation of basic and diluted net loss per share for the periods following the Corporate Reorganization (in thousands, except share and per share data):

	July 10, 2020 through September 30, 2020
Numerator:	
Net loss	\$ (10,482)
Denominator:	
Weighted-average shares of common stock outstanding, basic and diluted	80,860,651
Net loss per common share, basic and diluted	\$ (0.13)

Potentially dilutive securities not included in the calculation of diluted net loss per share because to do so would be anti-dilutive are as follows (in common stock equivalents):

	September 30, 2020
Convertible preferred stock	199,791,519
Common stock warrants	9,329,799
Total	209,121,318

BioAtla, Inc.

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Recent accounting pronouncements

In February 2016, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2016-02, *Leases*. The new standard establishes a right-of-use model and requires a lessee to recognize on the balance sheet a right-of-use asset and corresponding lease liability for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. ASU No. 2016-02 is effective for annual periods beginning after December 15, 2021, and interim periods within fiscal years beginning after December 15, 2022 and early adoption is permitted. While management is currently assessing the impact this new standard will have, the expected primary impact to its consolidated financial position upon adoption will be the recognition, on a discounted basis, of its minimum commitments under noncancelable operating leases on its consolidated balance sheets resulting in the recording of right of use assets and lease liabilities. The Company’s current minimum commitments under its noncancelable operating lease is disclosed in Note 5.

In June 2016, the FASB issued ASU No. 2016-13, *Financial Instruments - Credit Losses*, to improve financial reporting by requiring timely recording of credit losses on loans and other financial instruments held by financial institutions and other organizations. The ASU requires the measurement of all expected credit losses for financial assets held at the reporting date based on historical experience, current conditions and reasonable and supportable forecasts. The early adoption of this guidance, effective January 1, 2019, had no material impact on the Company’s consolidated financial statements.

In June 2018, the FASB issued ASU No. 2018-07, *Compensation-Stock Compensation (Topic 718)*, which simplifies the accounting for nonemployee share-based payment transactions. The amendments in the new guidance specify that Topic 718 applies to all share-based payment transactions in which a grantor acquires goods or services to be used or consumed in a grantor’s own operations by issuing share-based payment awards. This guidance is effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020. Early adoption is permitted. The Company will adopt ASU No. 2018-07 effective October 1, 2020 and does not expect the adoption of this guidance will have a material impact on its consolidated financial statements.

In August 2018, the FASB issued ASU No. 2018-13, *Fair Value Measurement (Topic 820): Disclosure Framework— Changes to the Disclosure Requirements for Fair Value Measurement*, which eliminates, modifies and adds disclosure requirements on fair value measurements. The early adoption of this guidance, effective January 1, 2019, had no material impact on the Company’s consolidated financial statements.

In July 2017, the FASB issued ASU No. 2017-11, *Earnings Per Share (Topic 260); Distinguishing Liabilities from Equity (Topic 480); Derivatives and Hedging (Topic 815): (Part I) Accounting for Certain Financial Instruments with Down Round Features, (Part II) Replacement of the Indefinite Deferral for Mandatorily Redeemable Financial Instruments of Certain Nonpublic Entities and Certain Mandatorily Redeemable Noncontrolling Interests with a Scope Exception*. The ASU allows companies to exclude a down round feature when determining whether a financial instrument (or embedded conversion feature) is considered indexed to the entity’s own stock. As a result, financial instruments (or embedded conversion features) with down round features may no longer be required to be accounted classified as liabilities. A company will recognize the value of a down round feature only when it is triggered and the strike price has been adjusted downward. For equity-classified freestanding financial instruments, such as warrants, an entity will treat the value of the effect of the down round, when

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

triggered, as a dividend and a reduction of income available to common shareholders in computing basic earnings per share. For convertible instruments with embedded conversion features containing down round provisions, entities will recognize the value of the down round as a beneficial conversion discount to be amortized to earnings. For non-public companies, the guidance in ASU 2017-11 is effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020. Early adoption is permitted, and the guidance is to be applied using a full or modified retrospective approach. The early adoption of this guidance, effective January 1, 2020, had no material impact on the Company's consolidated financial statements.

3. Fair value measurements

The carrying amounts of the Company's current financial assets and current financial liabilities are considered to be representative of their respective fair values because of the short-term nature of those instruments. Based on the borrowing rates available to the Company for loans with similar terms, the Company believed that the carrying value of its outstanding convertible debt as of December 31, 2019 approximated fair value. As of December 31, 2018 and 2019, the Company had no financial assets measured at fair value on a recurring basis. As of December 31, 2018, the Company had no financial liabilities measured at fair value on a recurring basis and, as of December 31, 2019 and through the date of settlement in July 2020, the financial liabilities measured at fair value on a recurring basis include the embedded derivative liability described below. Profits interest liabilities are accounted for in accordance with the provisions of ASC 718 – *Stock Compensation* and, as such, are excluded from the fair value disclosures below.

The accounting guidance defines fair value, establishes a consistent framework for measuring fair value and expands disclosure for each major asset and liability category measured at fair value on either a recurring or non-recurring basis. Fair value is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, the accounting guidance establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1: Observable inputs such as quoted prices in active markets.

Level 2: Inputs, other than the quoted prices in active markets that are observable either directly or indirectly.

Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

None of the Company's non-financial assets and liabilities are recorded at fair value on a non-recurring basis. No transfers between levels have occurred during the periods presented.

Liabilities measured at fair value on a recurring basis are as follows as of December 31, 2019 (in thousands):

	Total	Fair value measurements at reporting date using		
		Quoted prices in active markets for identical assets (level 1)	Significant other observable inputs (level 2)	Significant unobservable inputs (level 3)
Embedded derivative liability	\$1,856	\$ —	\$ —	\$ 1,856
Total	\$1,856	\$ —	\$ —	\$ 1,856

The 2018 Notes (as amended in 2020), the 2019 Notes and the 2020 Notes (each as defined and described in Note 4) contain a redemption feature which was determined to be an embedded derivative requiring bifurcation and separate accounting. The fair value of the derivative was determined based on an income

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

approach that identified the cash flows using a “with-and-without” valuation methodology. The inputs used to determine the estimated fair value of the derivative instrument were based primarily on the probability of an underlying event triggering the embedded derivative occurring and the timing of such event.

The following table provides a reconciliation of the embedded derivative liability measured at fair value using Level 3 unobservable inputs (in thousands):

	Embedded derivative liability
Balance at December 31, 2018	\$ —
Initial fair value of embedded derivatives issued	1,793
Change in fair value	63
Balance at December 31, 2019	1,856
Initial fair value of embedded derivatives issued	3,415
Change in fair value	1,581
Settlement	(6,852)
Balance at September 30, 2020	\$ —

4. Convertible and other debt

Convertible debt consists of the following (in thousands):

	December 31,	
	2018	2019
Convertible debt	\$15,000	\$ 19,000

Less: current portion of convertible debt	—	(10,000)
Less: current portion of unamortized debt discount	—	294
Convertible debt, less current portion and debt discount	\$15,000	\$ 8,414

Pfizer convertible promissory note

In December 2015, the Company issued a \$10.0 million unsecured convertible promissory note (“Pfizer Note”) to certain affiliates of Pfizer, Inc. (“Pfizer”). The Pfizer Note accrues interest at 8.0% per annum with a maturity date in December 2020 and may not be prepaid without the consent of the note holder. Prior to amendment in March 2019 as described below, the Pfizer Note, including accrued interest, was convertible at the election of the holder into Class C preferred units at a price of \$3.394142 per unit and is automatically convertible into i) common shares upon the completion of an IPO based on the price per share paid by investors in the IPO or ii) qualified financing shares upon the completion of a qualified financing based on the price per share paid by

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

investors in the qualified financing. The Company assessed the terms of the Pfizer Note and concluded that it was not share-settled debt, did not contain any embedded derivative features requiring bifurcation and did not contain a beneficial conversion feature. As a result, the Pfizer Note was carried at cost since the Company did not incur a material amount of issuance costs in connection with the debt.

The Pfizer Note was amended in March 2019 in connection with the Division to provide the lender additional accrued interest upon conversion. The amended conversion amount of the Pfizer Note was equal to the greater of a) the then outstanding principal plus accrued interest, or b) principal plus accrued interest through December 7, 2020. In connection with the March 2019 amendment, Pfizer received conditional warrants in BioAtla Holdings and Inversagen which allows Pfizer to acquire an equity interest in each of BioAtla Holdings and Inversagen upon conversion of the Pfizer Note of the Post-Division Successor. The amendment of the Pfizer Note was accounted for as a modification, which requires prospective consideration of the revised terms. The Company recognized the initial fair value of the warrants of \$0.5 million as a fee paid by the Company to the lenders, which was recorded as debt discount on the modified debt and as a capital contribution, as the warrants are written on two entities under common control that were not consolidated with the Company. The debt discount was amortized to interest expense using the effective interest method over the term of the Pfizer Note. The fair value of the conditional warrants was determined using the Option Pricing Method based on the underlying value of the assets allocated to BioAtla Holdings and Inversagen. As of December 31, 2018 and 2019, outstanding accrued interest on the Pfizer Note was \$2.5 million and \$3.3 million, respectively. As of December 31, 2018 and 2019, unamortized debt issuance costs were \$0 and \$0.3 million, respectively. The Company incurred interest expense in connection with the Pfizer Note of \$0.8 million, \$1.0 million, \$0.8 million and \$0.6 million for the years ended December 31, 2018 and 2019 and the nine months ended September 30, 2019 and 2020, respectively. As further described below, the Pfizer Note was amended and settled in connection with the Corporate Reorganization in July 2020.

2018 convertible promissory notes

In August 2018, the Company issued unsecured convertible promissory notes for an aggregate of \$5.0 million (the "2018 Notes"). The 2018 Notes accrued interest at 8.0% per annum with a maturity date in July 2023 and could not be prepaid without the consent of the note holder. Prior to amendment in March 2019 as described below, the then outstanding principal plus accrued interest under the 2018 Notes were convertible at the election of the holder into Class C preferred units at a price of \$3.394142 per unit and were automatically convertible into i) common shares upon the completion of an IPO based on the price per share paid by investors in the IPO or ii) qualified financing shares upon the completion of a qualified financing based on the price per share paid by investors in the qualified financing. The Company assessed the terms of the 2018 Notes and concluded that they were not share-settled debt, did not contain any embedded derivative features requiring bifurcation and did not contain a beneficial conversion feature. As a result, the 2018 Notes were carried at cost since the Company did not incur a material amount of issuance costs in connection with the issuance of the promissory notes.

The 2018 Notes were amended in March 2019 in connection with the Division to provide the lenders additional accrued interest upon conversion. The amended conversion amount of the 2018 Notes was equal to the greater of a) the then outstanding principal plus accrued interest, or b) principal plus accrued interest through December 7, 2020. In connection with the March 2019 amendment, the lenders received conditional warrants in

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

BioAtla Holdings and Inversagen which allows them to acquire an equity interest in each of BioAtla Holdings and Inversagen upon conversion of the 2018 Notes of the Post-Division Successor. The amendment of the 2018 Notes was accounted for as a modification, which requires prospective consideration of the revised terms. The Company recognized the initial fair value of the warrants of \$0.2 million as a fee paid by the Company to the lenders, which was recorded as debt discount on the modified debt and as a capital contribution, as the warrants were written on two entities under common control that were not consolidated with the Company. The debt discount was amortized to interest expense using the effective interest method over the term of the 2018 Notes. The fair value of the conditional warrants was determined using the Option Pricing Method based on the underlying value of the assets allocated to BioAtla Holdings. The underlying value of the assets allocated to Inversagen was immaterial.

The 2018 Notes were amended in April 2020 to add a discount to the conversion prices such that they are convertible (i) automatically into preferred stock upon a qualified equity financing, with a conversion price of 80% of the lowest purchase price per share of preferred stock paid by investors in such qualified equity financing, (ii) automatically convert into common stock upon an initial public offering, with a conversion price of 80% of the price per share of common stock paid by investors in such initial public offering, and (iii) upon the election of each note holder, into Class C preferred units, with a conversion price per share of \$2.7153136. The Company concluded that the amendment was an extinguishment and the fair value of the amended 2018 Notes was equal to the then outstanding principal and accrued interest of the 2018 Notes. As a result, the Company recognized a loss on extinguishment for the \$0.2 million of unamortized discounts at the extinguishment date. In addition, the Company assessed the terms and concluded the amended 2018 Notes: (i) were not share-settled debt, (ii) contained a redemption feature that was determined to be an embedded derivative requiring bifurcation and (iii) did not contain a beneficial conversion feature. The \$2.2 million issuance date fair value of the embedded derivative liability was recorded as a debt discount and amortized to interest expense using the effective interest method over the remaining term of the 2018 Notes.

As of December 31, 2018 and 2019, outstanding accrued interest on the 2018 Notes was \$0.1 million and \$0.5 million, respectively. As of December 31, 2018 and 2019, unamortized debt issuance costs were \$0 and \$0.2 million, respectively. The Company incurred interest expense, including coupon interest and amortization of debt discounts, in connection with the 2018 Notes of \$0.1 million, \$0.4 million, \$0.3 million, and \$0.4 million for the years ended December 31, 2018 and 2019 and the nine months ended September 30, 2019 and 2020, respectively. As further described below, the 2018 Notes were amended and settled in connection with the Corporate Reorganization in July 2020.

2019 convertible promissory notes

Between August and December 2019, the Company issued unsecured convertible promissory notes payable to various entities in an aggregate principal amount of \$4.0 million (the "2019 Notes"), of which \$1.5 million was to related parties. The 2019 Notes accrued interest at 8.0% per annum with maturity dates of five years after issuance and could not be prepaid without the consent of the note holder. The outstanding principal amount and any accrued and unpaid interest on the 2019 Notes was due and payable on the earlier to occur of (i) the maturity date, (ii) an event of default, or (iii) immediately prior to an acquisition event. The 2019 Notes were convertible (i) automatically into preferred stock upon a qualified equity financing, with a conversion price of 80% of the lowest purchase price per share of preferred stock paid by investors in such qualified equity

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

financing, (ii) automatically into common stock upon an initial public offering, with a conversion price of 80% of the price per share of common stock paid by investors in such initial public offering, and (iii) upon the election of each note holder, into Class C preferred units, with a conversion price per share of \$2.7153136. The number of shares or units issuable upon conversion is determined by dividing the conversion amount by the conversion price, with the conversion amount equal to the greater of a) the then outstanding principal plus accrued interest, or b) principal plus accrued interest through December 7, 2020.

The Company assessed the terms and concluded the 2019 Notes: (i) were not share-settled debt, (ii) contained a redemption feature that was determined to be an embedded derivative requiring bifurcation and (iii) certain of the notes contained a beneficial conversion feature because the fair value of the securities into which the 2019 Notes were convertible at the time of issuance, the Class C preferred units, was greater than the effective conversion price of the 2019 Notes. The \$0.5 million beneficial conversion feature was recorded as additional paid-in capital and a debt discount and the \$1.8 million issuance date fair value of the embedded derivative liability was recorded as a debt discount, both of which discounts were amortized to interest expense using the effective interest method over the term of the 2019 Notes.

In April and May of 2020 certain of the 2019 Notes, representing \$2.5 million of the then outstanding principal balance, were amended such that the conversion shares or units issuable upon conversion is the greater of: (i) the then outstanding principal plus accrued interest divided by \$0.86866 or (ii) the amount determined by dividing the conversion amount by the conversion price, with the conversion amount equal to the greater of a) the then outstanding principal plus accrued interest, or b) principal plus accrued interest through December 7, 2020. The amendment of the 2019 Notes was accounted for as a modification, which requires prospective consideration of the revised terms.

For the year ended December 31, 2019 and the nine months ended September 30, 2019 and 2020, the Company recognized interest expense, including coupon interest and amortization of debt discounts, in connection with the 2019 Notes of \$0.1 million, \$27,000 and \$0.3 million, respectively. As of December 31, 2019, outstanding accrued interest and unamortized debt discount on the 2019 Notes were \$0.1 million and \$2.3 million, respectively, and no principal or interest had been repaid. As further described below, the 2019 Notes were amended and settled in connection with the Corporate Reorganization in July 2020.

2020 convertible promissory notes

During March, April and May of 2020 the Company issued unsecured convertible promissory notes (the "2020 Notes") payable to various entities in an aggregate principal amount of \$2.8 million, of which \$0.5 million was to related parties. The 2020 Notes accrued interest at 8.0% per annum with maturity dates of five years after issuance. The Company assessed the terms and concluded the 2020 Notes: (i) were not share-settled debt, (ii) contained a redemption feature that was determined to be an embedded derivative requiring bifurcation and (iii) did not contain a beneficial conversion feature. The \$1.2 million issuance date fair value of the embedded derivative liability was recorded as a debt discount which was amortized to interest expense using the effective interest method over the term of the 2020 Notes. In May of 2020 certain of the 2020 Notes, representing \$0.1 million of the then outstanding principal balance, were amended such that the conversion shares or units issuable upon conversion is the greater of: (i) the then outstanding principal plus accrued interest divided by \$0.86866 or (ii) the amount determined by dividing the conversion amount by the

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

conversion price, with the conversion amount equal to the greater of a) the then outstanding principal plus accrued interest, or b) principal plus accrued interest through December 7, 2020. The amendment of the 2020 Notes was accounted for as a modification, which requires prospective consideration of the revised terms.

For the nine months ended September 30, 2020, the Company recognized interest expense, including coupon interest and amortization of debt discounts, in connection with the 2020 Notes of \$0.1 million. As further described below, the 2020 Notes were amended and settled in connection with the Corporate Reorganization in July 2020.

Amendment and settlement of convertible notes

As a condition of the closing of the Series D financing in July 2020, the Pfizer Note, 2018 Notes, 2019 Notes and 2020 Notes (and together, the "Convertible Notes") were amended to settle the Convertible Notes into 59,164,808 Class D units of Himalaya Parent LLC. As of the settlement date, the aggregate outstanding principal and accrued interest of the Convertible Notes was \$21.8 million and \$4.7 million, respectively. The Pfizer Note converted into Class D units at a conversion price of \$0.51554931 and the 2018 Notes and 2019 Notes converted into Class D units at a conversion price of \$0.412439448, which is 80% of the price paid by investors in the Series D financing. As of the July 10, 2020 settlement date, the Convertible Notes had a carrying value of \$27.9 million, including related accrued interest, embedded derivatives and unamortized debt discounts. The fair value of the Class D units of Himalaya Parent LLC issued to the noteholders in exchange for the Convertible Notes was \$30.6 million, resulting in a loss on extinguishment of convertible debt of \$2.7 million. The fair value per unit of the Class D units of Himalaya Parent LLC was based on the fair value per share paid by investors in the Company's Series D financing.

Other debt

On April 22, 2020, the Company received proceeds from a loan in the amount of \$0.7 million (the "PPP Loan") from City National Bank, as lender, pursuant to the Paycheck Protection Program ("PPP") of the CARES Act. The PPP Loan is evidenced by a promissory note (the "Note"), which contains customary events of default relating to, among other things, payment defaults and breaches of representations, warranties or terms of the PPP Loan documents. The PPP Loan matures on April 22, 2022 and bears interest at an annual rate of approximately 1%. Beginning on November 22, 2020, the Company is required to make 18 equal monthly payments of principal and interest. The PPP Loan may be prepaid by the Company at any time prior to maturity with no prepayment penalties. The proceeds from the PPP Loan may only be used for payroll costs (including benefits), rent and utility obligations, and interest on certain of the Company's other debt obligations.

All or a portion of the PPP Loan may be forgiven by the U.S. Small Business Administration ("SBA") upon application by the Company beginning 60 days but not later than 120 days after loan approval and upon documentation of expenditures in accordance with the SBA requirements. In the event the PPP Loan, or any portion thereof, is forgiven pursuant to the PPP, the amount forgiven is applied to outstanding principal. If it is determined that the Company was not eligible to receive the PPP Loan, the Company may be subject to penalties and could be required to repay the PPP Loan in its entirety.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

5. Commitments and contingencies

Operating leases

In August 2014, the Company entered into a non-cancelable operating lease, as amended, with Alliance Diversified Holdings LLC (“Alliance Holdings”), a related party (see Note 9). The lease included certain tenant improvement allowances, rent escalations and additional charges for common area maintenance and other costs. The lease commenced in December 2014 and expired in February 2018.

In June 2017, as amended in January 2019, the Company entered into a non-cancellable operating lease for its corporate headquarters and laboratory space in San Diego, California. The lease commenced in January 2018, the period the Company gained access to the leased space and began recognizing rent expense. The lease expires in July 2025 and the Company has an option to extend the term of the lease for an additional five years. The lease includes certain rent abatement, rent escalations, tenant improvement allowances and additional charges for common area maintenance and other costs. Rent expense for the years ended December 31, 2018 and 2019 and the nine months ended September 30, 2019 and 2020 was \$0.9 million, \$1.1 million, \$0.8 million and \$1.3 million, respectively.

Expected future minimum payments under the non-cancelable operating lease are as follows (in thousands):

Years ending December 31:	Operating lease
2020	\$ 1,192
2021	1,374
2022	1,555
2023	1,636
2024	1,685
Thereafter	845
	<u>\$ 8,287</u>

Contingencies

From time to time, the Company may be subject to various claims and suits arising in the ordinary course of business. The Company is not currently a party to any legal proceedings the outcome of which the Company believes, if determined adversely to the Company, would individually or in the aggregate have a material adverse effect on the Company's business, operating results or financial condition.

6. Convertible preferred stock and members'/stockholders' deficit

Subsequent to the Corporate Reorganization, BioAtla, Inc. is a Delaware corporation with the authority to issue 350,000,000 shares of common stock, \$0.0001 par value, and 200,000,000 shares of preferred stock, \$0.0001 par value as further described below.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Convertible Preferred Stock

The Company's convertible preferred stock has been classified as temporary equity in the accompanying consolidated balance sheets in accordance with authoritative guidance for the classification and measurement of potentially redeemable securities whose redemption is based upon certain change in control events outside of the Company's control, including liquidation, sale or change of control of the Company. Because these change in control events are not probable, the Company has not adjusted the carrying values of the convertible preferred stock to redemption value.

Series D financing

On July 13, 2020, BioAtla, Inc. entered into a Series D Preferred Stock Purchase Agreement (the "Series D SPA"), pursuant to which it issued 140,626,711 shares of Series D convertible preferred stock at \$0.51554931 per share, for aggregate cash proceeds of \$72.5 million. The Company incurred \$4.3 million of issuance costs.

Description of securities of Delaware corporation

Dividends

No dividends may be declared, paid or set aside on common stock unless the holders of Series D preferred stock then outstanding shall first receive, or simultaneously receive, an equivalent dividend on as-converted to common stock basis.

Liquidation preferences

Upon any liquidation, dissolution or winding up of the Company, the Series D preferred stock has a liquidation preference of \$0.77 per share, plus any declared but unpaid dividends. Thereafter, any remaining assets of the Company will be distributed to the holders of common stock on a pro rata basis. The Series D preferred stock would be deemed converted to common stock in the event such conversion would result in a liquidation payment greater than its liquidation preference.

Conversion

The shares of Series D preferred stock are convertible into an equal number of shares of common stock, at the option of the holder, subject to certain anti-dilution adjustments and down round adjustments upon the issuance of certain securities for a consideration per share less than the then effective Series D preferred stock conversion price. Each share of Series D preferred stock is automatically converted into common stock upon either (a) the closing of the sale of shares of common stock to the public at a price per share of at least \$1.03, in a firm-commitment underwritten public offering pursuant to an effective registration statement under the Securities Act of 1933, as amended, resulting in at least \$50.0 million of gross proceeds to the Company and in connection with such offering the common stock is listed for trading on the Nasdaq Stock Market or the New York Stock Exchange or (b) upon the vote of the holders of at least a majority of the outstanding shares of the Series D preferred stock voting together as a single class.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Voting rights

The holder of each share of Series D preferred stock is entitled to one vote for each share of common stock into which it would convert and to vote as one class with the common stockholders. Certain matters require the vote of the holders of at least a majority of the Series D preferred stock, including material changes to the corporate structure, capitalization and the incurrence of certain corporate obligations.

Operating agreement

Prior to the Corporate Reorganization, the Company's operating agreement, as amended and restated, provided for classes of units, allocation of profits and losses, distribution preferences, other member rights and management of the LLC. The operating agreement designated Class A units, Class B units and Class C preferred units. The Class B units and Class C preferred units were non-voting, except as required by law. The Class B units were liability awards pursuant to authoritative guidance and, as such, were reported at fair value outside of members' deficit. Members were limited in their liability to their capital contributions.

Conversion

Class C preferred units were convertible, at the option of the member, into Class A units on a one-for-one basis, subject to adjustment for any split, reverse split, distribution or other event affecting the Class C preferred units. The Class C preferred units would have automatically converted into Class A units upon the earlier to occur of (i) immediately prior to the closing of the Company's first firm commitment underwritten public offering of its common equity and (ii) the vote of at least two-thirds of the Class C preferred units outstanding.

Distributions

Distributions, other than tax distributions, were to be made to each unit holder based on such unit holder's pro-rata share of total outstanding units; however, Class B units were subject to threshold limitations.

Preferred return

The preferred return was an amount separately determined for each Class C member equal to (i) the cumulative return that would have been earned from the date(s) of such Class C members' capital contribution in respect to their Class C preferred units at a rate of 10% per annum, simple interest, on the Class C issue price, plus (b) such Class C member's capital contributions. As of December 31, 2018 and 2019, the aggregate Class C preferred return was \$106.2 million and \$114.3 million, respectively.

Liquidation

The proceeds from a liquidation or winding up of the Company would have been distributed in the following order and priority:

- First, to the payment of creditors of the Company;
- Second, to the creation of any reserves that the managers deem reasonably necessary for any contingent or unforeseen liabilities or obligations of the Company;

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

- Third, to the repayment of any outstanding loans made by any member of the Company;
- Fourth, to the Class C members, in proportion to their unreturned preferred return, until each Class C member has received total distributions equal to such Class C member's preferred return; and
- Thereafter, to each member pro rata according to the percentage derived by dividing the number of outstanding units (excluding Class C preferred units already distributed) owned by such member by the total number of outstanding units (excluding Class C preferred units already distributed) owned by all members; however, Class B units are subject to threshold limitations.

Warrants

The Company has issued the warrants described below in connection with certain advisory services. The then fair value of these warrants will be recognized upon the completion of a public offering since they do not vest until the completion of such offering, and will be recognized as a reduction to revenue since the warrants are consideration paid to an affiliate of a related party collaborator. Upon adoption of ASU No. 2018-07 on October 1, 2020, the measurement date of these warrants became fixed in accordance with the guidance. As of October 1, 2020, the fair value of these warrants was nominal as they were deeply out-of-the-money.

In February 2016, the Company issued a warrant to Genius Earn Limited, an affiliate of Sinobioway. The warrant is exercisable for 4,419,379 shares of the Company's common equity at a price of \$6.788284 per share. The warrant becomes exercisable for a period of 365 days, beginning on the first business day after the closing of a public offering by the Company.

In March 2016, the Company issued warrants to Harmonia (China) Holding Limited ("Harmonia"), an affiliate of Sinobioway, after assignment of rights to the warrants by Green Valley Industries Limited ("Green Valley"). The warrants are exercisable for an aggregate of 2,946,252 shares of the Company's common equity at a price of \$6.788284 per share. The warrants become exercisable for a period of 365 days, beginning on the first business day after the closing of a public offering by the Company.

In June 2016, the Company issued warrants to Harmonia, an affiliate of Sinobioway, after assignment of rights to the warrants by Green Valley. The warrants are exercisable for an aggregate of 1,964,168 shares of the Company's common stock at a price of \$10.18246 per share. The warrants become exercisable for a period of 450 days, beginning on the first business day after the closing of a public offering by the Company.

Noncontrolling interests

In December 2018, the Company issued a noncontrolling interest in HTKY to Sinobioway and affiliates in form of ordinary shares in connection with the termination of its Collaboration and License Agreement (see Note 8). In addition to the ordinary shares issued to Sinobioway and affiliates, certain employees and shareholders of the Company purchased 19,000,000 ordinary shares of HTKY for an aggregate purchase price of \$19,000, of which 5,000,000 were repurchased for \$5,000 in March 2019. As of December 31, 2018 and 2019, the Company holds all of the outstanding HTKY preferred equity, consisting of 97,183,256 Series B convertible preference shares, and 1,000 ordinary shares. The Series B convertible preference shares have a liquidation preference equal to the greater of \$1.00 per share, plus declared and unpaid dividends, or the if-converted value, and pay

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

non-cumulative dividends in preference to the holders of ordinary shares at an annual rate of 7% of the purchase price per share when, as and if declared by the board. The net income (loss) of HTKY will be allocated to the ordinary shareholders on a pro rata basis. However, any net income will initially be allocated to the preference shares until the liquidation preference is met. Thereafter, preference shares will only be allocated dividends declared by the board of directors of HTKY. For the year ended December 31, 2019, substantially all of the \$61,000 net loss of HTKY was allocated to the noncontrolling interest. No material net losses were allocated to the noncontrolling interest for the year ended December 31, 2018.

7. Profits interest incentive plan

Prior to the Corporate Reorganization in July 2020, the Company maintained a Profits Interest Incentive Plan (the "Plan") for selected employees, consultants and other service providers. In connection with the Corporate Reorganization, Himalaya Parent LLC assumed the Plan and the \$1.0 million fair value of the liability was reclassified to additional paid-in capital. As of December 31, 2019, the Company had reserved a total of 16,665,977 Class B units for issuance under the Plan. In accordance with the Company's operating agreement, in the event the total outstanding Class B units represented in excess of 17.5% of the Company's total units outstanding, the percentage interest in the Company represented by the Class B units would be re-adjusted to 17.5%. The Class B units generally vested over four years, were subject to continued service requirements, and only provide the participants with benefits (in the form of distributions) if the distributions from BioAtla exceed specified threshold values. Generally, upon termination of services, all unvested Class B units were forfeited to the Company and the Company had the right, but not the obligation, to repurchase the vested Class B units within two years at the termination date fair value. The Class B unit repurchase would be settled in cash, at all times at the option of the Company, and the holder did not have the right to put the Class B units to the Company under any condition. Vested Class B units that are neither repurchased by the Company nor forfeited remain subject to the terms of the Company's operating agreement. The Class B units were not subject to sale, assignment, transfer, pledge, or allowed to be otherwise encumbered or disposed of without prior written consent of the Company. As of December 31, 2019, no Class B units had been repurchased. As of December 31, 2019, there were 2,187,028 Class B units available for future issuance under the Plan.

Activity under the Plan is summarized as follows:

Outstanding at December 31, 2017	8,764,304
Granted	4,230,000
Cancelled	(127,035)
Outstanding at December 31, 2018	12,867,269
Granted	2,277,586
Cancelled	(665,906)
Outstanding at December 31, 2019	14,478,949
Cancelled	(170,836)
Assumption of Plan by Himalaya Parent LLC on July 10, 2020	(14,308,113)
Outstanding at September 30, 2020	—

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Vesting of Class B units under the Plan is summarized as follows:

Unvested at December 31, 2017	3,292,922
Granted	4,230,000
Cancelled	(127,035)
Vested	(1,403,786)
Unvested at December 31, 2018	5,992,101
Granted	2,277,586
Cancelled	(665,906)
Vested	(1,445,453)
Unvested at December 31, 2019	6,158,328
Cancelled	(170,836)
Vested	(1,310,807)
Assumption of unvested Class B units by Himalaya Parent LLC on July 10, 2020	(4,676,685)
Unvested at September 30, 2020	—

The Class B units were liability awards pursuant to authoritative guidance, which required the Company to record a liability based on the fair value of the Class B units as of each reporting period. For the years ended December 31, 2018 and 2019 and July 10, 2020, the fair value of the liability awards was determined based on the Company's estimated enterprise value, which is allocated based on a hybrid model that, in addition to the option pricing model, considers the Company's expected IPO. Under the option pricing method, units are valued by creating a series of call options with exercise prices based on the liquidation preferences and conversion terms of each unit class.

In connection with the Division, the distribution thresholds that must be achieved before the Class B unit holders were entitled to distributions were adjusted, resulting in a \$0.9 million reduction to the aggregate profits interest liability between the Predecessor and the Post-Division LLCs at the date of the Division. The thresholds of the Post-Division Successor were changed in order to reflect the impact of the assets assigned to BioAtla Holdings and Inversagen in the Division. For the year ended December 31, 2019, the profits interest liability decreased \$7.4 million, including the \$0.9 million reduction described above, and \$0.8 million recognized as additional paid-in capital related to the fair value of vested Class B units assumed by BioAtla Holdings and Inversagen in connection with the Division. In addition, the Company recognized stock-based compensation expense and additional paid-in capital of \$0.2 million related to the fair value of the unvested Class B units assumed by BioAtla Holdings and Inversagen in connection with the Division since these Class B unit holders are employees of the Post-Division Successor, and were not expected to provide services to BioAtla Holdings or Inversagen.

8. Collaboration, license and option agreements

Global Co-Development and Collaboration Agreement with BeiGene

In April 2019, the Company entered into a Global Co-Development and Collaboration agreement (the "BeiGene Collaboration") with BeiGene, Ltd. and BeiGene Switzerland GmbH (collectively "BeiGene"), a commercial-stage biopharmaceutical company, for the development, manufacturing and commercialization of the Company's investigational CAB CTLA-4 antibody (BA3071).

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

The Company will co-develop the CAB-CTLA-4 antibody to reach defined early clinical objectives (“POC Milestone”), whereby the Company will perform the development activities (“Development Services”) and BeiGene will reimburse the Company for a portion of the costs incurred by the Company for these Development Services subsequent to the filing of an Investigational New Drug Application (“IND”). Following the POC Milestone, BeiGene will then lead the parties’ joint efforts to develop the product candidate and be responsible for global regulatory filings and commercialization. Subject to the terms of the agreement, BeiGene will hold a co-exclusive license with the Company to develop and manufacture the product candidate globally and an exclusive license to commercialize the product candidate globally. BeiGene will be responsible for all costs of development, manufacturing and commercialization in China, parts of the Middle East and Asia (excluding Japan), Australia and New Zealand (the “BeiGene Territory”), and the parties will share development and manufacturing costs and commercial profits and losses upon specified terms in the rest of the world that are not part of the BeiGene Territory (the “ROW”). In December 2019, the agreement was amended to clarify certain existing terms that did not change the performance obligations under the original agreement.

Subject to certain opt-out clauses, the BeiGene Collaboration shall remain in effect until the earlier of ten years following commercial sale or upon such time that the parties cease pursuing commercialization. Unless terminated early, at the expiration date BeiGene retains all licensing rights in the applicable territories. BeiGene may terminate the BeiGene Collaboration at any time after the one-year anniversary of the agreement subject to 90 days written notice, or any time subject to 45 days’ notice if it is determined that the proof of concept milestone or technological or scientific feasibility will not be achieved. The BeiGene Collaboration also contains customary provisions for termination by either party, including the event of breach of the BeiGene Collaboration, subject to cure.

In 2019, BeiGene paid the Company an upfront non-refundable payment of \$20.0 million and paid the Company \$5.0 million for the reimbursement of manufacturing costs. Additionally, the Company is eligible to receive up to \$249.0 million of variable consideration for subsequent development and regulatory milestones globally and commercial milestones in the BeiGene Territory. Finally, the Company is eligible to receive tiered royalties ranging from the mid-single digits to the mid-double digits based on net sales in the BeiGene Territory.

The Company concluded that the BeiGene Collaboration is a contract with a customer and applied relevant guidance from Topic 606 through reaching the POC milestone as the licenses to intellectual property granted to BeiGene and the obligation to perform research and development services are outputs of the Company’s ongoing activities. Following achievement of the POC milestone, the Company will apply ASC Topic 808, Collaborative Arrangements, because the BeiGene Collaboration is no longer a contract with a customer since all performance obligations under the contract will be fulfilled.

The Company identified material promises in the BeiGene Collaboration through POC milestone, consisting of the licenses described above and the Development Services. It was determined that the licenses are not distinct from the development services resulting in a single performance obligation.

In accordance with Topic 606, the Company determined the transaction price of the agreement is limited to the \$25.0 million received, and excluded the variable consideration of expense reimbursements, milestone payments and royalties as they are fully constrained. The expense reimbursements are included in the transaction price in the reporting period the Company concludes it is probable that inclusion of such amounts in the transaction price will not result in a significant reversal in revenue recognized. As part of the Company’s

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

evaluation of the milestone constraints, the Company determined the achievement of such milestones are contingent upon success in future developments, regulatory approvals and commercial activities which are not within its control and are uncertain at this stage. Variable consideration related to royalties will be recognized when the related sales occur.

The Company recognizes revenue over time using an input method, which the Company considers and appropriate measure of overall progress, based on actual costs incurred compared to estimated total costs expected to be incurred to fulfill its performance obligations. For the year ended December 31, 2019 and the nine months ended September 30, 2019 and 2020, the Company recognized revenue of \$4.7 million, \$2.5 million and \$0.4 million, respectively, related to the BeiGene collaboration. As of December 31, 2019 and September 30, 2020, the Company had \$20.2 million and \$19.8 million, respectively, of related deferred revenue, of which \$1.4 million and \$19.8 million, respectively, is classified as current. The deferred revenue is expected to be earned over an estimated remaining service period of 3.2 years. In October 2020, the BeiGene collaboration was amended (see Note 12).

Collaboration and License Agreement with Sinobioway

In March 2015, the Company, through its subsidiary HTHK, entered into a Collaboration and License Agreement with Sinobioway to develop and commercialize CAB Antibody products in China, Hong Kong, Macau, and Taiwan (the "Territory"). The agreement was amended several times between 2015 and 2017 and was terminated in December 2018.

Under the terms of the agreement, Sinobioway was granted the following rights in the Territory: (1) an exclusive license to certain know-how related to selected CAB antibodies and indications in the Territory, and (2) a non-exclusive license of certain patents to the extent related to the manufacture and formulation of selected CAB antibodies in the Territory. As consideration for the four Initial CAB Antibodies, Sinobioway paid the Company \$40.0 million.

The Company concluded that the agreement contained two units of accounting: 1) licenses and know-how for each of the four Initial CAB Antibodies, and 2) the obligation to present three CAB antibody indications quarterly after the one-year anniversary of the agreement. The arrangement consideration was allocated to the units of accounting based on the relative selling price method. Based on the results of the Company's analysis, the \$40.0 million in upfront payments under the agreement was allocated as follows: i) \$4.5 million to each Initial CAB Antibody which includes the licensed rights, transfer of know-how, and animal efficacy study data, and ii) \$22.0 million for the obligation to develop and provide three CAB antibody indications to Sinobioway quarterly beginning on the anniversary of the agreement. Revenue allocated to the Initial CAB Antibody units of accounting was recognized when each Initial CAB Antibody and the related animal efficacy study data were delivered to Sinobioway. Revenue allocated to the obligation to develop and provide CAB antibody indications would be recognized on a ratable basis over the estimated service period of 2.3 years.

The agreement was amended in May 2017, whereby Sinobioway paid the Company a payment of \$5.0 million related to the future selection of additional CAB antibodies under the agreement. The Company's obligations and the deliverables for the future CAB antibodies to be selected were similar to those for the previous four CAB antibodies selected. The Company allocated the arrangement consideration for the future CAB antibodies to the

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

units of accounting based on the relative selling price method limited to amounts that were fixed and determinable. Revenue allocated to the obligation to develop and provide CAB antibody candidates will be recognized on a ratable basis over the estimated service period of 1.8 years.

In 2018, the Company entered into an agreement to terminate its Amended and Restated Collaboration Agreement with Sinobioway (the "Termination Agreement"). Under the Termination Agreement, Sinobioway terminated its rights to develop and commercialize CAB Antibody products, including the four Initial CAB Antibodies, in the Territory and the Company will no longer be obligated to present new CAB Antibodies to Sinobioway for selection, funding, and development in the Territory. As consideration for the Termination Agreement, the Company issued a noncontrolling interest in Himalaya Therapeutics SEZC to Sinobioway in the form of 34,976,744 ordinary shares with a fair value of \$0.

In March 2018, as it has no further deliverables or performance obligations upon the effectiveness of the Termination Agreement, the Company recognized all remaining deferred revenue under the agreement. The Company recognized collaboration revenue of \$10.5 million for the year ended December 31, 2018 and had deferred revenue of \$0 as of December 31, 2018.

License and Option Agreement with Pfizer, Inc.

The Company was party to a license and option agreement with Pfizer that was terminated in December 2019. Under the agreement, the parties granted to each other the exclusive option to obtain an exclusive, worldwide, sublicensable, transferable license to develop and commercialize a certain number of Antibody Drug Conjugates ("ADC") CAB antibodies, with such ADC CAB antibodies to be jointly selected by the parties. As of December 2019, no ADC CAB Antibodies had been optioned by either party.

Pfizer paid the Company \$1.0 million in December 2015 upon execution of the agreement. The Company had identified a single deliverable at inception of the agreement, which consisted of the company's obligation to nominate targets, perform certain preclinical research, efficacy studies and related reports ("research and development services"). These services were prerequisites to Pfizer's exercise of Pfizer's substantive options under the agreement. As such, the Company recognized revenue for the \$1.0 million of consideration received over the four-year period over which it delivered its research and development services. In connection with the license and option agreement with Pfizer, the Company recognized collaboration revenue of \$0.2 million and \$0.5 million for the years ended December 31, 2018 and 2019, respectively, and had deferred revenue of \$0.5 million and \$0, respectively, as of December 31, 2018 and 2019.

9. Other related party transactions

Biotech Investment Group, LLC

Prior to the Corporate Reorganization, Biotech Investment Group, LLC ("BIG"), was a principal owner, related party of the Company and affiliated with Alliance Holdings, BioDuro, LLC ("BioDuro") and Biotech Investment Group II LLC ("BIG II"). Subsequent to the Corporate Reorganization, BIG is no longer a principal owner and, as a result, neither BIG nor its affiliates are related parties of the Company.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Alliance Diversified Holdings

During the year ended December 31, 2018, the Company leased its facility from Alliance Holdings. Rent expense, including common area maintenance, during the year ended December 31, 2018 was \$0.1 million. As of December 31, 2018, the Company had no outstanding accounts payable and accrued expenses due to Alliance Holdings. The lease agreement with Alliance Holdings was completed in February 2018.

BioDuro

BioDuro is a contract research organization that provides services to the Company. For the years ended December 31, 2018 and 2019, the Company incurred expenses of \$2.4 million and \$1.9 million, respectively, in connection with services provided by BioDuro. As of December 31, 2018 and 2019, the Company had outstanding accounts payable and accrued expenses due to BioDuro in the aggregate amount of \$0.5 million and \$0.4 million, respectively. During 2019, an affiliate of BIG sold a majority interest in BioDuro to an unaffiliated entity. Effective January 1, 2020, BioDuro is no longer considered a related party of the Company.

Biotech Investment Group II LLC

BIG II loaned the Company \$0.5 million under the terms of the 2019 Notes described in Note 4 above. As of December 31, 2019, the Company had outstanding 2019 Notes due to BIG II in the amount of \$0.5 million and accrued interest payable to BIG II of \$11,000. For the year ended December 31, 2019 and the nine months ended September 30, 2019 and 2020, the Company recognized interest expense (including amortization of debt discounts) of \$20,000, \$1,000 and \$42,000, respectively on outstanding 2019 Notes payable to BIG II.

Dr. Jay Short and Carolyn Anderson Short

Dr. Jay Short and Carolyn Anderson Short, principal owners and officers of the Company, loaned the Company \$1.0 million and \$0.5 million, respectively, under the terms of the 2019 Notes and 2020 Notes described in Note 4 above. As of December 31, 2019, the Company had outstanding 2019 Notes due to Dr. Jay Short and Carolyn Anderson Short in the amount of \$1.0 million and accrued interest payable to Dr. Jay Short and Carolyn Anderson Short of \$16,000. For the year ended December 31, 2019 and the nine months ended September 30, 2019 and 2020, the Company recognized interest expense (including amortization of debt discounts) of \$32,000, \$7,000 and \$0.1 million, respectively, on outstanding 2019 Notes and 2020 Notes payable to Dr. Jay Short and Carolyn Anderson Short. The 2019 Notes and 2020 Notes payable to Dr. Jay Short and Carolyn Anderson Short were settled in connection with the Corporate Reorganization in July 2020.

F1 Oncology, Inc. and F1 Oncology SEZC

The Company is a named party to a lease where F1 Oncology SEZC, a subsidiary of F1 Oncology, is the primary tenant. F1 Oncology SEZC pays the landlord directly for all payments due under the lease and is reimbursed by the Company for its share of the payments. For the years ended December 31, 2018 and 2019, the Company expensed \$20,000 and \$15,000, respectively, for its share of payments due under the lease. In addition, the Company expensed \$10,000 related to amendment of the license agreement described in Note 11. As of December 31, 2018 and 2019, the Company had outstanding accounts payable and accrued expenses due to F1

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Oncology in the aggregate amount of \$5,000 and \$0, respectively. As of December 31, 2019, the Company and F1 Oncology are no longer related parties since none of the Post-Division LLCs own any common or preferred stock of F1 Oncology and have no ongoing contractual relationships other than the license agreement described below (see Note 11).

Inversagen, LLC

Inversagen was formed in conjunction with the LLC Division. On March 15, 2019, the Company entered into an Exclusive License Agreement with Inversagen (the "Inversagen License"). Under the terms of the agreement, Inversagen acquired the rights to CAB-antibodies for the field of diseases associated with aging, outside of cancer, and a immuno-oncology antibody. The Company may perform development services under the agreement and will be reimbursed by Inversagen for its costs. Commencing on the first commercial sale of the CAB-antibodies and immuno-oncology antibody subject to the Inversagen License, Inversagen will pay the Company milestone payments and royalties, which represent a variable interest held by the Company. On July 7, 2020, the Company and Inversagen entered into the First Amendment to Exclusive License Agreement ("Amended Inversagen License"), which grants the Company an option for a period of 10 years to acquire the immuno-oncology antibody in return for royalty payments in the low-single digits during the applicable royalty term. No payments have been made to date.

Inversagen has only nominal assets and liabilities and is a VIE as the entity lacks sufficient equity to finance its activities without additional subordinated financial support. The Company does not consolidate Inversagen as it is not the primary beneficiary; Inversagen License and the Amended Inversagen License did not and do not provide the Company with any decision-making power over the activities that are most significant to the entity's economic success, such as the direction of its development efforts or the search for or terms of any future financing arrangements. The Company has no equity interest in Inversagen, and no exposure to its losses. Inversagen is currently inactive, and the Company has not provided any services to Inversagen, has not provided any support to Inversagen and has no obligation to do so, and Inversagen's creditors have no recourse to the general credit of the Company. The Company does not have any assets or liabilities associated with its variable interest in Inversagen at December 31, 2019 or September 30, 2020.

Inversagen is a related party of the Company. Dr. Jay Short and Carloyn Anderson Short serve as managers of Inversagen.

Himalaya Therapeutics SEZC

Prior to the Corporate Reorganization, Himalaya Therapeutics SEZC met the definition of a VIE under ASC 810-10, as the entity did not have enough equity to finance its activities without additional subordinated financial support. The Company consolidated Himalaya Therapeutics SEZC as the primary beneficiary, as it had (i) the power to direct activities of a VIE that most significantly impact the VIE's economic performance and (ii) the right to receive benefits from the VIE that could potentially be significant to the VIE, resulting from its control of the board of directors, and voting control of the entity via a voting agreement among its shareholders, and its equity holdings. The Company was not obligated to provide financial support to Himalaya Therapeutics SEZC. Himalaya Therapeutics SEZC's creditors had no recourse in the general credit of the Company. Himalaya Therapeutics SEZC held intellectual property related to certain CAB Antibodies under an

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

Exclusive Rights Agreement with the Company dated December 20, 2018. As of December 31, 2019, Himalaya Therapeutics SEZC had no material operations, did not have any employees and the carrying value of its assets and liabilities was nominal.

On January 1, 2020, the Company entered into an Amended and Restated Exclusive Rights Agreement (the “Amended Rights Agreement”) with Himalaya Therapeutics SEZC. Under the terms of the Amended Rights Agreement, Himalaya Therapeutics SEZC acquired the rights to 10 CAB-antibodies for the territory of China, Macao, Hong Kong and Taiwan, global rights to a CAB-HER2-bispecific-antibody and global co-development rights with us to an IL-22 non-CAB-antibody. Payments to the Company may include upfront payments, milestone payments and double digit royalties, which represent a variable interest held by the Company, but no payments have been made to the Company to date.

As part of the Corporate Reorganization, Himalaya Therapeutics SEZC was distributed to Himalaya Parent LLC at the carrying value of its assets and liabilities, which were nominal, and no gain or loss was recorded on the transaction in the Company’s financial statements for the nine months ended September 30, 2020. Himalaya Therapeutics SEZC continues to be a variable interest entity as it does not have sufficient equity to finance its activities without additional subordinated financial support. The Company is not obligated to provide financial support to Himalaya Therapeutics SEZC. The Company is not the primary beneficiary of Himalaya Therapeutics SEZC, however, as the Amended Rights Agreement does not provide BioAtla, Inc. with the power to direct activities of a VIE that most significantly impact the VIE’s economic performance, such as decision-making power over the direction of its development efforts or the search for or terms of any future financing arrangements. The Company does not have any assets or liabilities recorded at September 30, 2020 associated with its variable interest in Himalaya Therapeutics SEZC, and has no exposure to Himalaya Therapeutics SEZC losses. The Company does not have a variable interest in Himalaya Parent LLC.

Himalaya Therapeutics SEZC is a related party whose controlling shareholder is Himalaya Parent LLC. Dr. Jay Short and Carolyn Anderson Short serve as directors of Himalaya Therapeutics SEZC, and Carolyn Anderson Short serves as an officer of such entity.

BioAtla Holdings, LLC

Effective January 1, 2020, the Company entered into an Exclusive License Agreement (the “BioAtla Holdings License”) with BioAtla Holdings. Under the terms of the agreement, BioAtla Holdings acquired the rights to CAB antibodies for certain targets in the field of Adoptive Cell Therapy (CAR-T format) in exchange for potential royalty payments on future net sales. On July 7, 2020, the Company and BioAtla Holdings entered into the First Amendment to Exclusive License Agreement (the “Amended BioAtla Holdings License”), which grants the Company an option for a period of 10 years to acquire the ACT Preparations and ACT Treatments in return for royalty payments in the low-single digits during the applicable royalty term. The Company has not exercised its option and no payments have been made to date under these agreements.

In addition, effective January 1, 2020, the Company entered into a Royalty Sharing Agreement whereby the Company agreed to share with BioAtla Holdings 50% of the royalties it receives under the Amended and Restated F1 License defined and described in Note 11 below.

BioAtla Holdings is a variable interest entity as it does not have sufficient equity to finance its activities without additional subordinated financial support. The royalty payments and option to acquire assets represent

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

variable interests held by the Company in BioAtla Holdings. The Company is not the primary beneficiary of BioAtla Holdings, however, as the BioAtla Holdings License and Amended BioAtla Holdings License did not and do not provide the Company with any decision-making power over the activities that are most significant to the entity's economic success, such as the direction of its development efforts or the search for or terms of any future financing arrangements. The Company has no equity interest in BioAtla Holdings, and no exposure to its losses. BioAtla Holdings is currently inactive, and the Company has not provided any support to BioAtla Holdings and has no obligation to do so, and BioAtla Holdings' creditors have no recourse to the general credit of the Company. The Company does not have any assets or liabilities associated with its variable interests in BioAtla Holdings at December 31, 2019 or September 30, 2020.

BioAtla Holdings is a related Party of the Company. Dr. Jay Short and Carolyn Anderson Short serve as managers of BioAtla Holdings.

Himalaya Parent LLC

In connection with the Corporate Reorganization, Himalaya Parent assumed the Company's profits interest plan, including equity awards to employees of the Company. For the nine months ended September 30, 2020, the Company recognized \$24,000 of compensation cost and a related capital adjustment in connection with the assumed profits interest plan. Dr. Jay Short and Carolyn Anderson Short serve as managers of Himalaya Parent LLC.

10. 401(k) plan

The Company maintains a defined contribution 401(k) plan available to eligible employees. Employee contributions are voluntary and are determined on an individual basis, limited to the maximum amount allowable under federal tax regulations. The Company, at its discretion, may make certain matching contributions to the 401(k) plan. As of December 31, 2019 and September 30, 2020, the Company had not made any matching contributions.

11. F1 Oncology, Inc.

Exclusive License Agreement

Under an Exclusive License Agreement entered into in May 2016, the Company granted F1 Oncology and its affiliates an exclusive, worldwide, sublicensable license under certain patents and know-how controlled by the Company to develop, manufacture and commercialize Adoptive Cellular Therapy ("ACT") preparations and treatments for cancer. F1 Oncology's rights under the agreement exclude the right to grant sublicenses to third parties to discover, develop or manufacture any CAB ACT or any component of the Company's CAB ACT technology, except as used in or incorporated into F1 Oncology's ACTs for cancer. The license to F1 Oncology, which was amended in November 2017, is royalty bearing.

F1 Oncology granted the Company an exclusive, worldwide, royalty free, fully paid-up, sublicensable license under certain patents and know-how controlled by F1 Oncology and F1 Oncology's interest in technology jointly developed under the agreement to develop, manufacture and commercialize non-ACT CAB products for any indication.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

F1 Oncology is obligated to pay the Company during the royalty term, on a product-by-product basis and country-by-country basis, mid-single digit royalties based on annual net sales of certain F1 Oncology ACT products, subject to certain adjustments. The term during which F1 Oncology is obligated to pay royalties under the agreement with respect to any particular product in any particular country, will begin on the first commercial sale of such product in such country and will end on the date of expiration of the last-to-expire of certain product-related patent rights in such country. All royalties to be paid under the agreement are subject to certain adjustments. Future royalties will be recognized when earned.

Unless earlier terminated, the agreement continues in effect so long as F1 Oncology or any of its affiliates, licensees or sublicensees are developing or commercializing any F1 Oncology products in the ACT field or the Company or any of its affiliates, licensees or sublicensees are developing or commercializing any CAB products for any indication outside the ACT field. The agreement may be terminated only by the mutual written agreement of the parties.

In connection with the Exclusive License Agreement, the Company received common and preferred stock of F1 Oncology. The preferred stock was accounted for as a cost method investment and the common stock was accounted for as an equity method investment. Both the cost method investment and equity method investment had initial carrying values of zero and neither resulted in adjustments to the consolidated statements of operations for the years ended December 31, 2018 and 2019. These holdings of F1 Oncology common and preferred stock were retained by BioAtla Holdings in connection with the LLC Division.

In November 2019, the Company entered into an Amended and Restated Exclusive License Agreement with F1 Oncology (the "Amended and Restated F1 License"). The Amended and Restated F1 License curtailed the rights to certain CAB intellectual property previously licensed to F1 Oncology in exchange for a one-time, non-refundable, non-creditable license fee of \$10,000. More specifically, the Amended and Restated F1 License limits CAB ACT products to four specified targets, and BioAtla is no longer obligated to provide new targets to F1 Oncology. The Amended and Restated F1 License does not change F1 Oncology's obligation to pay BioAtla royalties on licensed products. In connection with the Amended and Restated F1 License, BioAtla Holdings sold its F1 Oncology common and preferred holdings back to F1 Oncology for consideration of \$25,000. The Company concluded that the Amended and Restated F1 License was priced at fair value and was not influenced by the pricing of the contemporaneous related party stock sale.

F1 Oncology is a VIE, and the Company has a variable interest in F1 Oncology due to its right to receive royalties during the royalty term under the Amended and Restated F1 License. As of November 2019 and through September 30, 2020, the Company has determined it is not the primary beneficiary of F1 Oncology and, as such, the Company does not consolidate F1 Oncology. The Company has no equity ownership in F1 Oncology, no representation on the F1 Oncology board of directors, and the Amended and Restated F1 License does not provide the Company with the ability to make decisions regarding the execution of business strategy that most significantly impact the economic performance of F1 Oncology. The Company has not funded and has no commitment to fund F1 Oncology's losses, and has no exposure to loss as a result of its Amended and Restated F1 License. The Company's financial statements do not include any assets or liabilities related to the Amended and Restated F1 License at December 31, 2019 and September 30, 2020.

BioAtla, Inc.

Notes to consolidated financial statements — (Continued)

(Information as of September 30, 2020 and thereafter and for the nine months ended September 30, 2019 and 2020 is unaudited)

12. Subsequent events

The Company has completed an evaluation of all subsequent events through October 5, 2020 for the financial statements as of and for the years ended December 31, 2018 and 2019 and through November 13, 2020 for the interim financial statements as of and for the nine months ended September 30, 2019 and 2020, to ensure these consolidated financial statements include appropriate disclosure of events both recognized in the consolidated financial statements and events which occurred but were not recognized in the consolidated financial statements. Except as described below or elsewhere in these consolidated financial statements, the Company has concluded that no subsequent event has occurred that requires disclosure.

Amendment of BeiGene Collaboration

In October 2020, the Company and BeiGene amended the Global Co-Development and Collaboration agreement (the “Amended BeiGene Collaboration”). Under the terms of the Amended BeiGene Collaboration, BeiGene is generally responsible for developing BA3071 and is responsible for global regulatory filings and commercialization. Subject to the terms of Amended BeiGene Collaboration, BeiGene holds an exclusive license with the Company to develop and manufacture the BA3071 candidate globally, and BeiGene is responsible for all costs of development, manufacturing and commercialization globally. The Amended BeiGene Collaboration provides that the Company is eligible to receive tiered royalties, ranging from the high-single digits to the low twenties, on sales worldwide, up to \$225.5 million in subsequent development and regulatory milestone payments globally and commercial milestones in the BeiGene territory (reduced from \$249 million under the BeiGene Collaboration), and a \$5 million milestone payment upon the completion of the Company’s amended performance obligations, including the transfer of the master cell bank for BA3071 and other know-how.

Item 13. Other expenses of issuance and distribution.

The following table sets forth the costs and expenses, other than underwriting discounts and commissions, payable by BioAtla, Inc., or the Registrant, in connection with the sale of the common stock being registered. All amounts shown are estimates except for the Securities and Exchange Commission, or SEC, registration fee, the Financial Industry Regulatory Authority, Inc., or FINRA, filing fee and the Nasdaq Global Market listing fee.

	Amount to be paid
SEC registration fee	\$ 10,910
FINRA filing fee	15,500
Nasdaq Global Market listing fee	150,000
Printing expenses	*
Legal fees and expenses	*
Accounting fees and expenses	*
Transfer agent and registrar fees and expenses	*
Miscellaneous expenses	*
Total	\$ *

* To be provided by amendment.

Item 14. Indemnification of directors and officers.

Upon the completion of this offering, the Registrant's amended and restated certificate of incorporation will contain provisions that eliminate, to the maximum extent permitted by the General Corporation Law of the State of Delaware, the personal liability of the Registrant's directors and executive officers for monetary damages for breach of their fiduciary duties as directors or officers. The Registrant's amended and restated certificate of incorporation and amended and restated bylaws will provide that the Registrant must indemnify its directors and executive officers and may indemnify its employees and other agents to the fullest extent permitted by the General Corporation Law of the State of Delaware.

Section 145 of the Delaware General Corporation Law provides that a Delaware corporation may indemnify any persons who were, are, or are threatened to be made, parties to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of such corporation), by reason of the fact that such person is or was an officer, director, employee or agent of such corporation, or is or was serving at the request of such corporation as an officer, director, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding, provided that such person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the corporation's best interests and, with respect to any criminal action or proceeding, had no reasonable cause to believe that his or her conduct was illegal. A Delaware corporation may indemnify any persons who were, are, or are threatened to be made, a party to any threatened, pending or completed action or suit by or in the right of the corporation by reason of the fact that such person is or was a director, officer, employee or agent of such corporation, or is or was serving at the request of such corporation as a director, officer, employee or agent of another corporation or enterprise. The indemnity may include expenses (including attorneys' fees) actually and reasonably incurred by

Table of Contents

such person in connection with the defense or settlement of such action or suit provided such person acted in good faith and in a manner he or she reasonably believed to be in or not opposed to the corporation's best interests except that no indemnification is permitted without judicial approval if the officer or director is adjudged to be liable to the corporation. Where an officer or director is successful on the merits or otherwise in the defense of any action referred to above, the corporation must indemnify him or her against the expenses (including attorneys' fees) actually and reasonably incurred.

The Registrant's amended and restated certificate of incorporation and amended and restated bylaws, each of which will become effective upon to the completion of this offering, provide for the indemnification of its directors and officers to the fullest extent permitted under the Delaware General Corporation Law.

Section 102(b)(7) of the Delaware General Corporation Law permits a corporation to provide in its certificate of incorporation that a director of the corporation shall not be personally liable to the corporation or its stockholders for monetary damages for breach of fiduciary duties as a director, except for liability for any:

- transaction from which the director derives an improper personal benefit;
- act or omission not in good faith or that involves intentional misconduct or a knowing violation of law;
- unlawful payment of dividends or redemption of shares; or
- breach of a director's duty of loyalty to the corporation or its stockholders.

The Registrant's amended and restated certificate of incorporation includes such a provision. Expenses incurred by any officer or director in defending any such action, suit or proceeding in advance of its final disposition shall be paid by the Registrant upon delivery to it of an undertaking, by or on behalf of such director or officer, to repay all amounts so advanced if it shall ultimately be determined that such director or officer is not entitled to be indemnified by the Registrant.

Section 174 of the Delaware General Corporation Law provides, among other things, that a director who willfully or negligently approves of an unlawful payment of dividends or an unlawful stock purchase or redemption, may be held liable for such actions. A director who was either absent when the unlawful actions were approved or dissented at the time may avoid liability by causing his or her dissent to such actions to be entered in the books containing minutes of the meetings of the board of directors at the time such action occurred or immediately after such absent director receives notice of the unlawful acts.

As permitted by the Delaware General Corporation Law, the Registrant will enter into indemnity agreements with each of its directors and executive officers, that will require the Registrant to indemnify such persons against any and all costs and expenses (including attorneys', witness or other professional fees) actually and reasonably incurred by such persons in connection with any action, suit or proceeding (including derivative actions), whether actual or threatened, to which any such person may be made a party by reason of the fact that such person is or was a director or officer or is or was acting or serving as an officer, director, employee or agent of the Registrant or any of its affiliated enterprises. Under these agreements, the Registrant is not required to provided indemnification for certain matters, including:

- indemnification beyond that permitted by the Delaware General Corporation Law;
- indemnification for any proceeding with respect to the unlawful payment of remuneration to the director or officer;
- indemnification for certain proceedings involving a final judgment that the director or officer is required to disgorge profits from the purchase or sale of the Registrant's stock;

Table of Contents

- indemnification for proceedings involving a final judgment that the director's or officer's conduct was in bad faith, knowingly fraudulent or deliberately dishonest or constituted willful misconduct or a breach of his or her duty of loyalty, but only to the extent of such specific determination;
- indemnification for proceedings or claims brought by an officer or director against us or any of the Registrant's directors, officers, employees or agents, except for (i) claims to establish a right of indemnification or proceedings, (ii) claims approved by the Registrant's board of directors, (iii) claims required by law, (iv) when there has been a change of control as defined in the indemnification agreement with each director or officer, or (v) by the Registrant in its sole discretion pursuant to the powers vested to the Registrant under Delaware law;
- indemnification for settlements the director or officer enters into without the Registrant's consent; or
- indemnification in violation of any undertaking required by the Securities Act or in any registration statement filed by the Registrant.

The indemnification agreements will also set forth certain procedures that will apply in the event of a claim for indemnification thereunder.

There is at present no pending litigation or proceeding involving any of the Registrant's directors or executive officers as to which indemnification is required or permitted, and the Registrant is not aware of any threatened litigation or proceeding that may result in a claim for indemnification.

The Registrant has an insurance policy in place that covers its officers and directors with respect to certain liabilities, including liabilities arising under the Securities Act or otherwise.

The Registrant plans to enter into an underwriting agreement which provides that the underwriters are obligated, under some circumstances, to indemnify the Registrant's directors, officers and controlling persons against specified liabilities, including liabilities under the Securities Act.

Item 15. Recent sales of unregistered securities.

The following list sets forth information regarding all unregistered securities issued and sold by the Registrant since January 1, 2017:

- (1) On May 23, 2017, pursuant to a Services and Unit Purchase Agreement, the Registrant issued and sold to Shanghai Weitong Investment Center Limited Partnership 2,946,253 Class C Preferred units as payment for advisory services to be rendered during the 24 month period following the date of the agreement.
- (2) Between January 2017 and October 2019, the Registrant granted an aggregate of 9,402,586 Profits Interest units pursuant to its profits interest plan to employees and consultants in connection with the provision of services to the Registrant.
- (3) Between July 2018 and May 2020, the Registrant issued and sold to investors convertible promissory notes for an aggregate principal amount of \$11.8 million.
- (4) On July 13, 2020, pursuant to the Series D Preferred Stock Purchase Agreement, we sold an aggregate of 140,626,711 shares of our Series D preferred stock at a purchase price of \$0.51554931 per share for an aggregate amount of \$72,500,003.82 to a group of venture capital funds.

The offers, sales and issuances of the securities described in paragraphs (1), (3), and (4) above were deemed to be exempt from registration under the Securities Act in reliance on Section 4(a)(2) of the Securities Act and

[Table of Contents](#)

Rule 506 promulgated under Regulation D promulgated thereunder as transactions by an issuer not involving a public offering. The recipients of securities in each of these transactions acquired the securities for investment only and not with a view to or for sale in connection with any distribution thereof and appropriate legends were affixed to the securities issued in these transactions. Each of the recipients of securities in these transactions was an accredited investor within the meaning of Rule 501 of Regulation D under the Securities Act and had adequate access, through employment, business or other relationships, to information about the Registrant. No underwriters were involved in these transactions.

The offers, sales and issuances of the securities described in paragraph (2) above were deemed to be exempt from registration under the Securities Act in reliance on Rule 701 in that the transactions were under compensatory benefit plans and contracts relating to compensation as provided under Rule 701, except for the issuance of 285,804 profits interest units issued to a former employee and accredited investor within the meaning of Rule 501 of Regulation D under the Securities Act, which issuance was deemed to be exempt from registration under the Securities Act in reliance on Section 4(a)(2) of the Securities Act. The recipients of such securities were the Registrant's employees, directors or consultants. The recipients of the securities described in paragraph (2) received the securities under the Registrant's Amended and Restated Profits Interest Plan. Appropriate legends were affixed to the securities issued in these transactions. Each of the recipients of securities in these transactions had adequate access, through employment, business or other relationships, to information about the Registrant.

Item 16. Exhibits and financial statement schedules.

(a) Exhibits.

See the Exhibit Index immediately preceding the signature page hereto for a list of exhibits filed as part of this registration statement on Form S-1, which Exhibit Index is incorporated herein by reference.

(b) Financial statement schedules.

No financial statement schedules are provided because the information called for is not required or is shown either in the financial statements or the notes thereto.

Item 17. Undertakings.

The undersigned Registrant hereby undertakes to provide to the underwriters at the closing specified in the underwriting agreement certificates in such denominations and registered in such names as required by the underwriters to permit prompt delivery to each purchaser.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that in the opinion of the SEC such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer, or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

[Table of Contents](#)

The undersigned Registrant hereby undertakes that:

- (a) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the Registrant pursuant to Rule 424(b) (1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.
- (b) For the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

Execution Version

EXCLUSIVE RIGHTS AGREEMENT

THIS AMENDED AND RESTATED EXCLUSIVE RIGHTS AGREEMENT (the “**Agreement**”) is effective January 1st, 2020 (the “**Effective Date**”) by and between BioAtla LLC, a Delaware limited liability company (“**BioAtla**”), Himalaya Therapeutics SEZC (formerly named BioAtla Cayman SEZC), a company organized under the laws of the Cayman Islands, having a registered office c/o International Corporation Services Ltd., P.O. Box 472, Harbour Place, 2nd Floor, 103 South Church Street, George Town, Grand Cayman KY1-1106, Cayman Islands, and Himalaya Therapeutics Hong Kong (formerly BioAtla Hong Kong Holding), having offices at 6th Floor, Alexandra House 18 Chater Road, Central Hong Kong (collectively, “**Himalaya**”).

RECITALS

WHEREAS, BioAtla has developed, and possesses intellectual property rights in and to, its proprietary Conditionally Active Biologics platform for the design and engineering of therapeutic monoclonal antibodies and other therapeutic proteins for selective conditional activation, and is the owner of CAB Antibodies (as defined below);

WHEREAS, Himalaya is a privately held biotechnology company established to develop and commercialize CAB Antibodies and other drugs in the Territory (as defined below);

WHEREAS, Himalaya desires to obtain from BioAtla, and BioAtla desires to grant to Himalaya exclusive rights to certain BioAtla Intellectual Property (defined below) and CAB Antibodies to develop and commercialize CAB Antibodies in the Territory, subject to the terms and conditions of this Agreement.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing premises and the mutual covenants contained herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, BioAtla and Himalaya hereby agree as follows:

1. DEFINITIONS

1.1 “ACT” or “Adoptive Cellular Therapy” means an immunotherapy in which (a) genetically modified lymphocytes are administered to a patient or (b) targeted gene therapy vectors that modify lymphocytes are administered to a patient. Adoptive Cellular Therapies include, but are not limited to, chimeric antigen receptor-modified T cell (“CAR T”) therapies.

1.2 “Affiliate” means, with respect to a given party, any corporation, company, partnership, joint venture, or any other entity that, directly or indirectly, through one or more intermediaries, is controlled by, controlling, or under common control with such party, as the case may be, but for only so long as such control exists. As used in this Section 1.2, “*control*” means direct or indirect beneficial ownership of more than 50% of the outstanding stock or other voting rights entitled to elect directors in any corporation, company, partnership, joint venture, or other entity; but in any country where the local law does not permit foreign equity participation of more than 50%, then such lesser percentage which is the maximum allowed to be owned by a foreign corporation in such country. For purposes of this Agreement, BioAtla and Himalaya will not be considered Affiliates of each other.

1.3 “Alliance Manager” has the meaning set forth in Section 2.8.

1.4 “Animal Proof-of-Concept” or “Animal POC” shall mean rodent tumor xenograft studies only.

1.5 “BioAtla Indemnitee” has the meaning set forth in Section 11.2.

1.6 “BioAtla Clinical Data” means clinical Data generated in connection with the clinical development of each CAB Antibody and each Product in the ROW by BioAtla.

1.7 “BioAtla Data” means any and all scientific, technical or test Data, including clinical pharmacology Data, chemistry-manufacture-controls Data (including analytical and quality control Data and stability Data), preclinical Data and clinical Data and all submissions made in association with an IND or NDA, pertaining to the CAB Antibody or Product generated by BioAtla in the ROW. BioAtla Data includes BioAtla Clinical Data.

1.8 “BioAtla Intellectual Property” means BioAtla Know-How and BioAtla Patent Rights.

1.9 “BioAtla Know-How” means, on a CAB Antibody-by-CAB Antibody and Product-by-Product basis, all Know-How (including BioAtla Data) that BioAtla Controls as of the Effective Date or during the Term, solely to the extent such Know-How is required to develop, manufacture, have manufactured, use, conduct clinical trials of, sell, have sold, and offer for sale each Product in the Territory. For avoidance of doubt, BioAtla Know-How shall not include Himalaya Know-How.

1.10 “BioAtla Patent Rights” means any and all Patent Rights that BioAtla or any of its Affiliates Controls as of the Effective Date or during the Term that Cover any BioAtla Know-How, including without limitation any such Patent Rights that Cover methods of use/treatment using a CAB Antibody composition of matter solely in the Territory (“Composition/Method of Use Patents”). For avoidance of doubt, BioAtla Patent Rights shall not include Himalaya Patent Rights.

1.11 “CAB Antibody” or “CAB Antibodies” means an Initial CAB Antibody and/or a New Option Antibody.

1.12 “CAB Antibody Formats” has the meaning set forth in Section 3.1.

1.13 “CAB Patent Rights” has the meaning set forth in Section 7.2.

1.14 “Calendar Quarter” means the period beginning on the Effective Date, and ending on the last day of the calendar quarter in which the Effective Date falls, and thereafter each successive period of three consecutive months ending on March 31, June 30, September 30, and December 31; provided that, the final Calendar Quarter shall end on the last day of the Term.

1.15 “Calendar Year” means the period beginning on the Effective Date and ending on December 31 of the calendar year in which the Effective Date falls, and thereafter each successive period of twelve consecutive months ending on December 31; provided that, the final Calendar Year shall end on the last day of the Term.

1.16 “CFDA” means the China Food and Drug Administration, or any successor agency thereto.

1.17 “Change of Control” means, with respect to BioAtla, (a) the sale of all or substantially all of BioAtla’s assets or business to any Third Party; (b) a merger, consolidation, share exchange or other similar transaction involving BioAtla and any Third Party which results in the holders of the outstanding voting securities of BioAtla immediately prior to such merger, consolidation, share exchange or other similar transaction ceasing to hold more than 50% of the combined voting power of the surviving, purchasing or continuing entity, directly or indirectly, immediately after such merger, consolidation, share exchange or other similar transaction, or (c) the acquisition by a Third Party, or group of Third Parties acting in concert, of more than 50% of the outstanding voting equity securities of BioAtla. Notwithstanding the foregoing, neither (i) a sale of BioAtla’s capital stock in a public offering or other bona fide financing transaction or (ii) a transaction solely to change the domicile of BioAtla shall constitute a Change of Control.

1.18 “Claim” has the meaning set forth in Section 11.1.

1.19 “Clinical Criteria” has the meaning set forth in Section 3.2(b).

1.20 “Clinical Data” has the meaning set forth in Section 7.1(c).

1.21 “Commercialization Plan(s)” means, with respect to a particular CAB Antibody, the written plan setting forth the activities to be performed by or on behalf of each Party, or by a Licensee (as the case may be), with respect to the commercialization of such CAB Antibody in the Territory, which plan will be agreed upon by the JDCC pursuant to Section 3.2(c) hereunder, as such plan may be amended from time to time. Each Commercialization Plan with a Licensee will also include a budget which will be comprised of actual costs incurred to date, and a projection of future costs to be incurred summarized by Calendar Quarter. The budget will be prepared in accordance with GAAP.

1.22 “Commercially Reasonable Efforts” means those efforts, consistent with the exercise of customary scientific and business practices, as applied in the pharmaceutical industry for development and commercialization activities conducted with respect to other products of similar commercial potential and market size.

1.23 “Composition/Method of Use Patents” has the meaning set forth in the definition of “BioAtla Patent Rights” above.

1.24 “Confidential Information” means any confidential or proprietary information and materials, patentable or otherwise, in any form (written, oral, photographic, electronic, magnetic, or otherwise) possessed, obtained, developed, or created by or on behalf of a party that is disclosed by or on behalf of such party or any of its Affiliates to any other party or its Affiliates.

1.25 “Control” or “Controlled” means, with respect to any Know-How, Patent Rights, New Patent Rights or other intellectual property right, the legal authority or right (whether by ownership, license or otherwise but without taking into account any rights granted pursuant to this Agreement) of a party to grant access, a license or a sublicense of or under such Know-How, Patent Rights, New Patent Rights or other intellectual property rights to another party, or to otherwise disclose proprietary or trade secret information to another party, without breaching the terms of any agreement with a Third Party, or misappropriating the proprietary or trade secret information of a Third Party. Notwithstanding the foregoing, for the purpose of defining whether intellectual property, Know-How, Patent Rights, New Patent Rights or other intellectual property rights to another party, is Controlled by a Party, if such intellectual property, Know-How, Patent Rights, New Patent Rights or other intellectual property rights to another party is first acquired, licensed or otherwise made available to such Party after the Effective Date, and if the use, practice or exploitation thereof by or on behalf of the other Party, its Affiliates or sublicensees would require the first Party to pay any additional amounts to the Third Party from which the first Party acquired, licensed or otherwise obtained intellectual property, Know-How, Patent Rights, New Patent Rights or other intellectual property rights (“Additional Amounts”), such intellectual property, Know-How, Patent Rights, New Patent Rights or other intellectual property rights shall be deemed to be Controlled by the first Party only if the other Party agrees to pay (if necessary) and does in fact pay all Additional Amounts with respect to such other Party’s use of or license.

1.26 “Costs of Development” means the cost to develop a CAB Antibody under a Development Plan, including, for example, to manufacture any CAB Antibody or Product for use in preclinical or clinical development activities as contemplated by the Development Plans (as applicable), including: (a) in the case of products and services acquired from Third Parties, payments made to such Third Parties; and (b) in the case of services performed by a party or its Affiliates, the actual costs incurred to perform those services. Actual costs shall consist of direct material and supply costs, direct labor costs, costs of licensed technologies such as any antibody-drug conjugate technology or cell lines used solely for development or commercialization activities, shipping, freight, sales tax, and overhead attributable to the CAB Antibody or Product, all calculated in accordance with GAAP. Direct material costs shall include the costs incurred in purchasing materials, including sales and excise taxes imposed thereon, customs duties and charges levied by government authorities, and all costs of packaging components. Direct labor costs shall include the fully-burdened cost of employees including salaries, payroll taxes, and benefits. Manufacturing overhead attributable to the CAB Antibody or Product shall include a reasonable allocation of indirect labor costs (not previously included in direct labor costs), a reasonable allocation of administrative costs and a reasonable allocation of facilities and other overhead costs.

1.27 “Costs of Commercialization” means the cost to commercialize a CAB Antibody under a Commercialization Plan, including: (a) in the case of products and services acquired from Third Parties, payments made to such Third Parties; and (b) in the case of services performed by a party or its Affiliates, the actual costs incurred to perform those services. Actual costs shall consist of direct material costs, direct labor costs and overhead directly attributable to the commercialization of a CAB Antibody or Product, all calculated in accordance with GAAP. Direct material costs shall include the costs incurred in purchasing materials, including sales and excise taxes imposed thereon, customs duties and charges levied by government authorities, and all costs of packaging components. Direct labor costs shall include the fully-burdened cost of employees including salaries, payroll taxes, and benefits. For clarification, under no circumstance shall any Commercialization Cost include any Costs of Development.

1.28 “Cover”, “Covering” or “Covered” means, with respect to a claim of a Patent Right and a Product, that the manufacture, use, offer for sale, sale or importation of the Product would infringe a Valid Claim of such Patent Right in the country in which such activity occurred, but for the licenses granted in this Agreement (or ownership thereof).

1.29 “Data” means any and all scientific, technical, safety or test data, including clinical pharmacology data, chemistry-manufacture-controls data (including analytical and quality control data and stability data), preclinical data and clinical data and all submissions made in association with an IND or NDA, pertaining to any CAB Antibody or Product generated by any person, including generated by or on behalf of Himalaya or its Affiliates or Licensees, or by or on behalf of BioAtla or its Affiliates with respect to any CAB Antibody or Product under a Development Plan or a Commercialization Plan, as the case may be. Data shall include the Clinical Data.

1.30 “Development Plan(s)” means, with respect to a particular CAB Antibody, the written plan setting forth the activities to be performed by or on behalf of each Party, or by a Licensee (as the case may be), with respect to the development of such CAB Antibody in the Territory, including timelines and the Clinical Criteria, which plan will be agreed upon by the JDCC pursuant to Section 3.2(b) hereunder, as such plan may be amended from time to time. Each development plan will also include a budget which will be comprised of actual costs incurred to date, and a projection of future costs to be incurred summarized by Calendar Quarter. The budget will be prepared in accordance with GAAP.

1.31 “Export Control Laws” means all applicable U.S. laws and regulations relating to (a) sanctions and embargoes imposed by the Office of Foreign Assets Control of the U.S. Department of Treasury or (b) the export or re-export of commodities, technologies, or services, including, but not limited to, the Export Administration Act of 1979, 24 U.S.C. §§ 2401-2420, the International Emergency Economic Powers Act, 50 U.S.C. §§ 1701-1706, the Trading with the Enemy Act, 50 U.S.C. §§ 1 et. seq., the Arms Export Control Act, 22 U.S.C. §§ 2778 and 2779, and the International Boycott Provisions of Section 999 of the U.S. Internal Revenue Code of 1986 (as amended).

1.32 “FCPA” means the U.S. Foreign Corrupt Practices Act (15 U.S.C. Section 78dd-1, et. seq.) as amended.

1.33 “FDA” means the U.S. Food and Drug Administration, or any successor agency thereto.

1.34 “Field” means all applications for the treatment of cancer in humans.

1.35 “First Commercial Sale” means, on a Product-by-Product and country-by-country basis, the first sale of such Product in such country for use or consumption by the general public and for which any of Himalaya or its Affiliates or Licensees has invoiced sales of Products in the Territory for which all Regulatory Approvals that are legally required in order to sell such Product in such country have been granted; in each case, provided, however, that the following shall not constitute a First Commercial Sale: (a) any sale to an Affiliate or Licensee unless the Affiliate or Licensee is the last entity in the distribution chain of the Product; (b) any use of such Product in Clinical Trials or non-clinical development activities with respect to such Product by or on behalf of Himalaya or its Affiliates or Licensees, or disposal or transfer of such Product or for a bona fide charitable purpose; and (c) compassionate use, in each case (a) – (c) for which no payment is received by Himalaya, its Affiliates or Licensees.

1.36 “GAAP” means generally accepted accounting principles in the United States, or internationally, as appropriate, consistently applied and means the international financial reporting standards (“IFRS”) at such time as IFRS becomes the generally accepted accounting standard and applicable laws permit that a party use IFRS.

1.37 “GC” means the People’s Republic of China, and the Special Administrative Regions of Hong Kong and Macao, and Taiwan.

1.38 “Global Transaction” means any licensing or other transaction in which a Third Party acquires, directly or indirectly, the rights to develop and commercialize the applicable Product in the Territory and the ROW.

1.39 “Global Transaction Summary” has the meaning set forth in Section 7.9.

1.40 “Himalaya Indemnitee” has the meaning set forth in Section 11.1.

1.41 “Himalaya Know-How” means all Know-How that Himalaya or any of its Affiliates Controls during the Term, which Know-How (a) is necessary to develop, make, have made, use, conduct clinical trials of, sell, have sold, offer for sale and import any CAB Antibody or any Product in the Field in the ROW or to develop, make, have made and conduct clinical trials of any CAB Antibody or any Product in the Field in the Territory, or (b) for purposes of Section 10.6(d)(i), as applicable, is necessary to use, sell, have sold, offer for sale and import any CAB Antibody or any Product in the Field in the Territory. For avoidance of doubt, Himalaya Know-How shall not include BioAtla Know-How.

1.42 “Himalaya Patent Rights” means any and all Patent Rights that Himalaya or any of its Affiliates Controls during the Term which Cover the Himalaya Know-How. For avoidance of doubt, Himalaya Patent Rights shall not include BioAtla Patent Rights.

1.43 “Himalaya Intellectual Property” means the Himalaya Know-How and the Himalaya Patent Rights.

1.44 “ICH” means the International Conference on Harmonization (of Technical Requirements for Registration of Pharmaceuticals for Human Use).

1.45 “IL-22 ANTIBODY” means BioAtla’s lead IL-22 antibody, including all data related thereto required for development (including manufacturing) and commercialization in the Territory.

1.46 “IND” means an investigational new drug application filed with the applicable Regulatory Authority, which application is required to commence human clinical trials in the applicable country.

1.47 “Indemnification Claim” has the meaning set forth in Section 11.1

1.48 “Indemnitee” has the meaning set forth in Section 11.1

1.49 “Indemnitor” has the meaning set forth in Section 11.1

1.50 “Initial CAB Antibody” means each CAB Antibody in the CAB Antibody Format listed on Exhibit A. Notwithstanding anything herein to the contrary, no Initial CAB Antibody shall be in an ACT format (including, without limitation, a CAR T format), and BioAtla shall be free to work with any Third Party in the Territory on Initial CAB Antibodies in an ACT format (including, without limitation, a CAR T format).

1.51 “Inventions” means all inventions, whether or not patentable, discovered, made, conceived, or conceived and reduced to practice by either Party, on or after the Effective Date in the course of activities conducted pursuant to this Agreement.

1.52 “**JDCC**” has the meaning set forth in Section 2.1.

1.53 “**Know-How**” means all techniques, technology, trade secrets, inventions (whether patentable or not), methods, know-how, Data and results (including all research Data, clinical pharmacology Data, chemistry-manufacture-controls Data (including analytical and quality control Data and stability Data), preclinical Data and clinical data), regulatory documents and filings, compositions of matter, cells, cell lines, assays, animal models and other physical, biological, or chemical material, and all other scientific, clinical, regulatory, marketing, financial and commercial information.

1.54 “**LEAD**” means a lead candidate antibody for a CAB Antibody hereunder as designated by BioAtla.

1.55 “**License Agreement**” has the meaning set forth in Section 4.2(a).

1.56 “**Licensee**” means any Third Party to whom Himalaya grants a sublicense under the License Agreement.

1.57 “**Litigation Conditions**” means, with respect to a Claim, (a) such Claim does not seek injunctive relief or non-monetary damages from the Indemnitee and (b) the Indemnitor expressly agrees in writing that as between the Indemnitor and Indemnitee, the Indemnitor shall be solely obligated to satisfy and discharge such Claim in full and is able to reasonably demonstrate that it has sufficient financial resources to meet such indemnification obligations.

1.58 “**Losses**” has the meaning set forth in Section 11.1.

1.59 “**MAA**” means a regulatory application filed with a Regulatory Authority (including the CFDA but excluding the FDA) seeking Regulatory Approval of a biological, pharmaceutical or diagnostic product, and all amendments and supplements thereto filed with such Regulatory Authority.

1.60 “**Materials**” has the meaning set forth in Section 3.7.

1.61 “**Milestone Payment**” means all payments made to Himalaya and all other Selling Parties other than an upfront payment or a royalty payment (based upon a specified percentage of Net Sales of the Product) for the development and /or commercialization of Products.

1.62 “**NDA**” means a new drug application or MAA, as applicable, filed with the applicable Regulatory Authority, which application is required for marketing approval for the applicable Product in the applicable country in the Territory.

1.63 “**Net Sales**” shall mean the gross amounts invoiced by or on behalf of Himalaya, Licensees or any of their respective Affiliates and assignees (each individually and collectively, the “Selling Party”) to third parties (other than another Selling Party) for sales or other dispositions of Products in the Territory, less the following deductions (all in accordance with GAAP) actually incurred, allowed, paid, accrued or otherwise specifically allocated to Products by the Selling Party:

[***]

1.64 “**New Option Antibody**” means the option antibodies, in the CAB Antibody Format indicated, listed on Exhibit B. Notwithstanding anything herein to the contrary, no New Option Antibody shall be in an ACT format (including, without limitation, a CAR T format), and BioAtla shall be free to work with any Third Party in the Territory on New Option Antibodies in an ACT format (including, without limitation, a CAR T format).

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

1.65 “New Patent Rights” means Patent Rights first developed on and after the Effective Date that Cover Inventions, as applicable.

1.66 “Non-Patented Inventions” shall mean Inventions first developed on and after the Effective Date that are not covered in New Patent Rights.

1.67 “P2 Initiation” means the enrollment of the first patient in a P2 Clinical Trial.

1.68 “P3 Initiation” means the enrollment of the first patient in a P3 Clinical Trial.

1.69 “Parties” means BioAtla and Himalaya and “party” means BioAtla or Himalaya.

1.70 “Patent Rights” means (a) all patents, certificates of invention, applications for certificates of invention, priority patent filings and patent applications, and (b) any renewal, division, continuation (in whole or in part), or request for continued examination of any of such patents, certificates of invention and patent applications, and any and all patents or certificates of invention issuing thereon, and any and all reissues, reexaminations, extensions, divisions, renewals, substitutions, confirmations, registrations, revalidations, revisions, and additions of or to any of the foregoing.

1.71 “Phase I Clinical Trial” or “P1 Clinical Trial” means a human clinical trial of a Product in which the primary endpoints include determination of most frequent and serious adverse events, as more fully defined in regulations in a country in the Territory, and any amended or successor regulations.

1.72 “Phase II Clinical Trial” or “P2 Clinical Trial” means the earlier to occur of (a) a human clinical trial of a Product in which the primary endpoints include a determination of dose ranges or preliminary determination of efficacy of such Product in patients being studied, as more fully defined in regulations in a country in the Territory, and any amended or successor regulations, and (b) a Pivotal Clinical Trial.

1.73 “Phase III Clinical Trial” or “P3 Clinical Trial” means the earlier to occur of (a) a human clinical trial of a Product, the purpose of which is to demonstrate clinically and statistically the efficacy and safety of a Product for an indication in order to support regulatory approval of such Product for such indication, as more fully defined in regulations in a country in the Territory, and any amended or successor regulations, and (b) a Pivotal Clinical Trial.

1.74 “Pivotal Clinical Trial” means a human clinical trial of a product on a sufficient number of subjects that, prior to commencement of the trial, satisfies both of the following ((a) and (b)):

(a) such trial is designed to establish that such product has an acceptable safety and efficacy profile for its intended use, and to determine warnings, precautions, and adverse reactions that are associated with such product in the dosage range to be prescribed, which trial is intended to support Regulatory Approval of such product in the Territory; and

(b) such trial is a registration trial sufficient for filing an application for a Regulatory Approval for such product in the Territory, as evidenced by (i) an agreement with or statement from the applicable Regulatory Authority on a Special Protocol Assessment or equivalent, or (ii) other guidance or minutes issued by the applicable Regulatory Authority for such registration trial.

1.75 “Product” means any pharmaceutical product that incorporates or is comprised of a CAB Antibody (or any variant, fragment, modification or derivative of a CAB Antibody), alone or in combination with one or more other active pharmaceutical ingredients, in any dosage form or formulation.

1.76 “Public Official or Entity” means (a) any officer, employee (including physicians, hospital administrators, or other healthcare professionals), agent, representative, department, agency, de facto official, corporate entity, instrumentality or subdivision of any government, military or public international organization, including, but not limited to, any ministry or department of health or any state-owned or affiliated company or hospital, or (b) any candidate for political office, any political party or any official of a political party.

1.77 “Regulatory Approval” means any and all approvals, licenses, registrations, or authorizations of any country, federal, supranational, state or local regulatory agency, department, bureau or other government entity that are necessary for the manufacture, use, storage, import, transport and sale of a Product in the Territory.

1.78 “Regulatory Authority” means any national, provincial or local regulatory agency, department, bureau or other government entity, that has responsibility in its applicable jurisdiction over the research, development, manufacture and commercialization of a Product in the Territory, including the FDA and CFDA.

1.79 “Regulatory-Based Exclusivity” means, on a Product-by- Product and country-by-country basis, that (a) Himalaya or any other Selling Party has been granted the exclusive legal right by a Regulatory Authority (or is otherwise entitled to the exclusive legal right by operation of Law) in such country to market and sell the Product or the active ingredient comprising such Product in such country, including any pediatric or orphan drug exclusivity, or (b) the data and information submitted by Himalaya or any other Selling Parties to the relevant Regulatory Authority in such country for purposes of obtaining Regulatory Approval for such Product may not be disclosed, referenced or relied upon in any way by any person other than Himalaya or other Selling Parties (including by relying upon the Regulatory Authority’s previous findings regarding the safety or effectiveness of the Product) to support the Regulatory Approval or marketing of any Product by a Third Party in such country.

1.80 “Regulatory Filing” means any IND or NDA filed with the applicable Regulatory Authority in a given country.

1.81 “ROW” means the rest of the world outside the Territory. For clarity, for CAB Antibodies for which the Territory is worldwide, there is no ROW.

1.82 “ROW License” has the meaning set forth in Section 4.3(a).

1.83 “Royalty Term” means, on a Product-by- Product and country-by-country basis, the period of time commencing on the First Commercial Sale of such Product in such country and expiring upon the latest of (a) the expiration of the last Valid Claim of a Composition/Method of Use Patent that Covers the Product in such country, (b) the expiration of Regulatory-Based Exclusivity for such Product in such country, and (c) the fifteenth (15th) anniversary of the date of First Commercial Sale of such Product in such country.

1.84 “SEC” means the U.S. Securities and Exchange Commission or any successor entity.

1.85 “Specifically Directed” means, with respect to a Target, the ability of a molecule, agent, or compound to selectively and specifically bind to such Target to inhibit, activate or otherwise modulate the activity of such Target.

1.86 “Target” means a protein, polypeptide, or nucleic acid molecule, and all nucleic acids encoding such protein, polypeptide, regulatory sequences or molecule, including all variants thereof.

1.87 “Territory” means the territory for each CAB Antibody set forth on a CAB Antibody-by-CAB Antibody basis in Exhibit A, and each New Option Antibody on a New Option Antibody-by-New Option Antibody basis in Exhibit B.

1.88 “Term” has the meaning set forth in Section 10.1.

1.89 “Third Party” means any person other than BioAtla or Himalaya that is not an Affiliate of BioAtla or of Himalaya.

1.90 “Third Party Acquirer” means any entity other than an Affiliate of BioAtla, in negotiations to acquire BioAtla.

1.91 “Third Party Service Provider” means any entity other than BioAtla, Himalaya, Licensee or an Affiliate of BioAtla or Himalaya or Licensee, which BioAtla, Himalaya or Licensee, or an Affiliate of BioAtla or Himalaya or Licensee, engages to perform development services under a Development Plan or commercialization services under a Commercialization Plan, or any other services related to a CAB Antibody or Product hereunder.

1.92 “U.S.” means the United States of America, including the District of Columbia

1.93 “US\$”, “\$” or “USD” means the United States dollars. For clarity, all payments hereunder are due in USD.

1.94 “Valid Claim” means a claim of (a) an issued patent in the Territory, as applicable, that has not expired, lapsed, been cancelled or abandoned, or been dedicated to the public, disclaimed, or held unenforceable, invalid, revoked or cancelled by a court or administrative agency of competent jurisdiction in an order or decision from which no appeal has been or can be taken, including through opposition, reexamination, reissue, disclaimer, inter partes review, post grant review, other post grant procedures or similar proceedings; or (b) a pending patent application that has not been finally abandoned or finally rejected or expired and which has been pending for no more than seven (7) years. For clarity, a claim which issues after being pending for more than seven (7) years from the date of the first substantive office action as described in (b) above shall be considered a Valid Claim as of the date of issuance.

1.95 “Withdrawal Notice” has the meaning set forth in Section 2.7.

1.96 “WW” hereunder means worldwide.

2. GOVERNANCE

2.1 Joint Development Committees. The parties will establish one or more joint development and commercialization committees (each a “**JDCC**”) to oversee and coordinate the development of all CAB Antibodies and Products in the Territory pursuant to this Agreement and to facilitate sharing of information from BioAtla regarding development of CAB Antibodies in the ROW by BioAtla, sharing of information from Himalaya, its Affiliates and Licensees, to BioAtla, and between the Parties, regarding development of the CAB Antibodies and Products in the Territory. JDCCs will be established with respect to any and all activities in the Territory under this Agreement, and any agreement providing or covering rights to each CAB Antibody or Product. Each JDCC shall include members from BioAtla and Himalaya. Upon sublicense of any CAB Antibody, the Licensee shall be added as a member of the JDCC for such CAB Antibody, as the case may be. The initial JDCC shall be established as set forth below in 2.2, and any subsequent JDCC shall be established prior to each Transfer Date.

2.2 JDCC Composition. Initially, each JDCC will be comprised of at least two members appointed by BioAtla and two members appointed by Himalaya, which members shall be senior level employees of such party with decision-making authority. BioAtla and Himalaya will each notify the other of its initial JDCC members within fifteen (15) days of written notification from Himalaya to BioAtla of preparedness to establish the JDC. Such notification shall name each party’s appointment its two members to the relevant JDCC. BioAtla, Himalaya, and the Licensee, as the case may be, through the JDCC, may change the number of JDCC members as long as there are an equal number of members from each of the members on the JDCC. Each party may change its JDCC members at any time by written notice to the other party. Any member of the JDCC may designate a substitute to attend and perform the functions of that member at any meeting of the JDCC. Himalaya shall appoint one of its JDCC members as chairman, whose role shall be to convene and preside at meetings of the JDCC, but the chairman shall not be to cast any tie-breaking vote. JDCC members may invite a reasonable number of non-member, non-voting representatives of such party to attend meetings of the JDCC.

2.3 JDCC Meetings. The JDCC will hold meetings at such frequency as determined by the JDCC members, but no less than once each Calendar Quarter, unless otherwise reasonably agreed to by the parties. Such meetings may be conducted by videoconference, teleconference or in person, as agreed to by the parties; provided, that no less than two (2) JDCC meetings each Calendar Year shall be in-person unless the members otherwise mutually agree. Minutes will be kept of all JDCC meetings and will reflect material decisions made at such meetings. Meeting minutes will be prepared by BioAtla and sent to each member of the JDCC for review and approval promptly following each meeting. Minutes will be deemed approved unless a member of the JDCC objects to the accuracy of such minutes within 15 days of receipt. Any costs and expenses incurred by each party related to a JDCC meeting, including, if applicable, travel and/or telecommunication expenses, shall be borne by Himalaya.

2.4 JDCC Authority. The JDCC shall be responsible for oversight of the parties' activities with respect to development of CAB Antibodies, and Products in the Territory pursuant to this Agreement. Without limiting the foregoing, the JDCC shall: (a) share information about the development and commercialization of each CAB Antibody and Product by the parties pursuant to the Development Plans and the Commercialization Plans in the Territory; (b) provide a forum for review and discussion of the Development Plans and the Commercialization Plans; (c) review amendments to the Development Plans and the Commercialization Plans; (d) facilitate the exchange of Data between the parties; and (e) such other responsibilities as mutually agreed upon by the parties in writing on a case-by-case basis. For clarity, the JDCC is solely responsible for oversight and coordination of development and commercialization activities in the Territory under a relevant Development Plan and/or Commercialization plan, as the case may be, and only after transfer at the Transfer Date of a CAB Antibody hereunder from BioAtla to Himalaya in the Territory. The JDCC has no oversight, or participation, in any development or commercialization activity of any CAB Antibody hereunder in the Territory prior to such transfer by BioAtla, and no oversight, or participation, in any development or commercialization activity of any CAB Antibody in the ROW hereunder, at any time.

2.5 JDCC Decision-Making. Decisions of the JDCC for matters within its decision-making authority shall be made by unanimous vote, with BioAtla's representatives to the JDCC collectively having one vote, Himalaya's representatives to the JDCC collectively having one vote, and Licensee's representatives to the JDCC collectively having one vote. If the JDCC fails to reach unanimous agreement on such a matter for a period in excess of 30 days, the matter shall be referred to a senior officer of BioAtla and a senior officer of Himalaya, in his/her capacity as the designee of Himalaya, who shall attempt in good faith to resolve such disagreement. Subject to Section 2.6 (and for so long as a Withdrawal Notice has not been issued or, if issued, not withdrawn pursuant to Section 2.7), if such disagreement has not been resolved within 30 days after being referred to such executives, Himalaya shall have final decision-making authority over all matters to be decided by the JDCC regarding development and commercialization of any CAB Antibody or Product in the Territory, however to the extent such matter may impact the safety of the CAB Antibody in the ROW, BioAtla shall have final decision-making authority. For avoidance of doubt, BioAtla shall have final decision-making authority over all matters regarding development and commercialization of any CAB Antibody or Product in ROW. Notwithstanding the foregoing, Himalaya shall have final decision-making authority over all matters to be decided by the JDCC regarding development and commercialization of any CAB Antibody or Product exclusive to Himalaya worldwide.

2.6 Scope of Governance. The JDCC shall only have such powers as are specifically assigned to it in this Agreement and such powers shall be subject to the terms and conditions set forth herein. Without limiting the generality of the foregoing, the JDCC shall have no power to amend this Agreement or expand or reduce the rights of the JDCC or any Party hereunder, and no decision of the JDCC shall be in contravention of any terms and conditions of this Agreement. It is understood and agreed that issues to be formally decided by the JDCC are only those specific issues that are expressly provided in this Agreement to be decided by the JDCC.

2.7 Withdrawal. At any time during the Term and for any reason, BioAtla shall have the right to withdraw from participation in the JDCC upon written notice to Himalaya, which notice shall be effective immediately upon receipt ("**Withdrawal Notice**"). Following the issuance of a Withdrawal Notice and subject to this Section 2.7, BioAtla's representatives to the JDCC shall not participate in any meetings of the JDCC. If, at any time, following the issuance of a Withdrawal Notice, BioAtla wishes to resume participation in the

JDCC, BioAtla shall notify Himalaya in writing and, thereafter, BioAtla's representatives to the JDCC shall be entitled to attend any subsequent meeting of the JDCC as provided in this Section 2.7 as if a Withdrawal Notice had not been issued by BioAtla. Following BioAtla's issuance of a Withdrawal Notice, unless and until BioAtla resumes participation in the JDCC in accordance with this Section 2.7: (i) all meetings of the JDCC shall be held at Himalaya's facilities; and (ii) BioAtla shall have the right to continue to receive the minutes of the JDCC meetings, but shall not have the right to approve the minutes for any JDCC meeting held after BioAtla's issuance of a Withdrawal Notice.

2.8 Alliance Managers. Upon establishment of the JDCC, each party shall appoint an individual to act as the alliance manager for such party (the "**Alliance Manager**"). Each Alliance Manager shall be responsible for alliance management between the parties on a day-to-day basis throughout the Term. Each Alliance Manager shall be permitted to attend meetings of the JDCC as non-voting participants. The Alliance Managers shall be the primary contact for the parties regarding the activities contemplated by this Agreement and shall facilitate all such activities hereunder. Each party may replace its Alliance Manager with an alternative representative at any time with prior written notice to the other party. Any Alliance Manager may designate a substitute to temporarily perform the functions of that Alliance Manager. Each Alliance Manager shall be charged with creating and maintaining a collaborative work environment within the JDCC.

2.9 Worldwide Exclusive Territory Antibodies. Notwithstanding anything herein to the contrary, any CAB Antibody licensed to Himalaya hereunder worldwide shall not have a JDCC. Himalaya shall be solely responsible for the global development and commercialization of such CAB Antibodies, and shall update BioAtla quarterly in writing about the progress of the development and commercialization of such CAB Antibodies. Himalaya shall use commercially reasonable efforts to diligently develop and commercialize all such CAB Antibodies.

3. DEVELOPMENT AND COMMERCIALIZATION

3.1 CAB Antibody Format. Antibodies can have multiple antibody formats, including different formats for treating different therapeutic indications. Examples of antibody formats include naked antibodies, antibody drug conjugates, bi-specific antibodies, or antibodies with different Fc functionality, among others. The parties acknowledge that each CAB Antibody licensed hereunder is in a specific antibody format (a "**CAB Antibody Format**") set forth in Exhibit A and Exhibit B attached hereto. Each CAB Antibody is only licensed under this Agreement by BioAtla for the specified CAB Antibody Format, and no other antibody format. CAB Antibodies in any ACT format, including, without limitation, CAR-T CAB Antibodies, are specifically excluded from the grant of licenses by BioAtla under this Agreement.

3.2 Development and Commercialization Plans.

(a) CAB Antibody Development and Commercialization Activities. Subject to the terms and conditions of this Agreement, Himalaya and BioAtla shall each diligently conduct the development activities in the Territory, and the ROW, for each CAB Antibody specifically as set forth in the applicable Development Plan, and the commercialization activities in the Territory for each CAB Antibody specifically as set forth in the applicable CAB Antibody Commercialization Plan. No research, development, commercialization or any other activity shall be conducted on any CAB Antibody by Himalaya, other than as set forth in a relevant Development Plan or Commercialization Plan. For clarity, and for all avoidance of any doubt, neither Himalaya nor any other Selling Party shall conduct, and neither Himalaya nor any other Selling Party shall grant any rights to any Third Party to conduct, any activity on any CAB Antibody at any time, other than as set forth in a relevant Development Plan or a Commercialization Plan hereunder, including, for example, modification or evaluation of a CAB Antibody for any purpose other than as set forth in a Development Plan or Commercialization Plan

(b) CAB Antibody Development Plan(s). BioAtla and Himalaya will work together (through the JDCC) to mutually agree to a Development Plan prior to continued development in the Territory of each CAB Antibody. Each CAB Antibody shall have a Development Plan, and each Development Plan shall set forth all development activities, including studies for each disease indication under the plan, timelines, and Third Party Service Providers required (if applicable). All Development Plans shall require

BioAtla's and Himalaya's prior written approval in the Territory. The JDCC shall send BioAtla and Himalaya a draft of each Development Plan for review and written approval, and BioAtla and Himalaya shall review and comment on each Development Plan within thirty (30) days of receipt. Work under each Development Plan shall commence no later than thirty (30) days of written approval of such plan, unless mutually agreed upon in writing by the parties. Depending on the stage of transfer from BioAtla, each Development Plan may comprise the following stages (each a "**Stage**") of development: Stage 1: Candidate selection, clone selection, working cell bank production; Stage 2: process development, initiation of master cell bank; Stage 3: preclinical development and manufacturing; Stage 4: Animal models and biomarker studies; Stage 5: Clinical development including P1 Clinical Trials; Stage 6: Clinical development including P2 Clinical Trials; Stage 7: Clinical development including P3 Clinical Trials; and Stage 8: NDA submission (or the equivalent) in the Territory. Each Development Plan shall set forth the timing and scope of the transfer of the relevant CAB Antibody material, data and information from BioAtla to Himalaya, as well as the identification of the LEAD, if relevant. Each Development Plan shall further include timelines, and shall set forth specific criteria for the generation of Data related to the CAB Antibody as a result of clinical studies conducted hereunder (the "**Clinical Criteria**"). Each approved Development Plan shall be attached to this Agreement as Exhibit C.

(c) CAB Antibody Commercialization Plan(s). BioAtla and Himalaya will work together (through the JDCC) to mutually agree to a Commercialization Plan prior to commercial launch of each Product in the Territory. Each Commercialization Plan shall include all commercialization related activities, including Third Party Service Providers required (if applicable), a written launch plan describing, in reasonable detail, all planned and anticipated commercialization activities for commercial launch of each Product in the Territory, including estimated timelines with respect thereto. Each CAB Antibody shall have a Commercialization Plan. All Commercialization Plans shall require BioAtla's and Himalaya's prior written approval. The JDCC shall send BioAtla and Himalaya a draft of each Commercialization Plan for review and written approval, and BioAtla and Himalaya shall review and comment on each Commercialization Plan within thirty (30) days of receipt. Execution of each Commercialization Plan shall commence no later than thirty (30) days of written approval of such plan. Each Commercialization Plan shall be attached to this Agreement as Exhibit D.

(d) Third Party Service Providers. In accordance with each Development Plan and Commercialization Plan, Himalaya, or Licensee, may procure and utilize Third Party Service Providers to provide services in connection with development and/or commercialization of CAB Antibodies and Products pursuant to this Agreement. Each Third Party Service Provider shall be required to execute contracts protecting all intellectual property related to each CAB Antibody and all confidential information and assigning all Inventions developed in connection with such services to Himalaya (subject to further assignment as provided in Section 7.1(c) below). Himalaya agrees that BioAtla shall have the right to reject and/or require replacement of such Third Party Service Providers to the extent BioAtla reasonably deems that use or continued use of such Third Party Service Providers may have a negative impact regarding (i) the quality of CAB Antibodies and Products developed and commercialized hereunder, or (ii) protection of any developed Inventions. For clarity, Licensees shall not be considered Third Party Service Providers for purposes of this Section 3.2(c).

(e) Commercially Reasonable Efforts. Himalaya shall use, and shall cause each Licensee and/or Selling Party to use under a License Agreement or other agreement, its Commercially Reasonable Efforts to diligently perform the development and commercialization activities contemplated by this Agreement in accordance with each applicable Development Plan and Commercialization Plan, in good scientific manner, and in accordance with the terms and conditions of this Agreement.

(f) Transfer of each CAB Antibody. BioAtla shall deliver the Data Package (as defined below) for each CAB Antibody at the Transfer Date (as defined below) to Himalaya. The "Data Package" shall include the Data (including the relevant in-vitro and Animal POC Data, the IND submission documents and/or P1 Clinical Trial Data) for each CAB Antibody to the extent such data is required for Himalaya to develop and commercialize the CAB Antibody or related Product under each Development Plan and Commercialization Plan. The transfer date for each CAB Antibody (the "**Transfer Date**") is set forth in Exhibit A and Exhibit B hereunder. Upon transfer, the Himalaya shall continue development in the Territory under each Development Plan and commercialization under each Commercialization Plan. BioAtla shall develop each CAB Antibody through the relevant Transfer Date. Notwithstanding the foregoing, in the

event BioAtla, for reasons unrelated to the CAB Antibody data, but, for example, for strategic business reasons, decides to discontinue development of a CAB Antibody prior to the Transfer Date, or delays development of a CAB Antibody under a Development Plan for longer than six (6) months (“Preclinical Development Termination”), BioAtla shall notify Himalaya within thirty (30) days of such termination of the development of the CAB Antibody, and fifteen (15) days from the date of such notice shall become the new Transfer Date for such CAB Antibody. BioAtla shall transfer the existing Data Package for such CAB Antibody subject to a Preclinical Development Termination, and Himalaya shall have the right, but not the obligation, to continue development under the Development Plan and commercialization under the Commercialization Plan for such CAB Antibody. BioAtla shall further transfer any technology required by Himalaya to continue development under the Development Plan and commercialization under the Commercialization Plan for the CAB Antibody subject to such Preclinical Development Termination in the Data Package, including any rights related to the required technology, solely to the extent required for Himalaya to develop and commercialize the CAB Antibody subject to such Preclinical Development Termination. Payments and the new Territory for any CAB Antibody subject to a Preclinical Development Termination shall be as set forth below in Exhibit G.

(g) In the event Third Party technologies or rights, not related solely to the CAB Antibody, are required for Himalaya’s manufacturing of the CAB Antibody as provided for hereunder, for example cell lines, or for a linker payload technology for any ADC, Himalaya shall be responsible for such license, including any fees, and BioAtla will secure such rights from such Third Party under its own relationships for access to such rights from such Third Party.

(h) **BioAtla Development of Products.** BioAtla shall be solely responsible for developing and commercializing any Product in the ROW, and shall be entitled to conduct any preclinical or clinical development for Products in the Territory.

3.3 Amendments to Development Plans or Commercialization Plans. Either party may submit to the other party proposed amendments to the Development Plans or Commercialization Plans as it considers necessary or appropriate, and any material amendment to a Development Plan or Commercialization Plan shall be subject to the applicable JDCC’s, BioAtla’s and Himalaya’s written approval as provided hereunder.

3.4 New Option Antibodies Designation, Selection Process & Option Exercise. BioAtla shall provide written notice to the JDCC identifying its designation of a lead candidate (“LEAD”) for a New Option Antibody (from the New Option Antibodies listed in Exhibit B). Within thirty (30) days of the JDCC’s receipt of such notice from BioAtla (the “Selection Period”), Himalaya shall notify the JDCC, and the JDCC shall immediately notify BioAtla, in writing, that it is exercising its option to the individual New Option Antibody hereunder (“Selection Notice”). Provided that Himalaya provides such notice to BioAtla prior to expiration of the Selection Period, the New Option Antibodies selected by Himalaya shall be included under this Agreement as New Option Antibody as of the date of such notice to BioAtla. For clarity, a New Option Antibody provided by BioAtla in a notice provided pursuant to this Section that is not selected by Himalaya as a New Option Antibody in a written notice provided to BioAtla prior to the expiration of the applicable Selection Period shall not be a New Option Antibody. BioAtla shall have no further obligations under this Agreement to re-offer such New Option Antibody to Himalaya, but it may do so if both parties mutually agree in writing to do so. Further, at any time during the Term, Himalaya may propose in writing to BioAtla a New Option Antibody developed in the Territory. Within thirty (30) days of receipt of the written proposal from Himalaya, BioAtla shall notify Himalaya if the New Option Antibody remains available in the Territory. Upon Himalaya’s receipt of such notification from BioAtla, the New Option Antibody that is the subject of a positive notice shall constitute a New Option Antibody hereunder. Thereafter, the JDCC shall agree to a Development Plan and a Commercialization Plan as set forth hereunder.

3.5 [*] Lead Designation.** BioAtla shall notify Himalaya upon designation of a LEAD candidate for [***] (“[***] Lead Designation Notice”). BioAtla shall include its decision whether or not to advance development of the [***] LEAD in the Lead Designation Notice. In the event BioAtla decides not to advance development of the [***] LEAD in the ROW in the [***] Lead Designation Notice, BioAtla shall simultaneously transfer to Himalaya the [***] LEAD and the relevant Data Package required for Himalaya to advance development and commercialization of the [***] in the Territory. If by [***], BioAtla has not advanced the [***] to a LEAD stage, Himalaya, shall have the right (but not the obligation) to notify BioAtla in writing of its desire to fund development of the [***] to a LEAD stage, the parties shall agree on a Development Plan for BioAtla to develop the [***] to the LEAD stage, and Himalaya shall pay BioAtla as set forth hereunder. BioAtla shall transfer the Data Package for the LEAD to Himalaya upon completion of the work as set forth under the Development Plan.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

3.6 [*] Lead Designation.** BioAtla shall notify Himalaya upon designation of a LEAD candidate for [***] (“[***] Lead Designation Notice”). BioAtla shall include its decision whether or not to advance development of the [***] LEAD in the Lead Designation Notice. In the event BioAtla decides not to advance development of the [***] LEAD in the ROW, BioAtla shall simultaneously transfer to Himalaya the [***] LEAD and the relevant Data Package required for Himalaya to advance development and commercialization of the [***] in the Territory. If by [***], BioAtla has not advanced the [***] to a LEAD stage, Himalaya, shall have the right (but not the obligation) to notify BioAtla in writing of its desire to fund development of the [***] to a LEAD stage, the parties shall agree on a Development Plan for BioAtla to develop the [***] to the LEAD stage, and Himalaya shall pay BioAtla as set forth hereunder. BioAtla shall transfer the Data Package for the LEAD to Himalaya upon completion of the work as set forth under the Development Plan.

3.7 Development, Manufacturing Commercialization.

(a) Development and Commercialization. Himalaya (itself or through its Affiliates, Licensees or other Selling Parties) shall be responsible, at its, or their, sole cost and expense, for all (i) development activities with respect to licensed, or sublicensed, CAB Antibodies and Products in the Territory, and (ii) commercialization activities with respect to Products in the Territory. Himalaya shall use, and shall cause its Affiliates, Third Party Service Providers, Licensees and/or other Selling Parties to use Commercially Reasonable Efforts to diligently develop all CAB Antibodies and all Products in the Territory, to diligently file for and obtain Regulatory Approval of Products in the Territory, and, after such Regulatory Approval is obtained, to diligently commercialize applicable Products in the Territory. The development activities shall comprise, at a minimum, the following activities:

(i) Provide BioAtla with annual forecasts of funding required for the development, manufacture and sale of Products beginning on the first anniversary of the Effective Date;

(ii) Fully fund the development of Products for Regulatory Approval as set forth under each Development Plan and each Commercialization Plan;

(iii) Timely pay all patent prosecution and maintenance costs in the Territory; and

(iv) If Himalaya fails to perform any of its obligations as specified herein with respect to any particular CAB Antibody on the timelines set forth in the Development and/or Commercialization Plans as applicable, then BioAtla shall have the right and option to either terminate this Agreement or change the grant of rights to Himalaya to any such CAB Antibody from exclusive to non-exclusive if it has notified Himalaya of its intent to do so and the reason and Himalaya has not cured such failure within sixty (60) days. This right, if exercised by BioAtla, supersedes the rights granted in Paragraph 4.1 below. Upon such event, Himalaya hereby covenants and agrees to assign to BioAtla all right and title to all data and information generated and related to the CAB Antibody and all Intellectual Property Rights related thereto developed by or on behalf of Himalaya and the other Selling Parties.

(b) Manufacturing in the Territory. The Parties shall negotiate in good faith a supply agreement for the manufacture by either party of any Product developed by Himalaya. Material shall be supplied at direct cost by either party to the other party. For avoidance of all doubt, no manufacturing development or overhead costs shall be charged by the supplying party, and third party service providers may be used.

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

(c) Records and Reports. Each party shall maintain records, in sufficient detail and in good scientific manner appropriate for patent and regulatory purposes, which shall fully and properly reflect all work done and results achieved by or on behalf of such party in the performance of development and commercialization activities contemplated by this Agreement.

3.8 Disclosure Regarding Development and Commercialization Efforts.

(a) Development Efforts. The parties will share information, directly or through the JDCC, about the development and commercialization of CAB Antibodies and Products in the Field in the Territory, and in the event BioAtla develops and commercializes a CAB Antibody in the ROW itself, it shall share its Data and other information related to such development in ROW solely to the extent the Data or other information assists Himalaya or any Licensee to develop and commercialize a CAB Antibody and/or Product in the Territory under a Development Plan or Commercialization Plan. Following completion of the applicable Development Plan for a CAB Antibody, Himalaya will update BioAtla on a regular basis (but no less than every thirty (30) days during the Term) regarding the development of CAB Antibodies and Products in the Field in the Territory by any Licensee, their Affiliates and Third Party Service Providers. Activities related to clinical development, including, but not limited to, commencement and status of any clinical trials, the filing of any submissions or communications with applicable Regulatory Authorities and the receipt of Regulatory Approval in the Territory shall be reported immediately upon submission or receipt thereof to Himalaya and BioAtla. For a period ending on the tenth anniversary of the Effective Date, Himalaya shall reasonably assist BioAtla in its development of each Product and, under a separate services agreement to be attached hereto as Exhibit F, other pharmaceutical products as BioAtla shall request from time to time; it being understood and agreed that Himalaya shall be reimbursed for use of its personnel at a full-time equivalent rate to be mutually agreed by the Parties plus [***]%.

(b) Commercialization Efforts. Himalaya shall provide (or shall cause its Affiliates or other Selling Parties to provide) to BioAtla with a written report, every six (6) months during each Calendar Year during the Term, describing, in reasonable detail, commercialization activities undertaken by Himalaya, Licensee, its Affiliates and other Selling Parties and Third Party Service Providers with respect to Products in the Territory, the results achieved since the last report and activities planned for the subsequent Calendar Year, and shall update BioAtla throughout such Calendar Year with respect to any material changes thereto, including material developments that might adversely impact the continued development or commercialization of one or more Products in the Territory. Throughout the Term, Himalaya shall provide (or shall cause its Affiliates or other Selling Parties or Third Party Service Providers to provide) to BioAtla prior written notice of any recall of Products in the Territory during the Term, which notice shall contain reasonable detail of the nature and scope of such recall.

3.9 Ownership of Data; Cooperation. All Data generated in connection with the development and commercialization of CAB Antibodies or any Product by BioAtla and its Affiliates, licensees, and any Licensees shall be the sole and exclusive property of BioAtla or its Affiliates and shall be considered BioAtla Know How, and Himalaya hereby assigns, and shall cause its Affiliates, employees, consultants, Selling Parties, agents, or independent contractors to assign, to BioAtla, such person's or entity's right, title and interest in and to any such Inventions, and intellectual property rights therein, as is necessary to enable BioAtla to fully effect the ownership of Inventions, and intellectual property rights therein, as provided for in this Agreement. Himalaya shall also include provisions in its relevant agreements with Third Party Service Providers performing activities on its behalf pursuant to this Agreement, that effect the intent of this Section 3.6. Himalaya agrees to provide reasonable cooperation to BioAtla, and shall cause its Affiliates, employees, consultants, Selling Parties, agents, or independent contractors to, cooperate with BioAtla and take all reasonable additional actions and execute such agreements, instruments and documents as may be reasonably required to perfect BioAtla's right, title and interest in and to Inventions, and intellectual property rights therein, as set forth in this Agreement, including by executing and delivering all documents reasonably required to evidence or record any assignment pursuant to this Agreement.

3.10 Materials Transfer. In order to facilitate the development activities contemplated by this Agreement, BioAtla may provide to Himalaya, its Licensees or Affiliates or other Selling Parties or Third Party Service Providers, or Himalaya may provide to BioAtla on behalf of its Licensees or Affiliates or Third Party Service Providers, certain biological materials or chemical compounds Controlled by the supplying party

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

(collectively, “**Materials**”) for use by the receiving party solely in furtherance of such development activities. For clarity, such Materials do not include the CAB Antibodies provided by BioAtla hereunder or under any License Agreement. Except as otherwise provided for under this Agreement, all such Materials delivered to a party will remain the sole property of the supplying party, will be used only in furtherance of the development activities conducted in accordance with this Agreement, will not be used or delivered to or for the benefit of any Third Party, except for subcontractors or Third Party Service Providers, without the prior written consent of the supplying party, and will be used in compliance with all applicable laws, rules and regulations. The Materials supplied under this Agreement must be used with prudence and appropriate caution in any experimental work because not all of their characteristics may be known. Except as expressly set forth in this Agreement, **THE MATERIALS ARE PROVIDED “AS IS” AND WITHOUT ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR ANY PARTICULAR PURPOSE OR ANY WARRANTY THAT THE USE OF THE MATERIALS WILL NOT INFRINGE OR VIOLATE ANY PATENT OR OTHER PROPRIETARY RIGHTS OF ANY THIRD PARTY.**

3.11 Adverse Event Reporting; Pharmacovigilance Agreement. As between the parties: (a) BioAtla shall be responsible for the timely reporting of all relevant adverse drug reactions/experiences, Product quality, Product complaints and safety Data relating to Products to the appropriate Regulatory Authorities in the ROW; and (b) except as otherwise agreed in writing by BioAtla and Himalaya, Himalaya shall be responsible for the timely reporting of all relevant adverse drug reactions/experiences, Product quality, Product complaints and safety Data relating to Products to the appropriate Regulatory Authorities in the Territory; all in accordance with applicable laws, rules and regulations of the relevant countries and Regulatory Authorities in the Territory. The parties shall enter into a pharmacovigilance agreement (“**Safety Agreement**”) which shall be negotiated and attached hereto as Exhibit E, on terms that comply with ICH guidelines, including: (i) providing detailed procedures regarding the maintenance of core safety information and the exchange of safety Data relating to Products worldwide within appropriate timeframes and in an appropriate format to enable each party to meet both expedited and periodic regulatory reporting requirements; and (ii) ensuring compliance with the reporting requirements of all applicable Regulatory Authorities on a worldwide basis for the reporting of safety Data in accordance with standards stipulated in the ICH guidelines, and all applicable regulatory and legal requirements regarding the management of safety Data.

4. License Rights.

4.1 Exclusive License by BioAtla to Himalaya in the Territory. Subject to the terms and conditions of this Agreement (including the rights retained by BioAtla pursuant to Sections 3.2, 3.6, 4.3 and 7.9), BioAtla hereby grants to Himalaya, during the Term, an exclusive license under the BioAtla Intellectual Property solely to the extent required to develop, manufacture, conduct clinical trials, obtain Regulatory Approval of, make, have made, use, import, offer for sale and sell Products in the Field in the Territory; it being understood and agreed the license granted pursuant to this Section 4.1 includes the right of Himalaya to (i) use, make reference to and incorporate Clinical Data in filings with Regulatory Authorities in the ROW by BioAtla, solely for the purpose of obtaining Regulatory Approval for Products in the Field in the Territory and (ii) cross-reference filings made by BioAtla with applicable Regulatory Authorities in the ROW solely for the purpose of obtaining Regulatory Approval for Products in the Field in the Territory.

4.2 Licenses and Sublicenses by Himalaya to a Third Party.

(a) Terms of Licenses to CAB Antibodies by Himalaya to a Third Party. Himalaya shall have the right to grant licenses under the Himalaya Intellectual Property to a CAB Antibody (each a “**License**”) to a Third Party (a “**Licensee**”), solely to the extent required by that Third Party to develop, conduct clinical trials, obtain Regulatory Approval of, make, have made, use, import, offer for sale and sell Products in the Field in the Territory; provided, that all Licenses shall be subject to the prior written approval of BioAtla in each instance which approval shall not be unreasonably withheld and which approval shall be provided within thirty (30) days of receipt of such agreement by BioAtla for approval from Himalaya. Further, subject to this Section 4.2, Himalaya shall have the right to sublicense rights to a CAB Antibody under the Himalaya Intellectual Property (“**Sublicense**”) to a Third Party service provider, solely to the extent

required by such Third Party service provider to provide services to Himalaya necessary to develop, conduct clinical trials, obtain Regulatory Approval of, make, have made, use, import, offer for sale and sell Products in the Field in the Territory; provided, that all sublicensed rights to any Licensee shall: (i) be set forth in a written agreement in a form to be agreed to in writing between the parties (each such agreement, a “**Service Agreement**”); (ii) not allow the further sublicense of such rights to another party other than as permitted in the Service Agreement; and (iii) be subject to the prior written approval of BioAtla in each instance.

(b) Terms of Sublicenses to BioAtla Know-How by Himalaya to a Third Party. Subject to this Section 4.2 and 10.6, Himalaya shall have the right to sublicense rights under the BioAtla Know-How, solely to a Licensee, and solely to the extent required to develop, conduct clinical trials, obtain Regulatory Approval of, make, have made, use, import, offer for sale and sell Products in the Field in the Territory to any Third Party.

4.3 Exclusive License of Himalaya Intellectual Property to BioAtla for ROW. Subject to the terms and conditions of this Agreement, Himalaya hereby grants to BioAtla:

(a) an exclusive (even as to Himalaya, its Affiliates, Licensees and Third Party service providers), royalty-free, fully-paid, irrevocable, perpetual license, with the right to sublicense through multiple tiers of sublicense, under the Himalaya Intellectual Property to develop, conduct clinical trials, obtain Regulatory Approval, make, have made, use, import, offer for sale and sell Products in the Field in the ROW (the “**ROW License**”);

(b) a non-exclusive, royalty-free, fully-paid, license under the Himalaya Intellectual Property as necessary for BioAtla to perform, and have performed, its obligations under this Agreement; and

(c) the ROW License includes the right of BioAtla to (i) use, make reference to and incorporate Clinical Data in filings with Regulatory Authorities in the Territory solely for the purpose of obtaining Regulatory Approval for Products in the Field in the ROW and (ii) cross-reference filings made by Himalaya with applicable Regulatory Authorities in the Territory solely for the purpose of obtaining Regulatory Approval for Products in the Field in the ROW. Himalaya shall obtain from its Affiliates and Third Party Service Providers all rights necessary for Himalaya to grant the ROW License and other rights granted to BioAtla under this Agreement.

4.4 Limitations.

(a) Limitations on Himalaya. Himalaya hereby covenants and agrees that it shall not, and shall cause its Affiliates and Third Party Service Providers not to, (i) develop, conduct clinical trials, make, have made, or obtain Regulatory Approvals for Products in the ROW, or (ii) offer for sale or sell any Product to customers in the ROW or to any Third Party in the Territory that Himalaya has reasonable grounds to believe is likely to export any Product in the ROW. If Himalaya becomes aware that a Third Party is exporting Products acquired from Himalaya or its Affiliates or Third Party service providers to a country in the ROW, then Himalaya shall use Commercially Reasonable Efforts within its legal rights and the remedies afforded by applicable laws to stop or deter such Third Party from continuing such exportation, including by ceasing or limiting the supply of the Product to such Third Party. All inquiries or orders received by Himalaya or its Affiliates or Third Party service providers for Products to be delivered or distributed in the ROW shall be referred to BioAtla or its designee.

(b) Limitations on BioAtla. To the extent not otherwise prohibited by law, BioAtla hereby covenants and agrees that it shall not, and shall cause its Affiliates and Licensees not to, offer for sale or sell any Product to customers in the Territory or to any Third Party that BioAtla has reasonable grounds to believe are likely to import any Product in the Territory. If BioAtla becomes aware that a Third Party is exporting any Product acquired from BioAtla or its Affiliates or Licensees to the Territory, then BioAtla shall use Commercially Reasonable Efforts within its legal rights and the remedies afforded by applicable laws to stop or deter such Third Party from continuing such exportation, including by ceasing or limiting the supply of such Product to such Third Party. All inquiries or orders received by BioAtla or its Affiliates for Products to be delivered or distributed in the Territory shall be referred to Himalaya or its designee.

4.5 No Implied License. No right or license under any intellectual property rights of a party is granted or shall be granted by implication to the other party, and each party agrees not to practice any intellectual property rights of any other party except pursuant to the licenses expressly granted in this Agreement or any other written agreement between the parties. All such rights or licenses are or shall be granted only as expressly provided in the terms of this Agreement or such other written agreement between the parties.

4.6 No Other CAB Antibody Rights or BioAtla Intellectual Property. It is understood that Himalaya shall not have any rights to any other CAB antibody or any BioAtla Intellectual Property, except as expressly permitted by this Agreement. Further, Himalaya shall not have the right to conduct, or to grant any right to conduct, any activity on any CAB Antibody other than as set forth in a Development Plan, including the right to evaluate any CAB Antibody for any purpose other than as set forth in a Development Plan. Any and all rights granted in any License Agreement, shall be consistent with, the terms and conditions of this Agreement. Further, Himalaya shall be responsible for the compliance of its Affiliates and Third Party service providers and Licensees with the terms and conditions of this Agreement. Within 30 days of execution, Himalaya shall provide BioAtla with a full and complete copy of each Third Party service provider agreement, executed License Agreement.

4.7 Reserved Rights. Subject to the restrictions hereunder, and the rights expressly granted hereunder to the other party, each party reserves all rights to practice, and to grant licenses under, its intellectual property rights for any and all purposes, including to develop, conduct clinical trials of, obtain Regulatory Approval for, make, have made, use, import, offer for sale and sale of Products, for Himalaya in the Field in the Territory, and for BioAtla in the ROW, in accordance with this Agreement

4.8 Diligence. Himalaya will use Commercially Reasonable Efforts to develop (including to seek Regulatory Approval for) and market at least one (1) Product in one (1) country for each CAB Antibody licensed. Except as provided in this Section 4.7, Himalaya will have no other diligence obligations with respect to the development or Regulatory Approval of Products under this Agreement. For avoidance of doubt, any actions taken by Himalaya's Affiliates or Sublicensees under this Agreement shall be treated as actions taken by Himalaya in regard to satisfaction of the requirements of this Section 4.7.

5. PAYMENTS; RECORDS; AUDITS

5.1 In partial consideration for the rights and licenses granted hereunder, Himalaya shall be responsible for, and/or make the following payments to BioAtla:

(a) Development and Commercialization Payments/Costs.

(i) For each Initial CAB Antibody, Himalaya shall make the payments to BioAtla and shall bear Costs of Development under, and in accordance with, each Development Plan, and Costs of Commercialization in accordance with each Commercialization Plan. For each Initial CAB Antibody, such payments and costs shall specifically include the payments and costs as set forth in Exhibit G attached hereto and made a part hereof;

(ii) In the event Himalaya exercises its option to license a New Option Antibody as set forth under 3.2(h), Himalaya shall make the payments to BioAtla and shall bear Costs of Development under, and in accordance with, each Development Plan, and Costs of Commercialization in accordance with each Commercialization Plan. For each New Option Antibody, such payments and costs shall specifically include the payments and costs as set forth in Exhibit G attached hereto and made a part hereof;

(iii) **Royalty.** Himalaya shall pay BioAtla, on a country-by-country basis for each Calendar Quarter during the applicable Royalty Term, the lower of (a) a [***] royalty on annual Net Sales of Products for each Product and (b) in the event Himalaya licenses the rights to commercialize the Products in any country in the Territory to a Third Party, [***] of the royalties or other comparable payments (based upon sales of Products) received by Himalaya from such Third Party in such country; and

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

(iv) Other CAB Antibody Payments. Subject to other payments due hereunder, and subject to (i) Himalaya being a publicly traded company on any stock exchange, or (ii) Himalaya experiencing a Change of Control, Himalaya shall pay BioAtla either (i) [***] of any Milestone Payment received for each CAB Antibody under a Sublicense, or (ii) if Himalaya or any Affiliate develops and commercializes Products itself, the development and sales milestone payments that are set forth in Exhibit G for each CAB Antibody. For clarity, each milestone set forth in Exhibit G shall be due and payable one time only (regardless of the number of Products to achieve any such development and sales milestone event within the Territory).

5.2 Payment Reports and Payments. Himalaya shall, at the time of payment of any amounts pursuant to Section 5.1 (and Exhibit G), deliver to BioAtla any reports of Himalaya, or reports received by Himalaya from a Licensee of Himalaya related to such payments, in addition to any other information requested by BioAtla with respect to such payments and the calculation thereof.

5.3 Records. Himalaya shall maintain, and shall obligate its Affiliates, Licensees and other Selling Parties and their Affiliates to maintain, complete and accurate records of Products made, used or sold by them under this Agreement, and any amounts payable to BioAtla in relation to Products, which records shall contain sufficient information to confirm the accuracy of any reports delivered to BioAtla hereunder. Himalaya shall retain, and shall obligate its Affiliates, Licensees and other Selling Parties to retain, such records relating to each Calendar Quarter for three (3) years after the end of that Calendar Quarter.

5.4 Audits. Either party (acting as the “**Auditing Party**”) shall have the right, at its own expense, to cause an internationally recognized, independent certified public accountant reasonably acceptable to the other party (the “**Auditor**”) to inspect such records of the other party, including in the case of Himalaya, records of Himalaya, its Affiliates, Licensees, and other Selling Parties (the “**Audited Party**”) during normal business hours for the sole purpose of verifying any reports and payments delivered under this Agreement. The Auditor shall not disclose to the Auditing Party any information other than information relating to accuracy of reports and payments delivered under this Agreement and shall provide the Audited Party with a copy of any report given to the Auditing Party. If the Auditor concludes from the inspection that any payments under Section 5.1 have been underpaid, the Auditor shall report that conclusion to both parties, and Himalaya or BioAtla, as applicable as the Audited Party, shall have sixty (60) days in which to review the details of the Auditor’s report with the Auditor in order to resolve the asserted discrepancy. The Audited Party shall pay the amount of any underpayment plus interest on such amount computed pursuant to this Agreement within (a) thirty (30) days after the Auditor first delivers the results of the audit, to the extent that the Audited Party agrees with the Auditor’s report, or (b) fifteen (15) days after the end of the sixty (60) day review period and the issuance of a confirming report by the Auditor that the Auditor continues to conclude that payments under Section 5.1 remain unpaid, to the extent the Audited Party disagrees with the Auditor’s report. The Auditing Party shall bear the full cost of the audit unless the audit performed under this Section reveals an underpayment in excess of five percent (5%) of the amount paid in any quarter, in which case the Audited Party shall bear the full cost of such audit. The Auditing Party may exercise its rights under this Section only once every year and only with reasonable prior notice to the Audited Party.

6. EXCHANGE RATE; TAXES; LATE PAYMENTS

6.1 Exchange Rate; Manner and Place of Payment. All references to dollars and “\$” herein shall refer to U.S. dollars. All payments hereunder shall be payable in U.S. dollars unless expressly noted otherwise. When conversion of payments from any currency other than U.S. dollars is required, such conversion shall be at an exchange rate equal to the weighted average of the rates of exchange for the currency of the country from which such payments are payable as published by *The Wall Street Journal*, Western U.S. Edition (the “**Wall Street Journal**”), during the Calendar Quarter in which the applicable sales were made (with respect to payments related to Net Sales) and during the 5 business days preceding the payment for all other payments. All payments owed under this Agreement shall be made by wire transfer in immediately available funds to a bank account designated in writing by the receiving party, unless otherwise specified in writing by such party.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

6.2 Tax Withholding. All payments hereunder shall be due and payable net of taxes paid in the Territory. For clarity, each Upfront and Milestone payment to BioAtla shall be calculated based on the gross amount before any local tax withholdings, and any Royalty payments shall be based on the gross Net Sales before any local tax withholdings. For clarity, Himalaya shall be fully obligated to pay for any and all Territory taxes related to such payment. Himalaya shall not deduct any Territory tax due from any payment, and shall be fully obligated for any such Territory taxes.

6.3 Late Payments. In the event that any payment due under this Agreement is not sent to the party entitled to receive such payment when due in accordance with the applicable provisions of Section 5, the payment shall accrue interest from the date due at a rate equal to eight percent (8%) per annum, compounded monthly. The payment of such interest shall not limit the party entitled to receive payment from exercising any other rights it may have as a consequence of the lateness of any payment and in all cases shall be adjusted downward to reflect the maximum rate then legally permissible.

7. INTELLECTUAL PROPERTY

7.1 Ownership of Intellectual Property.

(a) New Patent Rights. Subject to Section 7.1(b), Himalaya shall own all right, title and interest in and to New Patent Rights in the Territory and BioAtla shall own all right, title and interest in and to New Patent Rights in the ROW for inventions developed by and on behalf of such party. To the extent Himalaya, its Affiliates, Licensees, or Third Party Service Providers and their respective personnel or agents or Affiliates are deemed to have an inventive contribution to the Inventions under New Patent Rights contemplated to be owned by BioAtla pursuant to this Section 7.1, or other rights, title or interest within or to such Inventions, Himalaya hereby assigns, and shall cause to be promptly assigned, all of its, its Affiliates', Licensees', and Third Party Service Providers' and their Affiliates' rights, title and interest in and to such Inventions to BioAtla in the ROW. To the extent BioAtla is deemed to have an inventive contribution to the Inventions under New Patent Rights contemplated to be owned by Himalaya by this Section 7.1, or other rights, title or interest within or to such Inventions, BioAtla hereby assigns, its rights, title and interest in and to such Inventions to Himalaya in the Territory.

(b) Composition of Matter/Method of Use Patents in the ROW. BioAtla shall own all right, title and interest to the Composition of Matter/Method of Use Patents in the ROW.

(c) Composition of Matter Patents in the Territory. Subject to Himalaya making all payments due for a CAB Antibody, hereunder BioAtla shall assign i) patents and/or patent applications specifically directed to CAB Antibody compositions ("CAB Antibody Compositions"), and ii) patents and/or patent applications specifically directed to methods of use/treatment using a CAB Antibody Composition, transferred under a Development Plan under this Agreement, solely in the Territory ("Composition Patents"), to Himalaya, using the form of assignment set forth in Exhibit H hereto, at the time of filing of such patents and/or patent applications in the Territory. Simultaneously with such assignment, Himalaya shall also sign, an assignment to BioAtla for BioAtla's use in the event of a Default as set forth in paragraph 7.1 (e) below (the "Default Assignment") set forth in Exhibit I.

(d) Ownership of Data and Know-How. All (a) Data generated in connection with the development of each CAB Antibody and each Product under a Development Plan by Himalaya, its Affiliates, Licensees, and Third Party Service Providers, and their Affiliates (the "**Clinical Data**") and (b) Know-How generated in connection with the development of each CAB Antibody and each Product under a Development Plan by Himalaya, its Affiliates, Licensees, and Third Party Service Providers, and their Affiliates shall be the sole and exclusive property of BioAtla and shall be considered BioAtla Know How, and Himalaya, hereby assigns, and shall cause its Affiliates, Licensees, and Third Party Service Providers, and their Affiliates to promptly assign, all of its and their rights, title and interest in and to such Clinical Data and Know-How to BioAtla.

(e) Default Event. In the event Himalaya, its Affiliates, Licensees and Third Party Service Providers, and/or their Affiliates: i) deviate from agreed upon activities set forth under a Development Plan, including, but not limited to the agreed upon timelines or agreed upon funding set forth under such Development Plan; ii) terminates, discontinues or abandons the development or commercialization, or funding of such development or commercialization, of a CAB Antibody and/or Product in the Territory; iii) fails to make any payment related to patent costs; or iv) undertakes any action in the Territory which challenges the validity, scope or enforceability of or otherwise opposes any BioAtla Patent Rights (each a “*Default Event*”), then BioAtla shall provide written notice of such default to Himalaya, and Himalaya shall provide written notice of such default to the applicable Affiliate, Licensees, Third Party Service Provider, or their Affiliate. Himalaya shall have forty (40) days in which to cure such default, or cause such default to be cured. In the event Himalaya fails to cure such default, or cause such default to be cured, within such forty (40) day period, Himalaya hereby transfers to BioAtla, and shall cause all Affiliates, Licensees, Third Party Service Providers, and their Affiliates, all right, title and interest in such event, in the Composition/Method of Use Patents and Data, including Clinical Data, in the Territory, and BioAtla shall have the right to terminate this Agreement with immediate effect.

7.2 Prosecution and Maintenance of Composition/Method of Use Patents, Patent Rights and New Patent Rights. BioAtla shall have the first right, but not the obligation, to control and manage the preparation, filing, prosecution and maintenance of all Composition/Method of Use Patents and New Patent Rights (collectively “*CAB Patent Rights*”), subject to this Section 7.2. Himalaya shall, or shall cause the applicable Licensees to, reimburse BioAtla for all external patent fees and costs incurred with respect to preparation, filing, prosecution and maintenance of CAB Patent Rights in the Territory within 30 days from the date of invoice for such costs and expenses by BioAtla. BioAtla shall keep Himalaya, or the applicable Licensee, reasonably informed of progress with regard to the preparation, filing, prosecution and maintenance of all CAB Patent Rights, including content, timing and jurisdiction of the filing and prosecution of such CAB Patent Rights, and shall consult with, and consider in good faith the requests and suggestions of, Himalaya with respect to filing and prosecuting CAB Patent Rights. In the event that BioAtla desires to not file, abandon or cease prosecution or maintenance of any CAB Patent Right, BioAtla shall provide reasonable prior written notice to Himalaya, or the applicable Licensee, of such intention to abandon (which notice shall, to the extent possible, be given no later than 60 days prior to the next deadline for any action that must be taken with respect to any such CAB Patent Right in the relevant patent office in the Territory). In such case, at Himalaya’s, or the applicable Licensee’s, sole discretion and upon written notice to BioAtla, Himalaya, or the applicable Licensee, may elect to continue prosecution and/or maintenance of any such CAB Patent Right in BioAtla’s name, at Himalaya’s sole cost and expense and by counsel of Himalaya’s or the applicable Licensee’s choice, and BioAtla shall take such actions, at Himalaya’s or the applicable Licensee’s expense, as may be reasonably necessary to enable Himalaya or the applicable Licensee to do so. In such event, Himalaya or the applicable Licensee shall keep BioAtla reasonably informed on matters regarding such prosecution and maintenance.

7.3 Cooperation of the Parties. Each party agrees, and Himalaya will cause the applicable Licensees, or Third Party Service Provider to agree, to cooperate fully in the preparation, filing, prosecution and maintenance of CAB Patent Rights under Section 7.2 and in the obtaining and maintenance of any patent extensions, supplementary protection certificates and the like with respect thereto respectively at its own costs. Such cooperation includes: (a) executing all papers and instruments, or requiring its employees or contractors, to execute such papers and instruments, so as to enable the other party to apply for and to prosecute patent applications in any country as permitted by Section 7.2; and (b) promptly informing the other party of any matters coming to such party’s attention that may affect the preparation, filing, prosecution or maintenance of any such patent applications and patents issuing therefrom.

7.4 Hold Harmless. During the term of this Agreement, Himalaya shall hold BioAtla harmless from and against claims by Himalaya of infringement of Himalaya Intellectual Property with respect to BioAtla’s activities in accordance with this Agreement solely for the purposes of carrying out the development as set forth in each Development Plan, or commercialization as set forth in each Commercialization Plan. The provisions of this Section 7.4 are intended to permit BioAtla to have freedom to carry out its responsibilities and perform its obligations under this Agreement and each Development Plan and each Commercialization Plan without fear of being made a party to any legal action concerning infringing any of the Himalaya Intellectual Property that is used to carry out such responsibilities or perform such obligations.

7.5 Infringement by Third Parties.

(a) Notice. In the event that either BioAtla or Himalaya becomes aware of any infringement or threatened infringement by a Third Party of any CAB Patent Right, it will notify the other party in writing to that effect. Any such notice shall include evidence to support an allegation of infringement or threatened infringement by such Third Party.

(b) CAB Patent Rights. Subject to this Section 7.5(b), Himalaya shall have the first right, as between BioAtla and Himalaya, but not the obligation, to bring and control any action or proceeding with respect to infringement of any CAB Patent Rights in the Territory, at its own expense and by counsel of its own choice. BioAtla shall have the right, at its own expense, to be represented in any such action by counsel of its own choice, and Himalaya and its counsel will reasonably cooperate with BioAtla and its counsel in strategizing, preparing and presenting any such action or proceeding. If Himalaya fails to bring an action or proceeding with respect to infringement of any CAB Patent Rights in the Territory within (i) 75 days following the notice of alleged infringement or (ii) 10 days before the time limit, if any, set forth in the appropriate laws and regulations for the filing of such actions, whichever comes first, BioAtla shall have the right to bring and control any such action at its own expense and by counsel of its own choice, and Himalaya shall have the right, at its own expense, to be represented in any such action by counsel of its own choice. Except as otherwise agreed to by the parties as part of a cost-sharing arrangement, any recovery or damages realized as a result of such action or proceeding with respect to CAB Patent Rights in the Territory shall be used first to reimburse the parties' documented out-of-pocket legal expenses relating to the action or proceeding, and any remaining compensatory damages relating to Products (including lost sales or lost profits with respect to Products) shall be retained [***]% by the party that brought and controlled such action or proceeding and [***]% by the other party, and any punitive damages shall be equally shared by the parties. Himalaya may grant a Licensee the rights granted to it in this Section 7.4 pursuant to any License Agreement .

(c) Cooperation. In the event a party brings an infringement action in accordance with this Section 7.5, the other parties shall cooperate fully, including, if required to bring such action, the furnishing of a power of attorney or being named as a party.

7.6 Infringement of Third Party Rights. Each party shall promptly notify the other in writing of any allegation by a Third Party that the activity of BioAtla, Himalaya, Licensee or any of their respective Affiliates pursuant to this Agreement or any License Agreement infringes or may infringe the intellectual property rights of a Third Party. BioAtla shall have the sole right to control any defense of any such claim involving alleged infringement of Third Party rights by activities of BioAtla or its Affiliates at its own expense and by counsel of its own choice, and Himalaya and the Licensee under the applicable License Agreement shall have the right, at its own expense, to be represented in any such action by counsel of its own choice. Himalaya or the Licensee under the applicable License Agreement shall have the sole right to control any defense of any such claim involving alleged infringement of Third Party rights by activities of Himalaya or any Selling Party at its own expense and by counsel of its own choice, and BioAtla shall have the right, at its own expense, to be represented in any such action by counsel of its own choice.

7.7 Consent for Settlement. No party shall enter into any settlement or compromise of any action or proceeding under this Section 7 which would in any manner alter, diminish, or be in derogation of another party's rights under this Agreement without the prior written consent of such other party, which shall not be unreasonably withheld.

7.8 Trademarks. Subject to BioAtla's written approval on a case by case basis, which shall not be unreasonably withheld, Himalaya shall own and be responsible for all trademarks, trade names, branding, or logos related to Products in the Field in the Territory, and will be responsible for selecting, registering, defending, and maintaining the same at Himalaya's sole cost and expense, provided that BioAtla's approval shall be deemed granted if BioAtla does not respond to Himalaya within 30 days of being informed by Himalaya of the same.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

7.9 BioAtla Global Transaction. BioAtla Global Transaction. In the event BioAtla has a party interested, or is interested itself, in exclusively licensing rights to a CAB Antibody subject to the rights granted to, or otherwise owned by, Himalaya hereunder, as part of a Global Transaction, BioAtla shall notify Himalaya of such interest in writing (“Global Transaction Notification”), and the parties shall confer within fifteen (15) days of such notification. Within thirty (30) days of the notification, Himalaya shall notify BioAtla in writing whether or not it will agree to participate in such Global Transaction (“Himalaya Approval”). BioAtla shall be solely responsible for the Global Transaction negotiation and execution, and shall update Himalaya on the status of the negotiation and relevant terms, in writing, every two (2) weeks. In the event the Global Transaction is not fully executed within three (3) months of the Himalaya Approval (“Negotiation Term”), Himalaya shall no longer be obligated to participate with its rights in such Global Transaction, however, the parties shall agree in writing the desire to extend the Negotiation Term for a specified period. The parties understand and agreed that: (a) BioAtla shall provide to Himalaya a summary, including the financial terms (which may be a term sheet), of any such proposed Global Transaction (such summary, the “**Global Transaction Summary**”) in the Global Transaction Notification; (b) Himalaya shall cooperate and assist BioAtla in consummating such Global Transaction, including the execution of all agreements and documentation requested by BioAtla and shall not, during the Negotiation Term, cease and otherwise refrain from discussing, negotiating or otherwise consummating any sublicense of any of the rights granted to, or otherwise owned by, Himalaya under this Agreement; (c) in connection with each such Global Transaction, the financial terms for Himalaya shall be as follows: within five (5) business days of receipt, BioAtla shall pay to Himalaya: A) in the event the Global Transaction involves an exclusive license, (i) [***] of all upfront and development milestones, (ii) [***] of sales milestones which are paid with respect to net sales of the applicable Product in the Territory, and (iii) [***] of the royalties paid with respect to net sales of the applicable Product in the Territory, all as and to the extent paid to BioAtla pursuant to such Global Transaction, or B) in the event that the Global Transaction involves a sharing of profits and losses by BioAtla and the Third Party pursuant to such Global Transaction (a “Co-Development Deal”), Himalaya shall be responsible for all Costs of Development associated with obtaining Regulatory Approval, and solely to the extent required to obtain Regulatory Approval, in the Territory, and Costs of Commercialization for the applicable Product solely in the Territory, and, in return, BioAtla shall promptly pay to Himalaya [***] of all global profits received by BioAtla pursuant to such Global Transaction. In the event the Global Transaction is a blend of a Co-Development Deal and an exclusive license, Himalaya shall be responsible for all Costs of Development associated with obtaining Regulatory Approval, and solely to the extent required to obtain Regulatory Approval, in the Territory, and Costs of Commercialization for the applicable Product solely in the Territory, and, in return, BioAtla shall promptly pay to Himalaya the greater of: a) [***] of any upfront payment received under such Global Transaction, and [***] of all proceeds received in the Territory, b) [***] of all proceeds received under such Global Transaction in the Territory. Notwithstanding the foregoing or anything to the contrary in this Agreement, in the case of BioAtla’s Co-Development of CTLA-4 with Beigene, in consideration of the rights in the Territory, BioAtla shall promptly pay Himalaya [***] percent of all development and sales milestones and royalties, received from Beigene in the Territory. For clarity, BioAtla shall pay Himalaya [***] of the development and sales milestones and royalties it receives under the CTLA-4 Co-Development with BeiGene in the BeiGene territory under the Co-Development agreement between BioAtla and BeiGene, since the BeiGene territory is larger than the Territory.

7.10 Prior to May 31st, 2020, in the event a Third Party Acquirer requires worldwide rights to [***] licensed to Himalaya hereunder (“Clinical Stage Licensed CAB Antibodies”), BioAtla shall notify Himalaya of such requirement in writing (“Acquisition Requirement Notification”), and the parties shall confer within ten (10) days of the Acquisition Requirement Notification and shall agree appropriate terms, including compensation, to Himalaya to exclusively license the rights to one or both of these two Clinical Stage Licensed CAB antibodies back to BioAtla (“Exclusive Back-License”), so BioAtla can conclude the acquisition transaction (“BioAtla Acquisition”). The Exclusive Back-License shall be effective upon the BioAtla Acquisition. BioAtla shall be solely responsible for the negotiation and execution of the BioAtla Acquisition, and shall update Himalaya on the status of the negotiation and relevant terms, in writing, every two (2) weeks. In the event the BioAtla Acquisition is not fully executed within three (3) months of the Acquisition Requirement Notification

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

("Negotiation Term"), Himalaya shall no longer be obligated to enter into the Exclusive Back-License, however, the parties shall agree in writing the desire to extend the Negotiation Term for a specified period. The parties understand and agreed that: (a) Himalaya shall, during the Negotiation Term, cease and otherwise refrain from discussing, negotiating or otherwise consummating any sublicense of any of the rights granted to, or otherwise owned by, Himalaya under this Agreement; (c) in connection with each such Exclusive Back-License, the financial terms for Himalaya shall be as follows for each CAB Antibody: an upfront payment of [***], (i) a [***] milestone payment upon NDA (or the equivalent) approval, and royalties as set forth hereunder for the Territory. BioAtla shall be responsible for all Costs of Development associated with obtaining Regulatory Approval in the Territory, and for all Costs of Commercialization for the applicable Product in the Territory. BioAtla shall make all reasonable attempts under the BioAtla Acquisition to require an Exclusive Back-License for either CAB-AXL-ADC or CAB-ROR2-ADC from Himalaya, but not both.

8. REPRESENTATIONS AND WARRANTIES

8.1 Mutual Representations and Warranties. Each party represents and warrants to the other that, as of the Effective Date: (a) it is duly organized and validly existing under the laws of its jurisdiction of incorporation or formation, and has full corporate or other power and authority to enter into this Agreement and to carry out the provisions hereof, (b) it is duly authorized to execute and deliver this Agreement and to perform its obligations hereunder, and each person executing this Agreement on its behalf has been duly authorized to do so by all requisite corporate or partnership action, (c) this Agreement is legally binding upon it, enforceable in accordance with its terms, and does not conflict with any agreement, instrument or understanding, oral or written, to which it is a party or by which it may be bound, nor violate any material law or regulation of any court, governmental body or administrative or other agency having jurisdiction over it, and (d) it has the right to grant the rights and licenses granted by it under this Agreement.

8.2 Mutual Covenants.

(a) Employees, Consultants and Contractors. Each party covenants that it has obtained or will obtain written agreements from each of its employees, consultants and contractors who perform development activities pursuant to this Agreement, which agreements will obligate such persons to obligations of confidentiality and non-use and to assign Inventions in a manner consistent with the provisions of this Agreement.

(b) Debarment. Each party represents, warrants and covenants to the other party that it is not debarred or disqualified under the U.S. Federal Food, Drug and Cosmetic Act or comparable laws in any country or jurisdiction other than the U.S. and it does not, and will not during the Term, employ or use the services of any person who is debarred or disqualified, in connection with activities relating to CAB Antibodies or any Product. In the event that either party becomes aware of the debarment or disqualification or threatened debarment or disqualification of any person providing services to such party, including the party itself or its Affiliates or Licensees or Third Party Service Providers, which directly or indirectly relate to activities contemplated by this Agreement, such party shall immediately notify the other party in writing and such party shall cease employing, contracting with, or retaining any such person to perform any such services.

(c) Compliance.

(i) In the performance of its obligations under this Agreement, such party shall comply and shall cause its and its Affiliates' employees and contractors to comply with all applicable laws, rules and regulations.

(ii) Such party and, to its knowledge, its and its Affiliates' employees and contractors shall not, in connection with the performance of their respective obligations under this Agreement, directly or indirectly through Third Parties, pay, promise or offer to pay, or authorize the payment of, any money or give any promise or offer to give, or authorize the giving of anything of value to a Public Official or Entity or other person for purpose of obtaining or retaining business for or with, or directing business to, any person, including, without limitation, either party (it being understood that, without any limitation to the foregoing, such party, and to its knowledge, its and its Affiliates' employees and contractors, has not directly or indirectly promised, offered or provided any corrupt payment, gratuity, emolument, bribe, kickback, illicit gift or hospitality or other illegal or unethical benefit to a Public Official or Entity or any other person in connection with the performance of such party's obligations under this Agreement, and shall not, directly or indirectly, engage in any of the foregoing).

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

(iii) Such party and its Affiliates, and their respective employees and contractors, in connection with the performance of their respective obligations under this Agreement, shall not cause such other party's indemnitees to be in violation of the FCPA, Export Control Laws, or any other applicable laws, rules or regulations or otherwise cause any reputational harm to such other party.

(iv) Such party shall immediately notify the other party if such party has any information or suspicion that there may be a violation of the FCPA, Export Control Laws, or any other applicable laws, rules or regulations in connection with the performance of this Agreement or the development, manufacture or commercialization of any Product.

(v) In connection with the performance of its obligations under this Agreement, such party shall comply and shall cause its and its Affiliates' employees and contractors to comply with such party's own anti-corruption and anti-bribery policy, a copy of which has been provided to the other party.

(vi) The other party will have the right, upon reasonable prior written notice and during such Party's regular business hours, to audit such party's books and records in the event that a suspected violation of any of the representations, warranties or covenants in this Section 8.2(c) needs to be investigated.

(vii) In the event that such party has violated or been suspected of violating any of the representations, warranties or covenants in this Section 8.2(c), such party will cause its or its Affiliates' personnel or others working under its direction or control to submit to periodic training that such party will provide on anti-corruption law compliance.

(viii) Such party will, at the other party's request, annually certify to such other party in writing such party's compliance, in connection with the performance of such party's obligations under this Agreement, with the representations, warranties or covenants in Section 8.2(c).

8.3 Additional BioAtla Representations, Warranties and Covenants. BioAtla represents, warrants and covenants to Himalaya that, as of the Effective Date:

(a) BioAtla has received no written notice from any Third Party that the development of any CAB Antibody conducted by BioAtla infringes any intellectual property rights of any Third Party; and

(b) there are no pending actions, claims, investigations, suits or proceedings against BioAtla, at law or in equity, or before or by any Regulatory Authority, and BioAtla has not received any written notice regarding any pending or threatened actions, claims, investigations, suits or proceedings against BioAtla, at law or in equity, or before or by any Regulatory Authority, in either case with respect to the BioAtla Know-How.

8.4 Additional Himalaya Representations, Warranties and Covenants. Himalaya represents, warrants and covenants to BioAtla that:

(a) Himalaya has not as of the Effective Date, and will not, and will not permit any Affiliate, Licensee or Third Party Service Provider to, during the Term, grant any right to any Third Party under the Himalaya Rights that would conflict with the rights granted to BioAtla hereunder;

(b) Himalaya shall not alone or with or for any Third Party (and shall not permit any Affiliate or Licensee to), research (including without limitation screen or conduct assays) in the Field any Licensed Candidate, or otherwise develop or commercialize any pharmaceutical product which is Specifically Directed to the Target of any Product; and

(c) Himalaya shall obtain, and maintain throughout the Term, all rights, authorizations, permits, licenses and consents necessary to perform and conduct the activities, in the Territory, contemplated by this Agreement.

8.5 Disclaimer. Except as expressly set forth in this Agreement, THE TECHNOLOGY AND INTELLECTUAL PROPERTY RIGHTS PROVIDED BY EACH PARTY HEREUNDER ARE PROVIDED "AS IS" AND EACH PARTY EXPRESSLY DISCLAIMS ANY AND ALL WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF DESIGN, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT OF THE INTELLECTUAL PROPERTY RIGHTS OF THIRD PARTIES, OR ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICES, IN ALL CASES WITH RESPECT THERETO. Without limiting the generality of the foregoing, (a) neither party represents or warrants that any Data obtained from conducting clinical trials in one country or jurisdiction will comply with the laws and regulations of any other country or jurisdiction, and (b) neither party represents or warrants the success of any study or test conducted pursuant to this Agreement or the safety or usefulness for any purpose of the technology it provides hereunder.

8.6 Limitation of Liability. EXCEPT (A) FOR A BREACH OF SECTION 8.4(b), OR (B) SECTION 13.5 OR (C) FOR CLAIMS THAT ARE SUBJECT TO INDEMNIFICATION UNDER 11 OR (C) FOR DAMAGES DUE TO FRAUD, MALICIOUS ACTIONS AND/OR INTENTIONAL TORT OF THE LIABLE PARTY, NEITHER PARTY NOR ANY OF THEIR RESPECTIVE AFFILIATES WILL BE LIABLE TO THE OTHER PARTY TO THIS AGREEMENT FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL, SPECIAL OR PUNITIVE OR EXEMPLARY DAMAGES OR LOST PROFITS, WHETHER LIABILITY IS ASSERTED IN CONTRACT, TORT (INCLUDING NEGLIGENCE AND STRICT PRODUCT LIABILITY), INDEMNITY OR CONTRIBUTION, AND IRRESPECTIVE OF WHETHER THAT PARTY OR ANY REPRESENTATIVE OF THAT PARTY HAS BEEN ADVISED OF, OR OTHERWISE MIGHT HAVE ANTICIPATED THE POSSIBILITY OF, ANY SUCH LOSS OR DAMAGE (EXCEPT TO THE EXTENT THE PARTY SEEKING INDEMNIFICATION IS ACTUALLY LIABLE TO A THIRD PARTY FOR SUCH CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES OR LOST PROFITS IN CONNECTION WITH A CLAIM BY SUCH THIRD PARTY).

9. CONFIDENTIALITY

9.1 Confidential Information. Except to the extent expressly authorized by this Agreement or otherwise agreed in writing by the parties, the parties agree that, during the Term and for ten (10) years thereafter, the receiving party shall keep confidential and shall not publish or otherwise disclose and shall not use for any purpose other than as expressly provided for in this Agreement any Confidential Information furnished to it by the other party pursuant to this Agreement or any Confidential Information developed by the other party hereunder, and both parties shall keep confidential and, subject to Section 9.5, shall not publish or otherwise disclose the terms of this Agreement. Each party may use the other party's Confidential Information only to the extent required to accomplish the purposes of this Agreement. Each party will use at least the same standard of care as it uses to protect proprietary or confidential information of its own (but no less than reasonable care) to ensure that its employees, agents, consultants, contractors and other representatives do not disclose or make any unauthorized use of the Confidential Information of the other party. Each party will promptly notify the other upon discovery of any unauthorized use or disclosure of the Confidential Information of the other party.

9.2 Exceptions. The obligations of confidentiality and restriction on use under this Article 9 shall not apply to any information which the receiving party can prove by competent written evidence: (a) is now, or hereafter becomes, through no act or failure to act on the part of the receiving party, generally known or available to the public; (b) is known by the receiving party at the time of receiving such information, other than by previous disclosure of the disclosing party, or its Affiliates, employees, agents, consultants, or contractors; (c) is hereafter furnished to the receiving party without restriction by a Third Party who has no obligation of confidentiality or limitations on use with respect thereto, as a matter of right; or (d) is independently discovered or developed by the receiving party without access or reference to, or use of, Confidential Information belonging to the disclosing party.

9.3 Authorized Disclosure. Each party may disclose Confidential Information belonging to the other party as expressly permitted by this Agreement or if and to the extent such disclosure is reasonably necessary in the following instances:

- (a) filing, prosecuting, or maintaining New Patent Rights as permitted by this Agreement;
- (b) Regulatory Filings for Products that such party has a license or right to develop hereunder in a given country or jurisdiction;
- (c) prosecuting or defending litigation as permitted by this Agreement;
- (d) complying with applicable court orders or governmental regulations or stock exchange rules; and
- (e) disclosure to Affiliates, Licensees, Third Party Service Providers, employees, consultants, contractors, agents or other Third Parties in connection with due diligence or similar investigations by such Third Parties, and disclosure to potential Third Party investors in confidential financing documents, provided, in each case, that any such Affiliate, Licensee, Third Party Service Provider, employee, consultant, contractor, agent or other Third Party agrees to be bound by terms of confidentiality and non-use consistent with those set forth in this Section 9.

Notwithstanding the foregoing, in the event a party is required to make a disclosure of the other party's Confidential Information pursuant to Section 9.3(c) or (d), it will, except where impracticable, give reasonable advance notice to the other party of such disclosure and use Commercially Reasonable Efforts to secure confidential treatment of such Confidential Information and at least as diligently as such party would use to protect its own confidential information. In any event, the parties agree to take all reasonable action to avoid disclosure of Confidential Information hereunder. Any information disclosed pursuant to 9.3(c) or (d) shall still be deemed Confidential Information and subject to the restrictions set forth in this Agreement, including the foregoing provisions of Section 9.

9.4 Publications. BioAtla shall have the right to review and comment on any material proposed for disclosure or publication by Himalaya regarding results of and other information regarding Himalaya's research or development activities with respect to Products, whether by oral presentation, manuscript or abstract. Before any such material is submitted for publication or presentation of the same is made, Himalaya shall deliver a complete copy to BioAtla at least 60 days prior to submitting the material to a publisher or initiating any other disclosure. Each party shall review any such material and give its comments to the other party within 30 days of the receipt of such material. With respect to oral presentation materials and abstracts, BioAtla shall make reasonable efforts to expedite review of such materials and abstracts, and shall return such items as soon as practicable to the other party with appropriate comments, if any, but in no event later than 30 days from receipt. Himalaya shall comply with BioAtla's request to delete references to the Confidential Information of BioAtla in any such material and agrees to delay any submission for publication or other public disclosure for a period of up to an additional 90 days for the purpose of preparing and filing appropriate patent applications. Himalaya shall reference BioAtla as the origin of the CAB Antibodies and shall include BioAtla authors as appropriate.

9.5 Publicity; Public Disclosures. It is understood that each party may desire or be required to issue future press releases relating to this Agreement or activities hereunder. The parties agree to consult with each other reasonably and in good faith with respect to the text and timing of such subsequent press releases prior to the issuance thereof, provided that a party may not unreasonably withhold, condition or delay consent to such releases, and that either party may issue such press releases or make such disclosures to the SEC or any other national securities exchange or other internationally recognized securities exchange pursuant to registration statements, periodic reports or current reports or otherwise as it determines, based on advice of counsel, are reasonably necessary to comply with laws or regulations or for appropriate market disclosure. The parties will consult with each other on the provisions of this Agreement to be redacted in any filings made by a party with the SEC or any other national securities exchange or other internationally recognized securities exchange or as otherwise required by law. In addition, following the initial joint press release announcing this Agreement, either party shall be free to disclose, without the other party's prior written consent, the existence of this Agreement, the identity of the other party and those terms of the Agreement which have already been publicly disclosed in accordance herewith.

9.6 Prior Non-Disclosure Agreement. As of the Effective Date, the terms of this Section 9 shall supersede any prior non-disclosure, secrecy or confidentiality agreement between the parties (or their Affiliates) dealing with the subject of this Agreement. Any information disclosed pursuant to any such prior agreement shall be deemed Confidential Information for purposes of this Agreement.

9.7 Equitable Relief. Given the nature of the Confidential Information and the competitive damage that a party would suffer upon unauthorized disclosure, use or transfer of its Confidential Information to any Third Party, the parties agree that monetary damages would not be a sufficient remedy for any breach of this Section 9. In addition to all other remedies, a party shall be entitled to specific performance and injunctive and other equitable relief as a remedy for any breach or threatened breach of this Section 9.

10. TERM AND TERMINATION

10.1 Term. This Agreement shall commence on the Effective Date, and unless terminated earlier as provided in this Section 10 or by mutual written agreement of the parties, shall continue until the expiration of all payment obligations under Section 5 (the “*Term*”).

10.2 Termination for Cause. Each party shall have the right to terminate this Agreement upon 60 days’ prior written notice to the other party upon the occurrence of any of the following:

(a) upon or after the bankruptcy, insolvency, dissolution or winding up of the other party (other than a dissolution or winding up for the purpose of reconstruction or amalgamation); or

(b) after the breach of any material provision of this Agreement by the other party (including any failure to pay any amounts in excess of \$100,000) if the breaching party has not cured such breach within the 60 day period following written notice of termination by the non-breaching party.

10.3 Termination for Patent Challenge. BioAtla shall have the right to terminate this Agreement immediately upon written notice to Himalaya if (a) Himalaya or any of its Affiliates directly, or indirectly through any Third Party, commences any interference or opposition proceeding with respect to, challenges the validity or enforceability of, or opposes any extension of or the grant of a supplementary protection certificate with respect to, any BioAtla Intellectual Property or (b) any Licensee or Third Party Service Provider directly, or indirectly through any Third Party, commences any interference or opposition proceeding with respect to, challenges the validity or enforceability of, or opposes any extension of or the grant of a supplementary protection certificate with respect to, any BioAtla Intellectual Property, and (i) Himalaya does not cause such Licensee or Third Party Service Provider to withdraw such action or (ii) Himalaya does not terminate the License Agreement with such Licensee or Third Party Service Provider, in each case, within 10 days of Himalaya receiving from BioAtla written notice of any such action being taken by such Licensee or Third Party Service Provider with sufficient evidence showing that such Licensee or Third Party Service Provider has taken such action.

10.4 Termination by BioAtla.

(a) If Himalaya notifies BioAtla in writing that it intends to abandon development of any CAB Antibody in the Territory, then BioAtla shall be entitled to terminate this Agreement immediately upon written notice to Himalaya with respect to such CAB Antibody.

(b) If Himalaya fails to comply with its diligence obligations set forth in this Agreement with respect to any CAB Antibody or Product in the Territory, then BioAtla shall be entitled to terminate this Agreement with respect to such CAB Antibody or Product immediately upon written notice to Himalaya if Himalaya has not complied with such diligence obligations to BioAtla’s satisfaction within the 60 day period following written notice of termination by BioAtla; provided, however, that in the event that Himalaya’s noncompliance with such diligence obligations cannot be cured prior to the expiration of the 60

day cure period, termination under this Section 10.4 shall not occur if Himalaya has taken appropriate steps to commence such cure during such 60 day period and Himalaya diligently continues to pursue reasonable efforts to cure such noncompliance within a reasonable period of time thereafter, but in any event within 90 days after notice of termination.

(c) BioAtla shall be entitled to terminate this Agreement pursuant to Sections 3.4(a)(iv) and 7.1.

10.5 Termination by Himalaya. Himalaya shall have the right to terminate this Agreement with respect to a CAB Antibody in the event that such CAB Antibody does not meet the Clinical Criteria.

10.6 Effect of Expiration or Termination; Surviving Obligations.

(a) **Effect of Termination by Himalaya.** In the event that this Agreement is terminated by Himalaya pursuant to Sections 10.2 or 10.5, as of such date of termination all rights of Himalaya hereunder shall immediately cease.

(b) **Effect of Expiration or Termination.** Upon expiration or termination of this Agreement, all rights and obligations of the parties under this Agreement shall terminate, except as provided elsewhere in this Section 10.6.

(c) **Additional Effect of Termination by Himalaya.** Upon any termination of this Agreement by Himalaya pursuant to Sections 10.2 and 10.5, the ROW License shall continue in effect in accordance with its terms.

(d) **Additional Effect of Termination by BioAtla.** Upon any termination of this Agreement by BioAtla pursuant to Section 10.2, 10.3 or 10.4:

(i) in lieu of the ROW License (with respect to Products), Himalaya shall, and it hereby does, grant to BioAtla an exclusive (even as to Himalaya), worldwide, royalty-free, fully-paid, irrevocable, perpetual license, with the right to sublicense through multiple tiers of sublicense, under the Himalaya Intellectual Property to develop, conduct clinical trials, obtain Regulatory Approval, make, have made, use, import, offer for sale and sell Products in the Field in both the Territory and the ROW;

(ii) as promptly as practicable (and in any event within ninety (90) days) after such termination, Himalaya shall: (A) to the extent not previously provided to BioAtla, deliver to BioAtla true, correct and complete copies of all Regulatory Filings and registrations (including Regulatory Approvals) for Products in the Field in the Territory, and disclose to BioAtla all Himalaya Know-How not previously disclosed to BioAtla; (B) transfer or assign, or cause to be transferred or assigned, to BioAtla or its designee (or to the extent not so assignable, take all reasonable actions to make available to BioAtla or its designee the benefits of) all Regulatory Filings and registrations (including Regulatory Approvals) for Products in the Field in the Territory, whether held in the name of Himalaya or its Affiliates, Licensee; and (C) take such other actions and execute such other instruments, assignments and documents as may be necessary to effect, evidence, register and record the transfer, assignment or other conveyance of rights under this Section 10.6 to BioAtla;

(iii) Himalaya shall, as directed by BioAtla and consistent with applicable law, cause to be wound-down any ongoing development activities of Himalaya and its Affiliates and other Selling Parties with respect to any Products in the Field in the Territory in an orderly fashion or promptly transfer such development activities to BioAtla or its designee, in compliance with all applicable laws, rules and regulations; and

(iv) Himalaya shall, and it hereby does, effective as of such termination, assign to BioAtla all of Himalaya's right, title and interest in and to any and all Product-specific trademarks used by Himalaya and its Affiliates, including all goodwill therein, and Himalaya shall promptly take such actions and execute such instruments, assignments and documents as may be necessary to effect, evidence, register and record such assignment, at Himalaya's cost.

(e) Effects of Termination on Sublicenses. In the event of any termination of this Agreement by either party pursuant to Sections 10.2, 10.3 and 10.4(a), all Sublicenses granted by Himalaya hereunder shall terminate effective as of the date of such termination of this Agreement. In the event of any termination of this Agreement with respect to a CAB Antibody by BioAtla pursuant to Section 10.4(b) or by Himalaya pursuant to Section 10.5, all Sublicenses granted by Himalaya hereunder with respect to such terminated CAB Antibody shall terminate effective as of the date of termination of such CAB Antibody.

(f) Confidential Information. Upon expiration or termination of this Agreement in its entirety, except to the extent that a party retains a license from any other party as provided in this Section 10.6, each party shall promptly return to the other parties, or delete or destroy, all relevant records and materials in such party's possession or control containing Confidential Information of the other party; provided that such party may keep one copy of such materials for archival purposes only subject to a continuing confidentiality obligations.

(g) Survival. Expiration or termination of this Agreement shall not relieve the parties of any obligation or right accruing prior to such expiration or termination. Except as set forth below or elsewhere in this Agreement, the obligations and rights of the parties under the following provisions of this Agreement shall survive expiration or termination of this Agreement: Sections 3.6, 5.4, 7.1, 10.6, 11, 12 and 13.1.

10.7 Exercise of Right to Terminate. Termination of this Agreement shall not preclude either party from claiming any other damages, compensation or relief that it may be entitled to upon such termination.

10.8 Rights in Bankruptcy. All rights and licenses granted under or pursuant to this Agreement by one party to another party are, and will otherwise be deemed to be, for purposes of Section 365(n) of the U.S. Bankruptcy Code or comparable provision of applicable bankruptcy or insolvency laws, licenses of right to "intellectual property" as defined under Section 101 of the U.S. Bankruptcy Code or comparable provision of applicable bankruptcy or insolvency laws. The parties agree that a party that is a licensee of such rights under this Agreement will retain and may fully exercise all of its rights and elections under the U.S. Bankruptcy Code or comparable provision of applicable bankruptcy or insolvency laws. The parties further agree that, in the event of the commencement of a bankruptcy proceeding by or against a party to this Agreement under the U.S. Bankruptcy Code or comparable provision of applicable bankruptcy or insolvency laws, a party which has been granted a license to intellectual property under this Agreement will be entitled to a complete duplicate of (or complete access to, as appropriate) any such intellectual property and all embodiments of such intellectual property, and same, if not already in its possession, will be promptly delivered to it (a) upon any such commencement of a bankruptcy or insolvency proceeding upon its written request therefor, unless the bankrupt party elects to continue to perform all of its obligations under this Agreement, or (b) if not delivered under (a) above, following the rejection of this Agreement by or on behalf of the bankrupt party upon written request therefor by such party.

11. INDEMNIFICATION

11.1 Indemnification by BioAtla. BioAtla hereby agrees to save, defend and hold Himalaya, its Affiliates (for so long as such entities remain Affiliates of Himalaya) and their respective directors, officers, employees and agents (each, a "**Himalaya Indemnatee**"), harmless from and against any and all liabilities, expenses and losses, including reasonable legal expenses and attorneys' fees (collectively, "**Losses**"), to which any Himalaya Indemnatee may become subject as a result of any claim, demand, action or other proceeding by any Third Party (a "**Claim**") to the extent such Losses arise out of: (a) the practice by BioAtla of any license granted to it hereunder by Himalaya or (b) the breach by BioAtla of any warranty, representation, covenant or agreement made by BioAtla in this Agreement; except, in each case, to the extent such Losses result from the gross negligence or willful misconduct of any Himalaya Indemnatee, or the breach by Himalaya of any warranty, representation, covenant or agreement made by Himalaya in this Agreement.

11.2 Indemnification by Himalaya. Himalaya hereby agrees to save, defend and hold BioAtla, its Affiliates (for so long as such entities remain Affiliates of BioAtla) and their respective directors, officers, employees and agents (each, a "**BioAtla Indemnatee**"), harmless from and against any and all Losses to which

any BioAtla Indemnitee may become subject as a result of any claim, demand, action or other proceeding by any Third Party to the extent such Losses arise out of: (a) the practice by Himalaya of any rights or license granted to it hereunder by BioAtla or (b) the breach by Himalaya of any warranty, representation, covenant or agreement made by Himalaya in this Agreement; except, in each case, to the extent such Losses result from the gross negligence or willful misconduct of any BioAtla Indemnitee, or the breach by BioAtla of any warranty, representation, covenant or agreement made by BioAtla in this Agreement.

11.3 Control of Defense.

(a) Notice of Claims. A Claim to which indemnification applies under Section 11.1 or Section 11.2 shall be referred to herein as an **“Indemnification Claim.”** If the Indemnitee intends to claim indemnification under this Article 11, the Party claiming indemnification (the **“Indemnitee”**) shall notify the indemnifying Party (the **“Indemnitor”**) in writing, promptly upon becoming aware of an Indemnification Claim, describing in reasonable detail the facts giving rise to the Indemnification Claim; provided, that an Indemnification Claim in respect of any action at law or suit in equity by or against a Third Party as to which indemnification shall be sought shall be given promptly after the action or suit is commenced (provided that the Indemnitee is aware of such commencement); and provided further, that the failure by an Indemnitee to give such notice shall not relieve the Indemnitor of its indemnification obligation under this Agreement except and only to the extent that the Indemnitor is actually prejudiced as a result of such failure to give notice.

(b) Indemnification Procedures. If an Indemnitee receives written notice of a Claim that the Indemnitee believes may result in a claim for indemnification under this Article 11, such Indemnitee shall deliver a notice of such Indemnification Claim to the Indemnitor in accordance with the provisions of Section 11.3(a). If the Litigation Conditions are satisfied, then the Indemnitor shall have the right to assume and control the defense of the Claim, at its own expense with counsel selected by it and reasonably acceptable to the Indemnitee, by delivering written notice of its assumption of such defense to the Indemnitee within twenty (20) days of its receipt of notice of such Claim from the Indemnitor (but the Indemnitor shall in any event have the right to assume and control the defense of a Claim that initially sought injunctive relief (including a declaratory judgment) from the Indemnitee when the only remaining dispute in such matter is the determination of non-injunctive relief or when the only remaining relief sought by the Third Party in such matter is non-injunctive relief, whichever is first); provided, however, that the Indemnitee shall have the right to retain its own counsel, with the reasonable fees and expenses to be paid by the Indemnitor, if at any time the Litigation Conditions are not satisfied with respect to such Claim. If the Indemnitor assumes and controls the defense of such Claim, the Indemnitor shall keep the Indemnitee reasonably apprised of the status of the Claim and the Indemnitee shall be entitled to otherwise monitor such Claim at its sole cost and expense. If the Claim seeks injunctive relief (including a declaratory judgment) against or from the Indemnitee or if the Indemnitor does not assume the defense of the Claim as described in this Section 11.3, the Indemnitee shall be permitted to assume and control the defense of such Claim (but shall have no obligation to do so) and in such event shall be entitled to settle or compromise the Indemnification Claims in its sole and reasonable discretion. If the Indemnitor has assumed and controls the defense of the Claim in accordance with this Section 11.3, (i) the Indemnitee shall not settle or compromise the Indemnification Claim without the prior written consent of the Indemnitor, such consent not to be unreasonably withheld, conditioned or delayed and (ii) the Indemnitor shall not settle or compromise the Indemnification Claim in any manner that would result in the payment of amounts by the Indemnitee, impose any other obligation on the Indemnitee or otherwise have an adverse effect on the Indemnitee’s rights or interests (including any rights under this Agreement or the scope or enforceability of any Patents or Know-How licensed by one Party to another Party pursuant to this Agreement), without the prior written consent of the Indemnitee. In each case, the Party that is not controlling the defense of any Claim shall reasonably cooperate with the Party that is controlling the defense of such Claim, at the controlling Party’s expense and shall make available to the controlling Party all pertinent information under the control of the non-controlling Party, which information shall be subject to Article 9 of this Agreement. Each Party shall use commercially reasonable efforts to avoid production of Confidential Information of the other Party (consistent with applicable law and rules of procedure), and to cause all communications among employees, counsel and other representatives of such Party to be made so as to preserve any applicable attorney-client or work-product privileges.

11.4 Insurance. Each party, at its own expense, shall maintain appropriate insurance (or self-insure) in an amount consistent with sound business practice and reasonable in light of its obligations under this Agreement during the Term. Each party shall provide a certificate of insurance (or evidence of self-insurance) evidencing such coverage to the other party upon request.

12. DISPUTE RESOLUTION

12.1 Disputes. In the event of any dispute arising out of or relating to this Agreement, except as otherwise provided in Section 2.5 of this Agreement, the parties shall, through their respective executive officers, first meet and attempt to resolve the dispute in face-to-face negotiations. This meeting shall occur within 15 days after a party provides notice to another party that it wishes to invoke such negotiations.

12.2 Arbitration. If the parties are unable to resolve such dispute through such negotiations, then, except in the case of a dispute, controversy or claim that concerns (a) the validity or infringement of a patent, trademark or copyright, or (b) any antitrust, anti-monopoly or competition law or regulation, whether or not statutory, the dispute shall be resolved by binding arbitration before a single independent and neutral experienced arbitrator selected by mutual agreement of the parties. In the event that the parties are unable to mutually agree on the appointment of such arbitrator, then such arbitration shall be conducted before a panel of three independent and neutral experienced arbitrators, one chosen by BioAtla, one chosen by Himalaya and the third chosen by the foregoing two arbitrators. Any such arbitration proceeding shall be administered by the Hong Kong International Arbitration Centre (HKIAC) in accordance with the Hong Kong International Arbitration Centre Administered Arbitration Rules (HKIAC Rules, with limited discovery, in accordance with its then current rules governing commercial disputes and the place of arbitration shall be Hong Kong. Any arbitration shall be conducted in the English language and applicable arbitration association shall use the laws of the State of New York as the governing law for this Agreement and the parties' obligations hereunder. The arbitrator(s) shall have no authority to award punitive or any other type of damages not measured by a party's compensatory damages. Except to the extent necessary to confirm or enforce an award or as may be required by law, neither a party nor any arbitrator may disclose the existence, content, or results of an arbitration without the prior written consent of all parties (BioAtla and Himalaya) to such arbitration. In no event shall an arbitration be initiated after the date when commencement of a legal or equitable proceeding based on the dispute, controversy or claim would be barred by the applicable statute of limitations. Each party shall bear its own attorneys' fees, costs and disbursements arising out of the arbitration, and shall pay an equal share of the fees and costs of the arbitrators; provided, however, that the arbitrators shall be authorized to determine whether a party is the prevailing party, and if so, to award to that prevailing party reimbursement for its reasonable attorneys' fees, costs and disbursements (including, for example, expert witness fees and expenses, photocopy charges, travel expenses, etc.) and/or the fees and costs of the arbitrators. Each party agrees to fully perform and satisfy any arbitration award made against it within 15 days of the service of the award. By agreeing to this binding arbitration provision, the parties understand that they are waiving certain rights and protections which may otherwise be available if a dispute between the parties were determined by litigation in court, including the right to seek or obtain certain types of damages precluded by this provision, the right to a jury trial, certain rights of appeal and a right to invoke formal rules of procedure and evidence.

12.3 Court Actions. Nothing contained in this Agreement shall deny a party the right to (a) seek, upon good cause, injunctive or other equitable relief from a court of competent jurisdiction in the context of an emergency or prospective irreparable harm, and such an action may be filed and maintained notwithstanding any ongoing dispute resolution discussions or arbitration proceedings or (b) the right to bring any dispute regarding its intellectual property rights in a court of competent jurisdiction.

13. GENERAL PROVISIONS

13.1 Governing Law. This Agreement shall be governed by, and construed and enforced in accordance with, the laws of the State of New York, excluding its conflicts of laws principles.

13.2 Entire Agreement; Modification. This Agreement is both a final expression of the Parties' agreement and a complete and exclusive statement with respect to all of its terms. This Agreement, together with all other written agreements specifically referenced herein, supersedes all prior and contemporaneous agreements and communications, whether oral, written or otherwise, concerning any and all matters contained herein. This Agreement may only be modified or supplemented in a writing expressly stated for such purpose and signed by the parties to this Agreement.

13.3 Relationship Between the Parties.

The parties' relationship, as established by this Agreement, is solely that of independent contractors. This Agreement does not create any partnership, joint venture or similar business relationship between the parties. Except as expressly set forth hereunder, no party is a legal representative of any other party, and no party can assume or create any obligation, representation, warranty or guarantee, express or implied, on behalf of any other party for any purpose whatsoever.

13.4 Non-Waiver. The failure of a party to insist upon strict performance of any provision of this Agreement or to exercise any right arising out of this Agreement shall neither impair that provision or right nor constitute a waiver of that provision or right, in whole or in part, in that instance or in any other instance. Any waiver by a party of a particular provision or right shall be in writing, shall be as to a particular matter and, if applicable, for a particular period of time and shall be signed by such party.

13.5 Assignment. Except as expressly provided hereunder, neither this Agreement nor any rights or obligations hereunder may be assigned or otherwise transferred by any party without the prior written consent of the other parties (which consent shall not be unreasonably withheld); *provided, however*, that a party may assign or otherwise transfer this Agreement and its rights and obligations hereunder without the other parties' consent:

(a) in connection with the transfer or sale of all or substantially all of the business or assets of such party relating to Products to a Third Party, whether by merger, consolidation, divestiture, restructure, sale of stock, sale of assets or otherwise, provided that in the event of a transaction (whether this Agreement is actually assigned or is assumed by the acquiring party by operation of law (*e.g.*, in the context of a reverse triangular merger)), (i) intellectual property rights of the acquiring party to such transaction (if other than one of the parties to this Agreement) shall not be included in the technology licensed hereunder, (ii) in the event of a Change of Control of BioAtla, no CAB antibodies and candidates of the acquiring party to such transaction, would be included under this Agreement; or

(b) to an Affiliate, provided that the assigning party shall remain liable and responsible to the non-assigning party hereto for the performance and observance of all such duties and obligations by such Affiliate.

The rights and obligations of the parties under this Agreement shall be binding upon and inure to the benefit of the successors and permitted assigns of the parties specified above, and the name of a party appearing herein will be deemed to include the name of such party's successors and permitted assigns to the extent necessary to carry out the intent of this section. Any assignment not in accordance with this Agreement shall be void.

13.6 No Third Party Beneficiaries. This Agreement is neither expressly nor impliedly made for the benefit of any party other than those executing it, except for the persons expressly entitled to indemnification as provided in Section 11.

13.7 Severability. If, for any reason, any part of this Agreement is adjudicated invalid, unenforceable or illegal by a court of competent jurisdiction, such adjudication shall not, to the extent feasible, affect or impair, in whole or in part, the validity, enforceability, or legality of any remaining portions of this Agreement. All remaining portions shall remain in full force and effect as if the original Agreement had been executed without the invalidated, unenforceable or illegal part.

13.8 Notices. Any notice to be given under this Agreement must be in writing and delivered either in person, by (a) air mail (postage prepaid) requiring return receipt, (b) overnight courier, or (c) email or facsimile confirmed thereafter by any of the foregoing, to the party to be notified at its address(es) given below, or at any address such party may designate by prior written notice to the other parties in accordance

with this Section 13.8. Notice shall be deemed sufficiently given for all purposes upon the earliest of: (i) the date of actual receipt; (ii) if air mailed, five days after the date of postmark; (iii) if delivered by overnight courier, the next day the overnight courier regularly makes deliveries or (iv) if emailed or sent by facsimile, the date of confirmation of receipt if during the recipient's normal business hours, otherwise the next day.

If to Himalaya, notices must be addressed to:

F +1 202 261 3333

13.9 Force Majeure. Each party shall be excused from liability for the failure or delay in performance of any obligation under this Agreement (other than failure to make payment when due) by reason of any event beyond such party's reasonable control including but not limited to Acts of God, fire, flood, explosion, earthquake, pandemic flu, or other natural forces, war, civil unrest, acts of terrorism, accident, destruction or other casualty, any lack or failure of transportation facilities, any lack or failure of supply of raw materials, or any other event similar to those enumerated above. Such excuse from liability shall be effective only to the extent and duration of the event(s) causing the failure or delay in performance and provided that the party has not caused such event(s) to occur. Notice of a party's failure or delay in performance due to force majeure must be given to the other party within 10 calendar days after its occurrence. All delivery dates under this Agreement that have been affected by force majeure shall be tolled for the duration of such force majeure. In no event shall any party be required to prevent or settle any labor disturbance or dispute.

13.10 Interpretation. The headings of clauses contained in this Agreement preceding the text of the sections, subsections and paragraphs hereof are inserted solely for convenience and ease of reference only and shall not constitute any part of this Agreement, or have any effect on its interpretation or construction. All references in this Agreement to the singular shall include the plural where applicable. Unless otherwise specified, references in this Agreement to any Article shall include all Sections, subsections and paragraphs in such Article, references to any Section shall include all subsections and paragraphs in such Section, and references in this Agreement to any subsection shall include all paragraphs in such subsection. The word "including" and similar words means including without limitation. The word "or" means "and/or" unless the context dictates otherwise because the subject of the conjunction are mutually exclusive. The words "herein," "hereof" and "hereunder" and other words of similar import refer to this Agreement as a whole and not to any particular Section or other subdivision. All references to days in this Agreement means calendar days, unless otherwise specified. Ambiguities and uncertainties in this Agreement, if any, shall not be interpreted against either Party, irrespective of which Party may be deemed to have caused the ambiguity or uncertainty to exist.

13.11 Counterparts; Electronic or Facsimile Signatures. This Agreement may be executed in any number of counterparts, each of which shall be an original, but all of which together shall constitute one instrument. This Agreement may be executed and delivered electronically or by facsimile and upon such delivery such electronic or facsimile signature will be deemed to have the same effect as if the original signature had been delivered to the other party.

13.12 English Language. This Agreement is in the English language, and the English language shall control their interpretation. In addition, all notices required or permitted to be given under this Agreement, and all written, electronic, oral or other communications between the Parties regarding this Agreement, shall be in the English language.

13.13 Exhibits and Schedules. All exhibits or schedules referred to in this Agreement are attached hereto and incorporated herein by this reference.

Development and Commercialization Payments/Costs

All payments due to BioAtla hereunder are due and payable in USD, and by wire to the bank account of written notice by BioAtla.

- 1) Himalaya shall make the following payments to BioAtla, and each party shall bear Costs of Development under, and in accordance with, each Development Plan, and Costs of Commercialization in accordance with each Commercialization Plan. Notwithstanding anything herein to the contrary, such payments and costs shall specifically include the following:
 - a) [***]: (i) Upon submission of a IND in the Territory, Himalaya will pay to BioAtla [***] for, and BioAtla will deliver to Himalaya, sufficient supply of [***] GMP manufactured material for at least [***]; (ii) Himalaya will conduct and fund [***] of the P1 Clinical Trial in the Territory, if required (for example an additional [***] patient study may be required by regulatory bodies in the Territory, despite all of the US P1 Clinical Trial data); (iii) Himalaya will conduct and fund [***] of the P2 Clinical Trial Territory patient costs, solely to the extent required for Himalaya to advance the [***] in the Territory for its desired indication(s), while leveraging BioAtla's ROW P2 patient data, which may be approximately [***] patients per indication, or more, in the Territory; for clarity, in the event the P2 Clinical Trial is comprised of patients from both the Territory and ROW for a particular indication, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, solely up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iv) Himalaya will conduct and fund [***] of a P3 Clinical Trial in the Territory, if required, (v) Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below. For clarity, Himalaya shall have the right to use all relevant BioAtla Clinical Data to support its Clinical Trials and Regulatory Filings in the Territory, and BioAtla shall have the right to use all relevant Himalaya Clinical Data to support its Clinical Trials and Regulatory Filings in the ROW. It is anticipated by the parties hereunder that both parties benefit from the cost efficiencies of leveraging each others data, and with BioAtla, or its licensee, developing and commercializing the [***] in the ROW, the parties anticipate that Himalaya may require fewer patients to advance the [***] in the Territory, since it will use the ROW data from BioAtla to support its studies. Himalaya will be responsible for and fund [***] percent ([***]%) of the Costs of Commercialization in the Territory;
 - b) [***]: (i) Upon submission of a IND in the Territory, Himalaya will pay to BioAtla [***] for, and BioAtla will deliver to Himalaya, sufficient supply of [***] GMP manufactured material for at least [***]; (ii) Himalaya will conduct and fund [***] of the P1 Clinical Trial in the Territory, if required (for example an additional [***] patient study may be required by regulatory bodies in the Territory, despite all of the US P1 Clinical Trial data); (iii) Himalaya will conduct and fund [***] of the P2 Clinical Trial Territory patient costs, solely to the extent required for Himalaya to advance the [***] in the Territory for its desired indication(s), while leveraging BioAtla's ROW P2 patient data, which may be approximately [***] per indication, or more, in the Territory; for clarity, in the event the P2 Clinical Trial is comprised of patients from both the Territory and ROW for a particular indication, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, solely up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iv) Himalaya will conduct and fund [***] of a P3 Clinical Trial in the Territory, if required, (v) Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below. For clarity, Himalaya shall have the right to use all relevant BioAtla Clinical Data to support its Clinical Trials and Regulatory Filings in the Territory, and BioAtla shall have the right to use all relevant Himalaya Clinical Data to support its Clinical Trials and Regulatory Filings in the ROW. It is anticipated by the parties hereunder that both parties benefit from the cost efficiencies of leveraging each others data, and with BioAtla, or its licensee, developing and commercializing the [***] in the ROW, the parties anticipate that Himalaya may require fewer patients to advance the [***] in the Territory, since it will use the ROW data from BioAtla to support its studies. Himalaya will be responsible for and fund [***] of the Costs of Commercialization in the Territory;

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

- c) [***]: Himalaya will pay to BioAtla [***] within [***] business days from notice from BioAtla of its IND filing in the US. Further, (i) upon submission of a IND in its Territory, Himalaya will pay to BioAtla [***] for, and BioAtla will deliver to Himalaya, sufficient supply of [***] GMP manufactured material for at least [***] patients; (ii) in the event the Parties jointly decide to perform the entire P1 Clinical Trial in the Territory, or the entire P1 Clinical Trial in the ROW, Himalaya shall be responsible for [***] of the direct costs (for clarity, direct costs do not include overhead) for such P1 Clinical Trial costs, and BioAtla shall be responsible for the remainder of such P1 Clinical Trial costs for such shared P1 Clinical Trial; in the event the P1 Clinical Trial is comprised of patients from both the Territory and ROW, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iii) Himalaya will conduct and fund [***] of the P2 Clinical Trial Territory patient costs, solely to the extent required for Himalaya to advance the [***] in the Territory for its desired indication(s), while leveraging BioAtla's ROW P2 patient data, which may be approximately [***] per indication, or more, in the Territory; for clarity, in the event the P2 Clinical Trial is comprised of patients from both the Territory and ROW for a particular indication, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, solely up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iv) Himalaya will conduct and fund [***] of a P3 Clinical Trial in the Territory, if required, and (v) Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below. For clarity, Himalaya shall have the right to use all relevant BioAtla Clinical Data to support its Clinical Trials and Regulatory Filings in the Territory, and BioAtla shall have the right to use all relevant Himalaya Clinical Data to support its Clinical Trials and Regulatory Filings in the ROW. It is anticipated by the parties hereunder that both parties benefit from the cost efficiencies of leveraging each others data, and with BioAtla, or its licensee, developing and commercializing the [***] in the ROW, the parties anticipate that Himalaya may require fewer patients to advance the [***] in the Territory, since it will use the ROW data from BioAtla to support its studies. Himalaya will be responsible for and fund [***] of the Costs of Commercialization in the Territory;
- d) [***]: Himalaya will pay to BioAtla [***] within [***] business days from notice from BioAtla of its IND filing in the US. Further, (i) upon submission of a IND in its Territory, Himalaya will pay to BioAtla [***] for, and BioAtla will deliver to Himalaya, sufficient supply of [***] GMP manufactured material for at least [***] patients; (ii) in the event the Parties jointly decide to perform the entire P1 Clinical Trial in the Territory, or the entire P1 Clinical Trial in the ROW, Himalaya shall be responsible for [***] of the direct costs (for clarity, direct costs do not include overhead) for such P1 Clinical Trial costs, and BioAtla shall be responsible for the remainder of such P1 Clinical Trial costs for such shared P1 Clinical Trial; in the event the P1 Clinical Trial is comprised of patients from both the Territory and ROW, Himalaya shall be responsible for the costs for the patients in the study that are in the [***] Territory, up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iii) Himalaya will conduct and fund [***] of the P2 Clinical Trial Territory patient costs, solely to the extent required for Himalaya to advance the [***] in the Territory for its desired indication(s), while leveraging BioAtla's ROW P2 patient data, which may be approximately [***] patients per indication, or more, in the Territory; for clarity, in the event the P2 Clinical Trial is comprised of patients from both the Territory and ROW for a particular indication, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, solely up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iv) Himalaya will conduct and fund [***] of a P3 Clinical Trial in the Territory, if required, and (v) Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below. For clarity, Himalaya shall have the right to use all relevant BioAtla Clinical Data to support its Clinical Trials and Regulatory Filings in the Territory, and BioAtla shall have the right to use all relevant Himalaya Clinical Data to support its Clinical Trials and Regulatory Filings in the ROW. It is anticipated by the parties hereunder that both parties benefit from the cost efficiencies of leveraging each

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

others data, and with BioAtla, or its licensee, developing and commercializing the [***] in the ROW, the parties anticipate that Himalaya may require fewer patients to advance the [***] in the Territory, since it will use the ROW data from BioAtla to support its studies. Himalaya will be responsible for and fund [***] of the Costs of Commercialization in the Territory;

- e) [***]: Himalaya shall pay BioAtla [***] to initiate work under a Development Plan to develop the [***] to a LEAD. Upon delivery of the LEAD and Data Package, under the Development Plan, Himalaya will pay BioAtla [***]. Himalaya will pay to BioAtla [***] within the earlier of: a) [***] business days from notice from BioAtla of its IND filing in the US, or b) [***] days from Himalaya filing its IND in the Territory. Further, in the event BioAtla is advancing development of [***] in ROW, Himalaya shall pay BioAtla, and the parties shall share costs, as follows: (i) upon submission of a IND in its Territory, Himalaya will pay to BioAtla [***] for, and BioAtla will deliver to Himalaya, sufficient supply of [***] manufactured material for at least [***] patients; (ii) in the event the Parties jointly decide to perform the entire P1 Clinical Trial in the Territory, or the entire P1 Clinical Trial in the ROW, Himalaya shall be responsible for [***] of the direct costs (for clarity, direct costs do not include overhead) for such P1 Clinical Trial costs, and BioAtla shall be responsible for the remainder of such P1 Clinical Trial costs for such shared P1 Clinical Trial; in the event the P1 Clinical Trial is comprised of patients from both the Territory and ROW, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iii) Himalaya will conduct and fund [***] of the P2 Clinical Trial Territory patient costs, solely to the extent required for Himalaya to advance the [***] in the Territory for its desired indication(s), while leveraging BioAtla's ROW P2 patient data, which may be approximately [***] patients per indication, or more, in the Territory; for clarity, in the event the P2 Clinical Trial is comprised of patients from both the Territory and ROW for a particular indication, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, solely up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iv) Himalaya will conduct and fund [***] of a P3 Clinical Trial in the Territory, if required, and (v) Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below. For clarity, Himalaya shall have the right to use all relevant BioAtla Clinical Data to support its Clinical Trials and Regulatory Filings in the Territory, and BioAtla shall have the right to use all relevant Himalaya Clinical Data to support its Clinical Trials and Regulatory Filings in the ROW. It is anticipated by the parties hereunder that both parties benefit from the cost efficiencies of leveraging each others data, and with BioAtla, or its licensee, developing and commercializing the [***] in the ROW, the parties anticipate that Himalaya may require fewer patients to advance the [***] in the Territory, since it will use the ROW data from BioAtla to support its studies. In the event BioAtla decides not to advance development of the [***] in the ROW in the [***] Lead Designation Notice, Himalaya shall be responsible for [***] of the remaining development costs for the [***] in the Territory. Himalaya will be responsible for and fund [***] of the Costs of Commercialization in the Territory;
- f) [***]: Himalaya will pay to BioAtla [***] within [***] business days from notice from BioAtla of its IND filing in the US. Further, (i) upon submission of a IND in its Territory, Himalaya will pay to BioAtla [***] for, and BioAtla will deliver to Himalaya, sufficient supply of [***] GMP manufactured material for at least [***] patients; (ii) in the event the Parties jointly decide to perform the entire P1 Clinical Trial in the Territory, or the entire P1 Clinical Trial in the ROW, Himalaya shall be responsible for [***] of the direct costs (for clarity, direct costs do not include overhead) for such P1 Clinical Trial costs, and BioAtla shall be responsible for the remainder of such P1 Clinical Trial costs for such shared P1 Clinical Trial; in the event the P1 Clinical Trial is comprised of patients from both the Territory and ROW, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iii) Himalaya will conduct and fund [***] of the P2 Clinical Trial Territory patient costs, solely to the extent required for Himalaya to advance the [***] in the Territory for its desired indication(s), while leveraging BioAtla's ROW P2 patient data, which may be approximately [***] patients per indication, or

more, in the Territory; for clarity, in the event the P2 Clinical Trial is comprised of patients from both the Territory and ROW for a particular indication, Himalaya shall be responsible for the costs for the patients in the study that are in the Territory, solely up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iv) Himalaya will conduct and fund [***] of a P3 Clinical Trial in the Territory, if required, and (v) Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below. For clarity, Himalaya shall have the right to use all relevant BioAtla Clinical Data to support its Clinical Trials and Regulatory Filings in the Territory, and BioAtla shall have the right to use all relevant Himalaya Clinical Data to support its Clinical Trials and Regulatory Filings in the ROW. It is anticipated by the parties hereunder that both parties benefit from the cost efficiencies of leveraging each others data, and with BioAtla, or its licensee, developing and commercializing the [***] in the ROW, the parties anticipate that Himalaya may require fewer patients to advance the [***] in the Territory, since it will use the ROW data from BioAtla to support its studies. Himalaya will be responsible for and fund [***] of the Costs of Commercialization in the Territory;

- g) [***]: BioAtla shall transfer the [***] after LEAD, and Himalaya will pay to BioAtla [***] within ten (10) business days of its IND filing in the Territory. Himalaya will conduct all development (including manufacturing) and commercialization activities and [***] of all Costs of Development and Costs of Commercialization in the Territory. Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below;
 - h) [***]: Himalaya shall pay BioAtla [***] to initiate work under a Development Plan to develop the [***] to a LEAD. Upon delivery of the LEAD and Data Package, under the Development Plan, Himalaya will pay BioAtla [***]. Further, Himalaya will pay to BioAtla [***] within [***] business days of IND filing of the [***] in the Territory. Himalaya will conduct all development (including manufacturing) and commercialization activities, and fund [***] of all Costs of Development and Costs of Commercialization in the Territory. Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below;
 - i) [***]: The parties shall jointly develop and commercialize (“Co-Develop”) the [***] as set forth under the Development Plan and Commercialization Plan, and shall share equally in all costs and all proceeds related thereto. BioAtla shall have the option to opt-out of the plan to Co-Develop the [***] by providing Himalaya written notice by [***] (“Opt-Out Notice”). Upon the Opt-Out Notice, BioAtla shall transfer the [***], including the relevant Data Package, to Himalaya, and Himalaya shall have the right to continue development and commercialization of the [***] itself in the Territory. If BioAtla decides to opt-out of the plan to Co-Develop, and Himalaya elects to continue development and commercialization, Himalaya will (i) conduct all development (including manufacturing) and commercialization activities and fund [***] of all Costs of Development and Costs of Commercialization in the Territory, including all costs of manufacturing (ii) pay to BioAtla [***] within [***] business days of IND filing of the [***], Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below;
 - j) Any CAB Antibody subject to a Preclinical Development Termination: BioAtla shall transfer a CAB Antibody subject to a Preclinical Development Termination as set forth in 3.2(f) above, including the Data Package.
- 2) In the event Himalaya exercises its option to license a New Option Antibody as set forth under 3.2 above, Himalaya shall make the following payments to BioAtla, and shall bear Costs of Development under, and in accordance with, each Development Plan, and Costs of Commercialization under, and in accordance with, each Commercialization Plan. Such payments and costs shall specifically include the following:
- a) [***] within [***] business days following written notice from the JDCC to BioAtla that Himalaya desires to proceed with a CAB-OPTION antibody; [***] within [***] business days following Himalaya’s IND submission in the Territory. Further, (i) in the event the Parties jointly decide to perform the entire P1 Clinical Trial in the Territory, or the entire P1 Clinical Trial in the ROW, Himalaya shall be responsible for

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

[***] of the direct costs (for clarity, direct costs do not include overhead) for such P1 Clinical Trial costs, and BioAtla shall be responsible for the remainder of such P1 Clinical Trial costs for such shared P1 Clinical Trial; in the event the P1 Clinical Trial is comprised of patients from both the CAB-OPTION Territory and ROW, Himalaya shall be responsible for the costs for the patients in the study that are in the CAB-OPTION Territory, up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iii) Himalaya will conduct and fund [***] of the P2 Clinical Trial Territory patient costs, solely to the extent required for Himalaya to advance the CAB-OPTION in the CAB-OPTION Territory for its desired indication(s), while leveraging BioAtla's ROW P2 patient data, which may be approximately [***] patients per indication, or more, in the CAB-OPTION Territory; for clarity, in the event the P2 Clinical Trial is comprised of patients from both the CAB-OPTION Territory and ROW for a particular indication, Himalaya shall be responsible for the costs for the patients in the study that are in the CAB-OPTION Territory, solely up to [***] of the total patients for the worldwide study, and BioAtla shall be responsible for the remainder of the costs; (iv) Himalaya will conduct and fund [***] of a P3 Clinical Trial in the Territory, if required, and (v) Himalaya shall make the royalty and milestone payments as set forth in (3) and (4) below; and

- b) royalties and milestones payable pursuant to this Section 5.1.
- 3) **Royalty.** Himalaya shall pay BioAtla, on a country-by-country basis for each Calendar Quarter during the applicable Royalty Term, [***]
- 4) **Other CAB Antibody Payments.** Subject to other payments due hereunder, upon (i) Himalaya becoming a publicly traded company on any stock exchange, or (ii) Himalaya experiencing a Change of Control, Himalaya shall pay BioAtla (i) [***] of any Milestone Payment received for CAB Antibodies, or (ii) if Himalaya or any Affiliate or Licensee develops and commercializes Products itself the development and sales milestone payments that are set forth below upon the first achievement by or on behalf of Himalaya, its Affiliates or its Licensees with respect to the first Product that achieves such event. For clarity, each milestone set forth below shall be due and payable one time only (regardless of the number of Products to achieve any such development and sales milestone event within the Territory).

Assignment Form

CONFIRMATORY PATENT ASSIGNMENT

This is a Confirmatory Patent Assignment (this "Assignment") dated effective [DATE] by and between BioAtla, LLC ("Assignor") on one hand, and Himalaya Therapeutics Hong Kong ("Assignee") on the other hand.

WHEREAS, pursuant to an Exclusive Rights agreement between Assignor and Assignee dated as of [EFFECTIVE DATE] (the "Agreement"), the Assignor agreed to transfer, sell, and assign to Assignee all of its rights, title, and interest in corresponding patent applications or patents in the People's Republic of China, the Special Administrative Regions of Hong Kong and Macao, and in Taiwan based on the PCT Patent Application Serial No. [NUMBER] ("Patents").

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor hereby confirms having assigned, transferred, conveyed, and delivered to the Assignee, its successors and assigns, effective as of the date first referred to above, all right, title, and interest of the Assignor in and to the Patents; the same to be held and enjoyed by the Assignee for its own use and enjoyment and for the use and enjoyment of its successors, assigns, and other legal representatives, to the end of the term or terms for which the Patents are issued, granted, reissued, or extended, as fully and entirely as the same would have been held and enjoyed by the Assignor.

IN WITNESS WHEREOF, the undersigned has caused this Assignment to be duly executed and delivered.

EXHIBIT I

Default Assignment Form

CONFIRMATORY PATENT ASSIGNMENT

This is a Confirmatory Patent Assignment (this "Assignment") dated effective [DATE] by and between Himalaya Therapeutics Hong Kong ("Assignor") on one hand, and BioAtla, LLC ("Assignee") on the other hand.

WHEREAS, pursuant to a Exclusive Rights agreement between Assignor and Assignee dated as of [EFFECTIVE DATE] (the "Agreement"), the Assignor agreed to transfer, sell, and assign to Assignee all of its rights, title, and interest in corresponding patent applications or patents in the People's Republic of China, the Special Administrative Regions of Hong Kong and Macao, and in Taiwan based on the PCT Patent Application Serial No. [NUMBER] ("Patents").

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor hereby confirms having assigned, transferred, conveyed, and delivered to the Assignee, its successors and assigns, effective as of the date first referred to above, all right, title, and interest of the Assignor in and to the Patents; the same to be held and enjoyed by the Assignee for its own use and enjoyment and for the use and enjoyment of its successors, assigns, and other legal representatives, to the end of the term or terms for which the Patents are issued, granted, reissued, or extended, as fully and entirely as the same would have been held and enjoyed by the Assignor.

IN WITNESS WHEREOF, the undersigned has caused this Assignment to be duly executed and delivered.

Himalaya Therapeutics Hong Kong
(Assignor)

EXECUTION COPY

EXCLUSIVE LICENSE AGREEMENT

INVERSAGEN LLC AND BIOATLA, LLC

THIS EXCLUSIVE LICENSE AGREEMENT (“*Agreement*”) is entered into as of March 15, 2019 (the “*Execution Date*”), by and between INVERSAGEN LLC, a Delaware limited liability company, (the “*Company*”), and BIOATLA, LLC, a Delaware limited liability company (“*BioAtla*”).

RECITALS

WHEREAS, BioAtla has developed, and possesses intellectual property rights in and to, its proprietary CAB Biologics platform for the design and engineering of therapeutic monoclonal antibodies and other therapeutic proteins for selective conditional activation under specific microphysical conditions, and related proprietary technologies for the discovery and development of CAB Biologics therapeutic antibodies and proteins;

WHEREAS, the Company desires to obtain, and BioAtla is willing to grant to the Company, an exclusive, worldwide license under the BioAtla Licensed Technology (defined below) to develop and commercialize Products (defined below) for the treatment of diseases related to senescent cell therapy in the Field, on the terms and subject to the conditions set forth herein.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing premises and the mutual covenants set forth below, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. DEFINITIONS.

1.1 “Affiliate” shall mean, as to an Entity, any other Entity that, directly or indirectly, controls, is controlled by or is under common control with such Entity, as the case may be, for so long as such control exists. As used in this Section 1.1, “control” means: (a) to possess, directly or indirectly, the power to direct the management and policies of an Entity, whether through ownership of voting securities or by contract relating to voting rights or corporate governance; or (b) direct or indirect beneficial ownership of at least fifty percent (50%) (or such lesser percentage that is the maximum allowed to be owned by a foreign Entity in a particular jurisdiction and is sufficient to grant the holder of such voting stock or interest the power to direct the management and policies of such entity) of the voting share capital in an Entity. For purposes of this Agreement, neither Company nor BioAtla shall be deemed an Affiliate of the other Party.

1.2 “Anti-Corruption Laws” means the U.S. Foreign Corrupt Practices Act, as amended, the Organization for Economic Co-operation and Development (OECD) Convention on combating bribery of foreign public officials in international business transactions, and any other comparable anti-corruption laws of any country or organization or nations within whose jurisdiction either party or any of its Affiliates operates or does business.

1.3 “Applicable Laws” shall mean the applicable provisions of any and all national, supranational, regional, state and local laws, treaties, statutes, rules, regulations, administrative codes, guidances, ordinances, judgments, decrees, directives, injunctions, orders, permits of or from any court, arbitrator, regulatory authority or governmental agency or authority having jurisdiction over or related to the subject item, including Anti-Corruption Laws and Export Control Laws.

1.4 “Assert” or “Assertion” shall mean to commence or prosecute patent infringement Litigation, or to make an express, specific written threat (such as, without limitation, a cease and desist demand letter) to commence or prosecute patent infringement Litigation.

1.5 “BioAtla Invention” shall mean any invention, whether or not patentable, made solely by one or more employees, consultants or contractors of BioAtla and its Affiliates in the course and as a result of the performance of the activities contemplated by Article 3.

1.6 “BioAtla Licensed Know-How” shall mean all Information Controlled by BioAtla and its Affiliates during the Collaboration Period that is necessary or useful for the development, manufacture, or commercialization of Products, including BioAtla Inventions but excluding BioAtla’s interest in Joint Inventions.

1.7 “BioAtla Licensed Patents” shall mean all Patent Rights Controlled by BioAtla during the Term covering or claiming any invention (including any BioAtla Invention but excluding any Joint Invention) Controlled by BioAtla during the Collaboration Period that is necessary or useful for the development, manufacture, or commercialization of Products. The BioAtla Licensed Patents existing as of the Execution Date include the patents and patent applications listed in **Exhibit 1** hereto. For clarity, BioAtla Licensed Patents exclude BioAtla’s interest in Joint Patents.

1.8 “BioAtla Licensed Technology” shall mean BioAtla Licensed Patents and BioAtla Licensed Know-How.

1.9 “BioAtla Non-Assert Patent” shall mean any Patent Right (excluding any BioAtla Licensed Patent) Controlled by BioAtla during the Term that claims any invention made solely by one or more employees, consultants or contractors of BioAtla after the Collaboration Period in the course and as a result of using or practicing Company Licensed Technology.

1.10 “Business Day” means a day other than a Saturday or Sunday or any other day on which commercial banks in San Diego, California are authorized or required by Applicable Law to close.

1.11 “CAB Biologics” shall mean a conditionally active biologic therapeutic molecule (which may, but need not, be a monoclonal antibody) that induces a tumor selective increase in any Potential Target antigen binding and is designed or developed for selective conditional activation under specific microphysical conditions.

1.12 “CAST” shall mean BioAtla’s proprietary conditionally active biologic therapeutic technology known as Conditionally Active Senescent Therapies which applies CAB Biologics’s for the treatment of age-related diseases, as more specifically described on Schedule A.

1.13 “Change of Control” of a Party means any of the following, in a single transaction or a series of related transactions: (a) the sale or disposition of all or substantially all of the assets of such Party to a Third Party, (b) the direct or indirect acquisition by a Third Party (other than an employee benefit plan (or related trust) sponsored or maintained by such Party or any of its Affiliates) of beneficial ownership of more than fifty percent (50%) of the then-outstanding common shares or voting power of such Party or any direct or indirect entity which holds, directly or indirectly, beneficial ownership of more than fifty percent (50%) of the then-outstanding common shares or voting power of such Party (a **“Parent Entity”**), or (c) the merger or consolidation of such Party or any Parent Entity with or into a Third Party, unless, following such merger or consolidation, the stockholders of such Party or Parent Entity immediately prior to such merger or consolidation beneficially own directly or indirectly more than fifty percent (50%) of the then-outstanding common shares or voting power of the entity resulting from such merger or consolidation.

1.14 “Collaboration Period” shall mean the period beginning on the Execution Date and expiring on the later of (a) third (3rd) anniversary of the Execution Date and (b) completion of the last project under a Project Plan.

1.15 “Company Invention” shall mean any invention, whether or not patentable, made solely by one or more employees, consultants or contractors of the Company (other than by BioAtla or its Affiliates pursuant to Article 3 hereof) during the Collaboration Period in the course and as a result of using or practicing BioAtla Licensed Technology that is necessary or useful for the development, manufacture, or commercialization of Products outside the Field.

1.16 “Company Licensed Know-How” shall mean all Information generated or developed by or on behalf of the Company (other than by BioAtla or its Affiliates pursuant to Article 3 hereof) during the Collaboration Period in the course and as a result of using or practicing BioAtla Licensed Technology that is necessary or useful for the development, manufacture, or commercialization of Products outside the Field, including Company Inventions but excluding Company’s interest in Joint Inventions.

1.17 “Company Licensed Patents” shall mean all Patent Rights Controlled by the Company during the Term covering or claiming any Company Invention. For clarity, Company Licensed Patents exclude the Company’s interest in Joint Patents.

1.18 “Company Licensed Technology” shall mean Company Licensed Patents and Company Licensed Know-How.

1.19 “Company Non-Assert Patent” shall mean any Patent Right (excluding any Company Licensed Patent) Controlled by the Company during the Term that claims any invention made solely by one or more employees, consultants or contractors of the Company during the Term but after the Collaboration Period in the course and as a result of using or practicing BioAtla Licensed Technology.

1.20 “Confidential Information” shall have the meaning provided in Section 5.1.

1.21 “Control” or “Controlled by” shall mean, with respect to any Patent Rights, Information or other intellectual property rights, the possession by a party of the ability (whether by ownership, license or other right, other than pursuant to a license granted to such party by the other party under this Agreement) to grant access to, or a license or sublicense of, such Patent Rights, Information or other intellectual property rights without violating the terms of any agreement or other arrangement with any Third Party. Notwithstanding the foregoing, for the purpose of defining whether intellectual property rights, Patent Rights, Information or Confidential Information is Controlled by a Party, if such intellectual property, Patent Rights, Information or Confidential Information is first acquired, licensed or otherwise made available to such Party after the Execution Date and if the use, practice or exploitation thereof by or on behalf of the other Party, its Affiliates or sublicensees would require the first Party to pay any amounts to the Third Party from which the first Party acquired, licensed or otherwise obtained such intellectual property rights, Patent Rights, Information or Confidential Information (“**Additional Amounts**”), such intellectual property rights, Patent Rights, Information or Confidential Information shall be deemed to be Controlled by the first Party only if the other Party agrees to pay (if necessary) and does in fact pay all Additional Amounts with respect to such other Party’s use of or license to such intellectual property rights, Patent Rights, Information or Confidential Information to the extent specified in this Agreement.

1.22 “[*] Product”** shall mean the candidate known as [***].

1.23 “Entity” shall mean any company, corporation, limited liability company, partnership, joint venture, firm, trust or other business entity.

1.24 “Exclusive License” shall have the meaning provided in Section 2.1.

1.25 “Exclusive Non-CAST License” shall have the meaning provided in Section 2.2.

1.26 “Execution Date” shall have the meaning provided in the introductory paragraph of this Agreement.

1.27 “Export Control Laws” shall mean: (a) all applicable U.S. export control laws, including the Arms Export Controls Act (22 U.S.C. Ch. 39), the International Emergency Economic Powers Act (50 U.S.C. §§ 1701 et seq.), the Trading With the Enemy Act (50 U.S.C. app. §§ 1 et seq.), the Export Administration Act of 1979 (50 U.S.C. app. §§ 2401 et seq.), International Boycott Provisions of Section 999 of the U.S. Internal Revenue Code of 1986, and all rules, regulations and executive orders relating to any of the foregoing, including but not limited to the International Traffic in Arms Regulations (22 C.F.R. §§ 120 et seq.), the Export Administration Regulations (15 C.F.R. §§ 730 et. seq.), and the regulations administered by the Office of Foreign Assets Controls of the United States Department of the Treasury; and (b) all export controls imposed on any item by any country or organization or nations within whose jurisdiction either party operates or does business.

1.28 “Field” (a) with respect to all [***] shall mean the diagnosis, prevention, palliation or treatment of all diseases (excluding oncology) in humans involving (i) senescent cell elimination therapy, and (ii) the use of [***] for diagnostic products which are included in the field described in clause (i) and (b) [***].

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

1.29 “First Commercial Sale” means the first commercial sale of a Product by Company, its Affiliates, or Selling Parties in a country in an arms’ length transaction to a Third Party following receipt of applicable Regulatory Approval of such Product in such country. Sales for test marketing or clinical trial purposes shall not constitute a First Commercial Sale; provided, that, on a country-by-country basis, with respect to any named patient sales, expanded access sales or similar sales to Third Parties by the Selling Parties prior to receipt of Regulatory Approval of the Product in any country (on a country-by-country basis, the **“Pre-Regulatory Approval Period”**), all such sales shall be included in Net Sales. The Parties understand and agree that any such sales during the applicable Pre-Regulatory Approval Period shall not be deemed to trigger the “First Commercial Sale” for purposes of commencing the Royalty Term.

1.30 “Information” shall mean any and all tangible and intangible (a) techniques, technology, practices, trade secrets, inventions (whether patentable or not), methods, knowledge, know-how, skill, experience, test data and results (including pharmacological, toxicological and clinical test data and results), analytical and quality control data, results or descriptions, software and algorithms, and (b) compositions of matter, cells, cell lines, assays, animal models and physical, biological or chemical material.

1.31 “Invention” shall mean a BioAtla Invention, Company Invention or Joint Invention.

1.32 “Joint Invention” shall mean any invention, whether or not patentable, made jointly by one or more employees, consultants or contractors of BioAtla or its Affiliates and one or more employees, consultants or contractors of Company in the course and as a result of the performance of the activities contemplated by Article 3.

1.33 “Joint Patents” shall mean all Patent Rights claiming Joint Inventions.

1.34 “Joint Technology” shall mean Joint Inventions and Joint Patents.

1.35 “Limited CAB Rights” shall have the meaning provided in Section 2.1.

1.36 “Litigation” means any procedure for the resolution of a controversy, whether created by a claim, a counterclaim or otherwise, in whatever form, administrative, judicial, arbitral or otherwise, including any proceeding in the United States International Trade Commission or any regulatory authority in any jurisdiction in the world.

1.37 “Materials” shall have the meaning provided in Section 3.3.

1.38 “Net Sales” shall mean the gross amounts invoiced by or on behalf of the Company or any of its Affiliates or sublicensees or assignees (each, a **“Selling Party”**) to Third Parties (other than another Selling Party) for sales or other dispositions of Products, less the following deductions actually incurred, allowed, paid, accrued or otherwise specifically allocated to Products by the Selling Party, all in accordance with U.S. generally accepted accounting principles consistently applied:

[***]

1.39 “Patent Rights” shall mean (a) all national, regional and international patents and patent applications filed in any country of the world, including without limitation provisional patent applications, (b) all patent applications filed either from such patents and patent applications or from a patent application claiming priority from either of these, including any continuation, continuation-in-part, division, provisional, converted provisional and continued prosecution applications, or any substitute applications, (c) any patent issued with respect to or in the future issued from any such patent applications including utility models, petty patents and design patents and certificates of invention, and (d) any and all extensions or restorations by existing or future extension or restoration mechanisms, including revalidations, reissues, reexaminations and extensions (including any supplementary protection certificates and the like) of the foregoing patents or patent applications.

1.40 “Person” means any individual, Entity, or governmental authority or agency, or any other entity not specifically listed herein.

1.41 “Potential Target” means a protein or polypeptide or biological molecule, including all variants thereof and any specific protein that is identified by a GenBank protein accession number or by its amino acid sequence and coded by a genetic locus.

1.42 “Product” shall mean (a) any composition comprising or containing a CAB Biologic and (b) the [***] Product.

1.43 “Regulatory Approval” means all approvals of each applicable regulatory authority necessary for the commercial marketing and sale of a product for a particular indication in a country (including separate regulatory authority pricing or reimbursement approvals whether or not legally required in order to sell the product in such country).

1.44 “Regulatory Exclusivity” means, with respect to a Product in a country, that the Product has been granted (a) data exclusivity afforded approved drug products pursuant to Section 505(c), 505(j), or 505A of the Federal, Food, Drug and Cosmetic Act, and the regulations promulgated thereunder, as amended from time to time, or their equivalent in a country other than the United States, (b) market exclusivity pursuant to the orphan drug provisions governing approved drugs designated for rare diseases or conditions under Sections 526 and 527 of the Federal, Food, Drug and Cosmetic Act, and the regulations promulgated thereunder, as amended from time to time, or its equivalent in a country other than the United States, or (c) any other data exclusivity or market exclusivity pursuant to any future Applicable Law.

1.45 “Royalty Term” shall have the meaning provided in Section 4.3.

1.46 “Term” shall have the meaning provided in Section 8.1.

1.47 “Territory” shall mean the entire world.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

1.48 “Third Party” shall mean an entity other than BioAtla and its Affiliates, and Company and its Affiliates.

1.49 “Valid Claim” shall mean: (a) a claim of an issued and unexpired patent, which claim has not been revoked or held unenforceable or invalid by a decision of a court or governmental agency of competent jurisdiction, which decision is not appealable or has not been appealed within the time allowed for appeal, and has not been abandoned, disclaimed, denied or admitted to be invalid or unenforceable through reissue, re-examination, disclaimer or otherwise; or (b) a patent application that has not been irretrievably cancelled, withdrawn or abandoned and that has been pending for less than seven (7) years from the earliest worldwide priority date from which such claim takes priority. If a claim of a patent application that ceased to be a Valid Claim under clause (b) of the preceding sentence because of the passage of time later issues as a part of a patent within clause (a) of the preceding sentence, then it shall again be considered a Valid Claim effective as of the issuance of such patent.

2. EXCLUSIVE LICENSES.

2.1 Exclusive License Grant to the Company. Subject to the terms and conditions of this Agreement, and effective on the Execution Date, BioAtla hereby grants to Company, an exclusive (even as to BioAtla and its Affiliates, except as expressly set forth hereunder), worldwide, royalty-bearing license, with the right to sublicense through multiple tiers of sublicense under the BioAtla Licensed Technology and BioAtla’s interest in the Joint Technology, solely to develop, make, have made, use, sell, have sold, offer for sale and import Products in the Field (the **“Exclusive License”**). The Exclusive License includes, without limitation, the right under the BioAtla Licensed Technology, exercisable solely by the Company and its Affiliates to identify, develop, make, have made, use and import CAB Biologics solely for the purpose of obtaining or generating Products in the Field (the **“Limited CAB Rights”**), subject, in each case, to the terms and conditions of this Agreement.

2.2 Exclusive Non-CAST License Grant to BioAtla. Subject to the terms and conditions of this Agreement, the Company hereby grants to BioAtla, an exclusive (even as to the Company and its Affiliates), worldwide, royalty-free and fully-paid license, with the right to sublicense through multiple tiers of sublicense, under the Company Licensed Technology and the Company’s interest in the Joint Technology, solely to develop, make, have made, use, sell, have sold, offer for sale and import Products (other than the [***] Product) outside the Field (the **“Exclusive Non-CAST License”**).

2.3 Sublicensing.

(a) By the Company.

(i) Generally. The Company shall have the right to grant sublicenses under the Exclusive License through multiple tiers of sublicense solely to develop, make, have made, use, sell, have sold, offer for sale and import Products in the Field; *provided, however*, that neither the Company nor any of its Affiliates may grant to any Third Party any sublicense under the Limited CAB Rights to discover, identify, evolve, modify, develop, make, have made, use or import any CAB Biologic.

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

(b) By BioAtla. BioAtla shall have the right to grant sublicenses under the Exclusive Non- CAST License through multiple tiers of sublicense solely to develop, make, have made, use, sell, have sold, offer for sale and import Products outside the Field.

(c) General Requirements.

(i) Each sublicense granted hereunder by a Party or its Affiliates shall be consistent with the requirements of this Agreement.

(ii) Each Party granting a sublicense under this Agreement shall be primarily liable for any failure by its Affiliates and Selling Parties and Third Party contractors to comply with all relevant restrictions, limitations and obligations in this Agreement.

(iii) Each sublicense must be granted pursuant to a written sublicense agreement and, with respect to any sublicense other than a sublicense by a Party to an Affiliate of such Party, such Party must provide the other Party with a copy of any sublicense agreement entered into within thirty (30) days after the execution of such sublicense agreement; provided that any such copy may be reasonably redacted to remove any confidential, proprietary or competitive information, but such copy shall not be redacted to the extent that it impairs the other Party's ability to ensure compliance with this Agreement. Such sublicense agreement shall be treated as Confidential Information of the sublicensing Party and no copies are required with respect to sublicense agreements with Third Party contractors.

2.4 Technology Transfer. As soon as reasonably practical after the Execution Date and thereafter upon Company's reasonable request during the period ending twelve months after the Execution Date, BioAtla shall provide the Company with reasonable technical assistance in the practice of the BioAtla Licensed Technology in the exercise of the Limited CAB Rights in the same manner and to the same extent as practiced by BioAtla.

2.5 License Exclusions and Limitations.

(a) Exclusive License.

(i) For clarity the Exclusive License specifically excludes any license or other right under the BioAtla Licensed Technology:

(1) to make or have made any CAB Biologic, except as expressly permitted by this Agreement;

(2) to sell, have sold or offer for sale any CAB Biologic, except as incorporated into a Product in the Field.

(ii) In addition, the Exclusive License specifically excludes any license or other right under the BioAtla Licensed Technology to develop, make, have made, use, sell, have sold, offer for sale or import Products outside of the Field.

(b) Exclusive Non-CAST License. For clarity, the Exclusive Non-CAST License specifically excludes any license or other right under the Company Licensed Technology to identify, develop, make, have made, use, sell, have sold, offer for sale or import any Product in the Field.

2.6 Retained Rights. Notwithstanding the exclusivity of the Exclusive License, BioAtla reserves such non-exclusive rights under the BioAtla Licensed Technology and its interest in the Joint Technology as are necessary for BioAtla to perform its obligations hereunder. As between the parties, BioAtla retains the exclusive right under the BioAtla Licensed Technology, to develop, make, have made, use, sell, have sold, offer for sale and import CAB Biologics outside the Field.

2.7 Negative Covenants.

(a) By BioAtla.

(i) BioAtla hereby covenants:

(1) not to develop, make, have made, use, sell, have sold, offer for sale or import any Product intended for use in the Field (based upon its approved product label), except with and through the Company and its Affiliates and sublicensees as expressly contemplated by this Agreement and the Sublicense Agreements;

(2) not to use or practice the Company Licensed Technology to identify, develop, make, have made, use, sell, have sold, offer for sale or import any Product intended for use in the Field (based upon its approved product label); and

(3) not to cause or permit, or grant any license or other right to, any of its Affiliates or any Third Party to engage in any of the activities prohibited by the preceding subparagraphs of this Section.

(ii) BioAtla covenants, on behalf of itself and its Affiliates, and its and their respective successors and assigns of any BioAtla Non-Assert Patent, that none of them will Assert against any Company Non-Assert Entity (as defined below), in any country or jurisdiction worldwide, any claim that the manufacture, use, sale, offer for sale or import of any Product in the Field in accordance with the terms and conditions of this Agreement infringes a BioAtla Non-Assert Patent. The term “**Company Non-Assert Entity**” means the Company, any of its Affiliates, any permitted Third Party sublicensee under the Exclusive License, or any Third Party contractor performing services on behalf of any of the foregoing. The Assertion by BioAtla, any of its Affiliates, or any of its or their respective successors and assigns of any BioAtla Non-Assert Patent, against a Company Non-Assert Entity (other than the Company) that has not been identified to BioAtla by the Company in writing shall not be deemed to breach the covenant set forth in this Section 2.7(a)(ii), *provided* that such Assertion and any and all Litigation relating thereto cease within 30 days after written notice from the Company identifying the applicable Affiliate or Third Party as a Company Non-Assert Entity. Notwithstanding anything to the contrary, BioAtla shall have no obligation to disclose to the Company any BioAtla Non-Assert Patent.

(b) By Company.

(i) Notwithstanding the scope of the Exclusive License, the Company hereby covenants:

(1) during the Term, not to develop, make, have made, use, sell, have sold, offer for sale or import any CAB Biologic hereunder, except as incorporated in a Product intended for use in the Field (based on its approved product label);

(2) during the Term, not to develop, make, have made, use, sell, have sold, offer for sale or import outside of the Field (other than as expressly permitted by Section 2.5(a)(ii)) any Product that incorporates any CAB Biologic;

(3) not to cause or permit, or grant any sublicense or other right to, any of its Affiliates or any Third Party to engage in any of the activities prohibited by the preceding subparagraphs of this Section 2.7(b);

(4) not to cause or permit any Third Party (other than a Third Party service provider performing contract services on behalf of the Company in accordance with Section 2.8 solely for the purpose of performing such services) to make or have made any CAB Biologic; and

(5) not to cause or permit, and not to grant any sublicense or other right to, any Third Party:

a. to sell, have sold or offer for sale any CAB Biologic; or

b. to sell, have sold or offer for sale any CAB Biologic component, except as incorporated in a Product in the Field; subject to Section 2.5(a)(ii).

(ii) The Company covenants, on behalf of itself and its Affiliates, and its and their respective successors and assigns of any Company Non-Assert Patent, that none of them will Assert against any BioAtla Non-Assert Entity (as defined below), in any country or jurisdiction worldwide, any claim that the manufacture, use, sale, offer for sale or import of any Product in the Field in accordance with the terms and conditions of this Agreement infringes a Company Non-Assert Patent. The term “**BioAtla Non-Assert Entity**” means BioAtla, any of its Affiliates, any permitted Third Party sublicensee under the Exclusive Non-CAST License, or any Third Party contractor performing services on behalf of any of the foregoing. The Assertion by the Company, any of its Affiliates, or any of its or their respective successors and assigns of any Company Non-Assert Patent, against a BioAtla Non-Assert Entity (other than BioAtla) that has not been identified to the Company by BioAtla in writing shall not be deemed to breach the covenant set forth in this Section 2.7(b)(ii), *provided* that such Assertion and any and all Litigation relating thereto cease within 30 days after written notice from BioAtla identifying the applicable Affiliate or Third Party as a BioAtla Non-Assert Entity. Notwithstanding anything to the contrary, the Company shall have no obligation to disclose to BioAtla any Company Non-Assert Patent.

2.8 Use of Third Party Contractors. Each party may engage Third Party contract service providers to perform on behalf of such party any activity that such party itself has the right to conduct under the license granted to such party in Section 2.1 or Section 2.2 (as applicable); *provided*, in each case, that: (a) such party shall require any such Third Party service provider to take all reasonable steps and use all reasonable measures to prevent unauthorized disclosure and unauthorized use of the Patent Rights and Information licensed to such party under Section 2.1 or Section 2.2 (as applicable); (b) none of the other party's rights hereunder are diminished or otherwise adversely affected as a result of such contracting; (c) each such contractor undertakes in writing obligations of confidentiality and non-use regarding Confidential Information of the other party at least as stringent as those undertaken by such party pursuant to Article 5; (d) prior to initiating performance of any such contract services, such Third Party service provider has signed a binding written agreement or instrument assigning, and agreeing to assign, to such party all Inventions resulting from performance of such services; and (e) such party shall at all times be fully responsible for the compliance of such Third Party service provider with the terms and conditions of this Agreement.

2.9 No Implied Licenses. No right or license under any Information, Patent Rights or other intellectual property rights is granted or shall be granted by implication. All such rights or licenses are or shall be granted only as expressly provided in the terms of this Agreement.

3. PROJECT PLANS.

3.1 Project(s). During the Collaboration Period, BioAtla and Inversagen shall mutually agree in writing after discussions in good faith to specific projects for BioAtla to discover and transfer CAB Biologics to Inversagen under specified project plan(s) (each, a "**Project Plan**").

3.2 Project Plans.

(i) Each Project Plan shall be attached to this Agreement as Schedule 1 and sequentially numbered (i.e., Schedule 1, Project 1, etc.). Each Project Plan shall describe and define the project, the CAB Biologic protein target, the estimated schedule for performance of the project, the total costs for the Project and the payment schedule therefor. Any work requested outside of a Project Plan will require entering into a new Project Plan, or if a change to an existing Project Plan, an amendment to an existing Project Plan. Within ninety (90) days of the Execution Date, the parties shall meet to discuss potential projects and define Project Plans. The parties agree that no work shall commence on a Project until an agreement for such Project is executed by both parties. The costs for the project and the payment schedule therefor shall be based on BioAtla's good faith estimate of activities reasonably required to perform such generation, identification and/or development, including BioAtla's internal costs for those activities based on an annual FTE rate equal to [***]% of the lesser of (A) BioAtla's then-effective internal fully-burdened annual FTE rate used throughout its internal project accounting system and (B) the lowest annual FTE rate then being charged by BioAtla to any Third Party for the generation, identification and/or development of BioAtla CAB Biologics, and any direct outsourced Third Party costs; it being understood and agreed that, if the total costs for the project incurred by BioAtla in any calendar year exceed the total costs budgeted for such project under the applicable Project Plan for such calendar year by more than [***] percent ([***]%), then Company will pay for up to [***] percent ([***]%) in excess of the total costs budgeted for such project under the applicable Project Plan and BioAtla shall be responsible for paying any remaining costs. Direct outsourced Third Party costs will be billed at cost without markup. BioAtla shall use commercially reasonable efforts to generate, identify and/or develop (as applicable) CAB Biologics under each Project Plan, and to deliver the CAB Biologics within the timeline and budget set forth in such Project Plan.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

3.3 Materials Transfer. In furtherance of the activities contemplated by this Article 3 or the transfer of BioAtla Licensed Know-How contemplated hereunder, each party may provide to the other party chemical compounds or biological materials, including, in the case of BioAtla as the supplying party, but not limited to, BioAtla CAB Biologics (collectively, the **“Materials”**), for use by the other party in accordance with this Agreement. Except as otherwise expressly provided under this Agreement, all such Materials delivered to the other party will remain the sole property of the supplying party, will be used only in accordance with the terms and conditions of this Agreement, will not be used or delivered to or for the benefit of any Third Party without the prior written consent of the supplying party, and will be used in compliance with all Applicable Laws. The Materials supplied under this Agreement must be used with prudence and appropriate caution in any experimental work because not all of their characteristics may be known. Except as expressly set forth in this Agreement, THE MATERIALS ARE PROVIDED “AS IS” AND WITHOUT ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR ANY PARTICULAR PURPOSE OR ANY WARRANTY THAT THE USE OF THE MATERIALS WILL NOT INFRINGE OR VIOLATE ANY PATENT OR OTHER PROPRIETARY RIGHTS OF ANY THIRD PARTY.

3.4 Company shall be solely and fully responsible for all development and commercialization activities and costs of the CAB Biologics in the Field delivered by BioAtla hereunder, and/or discovered by the Company for its use in the Field hereunder.

4. PAYMENTS.

4.1 Compensation for Development Work. BioAtla shall deliver written invoices to the Company, and the Company shall compensate BioAtla, for the development work under each timeline and budget accepted by the Company hereunder and for delivery of the resulting BioAtla CAB Biologics on the schedule and in the amounts set forth in such timeline and budget. Any proposed adjustments exceeding the accepted timeline and/or budget shall be approved in advance, in writing, by the parties. Each such invoice shall be due and payable within 30 days of receipt.

4.2 Royalties. Company shall pay royalties to BioAtla on aggregate annual Net Sales of each Product in the Territory by the Company, its Affiliates and Licensees in each calendar year at the applicable rate(s) set forth below:

Annual Net Sales Increments	Royalty Rate
[***]	[***]

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

4.3 Royalty Term. Royalties hereunder shall be payable on a Product-by-Product and country-by-country basis in the Territory during the period of time commencing on the First Commercial Sale of a Product in a country of the Territory and ending upon expiration of the later to occur of (a) the last-to-expire Valid Claim of the BioAtla Licensed Patents and Company Licensed Patents covering the manufacture, use, sale, offer for sale or import of such Product in such country, (b) the tenth (10th) anniversary following the First Commercial Sale in such country and (c) the expiration of Regulatory Exclusivity for such Product in such country (the “**Royalty Term**”). On a Product-by-Product and country-by-country basis, upon expiration of the Royalty Term for a Product in a country of Territory, the Company’s license hereunder with respect to such Product in such country shall become fully-paid, irrevocable and perpetual.

4.4 Payment; Reports. Royalties hereunder shall be calculated and reported for each calendar quarter and shall be paid within 60 days after the end of each calendar quarter. Each payment shall be accompanied by a report of Net Sales of Products by the Company, its Affiliates and Licensees, which report shall include the gross sales and Net Sales of each Product, the royalties payable, a description of the method used to calculate the royalties payable, and the exchange rates used, in each case presented on an Product-by-Product and country-by-country basis.

4.5 Exchange Rate; Manner and Place of Payment. All payments under this Article 4 shall be payable in U.S. dollars by wire transfer in immediately available funds to a bank and account designated in writing by BioAtla. When conversion of payments from any foreign currency is required, such conversion shall be made at the rate of exchange used throughout the accounting system of the Company and its Affiliates for the applicable period.

4.6 Audits. The Company shall keep (and shall cause its Affiliates and Licensees to keep) complete and accurate records pertaining to the sale or other disposition of Products in sufficient detail to permit BioAtla to confirm the accuracy of all royalty payments due hereunder for a period of three years from the end of the calendar year to which such records relate. BioAtla shall have the right, once annually, to cause an independent, certified public accountant reasonably acceptable to the Company (the “**Auditor**”) to audit such records solely to confirm Net Sales and royalties for a period covering not more than the preceding three years. Such audits may be exercised during normal business hours upon reasonable prior written notice to the Company. No calendar year shall be subject to audit under this section more than once. The Auditor will execute a reasonable written confidentiality agreement with the Company and will disclose to BioAtla only such information as is reasonably necessary to provide BioAtla with information regarding any actual or potential discrepancies between amounts reported and actually paid and amounts payable under this Agreement. The Auditor will send a copy of the report to the Company at the same time it is sent to BioAtla. The report sent to both parties will include the methodology and calculations used to determine the results. Prompt adjustments shall be made by the parties to reflect the results of such audit. BioAtla shall bear the full cost of such audit unless such audit discloses an underpayment by the Company of more than 5% of the amount due for any calendar year under this Agreement, in which case, the Company shall bear the full cost of such audit and shall promptly remit to BioAtla the amount of any underpayment. If such audit discloses an overpayment by the Company, then the Company will deduct the amount of such overpayment from amounts otherwise owed to BioAtla under this Agreement.

4.7 Withholding. BioAtla will pay any and all taxes levied on account of any payments made to it under this Agreement. If any taxes are paid or required to be withheld by the Company for the benefit of BioAtla on account of any amounts payments payable to BioAtla hereunder, the Company will deduct such taxes from the amount of payments otherwise due to BioAtla, timely pay the taxes to the proper taxing authority, and send proof of payment to BioAtla within 30 days following such payment.

4.8 Late Payments. In the event that any payment due under Section 4.1 (other than any invoiced amount or portion thereof that is subject to good faith dispute between the parties) is not made when due, the payment shall accrue interest from the date due at the rate of 1.0% per month; *provided, however,* that in no event shall such rate exceed the maximum legal annual interest rate. The payment of such interest shall not limit BioAtla from exercising any other rights it may have as a consequence of the lateness of any payment.

5. CONFIDENTIALITY.

5.1 Confidential Information. Except to the extent expressly authorized by this Agreement or otherwise agreed in writing by the parties, each party agrees that, during the Term, and for five years thereafter, such party (the **“Receiving Party”**) shall keep confidential and shall not publish or otherwise disclose and shall not use for any purpose other than as expressly provided for in this Agreement any Information furnished to it by the other party (the **“Disclosing Party”**) pursuant to this Agreement, the Confidentiality Agreement (the **“Confidential Information”**). Notwithstanding the foregoing, the parties hereby agree that: (a) each timeline and budget set forth under any Project Plan shall be considered the Confidential Information of both parties, and each party be deemed the Disclosing Party and the Receiving Party with respect thereto; (b) the terms of this Article 5 shall supersede the Confidentiality Agreement; and (c) any Information disclosed by a party pursuant to the Confidentiality Agreement shall be deemed Confidential Information of such party for purposes of this Agreement. The Receiving Party may use Confidential Information only to the extent required to accomplish the purposes of this Agreement. The Receiving Party will use at least the same standard of care as it uses to protect proprietary or Confidential Information of its own, but no less than reasonable care, to ensure that its employees, agents, consultants and other representatives do not disclose or make any unauthorized use of the Confidential Information. The Receiving Party will promptly notify the Disclosing Party upon discovery of any unauthorized use or disclosure of the Confidential Information.

5.2 Exceptions. Confidential Information shall not include any information which: (a) is now, or hereafter becomes, through no act or failure to act on the part of the Receiving Party in breach of this Agreement, publicly known or available; (b) is known by the Receiving Party at the time of receiving such information (other than as a result of disclosure by or on behalf of the Disclosing Party), as evidenced by its records; *provided, however,* that the exception set forth in this clause (b) shall not apply to results, or to any timeline and budget under any Project Plan; (c) is hereafter furnished to the Receiving Party by a Third Party, as a matter of right and without restriction on disclosure; or (d) is independently discovered or developed by the Receiving Party

outside of a Project Plan and without the use of Confidential Information of the Disclosing Party. For purposes of clause (a) of this Section, no combination of elements within the Confidential Information shall be deemed to be part of the public domain merely because the individual elements of such combination are part of the public domain, unless the entire combination itself, or the entire principle of use or operation of such combination (if any), is part of the public domain. In addition, no element within the Confidential Information shall be deemed to be a part of the public domain merely because it is embraced by more general information or data that is part of the public domain.

5.3 Authorized Disclosure. A Receiving Party may disclose Confidential Information of the Disclosing Party as expressly permitted by this Agreement (including as reasonably necessary for the Receiving Party's performance of its obligations under this Agreement), or if and to the extent such disclosure is reasonably necessary in the following instances:

(a) prosecuting or defending Litigation as permitted by this Agreement;

(b) complying with requests of government agencies, applicable court orders, Applicable Laws, rules or regulations, or the listing rules of any exchange on which the Receiving Party's or its Affiliate's securities are traded;

(c) enforcing the Receiving Party's rights under this Agreement;

(d) filing or prosecuting Patent Rights as permitted by this Agreement;

(e) in the case of the Company, disclosure in regulatory submissions with respect to Products within the scope of the Exclusive License;

(f) in the case of BioAtla, disclosure in regulatory submissions with respect to Products within the scope of the Exclusive Non-CAST License;

(g) disclosure to the Receiving Party's Affiliates, to the Company's actual or potential licensees or sublicensees of rights with respect to Products in the Field, to BioAtla's actual or potential licensees or sublicensees of rights with respect to Products outside the Field, and to the Receiving Party's and its Affiliates' representatives who, in each case, have a need to know such information in order for the Receiving Party to exercise its rights or fulfill its obligations under this Agreement, provided, in each case, that any such Affiliate, actual or potential licensee or sublicensee, or representative agrees to be bound by terms of confidentiality and non-use at least as restrictive as those set forth in this Article; and

(h) disclosure to Third Parties in connection with due diligence or similar investigations by such Third Parties, and disclosure to potential Third Party investors in confidential financing documents, provided, in each case, that any such Third Party agrees to be bound by reasonable obligations of confidentiality and non-use.

Notwithstanding the foregoing, in the event the Receiving Party is required to make a disclosure of the Disclosing Party's Confidential Information pursuant to this Section 5.3, it will, except where impracticable, (i) give reasonable advance notice to the Disclosing Party of such disclosure, (ii) use efforts to secure confidential treatment of such information at least as diligent as the Receiving Party would use to protect its own Confidential Information, but in no event less than reasonable efforts, and (iii) cooperate with any efforts by the Disclosing Party, at the Disclosing Party's request and expense, to secure confidential treatment of such Confidential Information.

5.4 Publication.

(a) By the Company.

(i) Subject to Section 5.4(a)(ii), BioAtla shall have the right to review and comment on any material proposed for disclosure or publication by the Company regarding results of the Company's development activities with respect to Products, whether by oral presentation, manuscript or abstract, but only to the extent (A) any such Product or the development, manufacture, use, sale or offer for sale thereof is covered by or uses or incorporates any BioAtla Licensed Technology or (B) any such material contains any BioAtla Licensed Know-How. Before any such material is submitted for publication or presentation of the same is made, the Company shall deliver a complete copy to BioAtla at least 60 days prior to submitting the material to a publisher or initiating any other disclosure. BioAtla shall review any such material and give its comments to the Company within 30 days of the receipt of such material and Company shall accept BioAtla's reasonable comments. With respect to oral presentation materials and abstracts, BioAtla shall make reasonable efforts to expedite review of such materials and abstracts, and shall return such items as soon as practicable to the Company with appropriate comments, if any, but in no event later than 30 days from receipt. The Company shall comply with BioAtla's request to delete references to the Confidential Information of BioAtla in any such material and agrees to delay any submission for publication or other public disclosure for a period of up to an additional 60 days for the purpose of allowing preparation and filing of appropriate patent applications.

(ii) Company and its Affiliates shall be free to publish, and to authorize their respective sublicensees to publish, the results of any clinical trial of any Product conducted by or on behalf of the Company, its Affiliate or any such sublicensee, without the prior review or approval of BioAtla.

(b) By BioAtla.

(i) Subject to Section 5.4(b)(ii), the Company shall have the right to review and comment on any material proposed for disclosure or publication by BioAtla regarding results of BioAtla's development activities with respect to Products in the Field, whether by oral presentation, manuscript or abstract, but only to the extent (A) any such Product or the development, manufacture, use, sale or offer for sale thereof is covered by or uses or incorporates any Company Licensed Technology or (B) any such material contains any Company Licensed Know-How. Before any such material is submitted for publication or presentation of the same is made, BioAtla shall deliver a complete copy to the Company at least 60 days prior to submitting the material to a publisher or initiating any other disclosure. The Company shall review any such material and give its comments to BioAtla within 30 days of the receipt of such material and BioAtla shall accept Company's reasonable comments. With respect to oral presentation materials and abstracts, the Company shall make reasonable efforts to expedite review of such materials and

abstracts, and shall return such items as soon as practicable to BioAtla with appropriate comments, if any, but in no event later than 30 days from receipt. BioAtla shall comply with the Company's request to delete references to the Confidential Information of the Company in any such material and agrees to delay any submission for publication or other public disclosure for a period of up to an additional 60 days for the purpose of allowing preparation and filing of appropriate patent applications.

(ii) BioAtla and its Affiliates shall be free to publish, and to authorize their respective sublicensees to publish, the results of any clinical trial of any Product in the Field conducted by or on behalf of BioAtla, its Affiliate or any such sublicensee, without the prior review or approval of the Company.

5.5 Public Announcements.

(a) **Joint Press Release.** The parties may issue a joint press release announcing the execution of this Agreement in a form to be mutually agreed upon by the parties.

(b) **Additional Press Releases.** The parties acknowledge that, after the issuance of the initial joint press release (if any), each party may desire or be required to issue subsequent press releases relating to this Agreement. The parties agree to consult with each other reasonably and in good faith with respect to the text and timing of subsequent press releases prior to the issuance thereof, provided that a party may not withhold consent to such releases that the other party determines, based on advice of outside legal counsel, are necessary to comply with Applicable Law or the listing rules of any exchange on which the other party's or its Affiliate's securities are traded. In the event of a required public announcement or any public disclosure (including, without limitation, disclosure in any filing with the U.S. Securities and Exchange Commission) relating to this Agreement, the party required to make such announcement or proposing to make such public disclosure shall provide the other party with a copy of the proposed text of such announcement or disclosure sufficiently in advance of the scheduled release or disclosure to afford such other party a reasonable opportunity to review and comment upon the proposed text, or at a minimum as far in advance of the scheduled release or disclosure as is practicable under the circumstances, and such party shall comply with the other party's reasonable and timely comments thereto. Each party may: (i) make public statements regarding this Agreement in response to questions by the press, analysts, investors or those attending industry conferences or financial analyst calls, provided, in each case, that such party shall have consulted with the other party and the parties shall have mutually agreed to a written discussion guide or "talking points" memo in advance, and the responding party shall provide responses that are consistent with such guide or memo; or (ii) make public statements regarding this Agreement in reports to shareholders or to any exchange on which such party's or its Affiliate's securities are traded, or issue press releases; in each case, so long as the contents of any such public statement, report or press release are contained in a prior public disclosure or public statement approved by the other party pursuant to this Section 5.4(b) or permitted by Section 5.3 and do not reveal non-public information about the other party.

(c) Filing of this Agreement. The parties shall coordinate in advance with each other in connection with the filing of this Agreement (including redaction of certain provisions of this Agreement) with any securities authority or with any stock exchange on which securities issued by a party or its Affiliate are traded, and each party will use reasonable efforts to seek and obtain confidential treatment for the terms proposed to be redacted; provided that each party will ultimately retain control over what terms are disclosed to any securities authority or stock exchange, as the case may be, to the extent such party determines, on the advice of outside legal counsel, that disclosure is reasonably necessary to comply with Applicable Laws, including disclosure requirements of the U.S. Securities and Exchange Commission, or with the requirements of any stock exchange on which securities issued by a party or its Affiliates are traded; and provided further that the parties will use their reasonable efforts to file redacted versions with any governing bodies which are consistent with redacted versions previously filed with any other governing bodies.

6. INTELLECTUAL PROPERTY.

6.1 Ownership. Inventorship of inventions, whether or not patentable, shall be determined in accordance with U.S. patent laws. Each party shall promptly disclose to the other party in writing each Invention made in whole or in part by such party, and the parties, with the advice of each party's outside patent counsel, use commercially reasonable efforts and exercise good faith to determine the inventorship of each such Invention for purposes of U.S. patent laws. The Company shall solely own all Company Inventions. BioAtla shall solely own all BioAtla Inventions. The parties shall jointly own all Joint Inventions and Joint Patents. Subject to the Exclusive License, the Exclusive Non-CAST License and the terms and conditions of this Agreement, each party shall have the right to use, and grant licenses under its joint ownership interest in, Joint Technology, without the other party's consent and without any duty to account to the other party for such use or license, and each party hereby waives any right it may have under the laws of any country to require any such consent or accounting.

6.2 Patent Prosecution and Maintenance. For purposes of this Section 6.2, the terms "prosecution" and "maintenance" (including variations such as "prosecute" and "maintain") shall mean, with respect to a Patent Right, the preparing, filing, prosecution, maintenance and defense of such Patent Right, in the applicable jurisdiction, as well as re-examinations, reissues and requests for patent term extensions and the like with respect to such Patent Right, together with the conduct of interferences, the defense of oppositions and other similar proceedings with respect to a Patent Right.

(a) BioAtla Licensed Patents. BioAtla shall have the sole right, but not the obligation, to prosecute and maintain the BioAtla Licensed Patents, at its sole cost and expense.

(b) Company Licensed Patents. The Company shall have the sole right, but not the obligation, to prosecute and maintain the Company Licensed Patents, at its sole cost and expense.

(c) Joint Patents. BioAtla will have the first right and responsibility to prepare, file, prosecute and maintain Joint Patents claiming a Joint Invention. BioAtla shall use counsel reasonably acceptable to the other party, and, unless otherwise agreed by the parties in writing, the parties shall share equally the reasonable and documented expenses of preparing, filing, prosecuting and maintaining such Joint Patents. BioAtla shall consult with Company as to the preparation, filing, prosecution and maintenance of the Joint Patents reasonably prior to any

deadline or action with any patent office, and shall furnish to the other party copies of all relevant drafts and documents reasonably in advance of such consultation. BioAtla shall keep Company reasonably informed of progress with regard to the preparation, filing, prosecution and maintenance of such Joint Patents, and shall provide to Company copies of all material patent office submissions within a reasonable amount of time following submission thereof by BioAtla. In the event that BioAtla desires to abandon or cease prosecution or maintenance of any such Joint Patent, BioAtla shall provide written notice to Company of such intention to abandon promptly after BioAtla makes such determination (which notice shall be given no later than 90 days (or for Hatch-Waxman actions, or the equivalent thereof, 30 days) prior to the next deadline for any action that must be taken with respect to such Joint Patent in the relevant patent office). In such case, Company shall have the right, in its discretion, exercisable upon written notice to the first party delivered no later than 30 days after receipt of notice from BioAtla, to assume responsibility for prosecution and maintenance of such Joint Patent, at its sole cost and expense and by counsel of its own choice.

6.3 Cooperation of the Parties. Each party agrees to cooperate fully in the prosecution and maintenance of Patent Rights under Section 6.2 and in the obtaining and maintenance of any patent extensions, supplementary protection certificates and the like with respect thereto. Such cooperation includes, but is not limited to: (a) executing all papers and instruments, or requiring its employees or contractors to execute such papers and instruments, so as to effectuate the joint ownership of Joint Inventions and Joint Patents set forth in Section 6.1, and to enable the other party to apply for and to prosecute patent applications in any country as permitted by Section 6.2; and (b) promptly informing the other party of any matters coming to such party's attention that may affect the preparation, filing, prosecution or maintenance of any such patent applications.

6.4 Infringement by Third Parties.

(a) Notice. In the event that either BioAtla or the Company becomes aware of any infringement or threatened infringement by a Third Party of any BioAtla Licensed Patent, Company Licensed Patent or Joint Patent, it shall notify the other party in writing to that effect.

(b) Enforcement.

(i) BioAtla Licensed Patents. BioAtla shall have the sole right to bring and enforce any action or proceeding with respect to infringement of any BioAtla Licensed Patent, at BioAtla's sole cost and expense.

(ii) Company Licensed Patents. The Company shall have the sole right to bring and enforce any action or proceeding with respect to infringement of any Company Licensed Patent, at the Company's sole cost and expense.

(iii) Joint Patents. BioAtla shall have the sole right to bring any action or proceeding with respect to infringement of any Joint Patent by a Third Party. Any damages or other monetary awards recovered in any action, suit or proceeding brought under this Section 6.4 shall first be applied to reimburse BioAtla for all of the costs and expenses it incurred in connection with such action, and any remaining proceeds shall be shared as follows: BioAtla shall retain [***] and Company shall retain [***] of such amount.

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

(c) Cooperation. The party enforcing Patent Rights under this Section 6.4 may require the participation of the other party where necessary to bring any suit. Such other party shall provide reasonable assistance, including being joined as a party plaintiff if necessary, at the enforcing party's expense.

6.5 Infringement of Third Party Rights. Each party shall promptly notify the other party in writing of any allegation by a Third Party that the activity of either party or any of their respective Affiliates pursuant to this Agreement infringes or may infringe the intellectual property rights of a Third Party. BioAtla shall have the sole right to control any defense of any such claim involving alleged infringement of Third Party rights by activities of BioAtla or its Affiliates at its own expense and by counsel of its own choice, and the Company shall have the right, at its own expense, to be represented in any such action by counsel of its own choice. The Company shall have the sole right to control any defense of any such claim involving alleged infringement of Third Party rights by activities of the Company or its Affiliates at its own expense and by counsel of its own choice, and BioAtla shall have the right, at its own expense, to be represented in any such action by counsel of its own choice.

6.6 Consent to Settlement. Neither party shall enter into any settlement or compromise of any action or proceeding under this Article 6 which would in any manner alter, diminish, or be in derogation of the other party's rights under this Agreement without the prior written consent of the other party, which shall not be unreasonably withheld.

7. REPRESENTATIONS AND WARRANTIES; DISCLAIMER; LIMITATION OF LIABILITY.

7.1 Mutual Representations and Warranties. Each party represents and warrants to the other as of the Execution Date that:

(a) it is duly organized and validly existing under the laws of its jurisdiction of incorporation or formation, and has full corporate or other power and authority to enter into this Agreement and to carry out the provisions hereof;

(b) it is duly authorized to execute and deliver this Agreement and to perform its obligations hereunder, and the person or persons executing this Agreement on its behalf has been duly authorized to do so by all requisite corporate or partnership action;

(c) this Agreement is legally binding upon it, enforceable in accordance with its terms, and does not conflict with any agreement, instrument or understanding, oral or written, to which it is a party or by which it may be bound (including, with respect to BioAtla, any agreement between BioAtla or any of its Affiliates), nor violate any material law or regulation of any court, governmental body or administrative or other agency having jurisdiction over it; and

(d) neither it nor any of its Affiliates is debarred from the drug industry by any regulatory authority (*e.g.*, by the FDA pursuant to 21 U.S.C. §335a), and it has not received written notice or other communication from any regulatory authority threatening debarment of such party or any of its Affiliates.

7.2 BioAtla Representations and Warranties. BioAtla represents and warrants to the Company as of the Execution Date that:

(a) BioAtla has not granted to any of its Affiliates or any Third Party any license or other right with respect to CAB Biologics or the BioAtla Licensed Technology that conflicts with the Exclusive License and rights granted to the Company herein, other than any such license or right that terminated prior to the Execution Date and is of no further force or effect;

(b) BioAtla is not a party to, and is not otherwise bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way BioAtla's right and ability (i) to grant the Exclusive License on the terms and conditions set forth in this Agreement or (ii) to comply with any of BioAtla's obligations hereunder;

(c) it has not received written notice from any Third Party claiming that the manufacture, use, sale, offer for sale or import of CAB Biologics infringes or would infringe the patent or other intellectual property rights of any Third Party; and

(d) there are no claims, judgments or settlements against or owed by BioAtla or any of its Affiliates with respect to the BioAtla Licensed Technology, and neither BioAtla nor any of its Affiliates is a party to any legal action, suit or proceeding relating to the BioAtla Licensed Technology, nor has BioAtla or any of its Affiliates received any written communication from any Third Party threatening such action, suit or proceeding.

7.3 Mutual Covenants. Each party covenants to the other party as follows:

(a) neither such party nor any of its Affiliates will employ or use the services of any Person that has been disqualified by a regulatory authority from conducting clinical testing of new drugs (*e.g.*, by the FDA pursuant to 21 C.F.R. Part 312.70) or debarred by a regulatory authority from the drug industry (*e.g.*, by the FDA pursuant to 21 U.S.C. §335a), in connection with any development activities within the scope of this Agreement; and if a party becomes aware of the debarment or disqualification or threatened debarment or disqualification of any Person providing services to such party or any of its Affiliates in connection with any development activities within the scope of this Agreement, such party shall immediately notify the other party in writing, and such party shall cease, or cause its Affiliate to cease (as applicable), employing, contracting with, or retaining any such Person to perform any services in connection with such development activities;

(b) neither such party nor any of its Affiliates will, in connection with the exercise of its rights or performance of its obligations under this Agreement, directly or indirectly through Third Parties, pay, promise or offer to pay, or authorize the payment of, any money or give any promise or offer to give, or authorize the giving of anything of value to a public official or entity for the purpose of obtaining or retaining business for or with, or directing business to, any Person, including such party and its Affiliates, nor will such party or any of its Affiliates directly

or indirectly promise, offer or provide any corrupt payment, gratuity, emolument, bribe, kickback, illicit gift or hospitality or other illegal or unethical benefit to a public official or entity or other Person or otherwise violate any Anti-Corruption Laws in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement;

(c) neither such party nor any of its Affiliates (or any of their respective employees and contractors), in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement, shall cause the other party to be in violation of Anti-Corruption Laws or Export Control Laws; and

(d) such party shall immediately notify the other party if such party has any information or suspicion that there may be a violation of Anti-Corruption Laws or Export Control Laws in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement.

7.4 BioAtla Covenants. In addition to any covenants made by BioAtla elsewhere in this Agreement, BioAtla hereby covenants to the Company that, during the Term:

(a) BioAtla will not grant any of its Affiliates or any Third Party any license or other right with respect to any BioAtla Licensed Technology that conflicts with the Exclusive License and rights granted to the Company herein; and

(b) BioAtla will not become a party to, or otherwise become bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way BioAtla's right and ability to comply with any of BioAtla's obligations hereunder.

7.5 Company Covenants. In addition to any covenants made by the Company elsewhere in this Agreement, the Company hereby covenants to BioAtla that, during the Term:

(a) the Company will not grant any of its Affiliates or any Third Party any license or other right with respect to any Company Licensed Technology that conflicts with the Exclusive Non-CAST License and rights granted to BioAtla herein; and

(b) the Company will not become a party to, or otherwise become bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way the Company's right and ability to comply with any of the Company's obligations hereunder.

7.6 Disclaimer. Except as expressly set forth in this Agreement, EACH PARTY EXPRESSLY DISCLAIMS ANY AND ALL WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE WARRANTIES OF DESIGN, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, VALIDITY OF PATENTS, NON-INFRINGEMENT OF THE INTELLECTUAL PROPERTY RIGHTS OF THIRD PARTIES, OR ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICES; IN EACH CASE, ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT OR ANY OF THE SUBLICENSE AGREEMENTS.

7.7 Limitation of Liability. EXCEPT FOR LIABILITY FOR BREACH OF ARTICLE 5, NEITHER PARTY SHALL BE ENTITLED TO RECOVER FROM THE OTHER PARTY ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL OR PUNITIVE DAMAGES IN CONNECTION WITH THIS AGREEMENT OR ANY LICENSE GRANTED HEREUNDER; *provided, however*, that this Section shall not be construed to limit either party's indemnification obligations hereunder.

8. TERM AND TERMINATION.

8.1 Term. The term of this Agreement (the "**Term**") shall begin on the Execution Date and, unless earlier terminated in accordance with this Article 8, shall continue in existence for so long as the Company or any of its Affiliates, licensees or sublicensees is developing or commercializing any Product in the Field or BioAtla or any of its Affiliates, licensees or sublicensees is developing or commercializing any Product outside the Field.

8.2 Termination. This Agreement may be terminated by BioAtla upon thirty (30) days prior written notice to Company for any failure by Company to pay any amounts owed to BioAtla under this Agreement which in the aggregate exceed [***] and have been outstanding for more than [***] days.

8.3 Consequences of Termination and Expiration; Accrued Obligations; Survival.

(a) Upon termination of this Agreement in accordance with Section 8.2(a), the Exclusive License shall terminate and the Exclusive Non-CAST License shall survive on a non-exclusive, fully paid, royalty free, irrevocable, perpetual basis.

(b) Upon expiration of this Agreement in accordance with Section 8.1, the Exclusive License and Exclusive Non-CAST License shall survive on a non-exclusive, fully-paid, royalty-free, irrevocable, perpetual basis. Expiration or termination of this Agreement shall not relieve either party of any obligation or liability accruing prior to such expiration or termination, nor shall such expiration preclude either party from pursuing all rights and remedies it may have under this Agreement, at law or in equity, with respect to breach of this Agreement. In addition, the parties' rights and obligations under Sections 2.2, 2.3 (other than Section 2.3(a)), 4.4, 4.5, 4.6, 4.7, 4.8, 7.6, 7.7 and 8.3 and Articles 5, 11, 12 and 13 of this Agreement shall survive expiration of this Agreement.

9. INDEMNIFICATION.

9.1 Indemnification by the Company. The Company hereby agrees to save, defend, indemnify and hold harmless BioAtla, its Affiliates, its and their respective officers, directors, agents, employees, successors and assigns (the "**BioAtla Indemnitees**"), from and against any and all losses, damages, liabilities, expenses and costs, including reasonable legal expense and attorneys' fees ("**Losses**"), to which any BioAtla Indemnitee may become subject as a result of

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

any claim, demand, action or other proceeding by any Third Party (each, a **“Claim”**) to the extent such Losses arise out of or relate to: (a) the development, manufacture, use, handling, storage, sale, offer for sale, import or other disposition by or on behalf of the Company, its Affiliates, licensees or sublicensees of Products, or any other exercise of the Exclusive License by or on behalf of the Company, its Affiliates or sublicensees; (b) the gross negligence or willful misconduct of any Company Indemnitee (defined below); or (c) the breach by the Company of any warranty, representation, covenant or agreement made by the Company in this Agreement; except, in each case, to the extent such Losses result from the gross negligence or willful misconduct of any BioAtla Indemnitee or the breach by BioAtla of any warranty, representation, covenant or agreement made by BioAtla in this Agreement.

9.2 Indemnification by BioAtla. BioAtla hereby agrees to save, defend, indemnify and hold harmless the Company, its Affiliates and their respective officers, directors, employees, consultants and agents (the **“Company Indemnitees”**) from and against any and all Losses to which any Company Indemnitee may become subject as a result of any Claim to the extent such Losses arise out of or relate to: (a) the development, manufacture, use, handling, storage, sale, offer for sale, import or other disposition by or on behalf of BioAtla, its Affiliates, licensees or sublicensees of Products outside the Field, involving the exercise of the Exclusive Non-CAST License by or on behalf of BioAtla, its Affiliates, licensees or sublicensees; (b) the gross negligence or willful misconduct of any BioAtla Indemnitee; or (c) the breach by BioAtla of any warranty, representation, covenant or agreement made by BioAtla in this Agreement; in each case except to the extent such Losses result from the gross negligence or willful misconduct of any Company Indemnitee or the breach by the Company of any warranty, representation, covenant or agreement made by the Company in this Agreement.

9.3 Control of Defense. In the event a party (the **“Indemnified Party”**) seeks indemnification under Section 9.1 or 9.2, it shall inform the other party (the **“Indemnifying Party”**) of a claim as soon as reasonably practicable after it receives notice of the claim (it being understood and agreed, however, that the failure by an Indemnified Party to give notice of a claim as provided in this Section 9.3 shall not relieve the Indemnifying Party of its indemnification obligation under this Agreement except and only to the extent that such Indemnifying Party is actually damaged as a result of such failure to give notice), shall permit the Indemnifying Party to assume direction and control of the defense of the claim (provided that such claim is solely for monetary damages and the Indemnifying Party agrees to pay all damages relating to such matter, as evidenced in a written confirmation delivered by the Indemnifying Party to the Indemnified Party) using counsel reasonably satisfactory to the Indemnified Party, and shall cooperate as requested (at the expense of the Indemnifying Party) in the defense of the claim. If the Indemnifying Party does not assume control of such defense within 15 days after receiving notice of the claim from the Indemnified Party, the Indemnified Party shall control such defense and, without limiting the Indemnifying Party's indemnification obligations, the Indemnifying Party shall reimburse the Indemnified Party for all costs, including reasonable attorney fees, incurred by the Indemnified Party in defending itself within 30 days after receipt of any invoice therefor from the Indemnified Party. The party not controlling such defense may participate therein at its own expense. The party controlling such defense shall keep the other party advised of the status of such action, suit, proceeding or claim and the defense thereof and shall consider recommendations made by the other party with respect thereto. The Indemnified Party shall not agree to any settlement of such action, suit, proceeding or claim without the prior written consent of the

Indemnifying Party, which shall not be unreasonably withheld, delayed or conditioned. The Indemnifying Party shall not agree to any settlement of such action, suit, proceeding or claim or consent to any judgment in respect thereof that does not include a complete and unconditional release of the Indemnified Party from all liability with respect thereto, that imposes any liability or obligation on the Indemnified Party or that acknowledges fault by the Indemnified Party without the prior written consent of the Indemnified Party. If the parties cannot agree as to the application of Section 9.1 or 9.2 to any claim, pending resolution of the Dispute pursuant to Article 10, the parties may conduct separate defenses of such claims, with each party retaining the right to claim indemnification from the other party in accordance with Section 9.1 or 9.2, as applicable, upon resolution of the underlying claim.

9.4 Insurance. Each party shall procure and maintain insurance, including comprehensive or commercial general liability insurance (including contractual liability and product liability), adequate to cover its obligations hereunder and which is consistent with normal business practices of prudent companies similarly situated. It is understood that such insurance shall not be construed to create a limit of either party's liability with respect to its indemnification obligations under this Article 9 or otherwise. Each party shall provide the other party with written evidence of such insurance upon request.

10. DISPUTE RESOLUTION.

10.1 Disputes. Subject to Section 10.3, any claim, dispute, or controversy as to the breach, enforcement, interpretation or validity of this Agreement (each, a "**Dispute**") will be referred to the Chief Executive Officer of the Company and the Chief Executive Officer of BioAtla (the "**Executives**") for attempted resolution. In the event such Executives are unable to resolve such Dispute within 30 days of such Dispute being referred to them, then, either Party may, at its sole discretion, seek resolution of such matter in accordance with Section 10.2.

10.2 Submission to Court for Resolution. Subject to Section 10.1, the Parties hereby irrevocably and unconditionally consent to the exclusive jurisdiction of the courts located in the Southern District of California for any action, suit or proceeding (other than appeals therefrom) arising out of or relating to this Agreement, and agree not to commence any action, suit or proceeding (other than appeals therefrom) related thereto except in such courts. The Parties further hereby irrevocably and unconditionally waive any objection to the laying of venue of any action, suit or proceeding (other than appeals therefrom) arising out of or relating to this Agreement in the courts of California, and hereby further irrevocably and unconditionally waive and agree not to plead or claim in any such court that any such action, suit or proceeding brought in any such court has been brought in an inconvenient forum. Each Party further agrees that service of any process, summons, notice or document by registered mail to its address set forth in Section 11.9 shall be effective service of process for any action, suit or proceeding brought against it under this Agreement in any such court. Notwithstanding anything to the contrary in this Section 10.2, each Party shall have the right to institute judicial proceedings against the other Party or anyone acting by, through or under such other Party, in any court of competent jurisdiction, in order to enforce the instituting Party's rights hereunder through reformation of contract, specific performance, injunction or similar equitable relief.

10.3 Court Actions. Nothing contained in this Agreement shall deny either party the right to seek injunctive or other equitable relief from a court of competent jurisdiction in the context of a *bona fide* emergency or prospective irreparable harm, and such an action may be filed and maintained notwithstanding any ongoing discussions between the parties or any ongoing arbitration proceeding. In addition, either party may bring an action in any court of competent jurisdiction to resolve Disputes pertaining to the validity, construction, scope, enforceability, infringement or other violations of Patent Rights or other intellectual property rights, and no such claim shall be subject to arbitration pursuant to Section 10.2.

11. MISCELLANEOUS.

11.1 Rights Upon Bankruptcy. All rights and licenses granted under or pursuant to this Agreement are, and shall otherwise be deemed to be, for purposes of Section 365(n) of Title 11 of the United States Code and other similar laws in any jurisdiction outside the US (collectively, the “**Bankruptcy Laws**”), licenses of rights to be “intellectual property” as defined under the Bankruptcy Laws. If a case is commenced during the Term by or against a party under Bankruptcy Laws then, unless and until this Agreement is rejected as provided in such Bankruptcy Laws, such party (in any capacity, including debtor-in-possession) and its successors and assigns (including a trustee) shall perform all of the obligations provided in this Agreement to be performed by such party. If a case is commenced during the Term by or against a party under the Bankruptcy Laws, this Agreement is rejected as provided in the Bankruptcy Laws and the other party elects to retain its rights hereunder as provided in the Bankruptcy Laws, then the party subject to such case under the Bankruptcy Laws (in any capacity, including debtor-in-possession) and its successors and assigns (including a Title 11 trustee), shall provide to the other party copies of all Information necessary for such other party to prosecute, maintain and enjoy its rights under the terms of this Agreement promptly upon such other party’s written request therefor. All rights, powers and remedies of the non-bankrupt party as provided herein are in addition to and not in substitution for any and all other rights, powers and remedies now or hereafter existing at law or in equity (including the Bankruptcy Laws) in the event of the commencement of a case by or against a party under the Bankruptcy Laws.

11.2 Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of California, USA, excluding its conflicts of laws principles.

11.3 Entire Agreement; Amendments. This Agreement (including the Exhibits hereto), is both a final expression of the parties’ agreement and a complete and exclusive statement with respect to all of its terms. This Agreement supersedes all prior and contemporaneous agreements and communications, whether oral, written or otherwise, concerning any and all matters contained herein between the Company and BioAtla. The Exhibits to this Agreement are incorporated herein by reference and shall be deemed a part of this Agreement. This Agreement may be amended, or any term hereof modified, only by a written instrument duly executed by authorized representatives of both parties hereto.

11.4 Non-Waiver. The failure of a party to insist upon strict performance of any provision of this Agreement or to exercise any right arising out of this Agreement shall neither impair that provision or right nor constitute a waiver of that provision or right, in whole or in part, in that instance or in any other instance. Any waiver by a party of a particular provision or right shall be in writing, shall be as to a particular matter and, if applicable, for a particular period of time and shall be signed by such party.

11.5 Assignment. Except as expressly provided hereunder, neither this Agreement nor any rights or obligations hereunder may be assigned or otherwise transferred by either party without the prior written consent of the other party; it being understood and agreed that, either Party may assign this Agreement to an Affiliate, provided that the assigning party shall remain liable and responsible to the non-assigning party hereto for the performance and observance of all such duties and obligations by such Affiliate.

The rights and obligations of the parties under this Agreement shall be binding upon and inure to the benefit of the successors and permitted assigns of the parties, and the name of a party appearing herein will be deemed to include the name of such party's successors and permitted assigns to the extent necessary to carry out the intent of this section. Any assignment not in accordance with this Agreement shall be void.

11.6 Change of Control. Notwithstanding anything to the contrary in this Agreement, with respect to any intellectual property rights controlled by the acquiring party or its Affiliates (if other than one of the Parties to this Agreement or any Affiliate of a Party immediately before such Change of Control) involved in any Change of Control of either Party, such intellectual property rights shall not be included in the technology and intellectual property rights licensed to the other Party hereunder to the extent held by such acquirer or its Affiliates (other than the relevant Party to this Agreement or any Affiliate of a Party immediately before such Change of Control) prior to such transaction, or to the extent such technology is developed outside the scope of activities conducted with respect to any Product. The BioAtla Licensed Technology and the Company Licensed Technology shall exclude any intellectual property owned or controlled by a permitted assignee or successor and not developed in connection with any Product developed, manufactured or commercialized pursuant to this Agreement.

11.7 Force Majeure. Each party shall be excused from liability for the failure or delay in performance of any obligation under this Agreement by reason of any event beyond such party's reasonable control, including but not limited to acts of God, fire, flood, explosion, earthquake, or other natural forces, war, civil unrest, acts of terrorism, accident, destruction or other casualty, any lack or failure of transportation facilities, any lack or failure of supply of raw materials, any strike or labor disturbance, or any other event similar to those enumerated above. Such excuse from liability shall be effective only to the extent and duration of the event(s) causing the failure or delay in performance and provided that the party has not caused such event(s) to occur. The affected party shall notify the other party of such force majeure circumstances as soon as reasonably practical, and shall promptly undertake all reasonable efforts necessary to cure such force majeure circumstances.

11.8 Severability. If any one or more of the provisions contained in this Agreement is held invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions contained herein shall not in any way be affected or impaired thereby, unless the absence of the invalidated provision(s) adversely affects the substantive rights of the parties. The parties shall in such an instance use their best efforts to replace the invalid, illegal or unenforceable provision(s) with valid, legal and enforceable provision(s) which, insofar as practical, implement the purposes of this Agreement.

11.9 Notices. Any notice to be given under this Agreement must be in writing and delivered either in person, by any method of mail (postage prepaid), or by internationally-recognized express courier or facsimile, to the party to be notified at its address(es) given below, or at any address such party has previously designated by prior written notice to the other. Notice shall be deemed sufficiently given for all purposes upon the earliest of: (a) the date of actual receipt; (b) if mailed, three (3) days after the date of postmark; (c) if delivered by express courier, the next Business Day the express courier regularly makes deliveries; (d) if delivered by email, upon the date upon which the receipt of such email is confirmed by return email or other written or electronic confirmation; or (e) if delivered by facsimile, upon confirmation of successful transmission.

11.10 Relationship between the Parties. The parties' relationship, as established by this Agreement, is solely that of independent contractors. This Agreement does not create any partnership, joint venture or similar business relationship between the parties. Neither party is a legal representative of the other party, and neither party may assume or create any obligation, representation, warranty or guarantee, express or implied, on behalf of the other party for any purpose whatsoever.

11.11 No Third Party Rights. The provisions of this Agreement are for the exclusive benefit of the parties, and no other person or entity shall have any right or claim against either party by reason of these provisions or be entitled to enforce any of these provisions against either party.

11.12 Interpretation. The headings of clauses contained in this Agreement preceding the text of the sections, subsections and paragraphs hereof are inserted solely for convenience and ease of reference only and shall not constitute any part of this Agreement, or have any effect on its interpretation or construction. All references in this Agreement to the singular shall include the plural where applicable. The term "including" or "includes" as used in this Agreement means including, without limiting the generality of any description preceding such term, and the word "or" has the inclusive meaning represented by the phrase "and/or." Unless otherwise specified, references in this Agreement to any section shall include all subsections and paragraphs in such Section and references in this Agreement to any subsection shall include all paragraphs in such

subsection. All references to days in this Agreement shall mean calendar days, unless otherwise specified. Ambiguities and uncertainties in this Agreement, if any, shall not be interpreted against either party, irrespective of which party may be deemed to have caused the ambiguity or uncertainty to exist. This Agreement has been prepared in the English language, and the English language shall control its interpretation. In addition, all notices required or permitted to be given hereunder, and all written, electronic, oral or other communications between the parties regarding this Agreement shall be in the English language. In the event of any inconsistency or conflict between the English version of this Agreement and any translation of this Agreement into any other language, the English version shall control.

11.13 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original document, and all of which, together with this writing, shall be deemed one instrument. This Agreement may be executed by facsimile or PDF signatures, which signatures shall have the same force and effect as original signatures.

FIRST AMENDMENT TO EXCLUSIVE LICENSE AGREEMENT

This First Amendment to Exclusive License Agreement (this “**Amendment**”) is dated as of July 7, 2020 (the “**Amendment Effective Date**”) by and between Inversagen LLC, a Delaware limited liability company (“**Inversagen**”) and BioAtla, LLC, a Delaware limited liability company (“**BioAtla**”). Capitalized terms used but not otherwise defined herein shall have the meanings ascribed to such terms in the Exclusive License Agreement by and between Inversagen and BioAtla effective as of March 15, 2019 (the “**Agreement**”).

Background

The parties desire to amend the Agreement as described more fully herein to provide BioAtla with an option as provided below.

Terms

NOW, THEREFORE, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the Parties hereto, intending to be legally bound, hereby agree as follows:

1. **Amendment to Agreement.** New Section 2.10 is hereby added as an amendment to the Agreement: “Option Grant. Subject to this Section 2.10, the Company hereby grants to BioAtla the exclusive option (the “**Option**”), exercisable at any time during the period commencing on July 7, 2020 and ending on July 7, 2030 (the “**Option Term**”), to acquire the sole and exclusive rights solely to develop, make, have made, use, sell, have sold, offer for sale and import the [***] Product in the Field in the Territory (other than the People’s Republic of China, Hong Kong, Taiwan and Macau) (such sole and exclusive rights, the “**Rights**”) with all provisions of the Agreement applying, *mutatis mutandis*, provided that (a) all references to the Company and BioAtla shall be switched and (b) all references to Product shall be switched so as to refer to the [***] Product, and (c) the royalty rate referred to in Section 4.2 shall be [***]. During the Option Term, BioAtla shall have the right, but not the obligation, to exercise the Option in its sole discretion by delivering written notice of such exercise (the “**Option Exercise Notice**”) to the Company. Within ten (10) Business Days following the Option Exercise Notice delivery, the Company and BioAtla shall negotiate and enter into a definitive license agreement as contemplated by this Section 2.10. The Company hereby represents and

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

warrants to BioAtla that, as of July 7, 2020, the Company has not directly or indirectly licensed, assigned or otherwise transferred any of the Rights to any person (other than to BioAtla pursuant to this Section 2.10). The Company hereby covenants and agrees with BioAtla that, during the Option Term, the Company shall not directly or indirectly license, assign or otherwise transfer any of the Rights to any person (other than to BioAtla pursuant to this Section 2.10).”

2. Miscellaneous. The Parties hereby confirm and agree that, except as amended hereby, the Agreement remains in full force and effect and is a binding obligation of the Parties hereto. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

This Amendment is executed by the authorized representatives of the parties as of the date first written above.

**EXCLUSIVE LICENSE AGREEMENT
BioAtla Holdings LLC and BioAtla LLC**

THIS EXCLUSIVE LICENSE AGREEMENT (“**Agreement**”) is entered into as of January 1, 2020, (the “**Execution Date**”), by and between **BIOATLA HOLDINGS LLC**, a Delaware corporation (the “**Company**”), and **BIOATLA LLC**, a Delaware limited liability company, having an address of 11085 Torreyana Road, San Diego, California 92121, USA (“**BioAtla**”).

RECITALS

WHEREAS, BioAtla has developed, and possesses intellectual property rights in and to, its proprietary Conditionally Active Biologics platform for the design and engineering of therapeutic monoclonal antibodies and other therapeutic proteins for selective conditional activation under specific microphysical conditions (the “**BioAtla CAB Platform**”), including CAB antibody components, and related proprietary technologies for the discovery and development of CAB therapeutic antibodies and proteins, and components thereof; and

WHEREAS, the Company desires to obtain, and BioAtla is willing to grant to the Company, an exclusive, worldwide license under the BioAtla Licensed Technology (defined below) to develop and commercialize ACT Preparations and ACT Treatments (defined below) for the treatment of cancer, on the terms and subject to the conditions set forth herein and in the other Transaction Agreements (defined below) between the Company and BioAtla.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing premises and the mutual covenants set forth below, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. DEFINITIONS.

1.1 “ACT” or “Adoptive Cellular Therapy” shall mean an immunotherapy in which (a) genetically modified lymphocytes are administered to a patient or (b) targeted gene therapy vectors that modify lymphocytes are administered to a patient. Adoptive Cellular Therapies include, but are not limited to, CAR-T therapies.

1.2 “ACT Field” shall mean Adoptive Cellular Therapies for any indication.

1.3 “ACT Preparation” shall mean a composition or preparation containing or comprising one or more ACT Components. For clarity, and without limiting the generality of the foregoing, an ACT Preparation:

(a) may (but need not) be a CAB ACT Preparation – *i.e.*, may but need not incorporate any of the following: (i) a CAB Component (whether or not a BioAtla CAB Component); (ii) a component obtained or generated by or on behalf of the Company from BioAtla CAB Deliverables; or (iii) a component obtained or generated by or on behalf of the Company through the practice of BioAtla Licensed Technology within the scope of the Limited CAB Rights; and

(b) may (but need not) incorporate a component identified, obtained or generated by or on behalf of the Company without the use of any BioAtla Licensed Technology, BioAtla CAB, other CAB, BioAtla CAB Component, other CAB Component or BioAtla CAB Deliverable (e.g., a component identified, obtained or generated through other technology).

1.4 “ACT Treatment” shall mean a cancer immunotherapy in which (a) lymphocytes are genetically modified by *ex vivo* exposure to an ACT Preparation and administered to a patient or (b) an ACT Preparation that genetically modifies lymphocytes is administered to a patient.

1.5 “Affiliate” shall mean, with respect to an Entity, any other Entity that controls, is controlled by, or is under common control with such Entity, for as long as such control exists. As used in this Section 1.7, “control” shall mean direct or indirect beneficial ownership of more than 50% of the outstanding stock or other voting rights entitled to elect directors of voting share capital in an Entity.

1.6 “Anti-Corruption Laws” means the U.S. Foreign Corrupt Practices Act, as amended, the Organization for Economic Co-operation and Development (OECD) Convention on combating bribery of foreign public officials in international business transactions, and any other comparable anti-corruption laws of any country or organization or nations within whose jurisdiction either party or any of its Affiliates operates or does business.

1.7 “Applicable Laws” shall mean the applicable provisions of any and all national, supranational, regional, state and local laws, treaties, statutes, rules, regulations, administrative codes, guidances, ordinances, judgments, decrees, directives, injunctions, orders, permits of or from any court, arbitrator, regulatory authority or governmental agency or authority having jurisdiction over or related to the subject item, including Anti-Corruption Laws and Export Control Laws.

1.8 “Assert” shall mean to commence or prosecute patent infringement Litigation, or to make an express, specific written threat (such as, without limitation, a cease and desist demand letter) to commence or prosecute patent infringement Litigation.

1.9 “BioAtla Licensed Know-How” shall mean all Information Controlled by BioAtla that is necessary or useful for the development, manufacture, or commercialization of CAB ACT Preparations or CAB ACT Treatments.

1.10 “BioAtla Licensed Patents” shall mean all Patent Rights Controlled by BioAtla during the Term covering or claiming any invention Controlled by BioAtla that is necessary or useful for the development, manufacture, or commercialization of CAB ACT Preparations or CAB ACT Treatments. The BioAtla Licensed Patents existing as of the Execution Date include the patents and patent applications listed in **Exhibit A** hereto.

1.11 “BioAtla Licensed Technology” shall mean BioAtla Licensed Patents and BioAtla Licensed Know-How.

1.12 “BioAtla Non-Assert Patent” shall mean any Patent Right (excluding any BioAtla Licensed Patent) Controlled by BioAtla during the Term that claims any invention made solely by one or more employees, consultants or contractors of BioAtla in the course and as a result of using or practicing Company Licensed Technology.

1.13 “CAB” shall mean a conditionally active biologic therapeutic molecule (which may, but need not, be a monoclonal antibody) designed or developed for selective conditional activation under specific microphysical conditions. For clarity, except as otherwise expressly specified in a particular context, the term “CAB” refers to a molecule described in the preceding sentence that is *not* in an ACT format.

1.14 “CAB ACT Preparation” shall mean, a CAB or CAB Component that, in each case, is in any ACT format.

1.15 “CAB ACT Treatment” shall mean an immunotherapy in which (a) lymphocytes are genetically modified by *ex vivo* exposure to a CAB ACT Preparation and administered to a patient or (b) a CAB ACT Preparation that genetically modifies lymphocytes is administered to a patient.

1.16 “CAB Component” shall mean any variant, fragment, modification or derivative of a CAB, including, by way of example and not limitation, the heavy and light chain amino acid sequences derived from a CAB antibody. For clarity, except as otherwise expressly specified in a particular context, the term “CAB Component” refers to a CAB variant, fragment, modification or derivative that is *not* in an ACT format.

1.17 “CAB Non-ACT Field” shall mean CAB Non-ACT Products for any indication. For clarity, the CAB Non-ACT Field specifically excludes the ACT Field.

1.18 “CAB Non-ACT Product” shall mean a composition or preparation containing or comprising one or more CABs and/or CAB Components; but excluding, in any event, any CAB ACT Preparation or CAB ACT Treatment.

1.19 “CAR” shall have the meaning provided in the Recitals to this Agreement.

1.20 “CAR-T” shall have the meaning provided in the Recitals to this Agreement.

1.21 “Company Invention” shall mean any invention, whether or not patentable, made solely by one or more employees, consultants or contractors of the Company or any of its Affiliates in the course and as a result of using or practicing BioAtla Licensed Technology that is necessary or useful for the development, manufacture, or commercialization of BioAtla CAB Non-ACT Products

1.22 “Company Licensed Know-How” shall mean all Information generated or developed by or on behalf of the Company in the course and as a result of using or practicing BioAtla Licensed Technology that is necessary or useful for the development, manufacture, or commercialization of BioAtla CAB Non-ACT Products.

1.23 “Company Licensed Patents” shall mean all Patent Rights Controlled by the Company during the Term covering or claiming any Company Invention.

1.24 “Company Licensed Technology” shall mean Company Licensed Patents and Company Licensed Know-How.

1.25 “Company Non-Assert Patent” shall mean any Patent Right (excluding any Company Licensed Patent) Controlled by the Company during the Term that claims any invention made solely by one or more employees, consultants or contractors of the Company during the Term in the course and as a result of using or practicing BioAtla Licensed Technology.

1.26 “Confidential Information” shall have the meaning provided in Section 6.1.

1.27 “Control” or “Controlled by” shall mean, with respect to any Patent Rights, Information or other intellectual property rights, the possession by a party of the ability (whether by ownership, license or other right, other than pursuant to a license granted to such party by the other party under this Agreement) to grant access to, or a license or sublicense of, such Patent Rights, Information or other intellectual property rights without violating the terms of any agreement or other arrangement with any Third Party.

1.28 “Entity” shall mean any company, corporation, limited liability company, partnership, joint venture, firm, trust or other business entity.

1.29 “Exclusive ACT License” shall have the meaning provided in Section 3.1.

1.30 “Exclusive Non-ACT License” shall have the meaning provided in Section 3.2.

1.31 “Execution Date” shall have the meaning provided in the introductory paragraph of this Agreement.

1.32 “Export Control Laws” shall mean: (a) all applicable U.S. export control laws, including the Arms Export Controls Act (22 U.S.C. Ch. 39), the International Emergency Economic Powers Act (50 U.S.C. §§ 1701 et seq.), the Trading With the Enemy Act (50 U.S.C. app. §§ 1 et seq.), the Export Administration Act of 1979 (50 U.S.C. app. §§ 2401 et seq.), International Boycott Provisions of Section 999 of the U.S. Internal Revenue Code of 1986, and all rules, regulations and executive orders relating to any of the foregoing, including but not limited to the International Traffic in Arms Regulations (22 C.F.R. §§ 120 et seq.), the Export Administration Regulations (15 C.F.R. §§ 730 et. seq.), and the regulations administered by the Office of Foreign Assets Controls of the United States Department of the Treasury; and (b) all export controls imposed on any item by any country or organization or nations within whose jurisdiction either party operates or does business.

1.33 “Product” shall mean an ACT Preparation and/or an ACT Treatment.

1.34 “Information” shall mean any and all tangible and intangible (a) techniques, technology, practices, trade secrets, inventions (whether patentable or not), methods, knowledge, know-how, skill, experience, test data and results (including pharmacological, toxicological and clinical test data and results), analytical and quality control data, results or descriptions, software and algorithms, and (b) compositions of matter, cells, cell lines, assays, animal models and physical, biological or chemical material; that, in each case, are not in the public domain.

1.35 “**Invention**” shall mean a BioAtla Invention or Company Invention.

1.36 “**Limited CAB Rights**” shall have the meaning provided in Section 3.1.

1.37 “**Litigation**” means any procedure for the resolution of a controversy, whether created by a claim, a counterclaim or otherwise, in whatever form, administrative, judicial, arbitral or otherwise, including any proceeding in the United States International Trade Commission or any regulatory authority in any jurisdiction in the world.

1.38 “**Patent Rights**” shall mean (a) all national, regional and international patents and patent applications filed in any country of the world, including without limitation provisional patent applications, (b) all patent applications filed either from such patents and patent applications or from a patent application claiming priority from either of these, including any continuation, continuation-in-part, division, provisional, converted provisional and continued prosecution applications, or any substitute applications, (c) any patent issued with respect to or in the future issued from any such patent applications including utility models, petty patents and design patents and certificates of invention, and (d) any and all extensions or restorations by existing or future extension or restoration mechanisms, including revalidations, reissues, reexaminations and extensions (including any supplementary protection certificates and the like) of the foregoing patents or patent applications.

1.39 “**Person**” means any individual, Entity, or governmental authority or agency, or any other entity not specifically listed herein.

1.40 “**scFv**” shall mean a single-chain variable fragment.

1.41 “**Successful scFv**” shall mean an scFv with [***]

1.42 “**Term**” shall have the meaning provided in Section 9.1.

1.43 “**Third Party**” shall mean an entity other than BioAtla and its Affiliates, and Company and its Affiliates.

2. EXCLUSIVE LICENSES.

2.1 Exclusive ACT License Grant to the Company. Subject to the terms and conditions of this Agreement, BioAtla shall, and it hereby does, grant to Company, an exclusive (even as to BioAtla and its Affiliates,), worldwide, royalty-free and fully-paid license, with the right to sublicense through multiple tiers of sublicense (subject to Section 2.3(a)), under the BioAtla Licensed Technology and BioAtla’s interest in the Joint Technology, solely to develop, make, have made, use, sell, have sold, offer for sale and import ACT Preparations and ACT Treatments in the ACT Field (the “**Exclusive ACT License**”). The Exclusive ACT License includes, without

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

limitation, the right under the BioAtla Licensed Technology, exercisable solely by the Company and its Affiliates: (a) to identify, develop, make, have made, use and import CABs solely for the purpose of obtaining or generating CAB Components and scFvs for use or incorporation in ACT Preparations and ACT Treatments in the ACT Field; and (b) to identify, develop, make, have made, use and import CAB Components and scFvs solely for use or incorporation in ACT Preparations and ACT Treatments in the ACT Field (collectively, the **“Limited CAB Rights”**), subject, in each case, to the terms and conditions of this Agreement.

2.2 Exclusive Non-ACT License Grant to BioAtla. Subject to the terms and conditions of this Agreement, the Company shall, and it hereby does, grant to BioAtla, an exclusive (even as to the Company and its Affiliates), worldwide, royalty-free and fully-paid license, with the right to sublicense through multiple tiers of sublicense, under the Company Licensed Technology and the Company’s interest in the Joint Technology, solely to develop, make, have made, use, sell, have sold, offer for sale and import BioAtla CAB Non-ACT Products in the CAB Non-ACT Field (the **“Exclusive Non-ACT License”**).

2.3 Sublicensing.

(a) By the Company.

(i) Generally. The Company shall have the right to grant sublicenses under the Exclusive ACT License through multiple tiers of sublicense solely to develop, make, have made, use, sell, have sold, offer for sale and import ACT Preparations and ACT Treatments in the ACT Field.

(b) By BioAtla. BioAtla shall have the right to grant sublicenses under the Exclusive Non-ACT License through multiple tiers of sublicense solely to develop, make, have made, use, sell, have sold, offer for sale and import BioAtla CAB Non-ACT Products in the CAB Non-ACT Field.

2.4 Technology Transfer. Upon the Company’s request from time to time during the Term, BioAtla shall disclose, or cause to be disclosed, to the Company, by in-person meeting, teleconference, videoconference, facility visit or otherwise, such BioAtla Licensed Know-How as is reasonably necessary for the exploitation of the Exclusive ACT License by the Company, including, without limitation, such BioAtla Licensed Know-How as is reasonably necessary for the Company to practice the BioAtla Licensed Technology (including any specialized methods for identifying CABs) in the exercise of the Limited CAB Rights in the same manner and to the same extent as practiced by BioAtla. In addition, upon the Company’s request from time to time during the Term, BioAtla shall provide the Company with reasonable technical assistance in the practice of the BioAtla Licensed Technology in the exercise of the Limited CAB Rights in the same manner and to the same extent as practiced by BioAtla.

2.5 License Exclusions and Limitations.

(a) Exclusive ACT License.

(i) For clarity, and notwithstanding anything hereunder to the contrary, the Exclusive ACT License specifically excludes any license or other right under the BioAtla Licensed Technology:

(1) to make or have made any CAB or CAB Component, except as expressly permitted by this Agreement;

(2) to sell, have sold or offer for sale any CAB; or

(3) to sell, have sold or offer for sale any CAB Component, except as (A) incorporated in an ACT Preparation in the ACT Field or (B) used or incorporated in an ACT Treatment in the ACT Field; subject, in each case, to Section 3.5(a)(ii) below.

(ii) In addition, the Exclusive ACT License specifically excludes any license or other right under the BioAtla Licensed Technology to develop, make, have made, use, sell, have sold, offer for sale or import ACT Preparations and ACT Treatments outside of the ACT Field; *provided, however,* that if the Company or any of its Affiliates or sublicensees obtains marketing approval of an ACT Preparation and/or an ACT Treatment in the ACT Field, then the Exclusive ACT License shall also include the right to develop, make, have made, use, sell, have sold, offer for sale or import such ACT Preparation and ACT Treatment in the entire ACT Field.

(b) **Exclusive Non-ACT License.** For clarity, and notwithstanding anything hereunder to the contrary, the Exclusive Non-ACT License specifically excludes any license or other right under the Company Licensed Technology to identify, develop, make, have made, use, sell, have sold, offer for sale or import (i) any ACT, or (ii) any ACT Component or product containing or comprising any ACT Component; in each case, for any for any purpose.

2.6 Retained Rights. Notwithstanding the exclusivity of the Exclusive ACT License, BioAtla reserves such exclusive and non-exclusive rights under the BioAtla Licensed Technology, to develop, make, have made, use, sell, have sold, offer for sale and import CABs in any non-ACT format.

2.7 Negative Covenants.

(a) By BioAtla.

(i) BioAtla hereby covenants:

(1) during the Term, not to develop, make, have made, use, sell, have sold, offer for sale or import any CAB ACT Preparation or CAB ACT Treatment in the ACT Field, except with and through the Company and its Affiliates and sublicensees as expressly contemplated by this Agreement and the Sublicense Agreements;

(2) during the Term, not to identify, develop, make, have made, use, sell, have sold, offer for sale or import any ACT Component or any product containing or comprising any ACT Component for any purpose;

(3) not to use or practice the Company Licensed Technology to identify, develop, make, have made, use, sell, have sold, offer for sale or import any ACT; and

(4) not to cause or permit, or grant any license or other right to, any of its Affiliates or any Third Party to engage in any of the activities prohibited by the preceding subparagraphs (1) through (4) of this Section 3.7(a).

(ii) BioAtla covenants, on behalf of itself and its Affiliates, and its and their respective successors and assigns of any BioAtla Non-Assert Patent, that none of them will Assert against any Company Non-Assert Entity (as defined below), in any country or jurisdiction worldwide, any claim that the manufacture, use, sale, offer for sale or import of any ACT Preparation or ACT Treatment in the ACT Field in accordance with the terms and conditions of this Agreement infringes a BioAtla Non-Assert Patent. The term “**Company Non-Assert Entity**” means the Company, any of its Affiliates, any permitted Third Party sublicensee under the Exclusive ACT License, or any Third Party contractor performing services on behalf of any of the foregoing. The Assertion by BioAtla, any of its Affiliates, or any of its or their respective successors and assigns of any BioAtla Non-Assert Patent, against a Company Non-Assert Party that has not been identified to BioAtla by the Company in writing shall not be deemed to breach the covenant set forth in this Section 3.7(a)(ii), *provided* that such Assertion and any and all Litigation relating thereto cease within 30 days after written notice from the Company identifying the applicable Affiliate or Third Party as a Company Non-Assert Entity. Notwithstanding anything to the contrary, BioAtla shall have no obligation to disclose to the Company any BioAtla Non-Assert Patent.

(b) By Company.

(i) Notwithstanding the scope of the Exclusive ACT License, the Company hereby covenants:

(1) during the Term, not to develop, make, have made, use, sell, have sold, offer for sale or import any BioAtla CAB Deliverable delivered by BioAtla hereunder or other BioAtla CAB Component, except as (A) incorporated in an ACT Preparation or (B) used or incorporated in an ACT Treatment;

(2) during the Term, not to develop, make, have made, use, sell, have sold, offer for sale or import outside of the ACT Field (other than as expressly permitted by Section 3.5(a)(ii)):

a. any ACT Preparation that incorporates:

i. any BioAtla CAB Component;

ii. any scFv obtained or generated by or on behalf of the Company from any BioAtla CAB Component; or

iii. any CAB Component or scFv obtained or generated by or on behalf of the Company through the practice of the BioAtla Licensed Technology; or

b. any ACT Treatment that uses or incorporates any ACT Preparation described hereunder;

(3) not to cause or permit, or grant any sublicense or other right to, any of its Affiliates or any Third Party to engage in any of the activities prohibited by the preceding subparagraphs (1) through (3) of this Section;

(4) not to cause or permit any Third Party (other than a Third Party service provider performing contract services on behalf of the Company, solely for the purpose of performing such services) to make or have made any CAB or CAB Component; and

(5) not to cause or permit, and not to grant any sublicense or other right to, any Third Party:

a. to sell, have sold or offer for sale any CAB; or

b. to sell, have sold or offer for sale any CAB Component, except as (A) incorporated in an ACT Preparation in the ACT Field or (B) used or incorporated in an ACT Treatment in the ACT Field.

(ii) The Company covenants, on behalf of itself and its Affiliates, and its and their respective successors and assigns of any Company Non-Assert Patent, that none of them will Assert against any BioAtla Non-Assert Entity (as defined below), in any country or jurisdiction worldwide, any claim that the manufacture, use, sale, offer for sale or import of any BioAtla CAB Non-ACT Product in the CAB Non-ACT Field in accordance with the terms and conditions of this Agreement infringes a Company Non-Assert Patent. The term “**BioAtla Non-Assert Entity**” means BioAtla, any of its Affiliates, any permitted Third Party sublicensee under the Exclusive Non-ACT License, or any Third Party contractor performing services on behalf of any of the foregoing. The Assertion by the Company, any of its Affiliates, or any of its or their respective successors and assigns of any Company Non-Assert Patent, against a BioAtla Non-Assert Party that has not been identified to the Company by BioAtla in writing shall not be deemed to breach the covenant set forth in this Section 3.7(b)(ii), *provided* that such Assertion and any and all Litigation relating thereto cease within 30 days after written notice from BioAtla identifying the applicable Affiliate or Third Party as a BioAtla Non-Assert Entity. Notwithstanding anything to the contrary, the Company shall have no obligation to disclose to BioAtla any Company Non-Assert Patent.

2.8 Use of Third Party Contractors. Each party may engage Third Party contract service providers to perform on behalf of such party any activity that such party itself has the right to conduct under the license granted to such party in Section 3.1 or Section 3.2 (as applicable); *provided*, in each case, that: (a) such party shall require any such Third Party service provider to take all reasonable steps and use all reasonable measures to prevent unauthorized disclosure and unauthorized use of the Patent Rights and Information licensed to such party under Section 3.1 or Section 3.2 (as applicable); (b) none of the other party’s rights hereunder are diminished or

otherwise adversely affected as a result of such contracting; (c) each such contractor undertakes in writing obligations of confidentiality and non-use regarding Confidential Information of the other party at least as stringent as those undertaken by such party pursuant to Article 6; (d) prior to initiating performance of any such contract services, such Third Party service provider has signed a binding written agreement or instrument assigning, and agreeing to assign, to such party all Inventions resulting from performance of such services; and (e) such party shall at all times be fully responsible for the compliance of such Third Party service provider with the terms and conditions of this Agreement.

2.9 No Implied Licenses. No right or license under any Information, Patent Rights or other intellectual property rights is granted or shall be granted by implication. All such rights or licenses are or shall be granted only as expressly provided in the terms of this Agreement.

3. PAYMENTS.

3.1 Royalties. Subject to Section 3.3 and 3.4 hereunder, Company shall pay to BioAlta:

(a) Royalties on aggregate annual Net Sales by the Company and its Affiliates and Licensees of each Product in the Territory in each calendar year at the applicable rate(s) set forth below:

[***]

3.2 Royalty Term. Royalties under Section 4.1 shall be payable on a Product-by-Product basis during the period of time commencing on the First Commercial Sale of a Product in a country and ending upon expiration of the last-to-expire Valid Claim of the BioAlta Licensed Patents and the Company Licensed Patents covering the manufacture, use, sale, offer for sale or import of such Product (the "Royalty Term"). On a Product-by-Product basis, upon expiration of the royalty Term for a Product, the Company's license with respect to such Product shall become fully-paid, irrevocable and perpetual.

3.3 Third Party Licenses. In the event that the Company (or its Affiliate or Licensee, as applicable) is required to obtain, and obtains, one or more licenses under Patent Rights of Third Parties that are necessary for the manufacture, use or sale solely of the CAB component of a Product in a country (hereinafter "**Third Party Licenses**"), the Company may deduct 25% of the royalties actually paid to such Third Party under such Third Party License with respect to sales of such Product in such country from the royalties otherwise payable to BioAtla under this Agreement with respect to Net Sales of such Product in such country; *provided, however*, that the royalties payable to BioAtla with respect to Net Sales of such Product in such country may not be reduced by more than 25% in any calendar quarter as a result of any and all such offsets in the aggregate. Any portion of the royalties paid to such Third Party under such Third Party License with respect to such Product in such country that the Company would, but for the foregoing limitation on royalty reductions, be entitled to deduct under this Section 3.4 shall be carried over and applied against royalties payable to BioAtla in respect of such Product in such country in subsequent calendar quarters until the full deduction is taken.

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

3.4 Payment; Reports. Royalties under Section 3.2 shall be calculated and reported for each calendar quarter and shall be paid within 60 days after the end of each calendar quarter. Each payment shall be accompanied by a report of Net Sales of Products by the Company, its Affiliates and Licensees, which report shall include the gross sales and Net Sales of each Product (including a statement of deductions taken to calculate Net Sales), the royalties payable, a description of the method used to calculate the royalties payable, and the exchange rates used, in each case presented on a Product-by-Product and country-by-country basis.

3.5 Exchange Rate; Manner and Place of Payment. All payments under this Article 3 shall be payable in U.S. dollars by wire transfer in immediately available funds to a bank and account designated in writing by BioAtla. For the purpose of calculation of Net Sales expressed in currencies other than U.S. Dollars, Company shall convert any amount expressed in a foreign currency into U.S. Dollar equivalents using a rate of exchange as published in The Wall Street Journal (U.S. Eastern Edition) on last day of the Calendar Quarter in which such Net Sales were made.

3.6 Audits. The Company shall keep (and shall cause its Affiliates and Licensees to keep) complete and accurate records pertaining to the sale or other disposition of Products in sufficient detail to permit BioAtla to confirm the accuracy of all royalty payments due hereunder for a period of three years from the end of the calendar year to which such records relate. BioAtla shall have the right, once annually, to cause an independent, certified public accountant reasonably acceptable to the Company (the “**Auditor**”) to audit such records solely to confirm Net Sales and royalties for a period covering not more than the preceding three years. Such audits may be exercised during normal business hours upon reasonable prior written notice to the Company. No calendar year shall be subject to audit under this section more than once. The Auditor will execute a reasonable written confidentiality agreement with the Company and will disclose to BioAtla only such information as is reasonably necessary to provide BioAtla with information regarding any actual or potential discrepancies between amounts reported and actually paid and amounts payable under this Agreement. The Auditor will send a copy of the report to the Company at the same time it is sent to BioAtla. The report sent to both parties will include the methodology and calculations used to determine the results. Prompt adjustments shall be made by the parties to reflect the results of such audit. BioAtla shall bear the full cost of such audit unless such audit discloses an underpayment by the Company of more than 5% of the amount due for any calendar year under this Agreement, in which case, the Company shall bear the full cost of such audit and shall promptly remit to BioAtla the amount of any underpayment. If such audit discloses an overpayment by the Company, then the Company will deduct the amount of such overpayment from amounts otherwise owed to BioAtla under this Agreement. If such audit discloses an underpayment by the Company, then the Company will pay the amount of such underpayment owed to BioAtla within 30 days.

3.7 Withholding. BioAtla will pay any and all taxes levied on account of any payments made to it under this Agreement. If any taxes are paid or required to be withheld by the Company for the benefit of BioAtla on account of any amounts payments payable to BioAtla hereunder, the Company will deduct such taxes from the amount of payments otherwise due to BioAtla, timely pay the taxes to the proper taxing authority, and send proof of payment to BioAtla within 30 days following such payment.

3.8 Late Payments. In the event that any payment due under Section 5.1 (other than any invoiced amount or portion thereof that is subject to good faith dispute between the parties) is not made when due, the payment shall accrue interest from the date due at the rate of 1.0% per month; *provided, however*, that in no event shall such rate exceed the maximum legal annual interest rate. The payment of such interest shall not limit BioAtla from exercising any other rights it may have as a consequence of the lateness of any payment.

4. CONFIDENTIALITY.

4.1 Confidential Information. Except to the extent expressly authorized by this Agreement or otherwise agreed in writing by the parties, each party agrees that, after the First Series A3 Closing Date during the Term, and for five years thereafter, such party (the **“Receiving Party”**) shall keep confidential and shall not publish or otherwise disclose and shall not use for any purpose other than as expressly provided for in this Agreement any Information furnished to it by the other party (the **“Disclosing Party”**) pursuant to this Agreement or the Confidentiality Agreement (collectively, **“Confidential Information”**). Notwithstanding the foregoing, the parties hereby agree that: (i) each Timeline and Budget shall be considered the Confidential Information of both parties, and each party be deemed the Disclosing Party and the Receiving Party with respect thereto, and (ii) except as expressly set forth above in the case of Results, any Information disclosed by a party pursuant to the Confidentiality Agreement shall be deemed Confidential Information of such party for purposes of this Agreement. The Receiving Party may use Confidential Information only to the extent required to accomplish the purposes of this Agreement. The Receiving Party will use at least the same standard of care as it uses to protect proprietary or confidential information of its own, but no less than reasonable care, to ensure that its employees, agents, consultants and other representatives do not disclose or make any unauthorized use of the Confidential Information. The Receiving Party will promptly notify the Disclosing Party upon discovery of any unauthorized use or disclosure of the Confidential Information.

4.2 Exceptions. Confidential Information shall not include any information which the Receiving Party can prove by competent evidence: (a) is now, or hereafter becomes, through no act or failure to act on the part of the Receiving Party in breach of this Agreement, publicly known or available; (b) is known by the Receiving Party at the time of receiving such information (other than as a result of disclosure by or on behalf of the Disclosing Party), as evidenced by its records; *provided, however*, that the exception set forth in this clause (b) shall not apply to Results (in the case of BioAtla as the Receiving Party) or to any Timeline and Budget; (c) is hereafter furnished to the Receiving Party by a Third Party, as a matter of right and without restriction on disclosure; or (d) is independently discovered or developed by the Receiving Party outside of the R&D Program and without the use of Confidential Information of the Disclosing Party. For purposes of clause (a) of this Section 6.2, no combination of elements within the Confidential Information shall be deemed to be part of the public domain merely because the individual elements of such combination are part of the public domain, unless the entire combination itself, or the entire principle of use or operation of such combination (if any), is part of the public domain. In addition, no element within the Confidential Information shall be deemed to be a part of the public domain merely because it is embraced by more general information or data that is part of the public domain.

4.3 Authorized Disclosure. A Receiving Party may disclose Confidential Information of the Disclosing Party as expressly permitted by this Agreement (including as reasonably necessary for the Receiving Party's performance of its obligations under this Agreement), or if and to the extent such disclosure is reasonably necessary in the following instances:

(a) prosecuting or defending litigation as permitted by this Agreement;

(b) complying with applicable court orders, applicable laws, rules or regulations, or the listing rules of any exchange on which the Receiving Party's or its Affiliate's securities are traded;

(c) enforcing the Receiving Party's rights under this Agreement;

(d) filing or prosecuting Patent Rights as permitted by this Agreement;

(e) in the case of the Company, disclosure in regulatory submissions with respect to Products within the scope of the Exclusive ACT License;

(f) in the case of BioAtla, disclosure in regulatory submissions with respect to BioAtla CAB Non-ACT Products within the scope of the Exclusive Non-ACT License;

(g) disclosure to the Receiving Party's Affiliates, to the Company's actual or potential licensees or sublicensees of rights with respect to Products, to BioAtla's actual or potential licensees or sublicensees of rights with respect to BioAtla CAB Non-ACT Products, and to the Receiving Party's and its Affiliates' Representatives who, in each case, have a need to know such information in order for the Receiving Party to exercise its rights or fulfill its obligations under this Agreement, provided, in each case, that any such Affiliate, actual or potential licensee or sublicensee, or Representative agrees to be bound by terms of confidentiality and non-use at least as restrictive as those set forth in this Article 6; and

(h) disclosure to Third Parties in connection with due diligence or similar investigations by such Third Parties, and disclosure to potential Third Party investors in confidential financing documents, provided, in each case, that any such Third Party agrees to be bound by reasonable obligations of confidentiality and non-use.

Notwithstanding the foregoing, in the event the Receiving Party is required to make a disclosure of the Disclosing Party's Confidential Information pursuant to Section 6.3(a) or 6.3(b), it will, except where impracticable, (i) give reasonable advance notice to the Disclosing Party of such disclosure, (ii) use efforts to secure confidential treatment of such information at least as diligent as the Receiving Party would use to protect its own confidential information, but in no event less than reasonable efforts, and (iii) cooperate with any efforts by the Disclosing Party, at the Disclosing Party's request and expense, to secure confidential treatment of such Confidential Information.

4.4 Publication.

(a) By the Company.

(i) Subject to Section 6.4(a)(ii), BioAtla shall have the right to review and comment on any material proposed for disclosure or publication by the Company regarding results of the Company's development activities with respect to Products, whether by oral presentation, manuscript or abstract, but only to the extent (A) any such Product or the development, manufacture, use, sale or offer for sale thereof is covered by or uses or incorporates any BioAtla Licensed Technology or (B) any such material contains any BioAtla Licensed Know-How. Before any such material is submitted for publication or presentation of the same is made, the Company shall deliver a complete copy to BioAtla at least 60 days prior to submitting the material to a publisher or initiating any other disclosure. BioAtla shall review any such material and give its comments to the Company within 30 days of the receipt of such material. With respect to oral presentation materials and abstracts, BioAtla shall make reasonable efforts to expedite review of such materials and abstracts, and shall return such items as soon as practicable to the Company with appropriate comments, if any, but in no event later than 30 days from receipt. The Company shall comply with BioAtla's request to delete references to the Confidential Information of BioAtla in any such material and agrees to delay any submission for publication or other public disclosure for a period of up to an additional 60 days for the purpose of allowing preparation and filing of appropriate patent applications.

(ii) The Company and its Affiliates shall be free to publish, and to authorize their respective sublicensees to publish, the results of any clinical trial of any Product conducted by or on behalf of the Company, its Affiliate or any such sublicensee, without the prior review or approval of BioAtla.

(b) By BioAtla.

(i) Subject to Section 6.4(b)(ii), the Company shall have the right to review and comment on any material proposed for disclosure or publication by BioAtla regarding results of BioAtla's development activities with respect to BioAtla CAB Non-ACT Products, whether by oral presentation, manuscript or abstract, but only to the extent (A) any such BioAtla CAB Non-ACT Product or the development, manufacture, use, sale or offer for sale thereof is covered by or uses or incorporates any Company Licensed Technology or (B) any such material contains any Company Licensed Know-How. Before any such material is submitted for publication or presentation of the same is made, BioAtla shall deliver a complete copy to the Company at least 60 days prior to submitting the material to a publisher or initiating any other disclosure. the Company shall review any such material and give its comments to BioAtla within 30 days of the receipt of such material. With respect to oral presentation materials and abstracts, the Company shall make reasonable efforts to expedite review of such materials and abstracts, and shall return such items as soon as practicable to BioAtla with appropriate comments, if any, but in no event later than 30 days from receipt. BioAtla shall comply with the Company's request to delete references to the Confidential Information of the Company in any such material and agrees to delay any submission for publication or other public disclosure for a period of up to an additional 60 days for the purpose of allowing preparation and filing of appropriate patent applications.

(ii) BioAtla and its Affiliates shall be free to publish, and to authorize their respective sublicensees to publish, the results of any clinical trial of any BioAtla CAB Non-ACT Product conducted by or on behalf of BioAtla, its Affiliate or any such sublicensee, without the prior review or approval of the Company.

4.5 Public Announcements.

(a) **Additional Press Releases.** The parties acknowledge that each party may desire or be required to issue subsequent press releases relating to this Agreement. The parties agree to consult with each other reasonably and in good faith with respect to the text and timing of subsequent press releases prior to the issuance thereof, provided that a party may not withhold consent to such releases that the other party determines, based on advice of outside legal counsel, are necessary to comply with Applicable Law or the listing rules of any exchange on which the other party's or its Affiliate's securities are traded. In the event of a required public announcement or any public disclosure (including, without limitation, disclosure in any filing with the U.S. Securities and Exchange Commission) relating to this Agreement, the party required to make such announcement or proposing to make such public disclosure shall provide the other party with a copy of the proposed text of such announcement or disclosure sufficiently in advance of the scheduled release or disclosure to afford such other party a reasonable opportunity to review and comment upon the proposed text, or at a minimum as far in advance of the scheduled release or disclosure as is practicable under the circumstances, and such party shall comply with the other party's reasonable and timely comments thereto. Each party may: (i) make public statements regarding this Agreement in response to questions by the press, analysts, investors or those attending industry conferences or financial analyst calls, provided, in each case, that such party shall have consulted with the other party and the parties shall have mutually agreed to a written discussion guide or "talking points" memo in advance, and the responding party shall provide responses that are consistent with such guide or memo; or (ii) make public statements regarding this Agreement in reports to shareholders or to any exchange on which such party's or its Affiliate's securities are traded, or issue press releases; in each case, so long as the contents of any such public statement, report or press release are contained in a prior public disclosure or public statement approved by the other party pursuant to this Section 6.4(b) or permitted by Section 6.3 and do not reveal non-public information about the other party.

(b) **Filing of this Agreement.** The parties shall coordinate in advance with each other in connection with the filing of this Agreement (including redaction of certain provisions of this Agreement) with any securities authority or with any stock exchange on which securities issued by a party or its Affiliate are traded, and each party will use reasonable efforts to seek and obtain confidential treatment for the terms proposed to be redacted; provided that each party will ultimately retain control over what terms are disclosed to any securities authority or stock exchange, as the case may be, to the extent such party determines, on the advice of outside legal counsel, that disclosure is reasonably necessary to comply with Applicable Laws, including disclosure requirements of the U.S. Securities and Exchange Commission, or with the requirements of any stock exchange on which securities issued by a party or its Affiliates are traded; and provided further that the parties will use their reasonable efforts to file redacted versions with any governing bodies which are consistent with redacted versions previously filed with any other governing bodies.

5. INTELLECTUAL PROPERTY.

5.1 Ownership. Inventorship of inventions, whether or not patentable, shall be determined in accordance with U.S. patent laws. Each party shall promptly disclose to the other party in writing each Invention made in whole or in part by such party, and the parties, with the advice of each party's outside patent counsel, use commercially reasonable efforts and exercise good faith to determine the inventorship of each such Invention for purposes of U.S. patent laws. The Company shall solely own all Company Inventions. BioAtla shall solely own all BioAtla Inventions.

5.2 Patent Prosecution and Maintenance. For purposes of this Section, the terms "prosecution" and "maintenance" (including variations such as "prosecute" and "maintain") shall mean, with respect to a Patent Right, the preparing, filing, prosecution, maintenance and defense of such Patent Right, in the applicable jurisdiction, as well as re-examinations, reissues and requests for patent term extensions and the like with respect to such Patent Right, together with the conduct of interferences, the defense of oppositions and other similar proceedings with respect to a Patent Right.

(a) BioAtla Licensed Patents. BioAtla shall have the sole right, but not the obligation, to prosecute and maintain the BioAtla Licensed Patents, at its sole cost and expense.

(b) Company Licensed Patents. The Company shall have the sole right, but not the obligation, to prosecute and maintain the Company Licensed Patents, at its sole cost and expense.

(c) Joint Patents. The parties shall mutually agree, on a Joint Invention-by-Joint Invention basis, which of the parties will have the first right and responsibility to prepare, file, prosecute and maintain Joint Patents claiming a Joint Invention. The party with such first right and responsibility (the "**First Party**") shall use counsel reasonably acceptable to the other party, and, unless otherwise agreed by the parties in writing, the parties shall share equally the reasonable and documented expenses of preparing, filing, prosecuting and maintaining such Joint Patents. The First Party shall consult with the other party as to the preparation, filing, prosecution and maintenance of the Joint Patents reasonably prior to any deadline or action with any patent office, and shall furnish to the other party copies of all relevant drafts and documents reasonably in advance of such consultation. The First Party shall keep the other party reasonably informed of progress with regard to the preparation, filing, prosecution and maintenance of such Joint Patents, and shall provide to the other party copies of all material patent office submissions within a reasonable amount of time following submission thereof by such party. In the event that the First Party desires to abandon or cease prosecution or maintenance of any such Joint Patent, the First Party shall provide written notice to the other party of such intention to abandon promptly after the First Party makes such determination (which notice shall be given no later than 90 days (or for Hatch-Waxman actions, or the equivalent thereof, 30 days) prior to the next deadline for any action that must be taken with respect to such Joint Patent in the relevant patent office). In such case, the other party shall have the right, in its discretion, exercisable upon written notice to the first party delivered no later than 30 days after receipt of notice from the first party, to assume responsibility for prosecution and maintenance of such Joint Patent, at its sole cost and expense and by counsel of its own choice.

5.3 Cooperation of the Parties. Each party agrees to cooperate fully in the prosecution and maintenance of Patent Rights under Section and in the obtaining and maintenance of any patent extensions, supplementary protection certificates and the like with respect thereto. Such cooperation includes, but is not limited to: (a) executing all papers and instruments, or requiring its employees or contractors to execute such papers and instruments, so as to effectuate the joint ownership of Joint Inventions and Joint Patents set forth hereunder, and to enable the other party to apply for and to prosecute patent applications in any country as permitted hereunder; and (b) promptly informing the other party of any matters coming to such party's attention that may affect the preparation, filing, prosecution or maintenance of any such patent applications.

5.4 Infringement by Third Parties.

(a) Notice. In the event that either BioAtla or the Company becomes aware of any infringement or threatened infringement by a Third Party of any BioAtla Licensed Patent, Company Licensed Patent or Joint Patent, it shall notify the other party in writing to that effect.

(b) Enforcement.

(i) BioAtla Licensed Patents. BioAtla shall have the sole right to bring and enforce any action or proceeding with respect to infringement of any BioAtla Licensed Patent, at BioAtla's sole cost and expense.

(ii) Company Licensed Patents. The Company shall have the sole right to bring and enforce any action or proceeding with respect to infringement of any Company Licensed Patent, at the Company's sole cost and expense.

(iii) Joint Patents. The parties shall mutually agree on a case-by-case basis, (A) whether to bring any action or proceeding with respect to infringement of any Joint Patent by a Third Party, and (B) if the parties agree to bring such an action or proceeding, how to proceed against such Third Party, whether and to what extent the costs of such action or proceeding will be shared by the parties, and how any recovery realized as a result of such action or proceeding, whether by way of settlement or otherwise, will be allocated between the parties. The settlement or compromise of any such action or proceeding shall require the written approval of both parties, not to be unreasonably withheld.

(c) Cooperation. The party enforcing Patent Rights under this Section 7.4 may require the participation of the other party where necessary to bring any suit. Such other party shall provide reasonable assistance, including being joined as a party plaintiff if necessary, at the enforcing party's expense.

5.5 Infringement of Third Party Rights. Each party shall promptly notify the other party in writing of any allegation by a Third Party that the activity of either party or any of their respective Affiliates pursuant to this Agreement infringes or may infringe the intellectual property rights of a Third Party. BioAtla shall have the sole right to control any defense of any such claim involving alleged infringement of Third Party rights by activities of BioAtla or its Affiliates at its own expense and by counsel of its own choice, and the Company shall have the right, at its own expense, to be represented in any such action by counsel of its own choice. The Company shall have the sole right to control any defense of any such claim involving alleged infringement of Third Party rights by activities of the Company or its Affiliates at its own expense and by counsel of its own choice, and BioAtla shall have the right, at its own expense, to be represented in any such action by counsel of its own choice.

5.6 Consent to Settlement. Neither party shall enter into any settlement or compromise of any action or proceeding under this Article 7 which would in any manner alter, diminish, or be in derogation of the other party's rights under this Agreement without the prior written consent of the other party, which shall not be unreasonably withheld.

6. REPRESENTATIONS AND WARRANTIES; DISCLAIMER; LIMITATION OF LIABILITY.

6.1 Mutual Representations and Warranties. Each party represents and warrants to the other as of the Execution Date that:

(a) it is duly organized and validly existing under the laws of its jurisdiction of incorporation or formation, and has full corporate or other power and authority to enter into this Agreement and to carry out the provisions hereof;

(b) it is duly authorized to execute and deliver this Agreement and to perform its obligations hereunder, and the person or persons executing this Agreement on its behalf has been duly authorized to do so by all requisite corporate or partnership action;

(c) this Agreement is legally binding upon it, enforceable in accordance with its terms, and does not conflict with any agreement, instrument or understanding, oral or written, to which it is a party or by which it may be bound, nor violate any material law or regulation of any court, governmental body or administrative or other agency having jurisdiction over it; and

(d) neither it nor any of its Affiliates is debarred from the drug industry by any Regulatory Authority (*e.g.*, by the FDA pursuant to 21 U.S.C. §335a), and it has not received written notice or other communication from any regulatory authority threatening debarment of such party or any of its Affiliates.

6.2 BioAtla Representations and Warranties. BioAtla represents and warrants to the Company as of the Execution Date that:

(a) BioAtla has not granted to any of its Affiliates or any Third Party any license or other right with respect to CABs, CAB Components or the BioAtla Licensed Technology that conflicts with the Exclusive ACT License and rights granted to the Company herein, other than any such license or right that terminated prior to the Execution Date and is of no further force or effect;

(b) BioAtla is not a party to, and is not otherwise bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way BioAtla's right and ability (i) to grant the Exclusive ACT License on the terms and conditions set forth in this Agreement or (ii) to comply with any of BioAtla's obligations hereunder;

(c) it has not received written notice from any Third Party claiming that the manufacture, use, sale, offer for sale or import of CABs or CAB Components thereof infringes or would infringe the patent or other intellectual property rights of any Third Party; and

(d) there are no claims, judgments or settlements against or owed by BioAtla or any of its Affiliates with respect to the BioAtla Licensed Technology, and neither BioAtla nor any of its Affiliates is a party to any legal action, suit or proceeding relating to the BioAtla Licensed Technology, nor has BioAtla or any of its Affiliates received any written communication from any Third Party threatening such action, suit or proceeding.

6.3 Mutual Covenants. Each party covenants to the other party as follows:

(a) neither such party nor any of its Affiliates will employ or use the services of any Person that has been disqualified by a regulatory authority from conducting clinical testing of new drugs (*e.g.*, by the FDA pursuant to 21 C.F.R. Part 312.70) or debarred by a regulatory authority from the drug industry (*e.g.*, by the FDA pursuant to 21 U.S.C. §335a), in connection with any development activities within the scope of this Agreement; and if a party becomes aware of the debarment or disqualification or threatened debarment or disqualification of any Person providing services to such party or any of its Affiliates in connection with any development activities within the scope of this Agreement, such party shall immediately notify the other party in writing, and such party shall cease, or cause its Affiliate to cease (as applicable), employing, contracting with, or retaining any such Person to perform any services in connection with such development activities);

(b) neither such party nor any of its Affiliates will, in connection with the exercise of its rights or performance of its obligations under this Agreement, directly or indirectly through Third Parties, pay, promise or offer to pay, or authorize the payment of, any money or give any promise or offer to give, or authorize the giving of anything of value to a public official or entity for the purpose of obtaining or retaining business for or with, or directing business to, any Person, including such party and its Affiliates, nor will such party or any of its Affiliates directly or indirectly promise, offer or provide any corrupt payment, gratuity, emolument, bribe, kickback, illicit gift or hospitality or other illegal or unethical benefit to a public official or entity or other Person or otherwise violate any Anti-Corruption Laws in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement;

(c) neither such party nor any of its Affiliates (or any of their respective employees and contractors), in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement, shall cause the other party to be in violation of Anti-Corruption Laws or Export Control Laws; and

(d) such party shall immediately notify the other party if such party has any information or suspicion that there may be a violation of Anti-Corruption Laws or Export Control Laws in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement.

6.4 BioAtla Covenants. In addition to any covenants made by BioAtla elsewhere in this Agreement, BioAtla hereby covenants to the Company that, during the Term:

(a) BioAtla will not grant any of its Affiliates or any Third Party any license or other right with respect to any BioAtla Licensed Technology that conflicts with the Exclusive ACT License and rights granted to the Company herein; and

(b) BioAtla will not become a party to, or otherwise become bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way BioAtla's right and ability to comply with any of BioAtla's obligations under Article 3 or Article 4 hereof.

6.5 Company Covenants. In addition to any covenants made by the Company elsewhere in this Agreement, the Company hereby covenants to BioAtla that, during the Term:

(a) the Company will not grant any of its Affiliates or any Third Party any license or other right with respect to any Company Licensed Technology that conflicts with the Exclusive Non-ACT License and rights granted to BioAtla herein; and

(b) the Company will not become a party to, or otherwise become bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way the Company's right and ability to comply with any of the Company's obligations under Article 3 hereof.

6.6 Disclaimer. Except as expressly set forth in this Agreement, EACH PARTY EXPRESSLY DISCLAIMS ANY AND ALL WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE WARRANTIES OF DESIGN, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, VALIDITY OF PATENTS, NON-INFRINGEMENT OF THE INTELLECTUAL PROPERTY RIGHTS OF THIRD PARTIES, OR ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICES; IN EACH CASE, ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT OR ANY OF THE SUBLICENSE AGREEMENTS.

6.7 Limitation of Liability. EXCEPT FOR LIABILITY FOR BREACH OF ARTICLE 6, NEITHER PARTY SHALL BE ENTITLED TO RECOVER FROM THE OTHER PARTY ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL OR PUNITIVE DAMAGES IN CONNECTION WITH THIS AGREEMENT OR ANY LICENSE GRANTED HEREUNDER; *provided, however,* that this Section 8.7 shall not be construed to limit either party's indemnification obligations under Article 10.

7. TERM AND TERMINATION.

7.1 Term. The term of this Agreement (the "**Term**") shall begin on the Execution Date and, unless earlier terminated in accordance with this Article 9, shall continue in existence for so long as the Company or any of its Affiliates, licensees or sublicensees is developing or commercializing any Product in the ACT Field or BioAtla or any of its Affiliates, licensees or sublicensees is developing or commercializing any BioAtla CAB Non-ACT Product in the CAB Non-ACT Field.

7.2 Termination. This Agreement may be terminated only by mutual written agreement of the parties. In the event the parties terminate this Agreement by mutual written agreement, the parties shall also mutually agree in writing upon the consequences of such termination and the parties' respective surviving rights and obligations hereunder.

7.3 Consequences of Expiration; Accrued Obligations; Survival. Upon expiration of this Agreement in accordance with Section 9.1, the Exclusive ACT License and Exclusive Non-ACT License shall survive on a non-exclusive, fully-paid, royalty-free, irrevocable, perpetual basis. Expiration of this Agreement shall not relieve either party of any obligation or liability accruing prior to such expiration, nor shall such expiration preclude either party from pursuing all rights and remedies it may have under this Agreement, at law or in equity, with respect to breach of this Agreement. In addition, the parties' rights and obligations under Sections 5.2, 5.3, 5.4, 5.5, 6.1, 6.2, 6.3, 8.6, 8.7 and 9.3 and Articles 10, 11 and 12 of this Agreement shall survive expiration of this Agreement.

8. INDEMNIFICATION.

8.1 Indemnification by the Company. The Company hereby agrees to save, defend, indemnify and hold harmless BioAtla, its Affiliates, its and their respective officers, directors, agents, employees, successors and assigns (the "**BioAtla Indemnitees**"), from and against any and all losses, damages, liabilities, expenses and costs, including reasonable legal expense and attorneys' fees ("**Losses**"), to which any BioAtla Indemnitee may become subject as a result of any claim, demand, action or other proceeding by any Third Party (each, a "**Claim**") to the extent such Losses arise out of or relate to: (a) the development, manufacture, use, handling, storage, sale, offer for sale, import or other disposition by or on behalf of the Company, its Affiliates, licensees or sublicensees of Products, or any other exercise of the Exclusive ACT License by or on behalf of the Company, its Affiliates or sublicensees; (b) the gross negligence or willful misconduct of any Company Indemnitee (defined below); or (c) the breach by the Company of any warranty, representation, covenant or agreement made by the Company in this Agreement; except, in each case, to the extent such Losses result from the gross negligence or willful misconduct of any BioAtla Indemnitee or the breach by BioAtla of any warranty, representation, covenant or agreement made by BioAtla in this Agreement.

8.2 Indemnification by BioAtla. BioAtla hereby agrees to save, defend, indemnify and hold harmless the Company, its Affiliates and their respective officers, directors, employees, consultants and agents (the "**Company Indemnitees**") from and against any and all Losses to which any Company Indemnitee may become subject as a result of any claim, demand, action or other proceeding by any Third Party to the extent such Losses arise out of or relate to: (a) the development, manufacture, use, handling, storage, sale, offer for sale, import or other disposition by or on behalf of BioAtla, its Affiliates, licensees or sublicensees of BioAtla CAB Non-ACT Products, or any other exercise of the Exclusive Non-ACT License by or on behalf of BioAtla, its Affiliates, licensees or sublicensees; (b) the gross negligence or willful misconduct of any BioAtla Indemnitee; or (c) the breach by BioAtla of any warranty, representation, covenant or agreement made by BioAtla in this Agreement; in each case except to the extent such Losses result from the gross negligence or willful misconduct of any Company Indemnitee or the breach by the Company of any warranty, representation, covenant or agreement made by the Company in this Agreement.

8.3 Control of Defense. In the event a party (the **“Indemnified Party”**) seeks indemnification under Section 10.1 or 10.2, it shall inform the other party (the **“Indemnifying Party”**) of a claim as soon as reasonably practicable after it receives notice of the claim (it being understood and agreed, however, that the failure by an Indemnified Party to give notice of a claim as provided in this Section 10.3 shall not relieve the Indemnifying Party of its indemnification obligation under this Agreement except and only to the extent that such Indemnifying Party is actually damaged as a result of such failure to give notice), shall permit the Indemnifying Party to assume direction and control of the defense of the claim (including the right to settle the claim solely for monetary consideration) using counsel reasonably satisfactory to the Indemnified Party, and shall cooperate as requested (at the expense of the Indemnifying Party) in the defense of the claim. If the Indemnifying Party does not assume control of such defense within 15 days after receiving notice of the claim from the Indemnified Party, the Indemnified Party shall control such defense and, without limiting the Indemnifying Party’s indemnification obligations, the Indemnifying Party shall reimburse the Indemnified Party for all costs, including reasonable attorney fees, incurred by the Indemnified Party in defending itself within 30 days after receipt of any invoice therefor from the Indemnified Party. The party not controlling such defense may participate therein at its own expense. The party controlling such defense shall keep the other party advised of the status of such action, suit, proceeding or claim and the defense thereof and shall consider recommendations made by the other party with respect thereto. The Indemnified Party shall not agree to any settlement of such action, suit, proceeding or claim without the prior written consent of the Indemnifying Party, which shall not be unreasonably withheld, delayed or conditioned. The Indemnifying Party shall not agree to any settlement of such action, suit, proceeding or claim or consent to any judgment in respect thereof that does not include a complete and unconditional release of the Indemnified Party from all liability with respect thereto, that imposes any liability or obligation on the Indemnified Party or that acknowledges fault by the Indemnified Party without the prior written consent of the Indemnified Party. If the parties cannot agree as to the application of Section 10.1 or 10.2 to any claim, pending resolution of the dispute pursuant to Article 11, the parties may conduct separate defenses of such claims, with each party retaining the right to claim indemnification from the other party in accordance with Section 10.1 or 10.2, as applicable, upon resolution of the underlying claim.

8.4 Insurance. Each party shall procure and maintain insurance, including comprehensive or commercial general liability insurance (including contractual liability and product liability), adequate to cover its obligations hereunder and which is consistent with normal business practices of prudent companies similarly situated. It is understood that such insurance shall not be construed to create a limit of either party’s liability with respect to its indemnification obligations under this Article 10 or otherwise. Each party shall provide the other party with written evidence of such insurance upon request.

9. DISPUTE RESOLUTION.

9.1 Disputes. Subject to Section 11.3, any claim, dispute, or controversy as to the breach, enforcement, interpretation or validity of this Agreement (each, a **“Dispute”**) will be referred to the Chief Executive Officer of the Company and the Chief Executive Officer of BioAtla (the **“Executives”**) for attempted resolution. In the event such Executives are unable to resolve such Dispute within 30 days of such Dispute being referred to them, then, upon the written request of either party to the other party, the Dispute shall be subject to arbitration in accordance with Section 11.2, except as expressly set forth in Section 11.3.

9.2 Arbitration.

(a) Claims. Subject to Section 11.3 below, any Dispute that is not resolved under Section 11.1 within the applicable 30-day period shall be resolved by final and binding arbitration administered by JAMS (the “**Administrator**”) in accordance with its then-effective Comprehensive Arbitration Rules and Procedures (the “**Rules**”), except to the extent any such Rule conflicts with the express provisions of this Section 11.2. (Capitalized terms used but not otherwise defined in this Agreement shall have the meanings provided in the Rules.) The Arbitration shall be conducted by three neutral arbitrators, each of whom shall be a lawyer with at least 15 years of experience with a law firm or corporate law department of over 25 lawyers and at least 10 years representing (either as outside counsel or in-house counsel) companies in the pharmaceutical or biotechnology industry in connection with licensing transactions, provided that no such individual shall be a current or former employee or director, or a current stockholder, of either party or any of their respective Affiliates. Each party shall appoint one arbitrator, and the two so-appointed arbitrators shall jointly nominate the third arbitrator who shall become the chairman. If such nomination of the chairman does not take place within 30 days from the nomination of the last co-arbitrator, the chairman shall be selected in accordance with the Rules. The arbitration and all associated discovery proceedings and communications shall be conducted in English, and the arbitration shall be held in New York, New York, USA.

(b) Discovery. Within 30 days after selection of the third arbitrator, the arbitrators shall conduct the Preliminary Conference. In addressing any of the subjects within the scope of the Preliminary Conference, the arbitrators shall take into account both the desirability of making discovery efficient and cost-effective and the needs of the parties for an understanding of any legitimate issue raised in the Arbitration. In that regard, the parties agree to the application of the E-Discovery procedures set forth in Rule 16.2(c) of the JAMS Expedited Procedures. In addition, each party shall have the right to take up to 40 hours of deposition testimony, including expert deposition testimony.

(c) Hearing; Decision. The Hearing shall commence within 60 days after the discovery cutoff. The arbitrators shall require that each party submit concise written statements of position and shall permit the submission of rebuttal statements, subject to reasonable limitations on the length of such statements to be established by the arbitrators. The Hearing shall be no longer than 5 Business Days in duration. The arbitrators shall also permit the submission of expert reports. The arbitrators shall render the Award within 30 days after the arbitrators declares the Hearing closed, and the Award shall include a written statement describing the essential findings and conclusions on which the Award is based, including the calculation of any damages awarded. The arbitrators will, in rendering their decision, apply the substantive law of the State of California, USA, without giving effect to its principles of conflicts of law. The arbitrators’ authority to award special, incidental, consequential or punitive damages shall be subject to the limitation set forth in Section 8.7. The Award rendered by the arbitrators shall be final, binding and non-appealable, and judgment may be entered upon it in any court of competent jurisdiction.

(d) Costs. Each party shall bear its own attorney’s fees, costs, and disbursements arising out of the arbitration, and shall pay an equal share of the fees and costs of the arbitrator.

9.3 Court Actions. Nothing contained in this Agreement shall deny either party the right to seek injunctive or other equitable relief from a court of competent jurisdiction in the context of a *bona fide* emergency or prospective irreparable harm, and such an action may be filed and maintained notwithstanding any ongoing discussions between the parties or any ongoing arbitration proceeding. In addition, either party may bring an action in any court of competent jurisdiction to resolve disputes pertaining to the validity, construction, scope, enforceability, infringement or other violations of Patent Rights or other intellectual property rights, and no such claim shall be subject to arbitration pursuant to Section 11.2.

10. MISCELLANEOUS.

10.1 Rights Upon Bankruptcy. All rights and licenses granted under or pursuant to this Agreement are, and shall otherwise be deemed to be, for purposes of Section 365(n) of Title 11 of the United States Code and other similar laws in any jurisdiction outside the US (collectively, the “**Bankruptcy Laws**”), licenses of rights to be “intellectual property” as defined under the Bankruptcy Laws. If a case is commenced during the Term by or against a party under Bankruptcy Laws then, unless and until this Agreement is rejected as provided in such Bankruptcy Laws, such party (in any capacity, including debtor-in-possession) and its successors and assigns (including a trustee) shall perform all of the obligations provided in this Agreement to be performed by such party. If a case is commenced during the Term by or against a party under the Bankruptcy Laws, this Agreement is rejected as provided in the Bankruptcy Laws and the other party elects to retain its rights hereunder as provided in the Bankruptcy Laws, then the party subject to such case under the Bankruptcy Laws (in any capacity, including debtor-in-possession) and its successors and assigns (including a Title 11 trustee), shall provide to the other party copies of all Information necessary for such other party to prosecute, maintain and enjoy its rights under the terms of this Agreement promptly upon such other party’s written request therefor. All rights, powers and remedies of the non-bankrupt party as provided herein are in addition to and not in substitution for any and all other rights, powers and remedies now or hereafter existing at law or in equity (including the Bankruptcy Laws) in the event of the commencement of a case by or against a party under the Bankruptcy Laws.

10.2 Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of California, USA, excluding its conflicts of laws principles.

10.3 Entire Agreement; Amendments. This Agreement (including the Exhibits hereto), together with the Confidentiality Agreement, is both a final expression of the parties’ agreement and a complete and exclusive statement with respect to all of its terms. This Agreement supersedes all prior and contemporaneous agreements and communications, whether oral, written or otherwise, concerning any and all matters contained herein. This Agreement may be amended, or any term hereof modified, only by a written instrument duly executed by authorized representatives of both parties hereto.

10.4 Non-Waiver. The failure of a party to insist upon strict performance of any provision of this Agreement or to exercise any right arising out of this Agreement shall neither impair that provision or right nor constitute a waiver of that provision or right, in whole or in part, in that instance or in any other instance. Any waiver by a party of a particular provision or right shall be in writing, shall be as to a particular matter and, if applicable, for a particular period of time and shall be signed by such party.

10.5 Assignment. Except as expressly provided hereunder, neither this Agreement nor any rights or obligations hereunder may be assigned or otherwise transferred by either party without the prior written consent of the other party (which consent shall not be unreasonably withheld); *provided, however*, that, either party may assign this Agreement and its rights and obligations hereunder without the other party's consent:

(a) in connection with the transfer or sale of all or substantially all of the business of such party to which this Agreement relates to a Third Party ("**Third Party Acquirer**"), whether by merger, sale of stock, sale of assets or otherwise (each, a "**Sale Transaction**"), provided that in the event of a Sale Transaction (whether this Agreement is actually assigned or is assumed by the Third Party Acquirer or the surviving corporation resulting from such Sale Transaction by operation of law (*e.g.*, in the context of a reverse triangular merger)), intellectual property rights of the Third Party Acquirer that existed prior to the Sale Transaction shall not be included in the technology licensed hereunder or otherwise subject to this Agreement; or

(b) to an Affiliate, provided that the assigning party shall remain liable and responsible to the non-assigning party hereto for the performance and observance of all such duties and obligations by such Affiliate.

The rights and obligations of the parties under this Agreement shall be binding upon and inure to the benefit of the successors and permitted assigns of the parties, and the name of a party appearing herein will be deemed to include the name of such party's successors and permitted assigns to the extent necessary to carry out the intent of this section. Any assignment not in accordance with this Agreement shall be void.

10.6 Force Majeure. Each party shall be excused from liability for the failure or delay in performance of any obligation under this Agreement by reason of any event beyond such party's reasonable control, including but not limited to Acts of God, fire, flood, explosion, earthquake, or other natural forces, war, civil unrest, acts of terrorism, accident, destruction or other casualty, any lack or failure of transportation facilities, any lack or failure of supply of raw materials, any strike or labor disturbance, or any other event similar to those enumerated above. Such excuse from liability shall be effective only to the extent and duration of the event(s) causing the failure or delay in performance and provided that the party has not caused such event(s) to occur. The affected party shall notify the other party of such force majeure circumstances as soon as reasonably practical, and shall promptly undertake all reasonable efforts necessary to cure such force majeure circumstances.

10.7 Severability. If any one or more of the provisions contained in this Agreement is held invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions contained herein shall not in any way be affected or impaired thereby, unless the absence of the invalidated provision(s) adversely affects the substantive rights of the parties. The parties shall in such an instance use their best efforts to replace the invalid, illegal or unenforceable provision(s) with valid, legal and enforceable provision(s) which, insofar as practical, implement the purposes of this Agreement.

10.8 Notices. Any notice to be given under this Agreement must be in writing and delivered either in person, by any method of mail (postage prepaid), or by internationally-recognized express courier or facsimile, to the party to be notified at its address(es) given below, or at any address such party has previously designated by prior written notice to the other. Notice shall be deemed sufficiently given for all purposes upon the earliest of: (a) the date of actual receipt; (b) if mailed, three (3) days after the date of postmark; (c) if delivered by express courier, the next Business Day the express courier regularly makes deliveries; (d) if delivered by email, upon the date upon which the receipt of such email is confirmed by return email or other written or electronic confirmation; or (e) if delivered by facsimile, upon confirmation of successful transmission.

10.9 Relationship between the Parties. The parties' relationship, as established by this Agreement, is solely that of independent contractors. This Agreement does not create any partnership, joint venture or similar business relationship between the parties. Neither party is a legal representative of the other party, and neither party may assume or create any obligation, representation, warranty or guarantee, express or implied, on behalf of the other party for any purpose whatsoever.

10.10 No Third Party Rights. The provisions of this Agreement are for the exclusive benefit of the parties, and no other person or entity shall have any right or claim against either party by reason of these provisions or be entitled to enforce any of these provisions against either party.

10.11 Interpretation. The headings of clauses contained in this Agreement preceding the text of the sections, subsections and paragraphs hereof are inserted solely for convenience and ease of reference only and shall not constitute any part of this Agreement, or have any effect on its interpretation or construction. All references in this Agreement to the singular shall include the plural where applicable. The term "including" or "includes" as used in this Agreement means including, without limiting the generality of any description preceding such term, and the word "or" has the inclusive meaning represented by the phrase "and/or." Unless otherwise specified, references in this Agreement to any section shall include all subsections and paragraphs in such Section and references in this Agreement to any subsection shall include all paragraphs in such subsection. All references to days in this Agreement shall mean calendar days, unless otherwise specified. Ambiguities and uncertainties in this Agreement, if any, shall not be interpreted against either party, irrespective of which party may be deemed to have caused the ambiguity or uncertainty to exist. This Agreement has been prepared in the English language, and the English language shall

control its interpretation. In addition, all notices required or permitted to be given hereunder, and all written, electronic, oral or other communications between the parties regarding this Agreement shall be in the English language. In the event of any inconsistency or conflict between the English version of this Agreement and any translation of this Agreement into any other language, the English version shall control.

10.12 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original document, and all of which, together with this writing, shall be deemed one instrument. This Agreement may be executed by facsimile or PDF signatures, which signatures shall have the same force and effect as original signatures.

FIRST AMENDMENT TO EXCLUSIVE LICENSE AGREEMENT

This First Amendment to Exclusive License Agreement (this “**Amendment**”) is dated as of July 7, 2020 (the “**Amendment Effective Date**”) by and between BioAtla Holdings LLC, a Delaware limited liability company (the “**Company**”) and BioAtla, LLC, a Delaware limited liability company (“**BioAtla**”). Capitalized terms used but not otherwise defined herein shall have the meanings ascribed to such terms in the Exclusive License Agreement by and between the Company and BioAtla effective as of March 15, 2019 (the “**Agreement**”).

Background

The parties desire to amend the Agreement as described more fully herein to provide BioAtla with an option as provided below.

Terms

NOW, THEREFORE, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the Parties hereto, intending to be legally bound, hereby agree as follows:

1. **Amendment to Agreement.** New Section 2.10 is hereby added as an amendment to the Agreement: “Option Grant. Subject to this Section 2.10, the Company hereby grants to BioAtla the exclusive option (the “**Option**”), exercisable at any time during the period commencing on July 7, 2020 and ending on July 7, 2030 (the “**Option Term**”), to acquire the sole and exclusive rights solely to develop, make, have made, use, sell, have sold, offer for sale and import ACT Preparations and ACT Treatments in the Field in the Territory (other than the People’s Republic of China, Hong Kong, Taiwan and Macau) (such sole and exclusive rights, the “**Rights**”) with all provisions of the Agreement applying, *mutatis mutandis*, provided that (a) all references to the Company and BioAtla shall be switched and (b) the royalty rate referred to in Section 3.1 shall be [***]. During the Option Term, BioAtla shall have the right, but not the obligation, to exercise the Option in its sole discretion by delivering written notice of such exercise (the “**Option Exercise Notice**”) to the Company. Within ten (10) Business Days following the Option Exercise Notice delivery, the Company and BioAtla shall negotiate and enter into a definitive license agreement as contemplated by this Section 2.10. The Company hereby represents and warrants to BioAtla that, as of July 7, 2020, the Company has not directly or indirectly

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

licensed, assigned or otherwise transferred any of the Rights to any person (other than to BioAtla pursuant to this Section 2.10). The Company hereby covenants and agrees with BioAtla that, during the Option Term, the Company shall not directly or indirectly license, assign or otherwise transfer any of the Rights to any person (other than to BioAtla pursuant to this Section 2.10).”

2. Miscellaneous. The Parties hereby confirm and agree that, except as amended hereby, the Agreement remains in full force and effect and is a binding obligation of the Parties hereto. This Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

This Amendment is executed by the authorized representatives of the parties as of the date first written above.

AMENDED AND RESTATED EXCLUSIVE LICENSE AGREEMENT

F1 Oncology, Inc. and BioAtla, LLC

THIS AMENDED AND RESTATED EXCLUSIVE LICENSE AGREEMENT (“*Exclusive Agreement*”) is entered into as of November 22, 2019 (the “*2019 Execution Date*”), by and between F1 ONCOLOGY, INC., a Delaware corporation, having an address of 625 S. Flagler Drive, Suite 625, West Palm Beach, Florida 33401, USA (the “*Company*”), and BIOATLA, LLC, a Delaware limited liability company, having an address of 11085 Torreyana Road, San Diego, California 92121, USA (“*BioAtla*”).

RECITALS

WHEREAS, BioAtla has developed, and possesses intellectual property rights in and to, its proprietary Conditionally Active Biologics platform for the design and engineering of therapeutic monoclonal antibodies and other therapeutic proteins for selective conditional activation under specific microphysical conditions (the “*BioAtla CAB Platform*”), including CAB antibody components, and related proprietary technologies for the discovery and development of CAB therapeutic antibodies and proteins, and components thereof;

WHEREAS, the Company has developed, and possesses intellectual property rights in and to proprietary technologies for the discovery and development of Chimeric Antigen Receptor (“*CAR*”) T-cell (“*CAR-T*”) therapies and other Adoptive Cellular Therapies (defined below), including the Company’s proprietary gene transfer systems for CAR vector components that comprise membrane spanning regions, T-cell stimulator, propagation and regulatory components;

WHEREAS, BioAtla and Company are parties to an Exclusive License Agreement dated May 18, 2016 (the “*2016 Agreement*”), as amended by that certain First Amendment to Exclusive License Agreement dated July 28, 2016 (the “*First Amendment*”), and that certain Second Amendment to License Agreement dated November 29, 2017 (the “*Second Amendment*”; and the 2016 Agreement, as amended by the First Amendment and the Second Amendment, collectively, the “*Original Agreement*”); and

WHEREAS, the parties wish to amend and restate the Original Agreement, effective as of the Restatement Date, to, among other things, limit the scope of the exclusive license granted to Company.

AGREEMENT

NOW, THEREFORE, in consideration of the foregoing premises and the mutual covenants set forth below, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

1. DEFINITIONS.

1.1 “*ACT*” or “*Adoptive Cellular Therapy*” shall mean an immunotherapy in which (a) genetically modified lymphocytes are administered to a patient or (b) targeted gene therapy vectors that modify lymphocytes are administered to a patient. Adoptive Cellular Therapies include, but are not limited to, CAR-T therapies.

1.2 “ACT Field” shall mean [***].

1.3 “Affiliate” shall mean, with respect to an Entity, any other Entity that controls, is controlled by, or is under common control with such Entity, for as long as such control exists. As used in this Section 1.3, “control” shall mean direct or indirect beneficial ownership of more than 50% of the outstanding stock or other voting rights entitled to elect directors of voting share capital in an Entity. Notwithstanding the foregoing, for purposes of this Agreement, and regardless of the foregoing definition of “control”: (a) BioAtla and Company shall be deemed not to be Affiliates of each other; and (b) BioAtla HK shall be considered an Affiliate of BioAtla.

1.4 “Anti-Corruption Laws” means the U.S. Foreign Corrupt Practices Act, as amended, the Organization for Economic Co-operation and Development (OECD) Convention on combating bribery of foreign public officials in international business transactions, and any other comparable anti-corruption laws of any country or organization or nations within whose jurisdiction either party or any of its Affiliates operates or does business.

1.5 “Applicable Laws” shall mean the applicable provisions of any and all national, supranational, regional, state and local laws, treaties, statutes, rules, regulations, administrative codes, guidances, ordinances, judgments, decrees, directives, injunctions, orders, permits of or from any court, arbitrator, regulatory authority or governmental agency or authority having jurisdiction over or related to the subject item, including Anti-Corruption Laws and Export Control Laws.

1.6 “Assert” shall mean to commence or prosecute patent infringement Litigation, or to make an express, specific written threat (such as, without limitation, a cease and desist demand letter) to commence or prosecute patent infringement Litigation.

1.7 “BioAtla CAB” shall mean a CAB developed or identified by or on behalf of BioAtla or any of its Affiliates as of the Restatement Date using the BioAtla CAB Platform, whether before or during the Term.

1.8 “BioAtla CAB Component” shall mean a CAB Component of a BioAtla CAB.

1.9 “BioAtla CAB Deliverables” shall mean, for a particular CAB, heavy and light chain amino acid sequences derived from such CAB and other information and/or material as mutually agreed.

1.10 “BioAtla CAB Non-ACT Product” shall mean a CAB Non-ACT Product Directed to any Licensed Target and containing or comprising a BioAtla CAB or a BioAtla CAB Component.

1.11 “BioAtla HK” shall mean BioAtla Hong Kong Limited, a company organized under the laws of Hong Kong, 51% of the outstanding voting securities of which are owned by BioAtla.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

1.12 “BioAtla Invention” shall mean any invention, whether or not patentable, made solely by one or more employees, consultants or contractors of BioAtla or its Affiliates in the course and as a result of the performance of the activities contemplated by Article 4 of the 2016 Agreement.

1.13 “BioAtla Licensed Know-How” shall mean: all Information Controlled by BioAtla or any of its Affiliates during the Collaboration Period that is necessary or useful for the identification, development, manufacture, or commercialization of CAB ACT Preparations or CAB ACT Treatments, only to extent that such Information is related to a CAB Directed to any Licensed Target, including Results and BioAtla Inventions but, excluding BioAtla’s and its Affiliates’ interest in Joint Inventions.

1.14 “BioAtla Licensed Patents” shall mean all Patent Rights Controlled by BioAtla or any of its Affiliates that cover or claim any invention (including any BioAtla Invention but excluding any Joint Invention) Controlled by BioAtla during the Collaboration Period and that are necessary or useful for the development, manufacture, or commercialization of CAB ACT Preparations or CAB ACT Treatments; except in the case of any such Patent Right that is first filed or issued after the Collaboration Period, to the extent the claims of such Patent Right include any invention that first came within the Control of BioAtla only after the Collaboration Period. The BioAtla Licensed Patents existing as of the 2019 Execution Date include the patents and patent applications listed in **Exhibit A** hereto. For clarity, BioAtla Licensed Patents exclude BioAtla’s and its Affiliates’ interest in Joint Patents.

1.15 “BioAtla Licensed Technology” shall mean BioAtla Licensed Patents and BioAtla Licensed Know-How.

1.16 “BioAtla Non-Assert Patent” shall mean any Patent Right (excluding any BioAtla Licensed Patent) Controlled by BioAtla or any of its Affiliates during the Term that (a) claims any invention made solely by one or more employees, consultants or contractors of BioAtla after the Collaboration Period in the course and as a result of using or practicing Company Licensed Technology, or (b) covers or claims the manufacture, use, sale, offer for sale or import of any CAB ACT Preparation or CAB ACT Treatment in the F1 Act Field that, in each case, is Directed to any Licensed Target.

1.17 “CAB” shall mean a conditionally active biologic therapeutic molecule (which may, but need not, be a monoclonal antibody) designed or developed for selective conditional activation under specific microphysical conditions. For clarity, except as otherwise expressly specified in a particular context, the term “CAB” refers to a molecule described in the preceding sentence that is not in an ACT format.

1.18 “CAB ACT Preparation” shall mean, solely with respect to the Licensed Targets, a CAB or CAB Component that, in each case, is in any ACT format.

1.19 “CAB ACT Treatment” shall mean an immunotherapy in which (a) lymphocytes are genetically modified by *ex vivo* exposure to a CAB ACT Preparation and administered to a patient or (b) a CAB ACT Preparation that genetically modifies lymphocytes is administered to a patient.

1.20 “CAB Component” shall mean, solely with respect to the Licensed Targets, any variant, fragment, modification or derivative of a CAB, including, by way of example and not limitation, the heavy and light chain amino acid sequences derived from a CAB antibody. For clarity, except as otherwise expressly specified in a particular context, the term “CAB Component” refers to a CAB variant, fragment, modification or derivative that is *not* in an ACT format.

1.21 “CAB Non-ACT Field” shall mean [***].

1.22 “CAB Non-ACT Product” shall mean a composition or preparation containing or comprising one or more CABs and/or CAB Components; but excluding, in any event, any CAB ACT Preparation or CAB ACT Treatment.

1.23 “CAR” shall have the meaning provided in the Recitals to this Agreement.

1.24 “CAR-T” shall have the meaning provided in the Recitals to this Agreement.

1.25 “Collaboration Period” shall mean the period beginning on the Effective Date and expiring on the day that is 45 days after the Restatement Date.

1.26 “Company Invention” shall mean any invention, whether or not patentable, made solely by one or more employees, consultants or contractors of the Company (other than by BioAtla pursuant to Article 4 of the 2016 Agreement) or EXUMA SEZC or any of their respective Affiliates during the Collaboration Period in the course and as a result of using or practicing BioAtla Licensed Technology that is necessary or useful for the development, manufacture, or commercialization of BioAtla CAB Non-ACT Products.

1.27 “Company Licensed Know-How” shall mean all Information generated or developed by or on behalf of the Company (other than by BioAtla pursuant to Article 4 of the 2016 Agreement) or EXUMA SEZC or any of their respective Affiliates during the Collaboration Period in the course and as a result of using or practicing BioAtla Licensed Technology that is necessary or useful for the development, manufacture, or commercialization of BioAtla CAB Non-ACT Products, including Company Inventions but excluding Company’s interest in Joint Inventions.

1.28 “Company Licensed Patents” shall mean all Patent Rights Controlled by the Company or EXUMA SEZC or any of their respective Affiliates during the Term covering or claiming any Company Invention; except, in the case of any such Patent Right that is first filed or issued after the Collaboration Period, to the extent the claims of such Patent Right include any invention that first came within the Control of the Company only after the Collaboration Period. For clarity, Company Licensed Patents exclude the Company’s interest in Joint Patents.

1.29 “Company Licensed Technology” shall mean Company Licensed Patents and Company Licensed Know-How.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

1.30 “Company Non-Assert Patent” shall mean any Patent Right (excluding any Company Licensed Patent) Controlled by the Company or EXUMA SEZC or any of their respective Affiliates during the Term that claims any invention made solely by one or more employees, consultants or contractors of the Company or EXUMA SEZC or any of their respective Affiliates during the Term in the course and as a result of using or practicing BioAtla Licensed Technology, solely and only to the extent such Patent Right relates to the manufacture, use, sale, offer for sale or import of any CAB or CAB Component in the CAB Non-ACT Field, and, in each case, solely to the extent such CAB or CAB Component is Directed to any Target other than any Licensed Target.

1.31 “Confidential Information” shall have the meaning provided in Section 4.1.

1.32 “Confidentiality Agreement” shall mean the Confidential Disclosure Agreement between the parties dated December 16, 2015.

1.33 “Control” or “Controlled by” shall mean, with respect to any Patent Rights, Information or other intellectual property rights, the possession by a party of the ability (whether by ownership, license or other right, other than pursuant to a license granted to such party by the other party under this Agreement) to grant access to, or a license or sublicense of, such Patent Rights, Information or other intellectual property rights without violating the terms of any agreement or other arrangement with any Third Party.

1.34 “Directed” means, with respect to a biologic and a Target, that such biologic derives recognized therapeutic value from binding or modulating such Target.

1.35 “Effective Date” shall mean July 28, 2016.

1.36 “Entity” shall mean any company, corporation, limited liability company, partnership, joint venture, firm, trust or other business entity.

1.37 “Exclusive ACT License” shall have the meaning provided in Section 2.1.

1.38 “Exclusive Non-ACT License” shall have the meaning provided in Section 2.2.

1.39 “Execution Date” shall mean May 18, 2016.

1.40 “Export Control Laws” shall mean: (a) all applicable U.S. export control laws, including the Arms Export Controls Act (22 U.S.C. Ch. 39), the International Emergency Economic Powers Act (50 U.S.C. §§ 1701 et seq.), the Trading With the Enemy Act (50 U.S.C. app. §§ 1 et seq.), the Export Administration Act of 1979 (50 U.S.C. app. §§ 2401 et seq.), International Boycott Provisions of Section 999 of the U.S. Internal Revenue Code of 1986, and all rules, regulations and executive orders relating to any of the foregoing, including but not limited to the International Traffic in Arms Regulations (22 C.F.R. §§ 120 et seq.), the Export Administration Regulations (15 C.F.R. §§ 730 et seq.), and the regulations administered by the Office of Foreign Assets Controls of the United States Department of the Treasury; and (b) all export controls imposed on any item by any country or organization or nations within whose jurisdiction either party operates or does business.

1.41 “EXUMA SEZC” shall mean Exuma Biotechnology SEZC, a Cayman Islands Special Economic Zone exempt company.

1.42 “F1 ACT Components” shall mean (a) the Company’s proprietary CAR vector components that comprise a membrane spanning region along with T-cell stimulator, propagation and regulatory components, and/or (b) the Company’s other proprietary targeted gene therapy vector components (excluding CAB Components); in each case, whether existing before the Term or made, developed or acquired thereafter during the Term.

1.43 “F1 ACT Field” shall mean [***].

1.44 “F1 ACT Preparation” shall mean a composition or preparation Directed to any Licensed Target containing or comprising one or more ACT components (which, in each case, may, but need not, be F1 ACT Components). For clarity, and without limiting the generality of the foregoing, an F1 ACT Preparation:

(a) may (but need not) be a CAB ACT Preparation – *i.e.*, may but need not incorporate any of the following: (i) a CAB Component (whether or not a BioAtla CAB Component); (ii) a component obtained or generated by or on behalf of the Company from BioAtla CAB Deliverables; or (iii) a component obtained or generated by or on behalf of the Company through the practice of BioAtla Licensed Technology within the scope of the Limited CAB Rights; and

(b) may (but need not) incorporate a component identified, obtained or generated by or on behalf of the Company without the use of any BioAtla Licensed Technology, BioAtla CAB, other CAB, BioAtla CAB Component, other CAB Component or BioAtla CAB Deliverable (*e.g.*, a component identified, obtained or generated through other technology).

1.45 “F1 ACT Treatment” shall mean a cancer immunotherapy in which (a) lymphocytes are genetically modified by *ex vivo* exposure to an F1 ACT Preparation and administered to a patient or (b) an F1 ACT Preparation that genetically modifies lymphocytes is administered to a patient.

1.46 “F1 Product” shall mean an F1 ACT Preparation and/or an F1 ACT Treatment.

1.47 “Information” shall mean any and all tangible and intangible (a) techniques, technology, practices, trade secrets, inventions (whether patentable or not), methods, knowledge, know-how, skill, experience, test data and results (including pharmacological, toxicological and clinical test data and results), analytical and quality control data, results or descriptions, software and algorithms, and (b) compositions of matter, cells, cell lines, assays, animal models and physical, biological or chemical material; that, in each case, are not in the public domain.

1.48 “Invention” shall mean a BioAtla Invention, Company Invention or Joint Invention.

1.49 “Joint Invention” shall mean: (a) any Jointly-Owned MTA Invention; or (b) any invention, whether or not patentable, made jointly by one or more employees, consultants or contractors of BioAtla and one or more employees, consultants or contractors of Company in the course and as a result of the performance of the activities contemplated by Article 4 of the 2016 Agreement.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

1.50 “Jointly-Owned MTA Invention” shall mean any idea, invention, technique or other technology, whether or not patentable, that (a) was or is generated, developed or discovered by or on behalf of the Company in the course and as a result of using the “BioAtla Materials” (as defined in the MTA) to perform the “Development Work” (as defined in the MTA) under the MTA, and (b) is directed specifically and solely to the combination of one or more F1 ACT Components and any “BioAtla Materials” (as defined in the MTA).

1.51 “Joint Patents” shall mean all Patent Rights claiming Joint Inventions.

1.52 “Joint Technology” shall mean Joint Inventions and Joint Patents.

1.53 “Licensed Target” shall mean any of the following Targets: [***].

1.54 “Licensee” shall mean (a) any Third Party to which the Company or its Affiliate has granted a license or sublicense (or other grant of marketing rights) to identify, develop, make, have made, use, sell, have sold, offer for sale or import F1 ACT Preparations and/or F1 ACT Treatments in the F1 ACT Field in any territory (whether such Third Party’s license or sublicense was granted to it directly by the Company or its Affiliate or indirectly through one or more tiers of sublicense), or (b) Affiliate or assignee of Company or any of the Third Parties described in clause (a) above.

1.55 “Limited CAB Rights” shall have the meaning provided in Section 2.1.

1.56 “Litigation” means any procedure for the resolution of a controversy, whether created by a claim, a counterclaim or otherwise, in whatever form, administrative, judicial, arbitral or otherwise, including any proceeding in the United States International Trade Commission or any regulatory authority in any jurisdiction in the world.

1.57 “MTA” shall mean that certain Materials Transfer Agreement between the Company BioAtla dated February 25, 2016.

1.58 “Net Sales” shall mean the gross amounts invoiced by or on behalf of the Company or any of its Affiliates, Licensees or assignees (each, a “Selling Party”) to Third Parties (other than another Selling Party, unless such Selling Party is the end user) for sales or other dispositions of Products (including any amounts invoiced by such Selling Party to such Third Parties that are hospitals and other clinics in connection with the sale and dosing of the Product in patients, as applicable), less the following deductions actually incurred, allowed, paid, accrued or otherwise specifically allocated to Products by the Selling Party:

[***]

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

1.59 “Patent Rights” shall mean (a) all national, regional and international patents and patent applications filed in any country of the world, including without limitation provisional patent applications, (b) all patent applications filed either from such patents and patent applications or from a patent application claiming priority from either of these, including any continuation, continuation-in-part, division, provisional, converted provisional and continued prosecution applications, or any substitute applications, (c) any patent issued with respect to or in the future issued from any such patent applications including utility models, petty patents and design patents and certificates of invention, and (d) any and all extensions or restorations by existing or future extension or restoration mechanisms, including revalidations, reissues, reexaminations and extensions (including any supplementary protection certificates and the like) of the foregoing patents or patent applications.

1.60 “Person” means any individual, Entity, or governmental authority or agency, or any other entity not specifically listed herein.

1.61 “Product” shall mean any F1 Product, the manufacture, use, sale, offer for sale or import of which would, in the absence of a license or other rights under the BioAtla License Patents, infringe a Valid Claim of the BioAtla License Patents in the country in which such F1 Product is sold.

1.62 “Restatement Date” shall have the meaning provided in Section 10.1.

1.63 “Results” shall have the meaning provided in the MTA.

1.64 “Royalty Term” shall have the meaning provided in Section 3.3.

1.65 “scFv” shall mean a single-chain variable fragment.

1.66 “Sinobioway” shall mean Beijing Sinobioway Group Co., Ltd.

1.67 “Target” shall mean a unique molecular species (or naturally occurring allelic variant, glycosylation variant, or mutant thereof, or any combination thereof) that (a) is chemically distinct from other molecules, (b) is a peptide, protein or other biologic, and (c) wherein a binding entity derives recognized therapeutic value from binding such molecular species.

1.68 “Term” shall have the meaning provided in Section 7.1.

1.69 “Territory 1” shall mean the [***].

1.70 “Territory 2” shall mean [***].

1.71 “Third Party” shall mean an entity other than BioAtla and its Affiliates, and Company and its Affiliates.

1.72 “Valid Claim” shall mean: (a) a claim of an issued and unexpired patent, which claim has not been revoked or held unenforceable or invalid by a decision of a court or governmental agency of competent jurisdiction, which decision is not appealable or has not been appealed within the time allowed for appeal, and has not been abandoned, disclaimed, denied or admitted to be invalid or unenforceable through reissue, re-examination, disclaimer or otherwise; or (b) a patent application that has not been irretrievably cancelled, withdrawn or abandoned and

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

that has been pending for less than seven (7) years from the earliest worldwide priority date from which such claim takes priority. If a claim of a patent application that ceased to be a Valid Claim under clause (b) of the preceding sentence because of the passage of time later issues as a part of a patent within clause (a) of the preceding sentence, then it shall again be considered a Valid Claim effective as of the issuance of such patent.

2. LICENSES.

2.1 ACT License Grants to the Company. Subject to the terms and conditions of this Agreement (including, without limitation, Sections 2.4, 2.5(a) and 2.6 hereof), BioAtla hereby grants to Company: an exclusive (even as to BioAtla and its Affiliates, except as expressly set forth in Section 2.5), worldwide, royalty-bearing license, with the right to sublicense through multiple tiers of sublicense (subject to Section 2.3(a)), under the BioAtla Licensed Technology and BioAtla's and its Affiliates' interest in the Joint Technology, solely to identify, develop, make, have made, use, sell, have sold, offer for sale and import F1 ACT Preparations and F1 ACT Treatments in the F1 ACT Field (the "**Exclusive ACT License**"); and (b) a non-exclusive, worldwide, royalty-free and fully-paid license, with the right to sublicense solely to its Affiliates (subject to Section 2.3(a)) through multiple tiers, under the BioAtla Licensed Technology, for internal research purposes, solely to the extent for developing and commercializing Products. The Exclusive ACT License includes, without limitation, the right under the BioAtla Licensed Technology: (i) to identify, develop, make, have made, use, sell, have sold, offer for sale and import CABs solely for the purpose of obtaining or generating CAB Components and scFvs for use or incorporation in F1 ACT Preparations and F1 ACT Treatments in the F1 ACT Field; and (ii) to identify, develop, make, have made, use, sell, have sold, offer for sale and import CAB Components and scFvs solely for use or incorporation in F1 ACT Preparations and F1 ACT Treatments in the F1 ACT Field (collectively, the "**Limited CAB Rights**"), subject, in each case, to the terms and conditions of this Agreement (including, without limitation, Sections 2.3(a), 2.4, 2.5 and 2.6 hereof). Notwithstanding anything to the contrary, the Exclusive ACT License is only for the ACT format of any F1 ACT Preparations and F1 ACT Treatments and under no circumstances shall include any bispecific antibody, naked antibody, antibody drug conjugate or any other non-ACT format of any F1 ACT Preparations and F1 ACT Treatments.

2.2 Exclusive Non-ACT License Grant to BioAtla. Subject to the terms and conditions of this Agreement (including, without limitation, Sections 2.4, 2.5(b), and 2.6 hereof) the Company hereby grants to BioAtla, an exclusive (even as to the Company and its Affiliates, except as expressly set forth in Section 2.5), worldwide, royalty-free and fully-paid license, with the right to sublicense through multiple tiers of sublicense (subject to Section 2.3(b)), under the Company Licensed Technology and the Company's interest in the Joint Technology, solely to develop, make, have made, use, sell, have sold, offer for sale and import BioAtla CAB Non-ACT Products in the CAB Non-ACT Field (the "**Exclusive Non-ACT License**"). As soon as reasonably practical after the 2019 Execution Date and thereafter upon BioAtla's reasonable request during the Term, Company shall transfer to BioAtla, at no cost to BioAtla, copies of all Information Controlled by Company or EXUMA SEZC or any of their respective Affiliates solely outside of the F1 Act Field as of the Execution Date, excluding any Information relating to the Licensed Targets. In addition, Company shall provide reasonable assistance, including making its personnel reasonably available for meetings or teleconferences to answer questions and provide technical support to BioAtla with respect to the use of such transferred Information.

2.3 Sublicensing.

(a) By the Company. The Company shall have the right to grant sublicenses under the Exclusive ACT License through multiple tiers of sublicense, solely to identify, develop, make, have made, use, sell, have sold, offer for sale and import F1 ACT Preparations and F1 ACT Treatments in the F1 ACT Field; *provided, however*, that neither the Company nor any of its Affiliates may grant to any Third Party any sublicense under the Limited CAB Rights:

(i) to discover, identify, evolve, modify, develop, make, have made, use or import any CAB;

(ii) to discover, identify, evolve or modify any BioAtla CAB Deliverable or any other CAB Component; or

(iii) to develop, make, have made, use and import any BioAtla CAB Deliverable or other CAB Component, *except* as (A) incorporated in an F1 ACT Preparation in the F1 ACT Field or (B) used or incorporated in an F1 ACT Treatment in the F1 ACT Field.

(b) By BioAtla. BioAtla shall have the right to grant sublicenses under the Exclusive Non-ACT License through multiple tiers of sublicense solely to develop, make, have made, use, sell, have sold, offer for sale and import BioAtla CAB Non-ACT Products in the CAB Non-ACT Field.

2.4 License Exclusions and Limitations.

(a) Exclusive ACT License.

(i) For clarity, and notwithstanding Section 2.1 to the contrary, the Exclusive ACT License specifically excludes any license or other right under the BioAtla Licensed Technology and the Joint Technology:

(1) to make or have made any CAB or CAB Component, except as expressly permitted by this Agreement;

(2) to sell, have sold or offer for sale any CAB; or

(3) to sell, have sold or offer for sale any CAB Component, except as (A) incorporated in an F1 ACT Preparation in the F1 ACT Field or (B) used or incorporated in an F1 ACT Treatment in the F1 ACT Field.

(ii) In addition, the Exclusive ACT License specifically excludes any license or other right under the BioAtla Licensed Technology to develop, make, have made, use, sell, have sold, offer for sale or import F1 ACT Preparations and F1 ACT Treatments outside of the F1 ACT Field.

(b) Exclusive Non-ACT License. For clarity, and notwithstanding Section 2.2 to the contrary, the Exclusive Non-ACT License specifically excludes any license or other right under the Company Licensed Technology or the Joint Technology to identify, develop, make, have made, use, sell, have sold, offer for sale or import (i) any ACT, or (ii) any F1 ACT Component or product containing or comprising any F1 ACT Component; in each case, for any for any purpose.

2.5 Retained Rights.

(a) By BioAtla. As between the parties, subject to Company and its Affiliate's internal research use rights to the extent required to develop and commercialize Products and Section 2.6(a), BioAtla retains the exclusive right under the BioAtla Licensed Technology, to develop, make, have made, use, sell, have sold, offer for sale and import CABs in any non-ACT format.

(b) By Company. As between the parties, with respect to the Exclusive Non-ACT License and subject Section 2.6(b), Company retains the non-exclusive right under the Company Licensed Technology and its interest in the Joint Technology solely for internal research purposes to the extent required to develop and commercialize Products.

2.6 Negative Covenants.

(a) By BioAtla.

(i) BioAtla hereby covenants from and after the Restatement Date during the Term:

(1) not to identify, have identified, develop, have developed, make, have made, use, have used, sell, have sold, offer for sale, import [***], in each case, for an immunotherapy intended to be Directed to any Licensed Target in which (a) genetically modified cells are administered to a patient or (b) targeted gene therapy vectors that modify effector cells are administered to a patient, for any indication;

(2) not to use or practice the Company Licensed Technology or the Joint Technology to identify, develop, make, have made, use, sell, have sold, offer for sale or import any [***] in which (a) genetically modified cells are administered to a patient or (b) targeted gene therapy vectors that modify effector cells are administered to a patient; and

(3) not to cause or permit, or grant any license or other right to, any of its Affiliates or any Third Party to engage in any of the activities prohibited by the preceding subparagraphs (1) and (2) of this Section 2.6(a).

(ii) BioAtla covenants, on behalf of itself and its Affiliates, and its and their respective successors and assigns of any BioAtla Non-Assert Patent, that none of them will Assert against any Company Non-Assert Entity (as defined below), in any country or jurisdiction worldwide, any claim that the identification, development, manufacture, use, sale, offer for sale or import of any [***] in accordance with the terms and conditions of this Agreement infringes a BioAtla Non-Assert Patent. The term "**Company Non-Assert Entity**" means the Company, any of its Affiliates, any permitted Third

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

Party sublicensee under the Exclusive ACT License, or any Third Party contractor performing services on behalf of any of the foregoing. The Assertion by BioAtla, any of its Affiliates, or any of its or their respective successors and assigns of any BioAtla Non-Assert Patent, against a Company Non-Assert Party (other than the Company, EXUMA SEZC, and BreviCAR) that has not been identified to BioAtla by the Company in writing shall not be deemed to breach the covenant set forth in this Section 2.6(a)(ii), *provided* that such Assertion and any and all Litigation relating thereto cease within 30 days after written notice from the Company identifying the applicable Affiliate or Third Party as a Company Non-Assert Entity. Notwithstanding anything to the contrary, BioAtla shall have no obligation to disclose to the Company any BioAtla Non-Assert Patent.

(b) By Company.

(i) Notwithstanding the scope of the Exclusive ACT License, the Company hereby covenants from and after the Restatement Date during the Term:

(1) not to develop, make, have made, use, sell, have sold, offer for sale or import any [***], except as (A) incorporated in an F1 ACT Preparation, (B) used or incorporated in an F1 ACT Treatment, or (C) for internal research purposes, in each case of clauses (A)-(C), solely to the extent for developing and commercializing Products;

(2) not to develop, make, have made, use, sell, have sold, offer for sale or import [***] other than for internal research purposes (solely to the extent for developing and commercializing Products):

a. any CAB ACT Preparation that incorporates:

i. any BioAtla CAB Deliverable delivered by BioAtla hereunder prior to the Restatement Date;

ii. any BioAtla CAB Component of any BioAtla CAB Deliverable delivered by BioAtla hereunder prior to the

Restatement Date;

iii. any scFv obtained or generated by or on behalf of the Company from any CAB ACT Preparation described in subparagraphs (i) and (ii) of this Section 2.6(b)(i)(2)a;

iv. any CAB Component or scFv obtained or generated by or on behalf of the Company through the practice of the BioAtla Licensed Technology; or

b. any CAB ACT Treatment that uses or incorporates any CAB ACT Preparation described in Section 2.6(b)(i)(2)a;

(3) not to cause or permit, or grant any sublicense or other right to, any of its Affiliates or any Third Party to engage in any of the activities prohibited by the preceding subparagraphs (1) and (2) of this Section 2.6(b);

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

(4) not to cause or permit any Third Party (other than a Third Party service provider performing contract services on behalf of the Company in accordance with Section 2.6 solely for the purpose of performing such services) to make or have made any BioAtla CAB or BioAtla CAB Component ; and

(5) not to cause or permit, and not to grant any sublicense or other right to, any Third Party:

a. to sell, have sold or offer for sale any CAB that would infringe a Valid Claim of any BioAtla Patent Rights or that incorporates any BioAtla Licensed Know-How; or

b. to sell, have sold or offer for sale any CAB Component (except as (A) incorporated in an F1 ACT Preparation in the F1 ACT Field or (B) used or incorporated in an F1 ACT Treatment in the F1 ACT Field).

(ii) The Company covenants, on behalf of itself and its Affiliates, and its and their respective successors and assigns of any Company Non-Assert Patent, that none of them will Assert against any BioAtla Non-Assert Entity (as defined below), in any country or jurisdiction worldwide, any claim that the manufacture, use, sale, offer for sale or import of any [***] in accordance with the terms and conditions of this Agreement infringes a Company Non-Assert Patent. The term “**BioAtla Non-Assert Entity**” means BioAtla, any of its Affiliates, any permitted Third Party sublicensee under the Exclusive Non-ACT License, or any Third Party contractor performing services on behalf of any of the foregoing. The Assertion by the Company, any of its Affiliates, or any of its or their respective successors and assigns of any Company Non-Assert Patent, against a BioAtla Non-Assert Party (other than BioAtla) that has not been identified to the Company by BioAtla in writing shall not be deemed to breach the covenant set forth in this Section 2.6(b)(ii), *provided* that such Assertion and any and all Litigation relating thereto cease within 30 days after written notice from BioAtla identifying the applicable Affiliate or Third Party as a BioAtla Non-Assert Entity. Notwithstanding anything to the contrary, the Company shall have no obligation to disclose to BioAtla any Company Non-Assert Patent.

2.7 Use of Third Party Contractors. Each party may engage Third Party contract service providers to perform on behalf of such party any activity that such party itself has the right to conduct under the license granted to such party in Section 2.1 or Section 2.2 (as applicable); *provided*, in each case, that: (a) such party shall require any such Third Party service provider to take all reasonable steps and use all reasonable measures to prevent unauthorized disclosure and unauthorized use of the Patent Rights and Information licensed to such party under Section 2.1 or Section 2.2 (as applicable); (b) none of the other party’s rights hereunder are diminished or otherwise adversely affected as a result of such contracting; (c) each such contractor undertakes in writing obligations of confidentiality and non-use regarding Confidential Information of the other party at least as stringent as those undertaken by such party pursuant to Article 4; (d) prior to initiating performance of any such contract services, such Third Party service provider has signed a binding written agreement or instrument assigning, and agreeing to assign, to such party all Inventions resulting from performance of such services; and (e) such party shall at all times be fully responsible for the compliance of such Third Party service provider with the terms and conditions of this Agreement.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

2.8 No Implied Licenses. No right or license under any Information, Patent Rights or other intellectual property rights is granted or shall be granted by implication. All such rights or licenses are or shall be granted only as expressly provided in the terms of this Agreement.

2.9 Materials Transfer. In furtherance of the activities contemplated by the Original Agreement BioAtla has provided Company with heavy and light chain amino acid and nucleic acid sequences derived from monoclonal antibodies [***]. (collectively, the "**Materials**"), for use by Company in accordance with this Agreement. Except as expressly set forth in this Agreement, THE MATERIALS ARE PROVIDED "AS IS" AND WITHOUT ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTY OF MERCHANTABILITY OR OF FITNESS FOR ANY PARTICULAR PURPOSE OR ANY WARRANTY THAT THE USE OF THE MATERIALS WILL NOT INFRINGE OR VIOLATE ANY PATENT OR OTHER PROPRIETARY RIGHTS OF ANY THIRD PARTY.

3. PAYMENTS.

3.1 BioAtla Payment. In exchange for the licenses and other amendments granted to BioAtla pursuant to this Exclusive Agreement, BioAtla shall pay Company, on the Restatement Date, a one-time, non-refundable, non-creditable license fee by wire transfer of immediately available funds into an account designated by Company of ten thousand U.S. dollars (\$10,000).

3.2 Royalties. Subject to Sections 3.3 and 3.4, Company shall pay to BioAtla:

(a) royalties on aggregate annual Net Sales by the Company and its Affiliates and Licensees of each Product in [***] in each calendar year at the rate of [***] and

(b) royalties on aggregate annual Net Sales by the Company and its Affiliates and Licensees of each Product in [***] in each calendar year at the applicable rate(s) set forth below:

[***]

3.3 Royalty Term. Royalties under Section 3.2 shall be payable on a Product-by-Product and country-by-country basis during the period of time commencing on the First Commercial Sale of a Product in a country and ending upon expiration of the last-to-expire Valid Claim of the BioAtla Licensed Patents and the Company Licensed Patents covering the manufacture, use, sale, offer for sale or import of such Product in such country (the "**Royalty Term**"). On a Product-by-Product and country-by-country basis, upon expiration of the Royalty Term for a Product in a country, the Company's license under Section 2.1 with respect to such Product in such country shall become fully-paid, irrevocable and perpetual.

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

3.4 Third Party Licenses. In the event that the Company (or its Affiliate or Licensee, as applicable) is required to obtain, and obtains, one or more licenses under Patent Rights of Third Parties that are necessary for the manufacture, use or sale solely of the CAB component of a Product in a country (hereinafter "**Third Party Licenses**"), the Company may deduct [***] of the royalties actually paid to such Third Party under such Third Party License with respect to sales of such Product in such country from the royalties otherwise payable to BioAtla under this Agreement with respect to Net Sales of such Product in such country; *provided, however*, that the royalties payable to BioAtla with respect to Net Sales of such Product in such country may not be reduced by more than [***] in any calendar quarter as a result of any and all such offsets in the aggregate. Any portion of the royalties paid to such Third Party under such Third Party License with respect to such Product in such country that the Company would, but for the foregoing limitation on royalty reductions, be entitled to deduct under this Section 3.4 shall be carried over and applied against royalties payable to BioAtla in respect of such Product in such country in subsequent calendar quarters until the full deduction is taken.

3.5 Payment; Reports. Royalties under Section 3.2 shall be calculated and reported for each calendar quarter and shall be paid within 60 days after the end of each calendar quarter. Each payment shall be accompanied by a report of Net Sales of Products by the Company, its Affiliates and Licensees, which report shall include the gross sales and Net Sales of each Product (including a statement of deductions taken to calculate Net Sales), the royalties payable, a description of the method used to calculate the royalties payable, and the exchange rates used, in each case presented on a Product-by-Product and country-by-country basis.

3.6 Exchange Rate; Manner and Place of Payment. All payments under this Article 3 shall be payable in U.S. dollars by wire transfer in immediately available funds to a bank and account designated in writing by BioAtla. For the purpose of calculation of Net Sales expressed in currencies other than U.S. Dollars, Company shall convert any amount expressed in a foreign currency into U.S. Dollar equivalents using a rate of exchange as published in The Wall Street Journal (U.S. Eastern Edition) on last day of the Calendar Quarter in which such Net Sales were made.

3.7 Audits. The Company shall keep (and shall cause its Affiliates and Licensees to keep) complete and accurate records pertaining to the sale or other disposition of Products in sufficient detail to permit BioAtla to confirm the accuracy of all royalty payments due hereunder for a period of three years from the end of the calendar year to which such records relate. BioAtla shall have the right, once annually, to cause an independent, certified public accountant reasonably acceptable to the Company (the "**Auditor**") to audit such records solely to confirm Net Sales and royalties for a period covering not more than the preceding three years. Such audits may be exercised during normal business hours upon reasonable prior written notice to the Company. No calendar year shall be subject to audit under this section more than once. The Auditor will execute a reasonable written confidentiality agreement with the Company and will disclose to BioAtla only

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

such information as is reasonably necessary to provide BioAtla with information regarding any actual or potential discrepancies between amounts reported and actually paid and amounts payable under this Agreement. The Auditor will send a copy of the report to the Company at the same time it is sent to BioAtla. The report sent to both parties will include the methodology and calculations used to determine the results. Prompt adjustments shall be made by the parties to reflect the results of such audit. BioAtla shall bear the full cost of such audit unless such audit discloses an underpayment by the Company of more than [***] of the amount due for any calendar year under this Agreement, in which case, the Company shall bear the full cost of such audit and shall promptly remit to BioAtla the amount of any underpayment. If such audit discloses an overpayment by the Company, then the Company will deduct the amount of such overpayment from amounts otherwise owed to BioAtla under this Agreement. If such audit discloses an underpayment by the Company, then the Company will pay the amount of such underpayment owed to BioAtla within 30 days.

3.8 Withholding. BioAtla will pay any and all taxes levied on account of any payments made to it under this Agreement. If any taxes are paid or required to be withheld by the Company for the benefit of BioAtla on account of any amounts payments payable to BioAtla hereunder, the Company will deduct such taxes from the amount of payments otherwise due to BioAtla, timely pay the taxes to the proper taxing authority, and send proof of payment to BioAtla within 30 days following such payment.

3.9 Late Payments. In the event that any payment due under Section 3.2 (other than any amount or portion thereof that is subject to good faith dispute between the parties) is not made when due, the payment shall accrue interest from the date due at the rate of [***] per month; *provided, however*, that in no event shall such rate exceed the maximum legal annual interest rate. The payment of such interest shall not limit BioAtla from exercising any other rights it may have as a consequence of the lateness of any payment.

4. CONFIDENTIALITY.

4.1 Confidential Information. Except to the extent expressly authorized by this Agreement or otherwise agreed in writing by the parties, each party agrees that, during the Term, and for five years thereafter, such party (the **“Receiving Party”**) shall keep confidential and shall not publish or otherwise disclose and shall not use for any purpose other than as expressly provided for in this Agreement any Information furnished to it by the other party (the **“Disclosing Party”**) pursuant to this Agreement, the Confidentiality Agreement or the MTA (collectively, **“Confidential Information”**). Notwithstanding the foregoing, the parties hereby agree that: (a) the Results shall be considered the Confidential Information of the Company, and the Company shall be deemed the Disclosing Party and BioAtla the Receiving Party with respect thereto; (b) the terms of this Article 4 shall supersede the Confidentiality Agreement and the MTA; and (c) except as expressly set forth above in the case of Results, any Information disclosed by a party pursuant to the Confidentiality Agreement or the MTA shall be deemed Confidential Information of such party for purposes of this Agreement. The Receiving Party may use Confidential Information only to the extent required to accomplish the purposes of this Agreement. The Receiving Party will use

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

at least the same standard of care as it uses to protect proprietary or confidential information of its own, but no less than reasonable care, to ensure that its employees, agents, consultants and other representatives do not disclose or make any unauthorized use of the Confidential Information. The Receiving Party will promptly notify the Disclosing Party upon discovery of any unauthorized use or disclosure of the Confidential Information.

4.2 Exceptions. Confidential Information shall not include any information which the Receiving Party can prove by competent evidence: (a) is now, or hereafter becomes, through no act or failure to act on the part of the Receiving Party in breach of this Agreement, publicly known or available; (b) is known by the Receiving Party at the time of receiving such information (other than as a result of disclosure by or on behalf of the Disclosing Party), as evidenced by its records; *provided, however*, that the exception set forth in this clause (b) shall not apply to Results (in the case of BioAtla as the Receiving Party); (c) is hereafter furnished to the Receiving Party by a Third Party, as a matter of right and without restriction on disclosure; or (d) is independently discovered or developed by the Receiving Party outside of the R&D Program and without the use of Confidential Information of the Disclosing Party. For purposes of clause (a) of this Section 4.2, no combination of elements within the Confidential Information shall be deemed to be part of the public domain merely because the individual elements of such combination are part of the public domain, unless the entire combination itself, or the entire principle of use or operation of such combination (if any), is part of the public domain. In addition, no element within the Confidential Information shall be deemed to be a part of the public domain merely because it is embraced by more general information or data that is part of the public domain.

4.3 Authorized Disclosure. A Receiving Party may disclose Confidential Information of the Disclosing Party as expressly permitted by this Agreement (including as reasonably necessary for the Receiving Party's performance of its obligations under this Agreement), or if and to the extent such disclosure is reasonably necessary in the following instances:

(a) prosecuting or defending litigation as permitted by this Agreement;

(b) complying with applicable court orders, applicable laws, rules or regulations, or the listing rules of any exchange on which the Receiving Party's or its Affiliate's securities are traded;

(c) enforcing the Receiving Party's rights under this Agreement;

(d) filing or prosecuting Patent Rights as permitted by this Agreement;

(e) in the case of the Company, disclosure in regulatory submissions with respect to F1 Products within the scope of the Exclusive ACT License;

(f) in the case of BioAtla, disclosure in regulatory submissions with respect to BioAtla CAB Non-ACT Products within the scope of the Exclusive Non-ACT License;

(g) disclosure to the Receiving Party's Affiliates, to the Company's actual or potential licensees or sublicensees of rights with respect to F1 Products, to BioAtla's actual or potential licensees or sublicensees of rights with respect to BioAtla CAB Non-ACT Products, and to the Receiving Party's and its Affiliates' Representatives who, in each case, have a need to know such information in order for the Receiving Party to exercise its rights or fulfill its obligations under this Agreement, provided, in each case, that any such Affiliate, actual or potential licensee or sublicensee, or Representative agrees to be bound by terms of confidentiality and non-use at least as restrictive as those set forth in this Article 4; and

(h) disclosure to Third Parties in connection with due diligence or similar investigations by such Third Parties, and disclosure to potential Third Party investors in confidential financing documents, provided, in each case, that any such Third Party agrees to be bound by reasonable obligations of confidentiality and non-use.

Notwithstanding the foregoing, in the event the Receiving Party is required to make a disclosure of the Disclosing Party's Confidential Information pursuant to Section 4.3(a) or 4.3(b), it will, except where impracticable, (i) give reasonable advance notice to the Disclosing Party of such disclosure, (ii) use efforts to secure confidential treatment of such information at least as diligent as the Receiving Party would use to protect its own confidential information, but in no event less than reasonable efforts, and (iii) cooperate with any efforts by the Disclosing Party, at the Disclosing Party's request and expense, to secure confidential treatment of such Confidential Information.

4.4 Publication.

(a) By the Company.

(i) Subject to Section 4.4(a)(ii), BioAtla shall have the right to review and comment on any material proposed for disclosure or publication by the Company regarding results of the Company's development activities with respect to F1 Products, whether by oral presentation, manuscript or abstract, but only to the extent (A) any such F1 Product or the development, manufacture, use, sale or offer for sale thereof is covered by or uses or incorporates any BioAtla Licensed Technology or (B) any such material contains any BioAtla Licensed Know-How. Before any such material is submitted for publication or presentation of the same is made, the Company shall deliver a complete copy to BioAtla at least 30 days prior to submitting the material to a publisher or initiating any other disclosure. BioAtla shall review any such material and give its comments to the Company within 10 days of the receipt of such material. With respect to oral presentation materials and abstracts, BioAtla shall make reasonable efforts to expedite review of such materials and abstracts, and shall return such items as soon as practicable to the Company with appropriate comments, if any, but in no event later than 10 days from receipt. The Company shall comply with BioAtla's request to delete references to the Confidential Information of BioAtla in any such material and agrees to delay any submission for publication or other public disclosure for a period of up to an additional 60 days for the purpose of allowing preparation and filing of appropriate patent applications.

(ii) During the Term, the Company and its Affiliates shall be free to publish, and to authorize their respective sublicensees to publish, the results of any clinical trial of any F1 Product conducted by or on behalf of the Company, its Affiliate or any such sublicensee, without the prior review or approval of BioAtla.

(b) By BioAtla.

(i) Subject to Section 4.4(b)(ii), the Company shall have the right to review and comment on any material proposed for disclosure or publication by BioAtla regarding results of BioAtla's development activities with respect to BioAtla CAB Non-ACT Products, whether by oral presentation, manuscript or abstract, but only to the extent (A) any such BioAtla CAB Non-ACT Product or the development, manufacture, use, sale or offer for sale thereof is covered by or uses or incorporates any Company Licensed Technology or (B) any such material contains any Company Licensed Know-How. Before any such material is submitted for publication or presentation of the same is made, BioAtla shall deliver a complete copy to the Company at least 30 days prior to submitting the material to a publisher or initiating any other disclosure. The Company shall review any such material and give its comments to BioAtla within 10 days of the receipt of such material. With respect to oral presentation materials and abstracts, the Company shall make reasonable efforts to expedite review of such materials and abstracts, and shall return such items as soon as practicable to BioAtla with appropriate comments, if any, but in no event later than 10 days from receipt. BioAtla shall comply with the Company's request to delete references to the Confidential Information of the Company in any such material and agrees to delay any submission for publication or other public disclosure for a period of up to an additional 60 days for the purpose of allowing preparation and filing of appropriate patent applications.

(ii) During the Term, BioAtla and its Affiliates shall be free to publish, and to authorize their respective sublicensees to publish, the results of any clinical trial of any BioAtla CAB Non-ACT Product conducted by or on behalf of BioAtla, its Affiliate or any such sublicensee, without the prior review or approval of the Company.

4.5 Public Announcements.

(a) The parties acknowledge that each party may desire or be required to issue press releases relating to this Agreement. The parties agree to consult with each other reasonably and in good faith with respect to the text and timing of subsequent press releases prior to the issuance thereof, provided that a party may not withhold consent to such releases that the other party determines, based on advice of outside legal counsel, are necessary to comply with Applicable Law or the listing rules of any exchange on which the other party's or its Affiliate's securities are traded. In the event of a required public announcement or any public disclosure (including, without limitation, disclosure in any filing with the U.S. Securities and Exchange Commission) relating to this Agreement, the party required to make such announcement or proposing to make such public disclosure shall provide the other party with a copy of the proposed text of such announcement or disclosure sufficiently in advance of the scheduled release or disclosure to afford such other party a reasonable opportunity to review and comment upon the proposed text, or at a minimum as far in advance of the scheduled release or disclosure as is practicable under the circumstances, and such party shall comply with the other party's reasonable and timely comments thereto. Each party may: (i) make public statements regarding this Agreement in response to questions by the press, analysts, investors or those attending industry conferences or financial analyst calls, provided, in each case, that such party shall have consulted with the other party and the parties shall have mutually agreed to a written discussion guide or "talking points" memo in advance, and the responding party shall provide responses that are consistent with such guide or memo; or (ii) make public statements regarding this Agreement in

reports to shareholders or to any exchange on which such party's or its Affiliate's securities are traded, or issue press releases; in each case, so long as the contents of any such public statement, report or press release are contained in a prior public disclosure or public statement approved by the other party pursuant to this Section 4.5(a) or permitted by Section 4.3 and do not reveal non-public information about the other party.

(b) Filing of this Agreement. The parties shall coordinate in advance with each other in connection with the filing of this Agreement (including redaction of certain provisions of this Agreement) with any securities authority or with any stock exchange on which securities issued by a party or its Affiliate are traded, and each party will use reasonable efforts to seek and obtain confidential treatment for the terms proposed to be redacted; provided that each party will ultimately retain control over what terms are disclosed to any securities authority or stock exchange, as the case may be, to the extent such party determines, on the advice of outside legal counsel, that disclosure is reasonably necessary to comply with Applicable Laws, including disclosure requirements of the U.S. Securities and Exchange Commission, or with the requirements of any stock exchange on which securities issued by a party or its Affiliates are traded; and provided further that the parties will use their reasonable efforts to file redacted versions with any governing bodies which are consistent with redacted versions previously filed with any other governing bodies.

5. INTELLECTUAL PROPERTY.

5.1 Ownership. Inventorship of inventions, whether or not patentable, shall be determined in accordance with U.S. patent laws. Each party shall promptly disclose to the other party in writing each Invention made in whole or in part by such party, and the parties, with the advice of each party's outside patent counsel, use commercially reasonable efforts and exercise good faith to determine the inventorship of each such Invention for purposes of U.S. patent laws. The Company shall solely own all Company Inventions. BioAtla shall solely own all BioAtla Inventions. The parties shall jointly own all Joint Inventions and Joint Patents. Subject to the Exclusive ACT License, the Exclusive Non-ACT License and the terms and conditions of this Agreement (including, without limitation, Sections 2.3, 2.4, 2.5, 2.6 and 2.7 hereof), each party shall have the right to use, and grant licenses under its joint ownership interest in, Joint Technology, without the other party's consent and without any duty to account to the other party for such use or license, and each party hereby waives any right it may have under the laws of any country to require any such consent or accounting.

5.2 Patent Prosecution and Maintenance. For purposes of this Section 5.2, the terms "prosecution" and "maintenance" (including variations such as "prosecute" and "maintain") shall mean, with respect to a Patent Right, the preparing, filing, prosecution, maintenance and defense of such Patent Right, in the applicable jurisdiction, as well as re-examinations, reissues and requests for patent term extensions and the like with respect to such Patent Right, together with the conduct of interferences, the defense of oppositions and other similar proceedings with respect to a Patent Right.

(a) BioAtla Licensed Patents. BioAtla shall have the sole right, but not the obligation, to prosecute and maintain the BioAtla Licensed Patents, at its sole cost and expense.

(b) Company Licensed Patents. The Company shall have the sole right, but not the obligation, to prosecute and maintain the Company Licensed Patents, at its sole cost and expense.

(c) Joint Patents. The parties shall mutually agree, on a Joint Invention-by-Joint Invention basis, which of the parties will have the first right and responsibility to prepare, file, prosecute and maintain Joint Patents claiming a Joint Invention (the party with such first right and responsibility, the **“First Party”**); *provided, however*, that Company shall be the First Party with respect to any Joint Patent that claims or discloses any CAB ACT Preparation or CAB ACT Treatment. The First Party shall use counsel reasonably acceptable to the other party, and, unless otherwise agreed by the parties in writing, the parties shall share equally the reasonable and documented expenses of preparing, filing, prosecuting and maintaining such Joint Patents. The First Party shall consult with the other party as to the preparation, filing, prosecution and maintenance of the Joint Patents reasonably prior to any deadline or action with any patent office, and shall furnish to the other party copies of all relevant drafts and documents reasonably in advance of such consultation. The First Party shall keep the other party reasonably informed of progress with regard to the preparation, filing, prosecution and maintenance of such Joint Patents, and shall provide to the other party copies of all material patent office submissions within a reasonable amount of time following submission thereof by such party. In the event that the First Party desires to abandon or cease prosecution or maintenance of any such Joint Patent, the First Party shall provide written notice to the other party of such intention to abandon promptly after the First Party makes such determination (which notice shall be given no later than 90 days (or for Hatch-Waxman actions, or the equivalent thereof, 30 days) prior to the next deadline for any action that must be taken with respect to such Joint Patent in the relevant patent office). In such case, the other party shall have the right, in its discretion, exercisable upon written notice to the first party delivered no later than 30 days after receipt of notice from the first party, to assume responsibility for prosecution and maintenance of such Joint Patent, at its sole cost and expense and by counsel of its own choice.

5.3 [***].

(a) Company represents that neither it nor any of its Affiliates have filed any patent application disclosing [***].

(b) BioAtla represents that, (i) neither it nor any of its Affiliates have filed any patent application disclosing Materials (or any derivative thereof) [***], and (ii) solely with respect to ACT (including, but not limited to, CAR compositions, CAR therapies, CAB ACT Preparations, and CAB ACT Treatments), neither it nor any of its Affiliates have filed any patent application disclosing Materials (or any derivative thereof) [***].

(c) If neither BioAtla nor any of its Affiliates have filed any patent application disclosing Materials (or any derivative thereof) [***], then (i) BioAtla and Company agree to consult with each other as to the preparation (including sharing drafts) and coordinate filing their first respective Patent Rights on the same day within 30 days of the Restatement Date, that disclose Materials (or any derivative thereof) [***] (the “Coordinated Filings”), regardless of whether such Patent Rights are Joint Patents.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

(d) BioAtla agrees not to disclose any Confidential Information that is an F1 ACT Preparation, ACT component, CAB ACT Preparation, or method comprising any of the foregoing, or a CAB ACT Treatment, comprising any Materials (or any derivative thereof) Directed to [***] in any BioAtla Licensed Patents filed during the Term, without the prior written consent of Company. Company agrees not to disclose any Confidential Information that is a CAB comprising any Materials (or any derivative thereof) [***] for anything other than an F1 ACT Preparation, ACT component, CAB ACT Preparation, or method comprising any of the foregoing, or a CAB ACT Treatment in any Company Licensed Patents filed during the Term without the prior written consent of BioAtla.

(e) In the event BioAtla disclosed in a BioAtla Licensed Patent filed prior to the Restatement Date, an F1 ACT Preparation, ACT component, CAB ACT Preparation, or method comprising any of the foregoing or a CAB ACT Treatment comprising any Materials (or any derivative thereof) [***] in any BioAtla Patent Rights filed during the Term in violation of this Section 5.3, (i) BioAtla shall provide Company with a copy of such Patent Rights within 5 days of the Restatement Date, (ii) such Patent Rights shall be included in the BioAtla Licensed Patent Rights, licensed pursuant to Section 2, (iii) in such Patent Rights, BioAtla agrees not to file or pursue claims directed to an F1 ACT Preparation, ACT component, CAB ACT Preparation, or method comprising any of the foregoing or a CAB ACT Treatment, and (iv) the parties shall cooperate such that Company or its Affiliates can, if it or they so desire in their sole discretion, perfect a claim of priority to such BioAtla Patent Rights for a patent application to which Company or its Affiliate is an applicant or has an ownership interest whether independently or jointly with BioAtla.

(f) Notwithstanding anything to the contrary in Section 5.3, and without limiting the parties' rights and obligations under Section 2.6 and Section 5.2, BioAtla and its Affiliates shall be entitled to file and prosecute Patent Rights which involve (i) CABs (other than a F1 ACT Preparation, ACT component, CAB ACT Preparation, or method comprising any of the foregoing, or a CAB ACT Treatment, comprising any Materials (or any derivative thereof) [***]) and (ii) the CAB Non-Act Field.

(g) Notwithstanding anything to the contrary in Section 5.3, and without limiting the parties' rights and obligations under Section 2.6 and Section 5.2, Company and its Affiliates shall be entitled to file and prosecute Patent Rights which involve (i) CABs (other than the BioAtla CAB Deliverables of BioAtla CABs delivered to Company, or method comprising the foregoing, [***]) and (ii) compositions and methods relating to an immunotherapy in which (i) genetically modified cells are administered to a patient or (ii) targeted gene therapy vectors that modify cells are administered to a patient, for any indication.

5.4 Cooperation of the Parties. Each party agrees to cooperate fully in the prosecution and maintenance of Patent Rights under Sections 5.2 or 5.3 and in the obtaining and maintenance of any patent extensions, supplementary protection certificates and the like with respect thereto. Such cooperation includes, but is not limited to: (a) executing all papers and instruments, or requiring its employees or contractors to execute such papers and instruments, so as to effectuate the joint ownership of Joint Inventions and Joint Patents set forth in Section 5.1, and to enable the other party to apply for and to prosecute patent applications in any country as permitted by Sections 5.2 or 5.3; and (b) promptly informing the other party of any matters coming to such party's attention that may affect the preparation, filing, prosecution or maintenance of any such patent applications.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

5.5 Infringement by Third Parties.

(a) Notice. In the event that either BioAtla or the Company becomes aware of any infringement or threatened infringement by a Third Party of any BioAtla Licensed Patent, Company Licensed Patent or Joint Patent, it shall notify the other party in writing to that effect.

(b) Enforcement.

(i) BioAtla Licensed Patents. BioAtla shall have the sole right, but not the obligation, to bring and enforce any action or proceeding with respect to infringement of any BioAtla Licensed Patent, at BioAtla's sole cost and expense.

(ii) Company Licensed Patents. The Company shall have the sole right, but not the obligation, to bring and enforce any action or proceeding with respect to infringement of any Company Licensed Patent, at the Company's sole cost and expense.

(iii) Joint Patents. The Company shall have the sole right to bring, enforce, or settle any action or proceeding with respect to infringement of any Joint Patent that claims or discloses a F1 ACT Preparation or F1 ACT Treatment, at the Company's sole discretion, cost and expense. With respect to other Joint Patents, the parties shall mutually agree on a case-by-case basis, (A) whether to bring any action or proceeding with respect to infringement of any Joint Patent by a Third Party, and (B) if the parties agree to bring such an action or proceeding, how to proceed against such Third Party, whether and to what extent the costs of such action or proceeding will be shared by the parties, and how any recovery realized as a result of such action or proceeding, whether by way of settlement or otherwise, will be allocated between the parties. The settlement or compromise of any such action or proceeding shall require the written approval of both parties, not to be unreasonably withheld.

(c) Cooperation. The party enforcing Patent Rights under this Section 5.5 may require the participation of the other party where necessary to bring any suit. Such other party shall provide reasonable assistance, including being joined as a party plaintiff if necessary, at the enforcing party's expense.

5.6 Infringement of Third Party Rights. Each party shall promptly notify the other party in writing of any allegation by a Third Party that the activity of either party or any of their respective Affiliates pursuant to this Agreement infringes or may infringe the intellectual property rights of a Third Party. BioAtla shall have the sole right to control any defense of any such claim involving alleged infringement of Third Party rights by activities of BioAtla or its Affiliates at its own expense and by counsel of its own choice, and the Company shall have the right, at its own expense, to be represented in any such action by counsel of its own choice. The Company shall have the sole right to control any defense of any such claim involving alleged infringement of Third Party rights by activities of the Company or its Affiliates at its own expense and by counsel of its own choice, and BioAtla shall have the right, at its own expense, to be represented in any such action by counsel of its own choice.

5.7 Consent to Settlement. Neither party shall enter into any settlement or compromise of any action or proceeding under this Article 5 which would in any manner alter, diminish, or be in derogation of the other party's rights under this Agreement without the prior written consent of the other party, which shall not be unreasonably withheld.

6. REPRESENTATIONS AND WARRANTIES; DISCLAIMER; LIMITATION OF LIABILITY.

6.1 Mutual Representations and Warranties. Each party represents and warrants to the other as of the Restatement Date that:

(a) it is duly organized and validly existing under the laws of its jurisdiction of incorporation or formation, and has full corporate or other power and authority to enter into this Agreement and to carry out the provisions hereof;

(b) it is duly authorized to execute and deliver this Agreement and to perform its obligations hereunder, and the person or persons executing this Agreement on its behalf has been duly authorized to do so by all requisite corporate or partnership action;

(c) this Agreement is legally binding upon it, enforceable in accordance with its terms, and does not conflict with any agreement, instrument or understanding, oral or written, to which it is a party or by which it may be bound (including, with respect to BioAtla, any agreement between BioAtla or any of its Affiliates and Sinobioway or any of its Affiliates, or between BioAtla or any of its Affiliates and BioCar or any of its Affiliates), nor violate any material law or regulation of any court, governmental body or administrative or other agency having jurisdiction over it; and

(d) neither it nor any of its Affiliates is debarred from the drug industry by any Regulatory Authority (*e.g.*, by the FDA pursuant to 21 U.S.C. §335a), and it has not received written notice or other communication from any regulatory authority threatening debarment of such party or any of its Affiliates.

6.2 BioAtla Representations and Warranties. BioAtla represents and warrants to the Company as of the Restatement Date that:

(a) BioAtla has not granted to any of its Affiliates or any Third Party any license or other right with respect to CABs, CAB Components or the BioAtla Licensed Technology that conflicts with the Exclusive ACT License and rights granted to the Company herein, other than any such license or right that terminated prior to the Execution Date and is of no further force or effect;

(b) BioAtla is not a party to, and is not otherwise bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way BioAtla's right and ability (i) to grant the Exclusive ACT License on the terms and conditions set forth in this Agreement or (ii) to comply with any of BioAtla's obligations under Article 2 hereof;

(c) it has not received written notice from any Third Party claiming that the manufacture, use, sale, offer for sale or import of CABs or CAB Components thereof infringes or would infringe the patent or other intellectual property rights of any Third Party; and

(d) there are no claims, judgments or settlements against or owed by BioAtla or any of its Affiliates with respect to the BioAtla Licensed Technology, and neither BioAtla nor any of its Affiliates is a party to any legal action, suit or proceeding relating to the BioAtla Licensed Technology, nor has BioAtla or any of its Affiliates received any written communication from any Third Party threatening such action, suit or proceeding.

6.3 Mutual Covenants. Each party covenants to the other party as follows:

(a) neither such party nor any of its Affiliates will employ or use the services of any Person that has been disqualified by a regulatory authority from conducting clinical testing of new drugs (*e.g.*, by the FDA pursuant to 21 C.F.R. Part 312.70) or debarred by a regulatory authority from the drug industry (*e.g.*, by the FDA pursuant to 21 U.S.C. §335a), in connection with any development activities within the scope of this Agreement; and if a party becomes aware of the debarment or disqualification or threatened debarment or disqualification of any Person providing services to such party or any of its Affiliates in connection with any development activities within the scope of this Agreement, such party shall immediately notify the other party in writing, and such party shall cease, or cause its Affiliate to cease (as applicable), employing, contracting with, or retaining any such Person to perform any services in connection with such development activities);

(b) neither such party nor any of its Affiliates will, in connection with the exercise of its rights or performance of its obligations under this Agreement, directly or indirectly through Third Parties, pay, promise or offer to pay, or authorize the payment of, any money or give any promise or offer to give, or authorize the giving of anything of value to a public official or entity for the purpose of obtaining or retaining business for or with, or directing business to, any Person, including such party and its Affiliates, nor will such party or any of its Affiliates directly or indirectly promise, offer or provide any corrupt payment, gratuity, emolument, bribe, kickback, illicit gift or hospitality or other illegal or unethical benefit to a public official or entity or other Person or otherwise violate any Anti-Corruption Laws in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement;

(c) neither such party nor any of its Affiliates (or any of their respective employees and contractors), in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement, shall cause the other party to be in violation of Anti-Corruption Laws or Export Control Laws; and

(d) such party shall immediately notify the other party if such party has any information or suspicion that there may be a violation of Anti-Corruption Laws or Export Control Laws in connection with the exercise of such party's rights or performance of such party's obligations under this Agreement.

6.4 BioAtla Covenants. In addition to any covenants made by BioAtla elsewhere in this Agreement, BioAtla hereby covenants to the Company that, during the Term:

(a) BioAtla will not grant any of its Affiliates or any Third Party any license or other right with respect to any BioAtla Licensed Technology that conflicts with the Exclusive ACT License and rights granted to the Company herein; and

(b) BioAtla will not become a party to, or otherwise become bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way BioAtla's right and ability to comply with any of BioAtla's obligations under Article 2 hereof.

6.5 Company Covenants. In addition to any covenants made by the Company elsewhere in this Agreement, the Company hereby covenants to BioAtla that, during the Term:

(a) the Company will not grant any of its Affiliates or any Third Party any license or other right with respect to any Company Licensed Technology that conflicts with the Exclusive Non-ACT License and rights granted to BioAtla herein; and

(b) the Company will not become a party to, or otherwise become bound by or subject to, any agreement with any of its Affiliates or any Third Party that restricts or encumbers in any way the Company's right and ability to comply with any of the Company's obligations under Article 2 hereof.

6.6 Disclaimer. Except as expressly set forth in this Agreement, EACH PARTY EXPRESSLY DISCLAIMS ANY AND ALL WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE WARRANTIES OF DESIGN, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, VALIDITY OF PATENTS, NON-INFRINGEMENT OF THE INTELLECTUAL PROPERTY RIGHTS OF THIRD PARTIES, OR ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICES; IN EACH CASE, ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT.

6.7 Limitation of Liability. EXCEPT FOR LIABILITY FOR BREACH OF ARTICLE 4, NEITHER PARTY SHALL BE ENTITLED TO RECOVER FROM THE OTHER PARTY ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL OR PUNITIVE DAMAGES IN CONNECTION WITH THIS AGREEMENT OR ANY LICENSE GRANTED HEREUNDER; *provided, however*, that this Section 6.7 shall not be construed to limit either party's indemnification obligations under Article 8.

7. TERM AND TERMINATION.

7.1 Term. The term of this Agreement (the "**Term**") shall begin on the 2019 Execution Date and, unless earlier terminated in accordance with Article 10 or this Article 7, shall continue in existence for so long as the Company or any of its Affiliates, licensees or sublicensees is developing or commercializing any F1 Product in the F1 ACT Field or BioAtla or any of its Affiliates, licensees or sublicensees is developing or commercializing any BioAtla CAB Non-ACT Product in the CAB Non-ACT Field.

7.2 Termination. This Agreement may be terminated only by mutual written agreement of the parties. In the event the parties terminate this Agreement by mutual written agreement, the parties shall also mutually agree in writing upon the consequences of such termination and the parties' respective surviving rights and obligations hereunder.

7.3 Consequences of Expiration; Accrued Obligations; Survival. Upon expiration of this Agreement in accordance with Section 7.1, the Exclusive ACT License and Exclusive Non-ACT License shall survive on a non-exclusive, fully-paid, royalty-free, irrevocable, perpetual basis. Expiration of this Agreement shall not relieve either party of any obligation or liability accruing prior to such expiration, nor shall such expiration preclude either party from pursuing all rights and remedies it may have under this Agreement, at law or in equity, with respect to breach of this Agreement. In addition, the parties' rights and obligations under Sections 3.5, 3.6, 3.7, 3.8, 3.9, 4.1, 4.2, 4.3, 6.6, 6.7 and 7.3 and Articles 8, 9 and 11 of this Agreement shall survive expiration of this Agreement.

8. INDEMNIFICATION.

8.1 Indemnification by the Company. The Company hereby agrees to save, defend, indemnify and hold harmless BioAtla, its Affiliates, its and their respective officers, directors, agents, employees, successors and assigns (the "**BioAtla Indemnitees**"), from and against any and all losses, damages, liabilities, expenses and costs, including reasonable legal expense and attorneys' fees ("**Losses**"), to which any BioAtla Indemnitee may become subject as a result of any claim, demand, action or other proceeding by any Third Party (each, a "**Claim**") to the extent such Losses arise out of or relate to: (a) the development, manufacture, use, handling, storage, sale, offer for sale, import or other disposition by or on behalf of the Company, its Affiliates, licensees or sublicensees of F1 Products, or any other exercise of the Exclusive ACT License by or on behalf of the Company, its Affiliates or sublicensees; (b) the gross negligence or willful misconduct of any Company Indemnitee (defined below); or (c) the breach by the Company of any warranty, representation, covenant or agreement made by the Company in this Agreement; except, in each case, to the extent such Losses result from the gross negligence or willful misconduct of any BioAtla Indemnitee or the breach by BioAtla of any warranty, representation, covenant or agreement made by BioAtla in this Agreement.

8.2 Indemnification by BioAtla. BioAtla hereby agrees to save, defend, indemnify and hold harmless the Company, its Affiliates and their respective officers, directors, employees, consultants and agents (the "**Company Indemnitees**") from and against any and all Losses to which any Company Indemnitee may become subject as a result of any claim, demand, action or other proceeding by any Third Party to the extent such Losses arise out of or relate to: (a) the development, manufacture, use, handling, storage, sale, offer for sale, import or other disposition by or on behalf of BioAtla, its Affiliates, licensees or sublicensees of BioAtla CAB Non-ACT Products, or any other exercise of the Exclusive Non-ACT License by or on behalf of BioAtla, its Affiliates, licensees or sublicensees; (b) the gross negligence or willful misconduct of any BioAtla Indemnitee; or (c) the breach by BioAtla of any warranty, representation, covenant or agreement made by BioAtla in this Agreement; in each case except to the extent such Losses result from the gross negligence or willful misconduct of any Company Indemnitee or the breach by the Company of any warranty, representation, covenant or agreement made by the Company in this Agreement.

8.3 Control of Defense. In the event a party (the "**Indemnified Party**") seeks indemnification under Section 8.1 or 8.2, it shall inform the other party (the "**Indemnifying Party**") of a claim as soon as reasonably practicable after it receives notice of the claim (it being understood and agreed, however, that the failure by an Indemnified Party to give notice of a claim as provided in this Section 8.3 shall not relieve the Indemnifying Party of its indemnification

obligation under this Agreement except and only to the extent that such Indemnifying Party is actually damaged as a result of such failure to give notice), shall permit the Indemnifying Party to assume direction and control of the defense of the claim (including the right to settle the claim solely for monetary consideration) using counsel reasonably satisfactory to the Indemnified Party, and shall cooperate as requested (at the expense of the Indemnifying Party) in the defense of the claim. If the Indemnifying Party does not assume control of such defense within 15 days after receiving notice of the claim from the Indemnified Party, the Indemnified Party shall control such defense and, without limiting the Indemnifying Party's indemnification obligations, the Indemnifying Party shall reimburse the Indemnified Party for all costs, including reasonable attorney fees, incurred by the Indemnified Party in defending itself within 30 days after receipt of any invoice therefor from the Indemnified Party. The party not controlling such defense may participate therein at its own expense. The party controlling such defense shall keep the other party advised of the status of such action, suit, proceeding or claim and the defense thereof and shall consider recommendations made by the other party with respect thereto. The Indemnified Party shall not agree to any settlement of such action, suit, proceeding or claim without the prior written consent of the Indemnifying Party, which shall not be unreasonably withheld, delayed or conditioned. The Indemnifying Party shall not agree to any settlement of such action, suit, proceeding or claim or consent to any judgment in respect thereof that does not include a complete and unconditional release of the Indemnified Party from all liability with respect thereto, that imposes any liability or obligation on the Indemnified Party or that acknowledges fault by the Indemnified Party without the prior written consent of the Indemnified Party. If the parties cannot agree as to the application of Section 8.1 or 8.2 to any claim, pending resolution of the dispute pursuant to Article 9, the parties may conduct separate defenses of such claims, with each party retaining the right to claim indemnification from the other party in accordance with Section 8.1 or 8.2, as applicable, upon resolution of the underlying claim.

8.4 Insurance. Each party shall procure and maintain insurance, including comprehensive or commercial general liability insurance (including contractual liability and product liability), adequate to cover its obligations hereunder and which is consistent with normal business practices of prudent companies similarly situated. It is understood that such insurance shall not be construed to create a limit of either party's liability with respect to its indemnification obligations under this Article 8 or otherwise. Each party shall provide the other party with written evidence of such insurance upon request.

9. DISPUTE RESOLUTION.

9.1 Disputes. Subject to Section 9.3, any claim, dispute, or controversy as to the breach, enforcement, interpretation or validity of this Agreement (each, a "**Dispute**") will be referred to the Chief Executive Officer of the Company and the Chief Executive Officer of BioAtla (the "**Executives**") for attempted resolution. In the event such Executives are unable to resolve such Dispute within 30 days of such Dispute being referred to them, then, upon the written request of either party to the other party, the Dispute shall be subject to arbitration in accordance with Section 9.2, except as expressly set forth in Section 9.3.

9.2 Arbitration.

(a) Claims. Subject to Section 9.3 below, any Dispute that is not resolved under Section 9.1 within the applicable 30-day period shall be resolved by final and binding arbitration administered by JAMS (the “**Administrator**”) in accordance with its then-effective Comprehensive Arbitration Rules and Procedures (the “**Rules**”), except to the extent any such Rule conflicts with the express provisions of this Section 9.2. (Capitalized terms used but not otherwise defined in this Agreement shall have the meanings provided in the Rules.) The Arbitration shall be conducted by three neutral arbitrators, each of whom shall be a lawyer with at least 15 years of experience with a law firm or corporate law department of over 25 lawyers and at least 10 years representing (either as outside counsel or in-house counsel) companies in the pharmaceutical or biotechnology industry in connection with licensing transactions, provided that no such individual shall be a current or former employee or director, or a current stockholder, of either party or any of their respective Affiliates. Each party shall appoint one arbitrator, and the two so-appointed arbitrators shall jointly nominate the third arbitrator who shall become the chairman. If such nomination of the chairman does not take place within 30 days from the nomination of the last co-arbitrator, the chairman shall be selected in accordance with the Rules. The arbitration and all associated discovery proceedings and communications shall be conducted in English, and the arbitration shall be held in New York, New York, USA.

(b) Discovery. Within 30 days after selection of the third arbitrator, the arbitrators shall conduct the Preliminary Conference. In addressing any of the subjects within the scope of the Preliminary Conference, the arbitrators shall take into account both the desirability of making discovery efficient and cost-effective and the needs of the parties for an understanding of any legitimate issue raised in the Arbitration. In that regard, the parties agree to the application of the E-Discovery procedures set forth in Rule 16.2(c) of the JAMS Expedited Procedures. In addition, each party shall have the right to take up to 40 hours of deposition testimony, including expert deposition testimony.

(c) Hearing; Decision. The Hearing shall commence within 60 days after the discovery cutoff. The arbitrators shall require that each party submit concise written statements of position and shall permit the submission of rebuttal statements, subject to reasonable limitations on the length of such statements to be established by the arbitrators. The Hearing shall be no longer than 5 Business Days in duration. The arbitrators shall also permit the submission of expert reports. The arbitrators shall render the Award within 30 days after the arbitrators declares the Hearing closed, and the Award shall include a written statement describing the essential findings and conclusions on which the Award is based, including the calculation of any damages awarded. The arbitrators will, in rendering their decision, apply the substantive law of the State of California, USA, without giving effect to its principles of conflicts of law. The arbitrators’ authority to award special, incidental, consequential or punitive damages shall be subject to the limitation set forth in Section 6.7. The Award rendered by the arbitrators shall be final, binding and non-appealable, and judgment may be entered upon it in any court of competent jurisdiction.

(d) Costs. Each party shall bear its own attorney’s fees, costs, and disbursements arising out of the arbitration, and shall pay an equal share of the fees and costs of the arbitrator.

9.3 Court Actions. Nothing contained in this Agreement shall deny either party the right to seek injunctive or other equitable relief from a court of competent jurisdiction in the context of a *bona fide* emergency or prospective irreparable harm, and such an action may be filed and maintained notwithstanding any ongoing discussions between the parties or any ongoing arbitration proceeding. In addition, either party may bring an action in any court of competent jurisdiction to resolve disputes pertaining to the validity, construction, scope, enforceability, infringement or other violations of Patent Rights or other intellectual property rights, and no such claim shall be subject to arbitration pursuant to Section 9.2.

10. NATURE AND EFFECTIVENESS OF AGREEMENT.

This Agreement is binding upon BioAtla and Company as of the 2019 Execution Date, and this Article 10 and 11 are effective as of the 2019 Execution Date, but the remainder of this Agreement shall become effective only when Company has entered into agreements with the holder of each note listed on **Exhibit C** to modify or convert each of said notes. Company shall provide to BioAtla written notice not later than 2 business days after execution of the final noteholder agreement and the Restatement Date shall be the date such notice is delivered (the “**Restatement Date**”). If Company has not provided such written notice on or before January 5th, 2020, or such later date as the parties mutually agree (the “**End Date**”), either party shall have the right to withdraw from and terminate this Agreement within 5 days after the End Date upon written notice to the other party and, effective upon such withdrawal, the Original Agreement shall remain in full force and effect on the same terms and conditions as it existed before execution of this Agreement and this Agreement shall automatically become null and void *ab initio*. Notwithstanding anything to the contrary, the parties understand and agree that, if the Company is unable to achieve the Restatement Date by the End Date, then BioAtla shall have the right to withdraw from and terminate this Agreement within 5 days after the End Date upon written notice to Company and, if such withdrawal and termination occurs, the Parties hereby covenant and agree that effective as of such withdrawal and termination the Original Agreement shall be terminated with immediate effect, in accordance with Section 9.2 thereof, and the parties further agree that such termination of the Original Agreement shall not relieve either party of any obligation or liability accruing thereunder prior to such termination, nor shall such termination preclude either party from pursuing all rights and remedies it may have under the Original Agreement, at law or in equity, with respect to breach of the Original Agreement, and the parties’ rights and obligations under Sections 6.1, 6.2, and 6.3 and Articles 6 (Confidentiality), 10 (Indemnification), 11 (Dispute Resolution), and 12 (Miscellaneous) of the Original Agreement shall survive such termination of the Original Agreement.

11. MISCELLANEOUS.

11.1 Rights Upon Bankruptcy. All rights and licenses granted under or pursuant to this Agreement are, and shall otherwise be deemed to be, for purposes of Section 365(n) of Title 11 of the United States Code and other similar laws in any jurisdiction outside the US (collectively, the “**Bankruptcy Laws**”), licenses of rights to be “intellectual property” as defined under the Bankruptcy Laws. If a case is commenced during the Term by or against a party under Bankruptcy Laws then, unless and until this Agreement is rejected as provided in such Bankruptcy Laws, such party (in any capacity, including debtor-in-possession) and its successors and assigns (including a trustee) shall perform all of the obligations provided in this Agreement to be performed by such

party. If a case is commenced during the Term by or against a party under the Bankruptcy Laws, this Agreement is rejected as provided in the Bankruptcy Laws and the other party elects to retain its rights hereunder as provided in the Bankruptcy Laws, then the party subject to such case under the Bankruptcy Laws (in any capacity, including debtor-in-possession) and its successors and assigns (including a Title 11 trustee), shall provide to the other party copies of all Information necessary for such other party to prosecute, maintain and enjoy its rights under the terms of this Agreement promptly upon such other party's written request therefor. All rights, powers and remedies of the non-bankrupt party as provided herein are in addition to and not in substitution for any and all other rights, powers and remedies now or hereafter existing at law or in equity (including the Bankruptcy Laws) in the event of the commencement of a case by or against a party under the Bankruptcy Laws.

11.2 Governing Law. This Agreement shall be governed by and construed in accordance with the laws of the State of California, USA, excluding its conflicts of laws principles.

11.3 Entire Agreement; Amendments. This Agreement (including the Exhibits hereto) is both a final expression of the parties' agreement and a complete and exclusive statement with respect to all of its terms. This Agreement supersedes all prior and contemporaneous agreements and communications, whether oral, written or otherwise, concerning any and all matters contained herein, between the Company and BioAtla. The Exhibits to this Agreement are incorporated herein by reference and shall be deemed a part of this Agreement. This Agreement may be amended, or any term hereof modified, only by a written instrument duly executed by authorized representatives of both parties hereto.

11.4 Non-Waiver. The failure of a party to insist upon strict performance of any provision of this Agreement or to exercise any right arising out of this Agreement shall neither impair that provision or right nor constitute a waiver of that provision or right, in whole or in part, in that instance or in any other instance. Any waiver by a party of a particular provision or right shall be in writing, shall be as to a particular matter and, if applicable, for a particular period of time and shall be signed by such party.

11.5 Assignment. Except as expressly provided hereunder, neither this Agreement nor any rights or obligations hereunder may be assigned or otherwise transferred by either party without the prior written consent of the other party (which consent shall not be unreasonably withheld); *provided, however*, that, (i) the Company may assign this Agreement and its rights and obligations hereunder without BioAtla's consent, and (ii) BioAtla may assign this Agreement and its rights and obligations hereunder without the Company's consent:

(a) in connection with the transfer or sale of all or substantially all of the business of such party to which this Agreement relates to a Third Party ("**Third Party Acquirer**"), whether by merger, sale of stock, sale of assets or otherwise (each, a "**Sale Transaction**"), provided that in the event of a Sale Transaction (whether this Agreement is actually assigned or is assumed by the Third Party Acquirer or the surviving corporation resulting from such Sale Transaction by operation of law (*e.g.*, in the context of a reverse triangular merger)), intellectual property rights of the Third Party Acquirer that existed prior to the Sale Transaction shall not be included in the technology licensed hereunder or otherwise subject to this Agreement; or

(b) to an Affiliate, provided that the assigning party shall remain liable and responsible to the non-assigning party hereto for the performance and observance of all such duties and obligations by such Affiliate.

The rights and obligations of the parties under this Agreement shall be binding upon and inure to the benefit of the successors and permitted assigns of the parties, and the name of a party appearing herein will be deemed to include the name of such party's successors and permitted assigns to the extent necessary to carry out the intent of this section. Any assignment not in accordance with this Agreement shall be void.

11.6 Force Majeure. Each party shall be excused from liability for the failure or delay in performance of any obligation under this Agreement by reason of any event beyond such party's reasonable control, including but not limited to Acts of God, fire, flood, explosion, earthquake, or other natural forces, war, civil unrest, acts of terrorism, accident, destruction or other casualty, any lack or failure of transportation facilities, any lack or failure of supply of raw materials, any strike or labor disturbance, or any other event similar to those enumerated above. Such excuse from liability shall be effective only to the extent and duration of the event(s) causing the failure or delay in performance and provided that the party has not caused such event(s) to occur. The affected party shall notify the other party of such force majeure circumstances as soon as reasonably practical, and shall promptly undertake all reasonable efforts necessary to cure such force majeure circumstances.

11.7 Severability. If any one or more of the provisions contained in this Agreement is held invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions contained herein shall not in any way be affected or impaired thereby, unless the absence of the invalidated provision(s) adversely affects the substantive rights of the parties. The parties shall in such an instance use their best efforts to replace the invalid, illegal or unenforceable provision(s) with valid, legal and enforceable provision(s) which, insofar as practical, implement the purposes of this Agreement.

11.8 Notices. Any notice to be given under this Agreement must be in writing and delivered either in person, by any method of mail (postage prepaid), or by internationally-recognized express courier or facsimile, to the party to be notified at its address(es) given below, or at any address such party has previously designated by prior written notice to the other. Notice shall be deemed sufficiently given for all purposes upon the earliest of: (a) the date of actual receipt; (b) if mailed, three (3) days after the date of postmark; (c) if delivered by express courier, the next Business Day the express courier regularly makes deliveries; (d) if delivered by email, upon the date upon which the receipt of such email is confirmed by return email or other written or electronic confirmation; or (e) if delivered by facsimile, upon confirmation of successful transmission.

11.9 Relationship between the Parties. The parties' relationship, as established by this Agreement, is solely that of independent contractors. This Agreement does not create any partnership, joint venture or similar business relationship between the parties. Neither party is a legal representative of the other party, and neither party may assume or create any obligation, representation, warranty or guarantee, express or implied, on behalf of the other party for any purpose whatsoever.

11.10 No Third Party Rights. The provisions of this Agreement are for the exclusive benefit of the parties, and no other person or entity shall have any right or claim against either party by reason of these provisions or be entitled to enforce any of these provisions against either party.

11.11 Interpretation. The headings of clauses contained in this Agreement preceding the text of the sections, subsections and paragraphs hereof are inserted solely for convenience and ease of reference only and shall not constitute any part of this Agreement, or have any effect on its interpretation or construction. All references in this Agreement to the singular shall include the plural where applicable. The term "including" or "includes" as used in this Agreement means including, without limiting the generality of any description preceding such term, and the word "or" has the inclusive meaning represented by the phrase "and/or." Unless otherwise specified, references in this Agreement to any section shall include all subsections and paragraphs in such Section and references in this Agreement to any subsection shall include all paragraphs in such subsection. All references to days in this Agreement shall mean calendar days, unless otherwise specified. Ambiguities and uncertainties in this Agreement, if any, shall not be interpreted against either party, irrespective of which party may be deemed to have caused the ambiguity or uncertainty to exist. This Agreement has been prepared in the English language, and the English language shall control its interpretation. In addition, all notices required or permitted to be given hereunder, and all written, electronic, oral or other communications between the parties regarding this Agreement shall be in the English language. In the event of any inconsistency or conflict between the English version of this Agreement and any translation of this Agreement into any other language, the English version shall control.

11.12 Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original document, and all of which, together with this writing, shall be deemed one instrument. This Agreement may be executed by facsimile or PDF signatures, which signatures shall have the same force and effect as original signatures.

[Signature page follows.]

IN WITNESS WHEREOF, the parties have duly executed this Exclusive License Agreement as of the 2019 Execution Date.

GLOBAL CO-DEVELOPMENT AND COLLABORATION AGREEMENT

This Global Co-Development and Collaboration Agreement (this “Agreement”) is entered into as of April 8, 2019 (the “Effective Date”), by and among BioAtla, LLC, a Delaware limited liability company (“BioAtla”), BeiGene, Ltd., a Cayman Islands corporation (“BeiGene Cayman”) and BeiGene Switzerland GmbH, a company organized under the laws of Switzerland having an address of c/o VISCHER AG, Aeschenvorstadt 4, 4051 Basel, Switzerland (“BeiGene Switzerland”) and together with BeiGene Cayman and its Affiliates, collectively, “BeiGene”). BeiGene and BioAtla are each referred to herein by name or as a “Party”, or, collectively, as the “Parties”.

INTRODUCTION

- 1 BioAtla has discovered and has been developing the Candidate known as CAB-CTLA-4 (BA3071), which Candidate is Directed against CTLA-4.
- 2 Pursuant to this Agreement, BioAtla hereby grants to BeiGene, under a co-development and collaboration structure, co-exclusive rights in the Territory with respect to the development and manufacture of the Products and exclusive rights in the Territory with respect to the commercialization of the Products, on the terms and subject to the conditions set forth herein.

NOW, THEREFORE, in consideration of the respective representations, warranties, covenants and agreements contained herein, and for other valuable consideration, the receipt and adequacy of which are hereby acknowledged, BioAtla and BeiGene hereby agree as follows:

Article I Definitions

Section 1.1 Definitions. When used in this Agreement, each of the following terms shall have the meanings set forth in this Article I.

“Accounting Standards” means (a) GAAP (United States Generally Accepted Accounting Principles); or (b) IFRS (International Financial Reporting Standards), in either case, consistently applied by the applicable Party or other Person.

“Affiliate” means, as to any Person, any other Person that, directly or indirectly, controls, is controlled by or is under common control with such Person, as the case may be, for so long as such control exists. As used in this section, “control” means: (a) to possess, directly or indirectly, the power to direct the management and policies of a Person, whether through ownership of voting securities or by contract relating to voting rights or corporate governance; or (b) direct or indirect beneficial ownership of at least fifty percent (50%) (or such lesser percentage that is the maximum allowed to be owned by a foreign Person in a particular jurisdiction and is sufficient to grant the holder of such voting stock or interest the power to direct the management and policies of such entity) of the voting share capital in a Person. For purposes of this Agreement, neither BeiGene nor BioAtla shall be deemed an Affiliate of the other Party.

“Annual Net Sales” means Net Sales by BeiGene, its Affiliates and Selling Parties of all Products in a particular Calendar Year in the Territory. For clarity, subject to Section 3.4, Annual Net Sales includes any Net Sales by BeiGene, its Affiliates and Selling Parties of any Companion Diagnostics.

“Antitrust Law” means the Hart-Scott-Rodino Antitrust Improvements Act of 1976 and the rules and regulations promulgated thereunder, the Sherman Act, as amended, the Clayton Act, as amended, the Federal Trade Commission Act, as amended, and any other Laws related to merger control or designed to prohibit, restrict or regulate actions having the purpose or effect of monopolization or restraint of trade, in the Territory.

“BeiGene Collaboration Intellectual Property” means BeiGene Collaboration Know-How and BeiGene Collaboration Patents, collectively.

“BeiGene Collaboration Know-How” means any Collaboration Know-How that is discovered, developed, generated or invented during the Term solely by or on behalf of BeiGene or its Affiliates.

“BeiGene Collaboration Patents” means any Patents that contain one or more claims that Cover any BeiGene Collaboration Know-How.

“BeiGene Combination Product Know-How” means any Know-How Controlled by BeiGene or any of its Affiliates as of the Effective Date or thereafter during the Term that relates to any Combination Product that includes a Candidate and one more other proprietary compounds that are owned or Controlled by BeiGene; provided, that, if any such Know-How relates solely to the Candidate, it shall not be BeiGene Combination Product Know-How for purposes of this Agreement.

“BeiGene Combination Product Patents” means any Patents Controlled by BeiGene or any of its Affiliates as of the Effective Date or thereafter during the Term that contains one or more claims that Cover any Combination Product that includes a Candidate and one more other proprietary compounds that are owned or Controlled by BeiGene.

“BeiGene Intellectual Property” means BeiGene Know-How, BeiGene Patents and BeiGene’s interest in Joint IP, collectively.

“BeiGene Know-How” means any Know-How that is (a) Controlled by BeiGene as of the Effective Date or during the Term; and (b) necessary or useful for the Development, Manufacture or Commercialization of the Products; including all BeiGene Collaboration Know-How but excluding BeiGene Combination Product Know-How.

“BeiGene Patents” means any Patents, other than BeiGene Collaboration Patents and BeiGene Combination Product Patents, that (a) are Controlled by BeiGene as of the Effective Date or during the Term; (b) contain one or more claims that Cover the Candidate and/or any Product (including its chemical composition, formulation, its method of delivery or use, and/or Manufacture) and (c) are necessary or useful to Develop, Manufacture, Commercialize and otherwise exploit the Products. For purposes of clarity, the BeiGene Patents shall include the Patents listed on Exhibit B attached hereto.

“BeiGene Territory” means the countries listed on Exhibit A attached hereto.

“beneficial owner,” “beneficially owns,” “beneficial ownership” and terms of similar import used in this Agreement shall, with respect to a Person, have the meaning set forth in Rule 13d-3 under the Securities Exchange Act of 1934, as amended (a) assuming the full conversion into, and exercise and exchange for, shares of common stock, other voting stock or any securities exercisable for common stock or other voting stock beneficially owned by such Person and (b) determined without regard for the number of days in which such Person has the right to acquire such beneficial ownership.

“BioAtla Collaboration Intellectual Property” means BioAtla Collaboration Know-How and BioAtla Collaboration Patents, collectively.

“BioAtla Collaboration Know-How” means any Collaboration Know-How, other than CAB Know-How, that is discovered, developed, generated or invented during the Term solely by or on behalf of BioAtla or its Affiliates.

“BioAtla Collaboration Patents” means any Patents, other than CAB Patents, that contain one or more claims that Cover any BioAtla Collaboration Know-How.

“BioAtla Intellectual Property” means BioAtla Know-How, BioAtla Patents and BioAtla’s interest in Joint IP, collectively.

“BioAtla Know-How” means any Know-How that is (a) Controlled by BioAtla as of the Effective Date or during the Term, and (b) necessary or useful for the Development, Manufacture or Commercialization of any Products, including all BioAtla Collaboration Know-How but excluding CAB Know-How.

“BioAtla Patents” means any Patents, other than CAB Patents, that (a) are Controlled by BioAtla as of the Effective Date or during the Term, (b) contain one or more claims that Cover the Candidate and/or any Product (including its chemical composition, formulation, its method of delivery or use, and/or Manufacture) and (c) are necessary or useful to Develop, Manufacture, Commercialize and otherwise exploit the Products. For purposes of clarity, the BioAtla Patents shall include the Patents listed on Exhibit D attached hereto and all BioAtla Collaboration Patents.

“BioAtla Platform Technology” means the BioAtla proprietary CAB and CIAOTM discovery and evolution technologies and Know-How (including screening technology and Know-How) that is generally applicable to CABs.

“Biologics License Application” or “BLA” means a Biologics License Application (as more fully described in U.S. 21 C.F.R. Part 601.20 or its successor regulation) and all amendments and supplements thereto submitted to the FDA, or any equivalent filing, including an MAA, in a country or regulatory jurisdiction other than the U.S. with the applicable Regulatory Authority, or any similar application or submission for Regulatory Approval filed with a Regulatory Authority to obtain marketing approval for a biologic product in a country or in a group of countries.

“Business Day” means a day other than a Saturday or Sunday or any other day on which commercial banks in San Diego, California and Beijing, China are authorized or required by applicable Law to close.

“CAB Know-How” means any Know-How that (a) is Controlled by BioAtla as of the Effective Date or during the Term, including the BioAtla Platform Technology, and (b) is used by BioAtla for the actual or potential discovery of Conditionally Active Biologics.

“CAB Patents” means any Patents that (a) are Controlled by BioAtla as of the Effective Date or during the Term, and (b) contain one or more claims that Cover any CAB Know-How but do not contain any claims that Cover any Candidate.

“Calendar Quarter” means a calendar quarter ending on the last day of March, June, September or December; provided, however, that the first Calendar Quarter shall begin on the Effective Date and end on the last day of the calendar quarter during which the Effective Date occurs; provided, that, the final Calendar Quarter shall end on the last day of the Term.

“Calendar Year” means a period of time commencing on January 1 and ending on the following December 31; provided, however, that the first Calendar Year shall begin on the Effective Date and end on December 31 of the calendar year during which the Effective Date occurs; provided, that, the final Calendar Year shall end on the last day of the Term.

“Candidate” means the compound known and designated as CAB-CTLA-4 (BA3071), as more specifically described on Exhibit C, including any derivatives, fragments or conjugates thereof.

“Change of Control” of a Party means any of the following, in a single transaction or a series of related transactions: (a) the sale or disposition of all or substantially all of the assets of such Party to a Third Party, (b) the direct or indirect acquisition by a Third Party (other than an employee benefit plan (or related trust) sponsored or maintained by such Party or any of its Affiliates) of beneficial ownership of more than fifty percent (50%) of the then-outstanding common shares or voting power of such Party or any direct or indirect entity which holds, directly or indirectly, beneficial ownership of more than fifty percent (50%) of the then-outstanding common shares or voting power of such Party (a “Parent Entity”), or (c) the merger or consolidation of such Party or any Parent Entity with or into a Third Party, unless, following such merger or consolidation, the stockholders of such Party or Parent Entity immediately prior to such merger or consolidation beneficially own directly or indirectly more than fifty percent (50%) of the then-outstanding common shares or voting power of the entity resulting from such merger or consolidation. Notwithstanding the foregoing an investment transaction by venture capital or other financial investors not engaged in the pharmaceutical or biotechnology business and not otherwise affiliated with a pharmaceutical or biotechnology company, the purpose of which is to raise capital for a Party, shall not be deemed to be a Change of Control for purposes of this Agreement.

“Clinical Trial” means a Phase I Clinical Trial, a Phase II Clinical Trial, a Phase III Clinical Trial, a Pivotal Clinical Trial, a Phase IV Clinical Trial or a combination of any of the foregoing clinical trials.

“Code” means the United States Internal Revenue Code of 1986, as amended.

“Collaboration Activities” means the activities performed or to be performed by a Party or Parties, as the case may be, relating to the Development, Manufacture or Commercialization of the Products under this Agreement, including in the exercise of any license granted under this Agreement relating to the Products.

“Collaboration Intellectual Property” means Collaboration Know-How and Collaboration Patents, collectively.

“Collaboration Know-How” means any Know-How that is discovered, developed, generated or invented during the Term in the conduct of Collaboration Activities pursuant to this Agreement, either (i) solely by or on behalf of BeiGene or its Affiliates, (ii) solely by or on behalf of BioAtla or its Affiliates or (iii) jointly by or on behalf of Persons described in the foregoing clauses (i) and (ii).

“Collaboration Patents” means any Patents that contain one or more claims that Cover Collaboration Know-How.

“Commercialization” or “Commercialize” means any and all activities directed to using, marketing, promoting, distributing, importing, offering to sell or selling a product, after or in expectation of receipt of Regulatory Approval for such product (but excluding Development), including (a) Manufacturing, marketing, promoting, detailing, distributing, importing, exporting, selling and offering to sell such product; (b) order processing, handling of returns and recalls, booking of sales and transporting such product for commercial sale; (c) the conduct of any post-approval Clinical Trials involving such product; (d) interacting with Regulatory Authorities regarding the above; and (e) seeking and obtaining pricing approvals and reimbursement approvals (as applicable) for that product.

“Commercially Reasonable Efforts” means, with respect to the obligations of a performing Party relating to the Development, Manufacture and Commercialization of a Candidate or Product under this Agreement, the carrying out of such obligations with efforts that are consistent with the efforts used by a biopharmaceutical company of similar size and market capitalization as such Party in the exercise of its commercially reasonable business practices relating to the Development, Manufacture and Commercialization of a pharmaceutical or biologic compound or product, as applicable, at a similar stage in its research, development or commercial life as the relevant Candidate or Product, and that has commercial and market potential similar to the relevant Candidate or Product, taking into account issues of intellectual property coverage, safety and efficacy, stage of development, product profile, competitiveness of the marketplace, proprietary position, regulatory exclusivity, anticipated or approved labeling, present and future market and commercial potential, the likelihood of receipt of Regulatory Approval and other regulatory requirements, profitability (including pricing and reimbursement status achieved or likely to be achieved), amounts payable to licensors of patent or other intellectual property rights, legal issues, Manufacturing, difficulty in Manufacturing the relevant Candidate or Product and alternative Third Party products in the marketplace of the relevant Candidate or Product to be marketed.

“Companion Diagnostic” means a biomarker or diagnostic test that is developed by or on behalf of a Party, or jointly by the Parties, in the conduct of Collaboration Activities as a companion diagnostic for use with a Product in accordance with the Regulatory Approval(s) therefor to generate a result for the purposes of diagnosing a disease or condition, or to facilitate the application of such Product in the cure, mitigation, treatment, or prevention of disease, including a biomarker or diagnostic test used to diagnose the likelihood that a specific patient will contract a certain disease or condition or to predict which patients are suitable candidates for a specific form of therapy using such Product.

“Conditionally Active Biologics” or “CAB” means any conditionally active biologic molecule that induces a tumor selective increase in any Potential Target antigen binding.

“Confidential Information” means, subject to Article XI, (a) all confidential or proprietary Know-How or other information relating to the Collaboration, and (b) all other confidential or proprietary Know-How or other information (whether or not patentable) actually disclosed by one Party or any of its Affiliates to the other Party or any of its Affiliates pursuant to this Agreement. For purposes of clarity, (1) any scientific, technical, manufacturing or financial information, including Data and information, that is disclosed through an audit or other report, shall constitute Confidential Information of the Disclosing Party and (2) any combination of Confidential Information shall not be considered to be in the public domain or in the possession of the Receiving Party merely because individual elements of such Confidential Information are in the public domain or in the possession of the Receiving Party unless the combination itself and its principles of operation are in the public domain or in the possession of the Receiving Party. Notwithstanding anything herein to the contrary, the terms of this Agreement and all Joint Inventions shall constitute Confidential Information of each Party.

“Control” or “Controlled” means, with respect to any (a) Know-How or other information or materials, (b) compound, or (c) intellectual property right, the possession (whether by license (other than a license granted under this Agreement) or ownership) by a Party of the ability to grant to the other Party access or a license, as provided herein, without violating the terms of any agreement with any Third Party existing as of the Effective Date or thereafter during the Term. Notwithstanding the foregoing, for the purpose of defining whether intellectual property, Patents, Know-How or Confidential Information is Controlled by a Party, if such intellectual property, Patents, Know-How or Confidential Information is first acquired, licensed or otherwise made available to such Party after the Effective Date and if the use, practice or exploitation thereof by or on behalf of the other Party, its Affiliates or sublicensees would require the first Party to pay any amounts to the Third Party from which the first Party acquired, licensed or otherwise obtained such intellectual property, Patents, Know-How or Confidential Information (“Additional Amounts”), such intellectual property, Patents, Know-How or Confidential Information shall be deemed to be Controlled by the first Party only if the other Party agrees to pay (if necessary) and does in fact pay all Additional Amounts with respect to such other Party’s use of or license to such intellectual property, Patents, Know-How or Confidential Information to the extent specified in this Agreement.

“Cover,” “Covering” or “Covered” means that, with respect to a product or technology and a Patent, but for ownership of or a license under such Patent, the Development, Manufacture, Commercialization or other use of such product or practice of such technology by a Person would infringe a claim of such Patent or, with respect to a claim included in any patent application, would infringe such claim if such patent application were to issue as a patent.

“Damages” means all claims, threatened claims, damages, losses, suits, proceedings, liabilities, costs (including reasonable legal expenses, costs of litigation and reasonable attorney’s fees), or judgments, whether for money or equitable relief, of any kind; provided that no Party shall be liable to hold harmless or indemnify the BeiGene Indemnified Parties or BioAtla Indemnified Parties, as applicable, for any claims, threatened claims, damages, losses, suits, proceedings, liabilities, costs or judgments for punitive or exemplary damages, except to the extent the Party seeking indemnification is actually liable to a Third Party for such punitive or exemplary damages in connection with a Claim by such Third Party.

“Data” means any and all research data, results, pharmacology data, medicinal chemistry data, preclinical data, market research, clinical data (including investigator reports (both preliminary and final), statistical analysis, expert opinions and reports, safety and other electronic databases), in any and all forms, including files, reports, raw data, source data (including patient medical records and original patient report forms, but excluding patient-specific data to the extent required by applicable Laws), in each case, generated by or on behalf of a Party with respect to the Candidate or any Product pursuant to this Agreement.

“Develop” or “Development” means all research, preclinical, non-clinical and clinical development activities, including activities relating to screening, assays, test method development and stability testing, toxicology, pharmacology, formulation, quality assurance/quality control development, the conduct of Clinical Trials, technology transfer, statistical analysis, process development and scale-up, pharmacokinetic studies, data collection and management, report writing and other pre-Regulatory Approval activities. For clarity, Development does not include any Manufacture or Commercialization activities.

“Development Plan” means a development plan and the related Development Budget for the Development activities to be conducted with respect to a Candidate or a Product pursuant to this Agreement as approved by the Parties, and as amended from time to time pursuant to Section 3.1(a); it being understood and agreed that, prior to the POC Milestone Date, the Development of the Candidates and the Products shall be governed by the Development Plan attached hereto as Schedule 3.1.

“Direct Cost” means, with respect to certain Collaboration Activities hereunder, the direct expenses paid or payable by either Party or its Affiliates to Third Parties and employee expenses calculated in accordance with the applicable FTE Rate that are specifically identifiable and incurred to conduct such Collaboration Activities hereunder and have been recorded in accordance with the Accounting Standards; provided, however, that solely with respect to employee expenses that are included as Direct Costs, if there is a conflict between the applicable FTE Rate and what would have been recorded in accordance with Accounting Standards, the FTE Rate shall apply.

“Directed” means, when used to describe the relationship between a molecule and a Target, that the molecule (a) specifically binds to such Target (or a portion thereof) and (b) exerts its diagnostic, prophylactic, therapeutic or biological effect in whole or in part through specifically binding to such Target (or such portion thereof).

“EMA” means the European Medicines Agency and any successor entity thereto.

“Executive Officers” means BeiGene’s Chief Executive Officer (or the officer or employee of BeiGene then serving in a substantially equivalent capacity) or his designee and BioAtla’s President (or the officer or employee of BioAtla then serving in a substantially equivalent capacity) or his designee; provided that any such designee must have decision-making authority on behalf of the applicable Party.

“FDA” means the United States Food and Drug Administration, or any successor agency thereof.

“FDCA” means the United States Federal Food, Drug, and Cosmetic Act, and the regulations promulgated thereunder, each as amended from time to time.

“Field” means the diagnosis, prevention, palliation or treatment of diseases in humans or animals.

“First Commercial Sale” means the first commercial sale of a Product or Generic Product, as applicable, by a Selling Party to a Third Party following receipt of applicable Regulatory Approval of such Product or Generic Product, as applicable, in such country; provided, that, (a) the provision of a Product or Generic Product, as applicable, for Clinical Trial purposes shall not constitute a First Commercial Sale, and (b) on a country-by-country basis, any named patient sales, expanded access sales or similar sales to Third Parties by the Selling Parties prior to receipt of Regulatory Approval of a Product or Generic Product, as applicable, in any country that are sold at or below such Selling Party’s cost of goods for a Product or Generic Product, as applicable, shall not be included in Net Sales and shall not be deemed to trigger the “First Commercial Sale” for purposes of commencing the Royalty Term.

“FTE” means the equivalent of the work of one (1) full-time employee of a Party or its Affiliates for one (1) year (consisting of [***] hours per year) in directly conducting Development, Manufacturing or Commercialization activities hereunder. Any Party’s employee who devotes fewer than [***] hours per year on the applicable activities shall be treated as an FTE on a pro-rata basis, calculated by dividing the actual number of hours worked by such employee on such activities by [***]. Any employee who devotes more than [***] hours per year on the applicable activities shall be treated as one (1) FTE. For the avoidance of doubt, FTE shall not include the work of general corporate or administrative personnel, except for the portion of such personnel’s work time actually spent on conducting scientific, technical or commercial activities directly related to the Development, Manufacture or Commercialization of the Products.

“FTE Rate” means, during the Term: (a) with respect to Development activities, [***] per FTE and (b) with respect to Commercialization activities, [***] per FTE. On January 1, 2020 and on January 1st of each subsequent Calendar Year, the foregoing rate shall be increased for the Calendar Year then commencing by the percentage increase, if any, in the Consumer Price

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

Index (“CPI”) as of December 31 of the then most recently completed Calendar Year with respect to the level of the CPI on December 31, 2018. As used in this definition, Consumer Price Index or CPI means the Consumer Price Index – Urban Wage Earners and Clerical Workers, US City Average, All Items, 1982-84 = 100, published by the United States Department of Labor, Bureau of Labor Statistics (or its successor equivalent index). The FTE Rate includes the applicable employee’s wages, bonuses, incentive compensation, equity incentive compensation, employer paid taxes, benefits, perks and other forms of compensation that would otherwise be considered the cost of an employee.

“Generic Product” means, any pharmaceutical or biological product (i) that contains (A) an identical active ingredient(s) as a Product, or (B) a “highly similar” active ingredient(s) as such Product, as the phrase “highly similar” is used in 42 U.S.C. § 262(i)(2), and subject to the factors set forth in FDA’s Guidance for Industry, “Quality Considerations in Demonstrating Biosimilarity to a Reference Protein Product,” (February 2012), at Section VI, and any successor FDA guidance thereto, (ii) for which Regulatory Approval is obtained by referencing the Regulatory Documentation of such Product, (iii) is approved for use in such country pursuant to a Regulatory Approval process governing approval of interchangeable or biosimilar biologics as described in 42 U.S.C. §§ 262, or an equivalent process for Regulatory Approval in any country outside the United States, or any other equivalent provision that comes into force, or is the subject of a notice with respect to such Product under 42 U.S.C. § 262(l)(2) or any other equivalent provision that comes into force in such country, and (iv) is sold in the same country as such Product by any Third Party that is not a Licensee Partner of BeiGene or any of its Affiliates or Selling Parties and did not purchase such product in a chain of distribution that included any of BeiGene or any of its Affiliates or Selling Parties.

“IND” means any Investigational New Drug application, filed with the FDA pursuant to Part 312 of Title 21 of the U.S. Code of Federal Regulations, including any supplements or amendments thereto. References herein to IND shall include, to the extent applicable, any comparable filing(s) outside the United States (such as a Clinical Trial Application in the countries that are officially recognized as member states of the EU).

“IND Filing” means the filing of an IND for a Candidate in the Territory.

“Indication” means any human disease, condition or syndrome, or sign or symptom of, or associated with, a human disease, condition or syndrome in a particular target patient population; it being understood that (x) different line therapies for the same disease or condition, such as (for example) first line treatment for a disease or condition as compared to second line treatment for such same disease or condition, shall not be deemed to be a different Indication and (y) all variants of a single disease or condition (e.g., variants of colon cancer or variants of prostate cancer), whether classified by severity or otherwise, shall be treated as the same Indication.

“IO” means immuno-oncology.

“Joint IP” means Joint Inventions and Joint Patents, collectively.

“Joint Inventions” means all Collaboration Know-How that is discovered, developed, generated or invented by or on behalf of both Parties or their respective Affiliates.

“Joint Patents” means any Patents that contain one or more claims that Cover any Joint Invention.

“Know-How” means any tangible or intangible trade secrets, know-how, expertise, discoveries, inventions, information, data or materials, including ideas, concepts, formulas, methods, procedures, designs, technologies, compositions, plans, applications, technical data, assays, manufacturing information or data, samples, chemical and biological materials and all derivatives, modifications and improvements thereof.

“Law” means any law, statute, rule, regulation, ordinance or other pronouncement having the effect of law, of any federal, national, multinational, state, provincial, county, city or other political subdivision, as from time to time enacted, repealed or amended, including Good Clinical Practices and adverse event reporting requirements, guidance from the International Conference on Harmonization or other generally accepted conventions, the FDCA and similar laws and regulations in countries outside the United States, and all other rules, regulations and requirements of the FDA and other applicable Regulatory Authorities that govern or otherwise apply to a Party’s activities in connection with this Agreement.

“Lead Party” means BeiGene; provided, that, (a) prior to the POC Milestone Date, BioAtla shall be the Lead Party solely with respect to the conduct of (i) any pre-clinical studies, (ii) any monotherapy Clinical Trials, and (iii) the IO+IO combination therapy Clinical Trials and (b) on and after the POC Milestone Date, BeiGene shall be the Lead Party for the conduct of all Collaboration Activities, including all Development, Manufacturing and Commercialization activities with respect to Candidates and the Products.

“Licensee Partner” means, with respect to a Party, any Third Party to whom such Party or any of its Affiliates or any other Licensee Partner grants a sublicense or license with respect to the Development, Manufacture or Commercialization of the Products in the Field under the rights, granted to such Party or Affiliate hereunder, in each case excluding (a) Third Party Contractors and (b) wholesale distributors or any other Third Party that purchases any Product in an arm’s-length transaction, where such Third Party does not have a sublicense to Develop, Manufacture or Commercialize any Product except for a limited sublicense to the extent required to enable such Third Party to perform final packaging for such Product for local distribution.

“Loss of Market Exclusivity” means the occurrence of any of the following conditions with respect to a particular Product in a particular country in the Territory at any time following First Commercial Sale of a Generic Product: the aggregate Net Sales of such Product in that country during any [***] are (a) [***] than the aggregate Net Sales of such Product in such country during the [***] immediately prior to the First Commercial Sale of a Generic Product (the “[***] Loss of Market Exclusivity”) or (b) [***] than the aggregate Net Sales of such Product in such country during the [***] immediately prior to the First Commercial Sale of a Generic Product (the “[***] Loss of Market Exclusivity”).

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

“MAA” means a regulatory application filed with the EMA seeking Regulatory Approval of a biological, pharmaceutical or diagnostic product, and all amendments and supplements thereto filed with the EMA.

“Major Market” means each of the United States, France, Germany, Italy, Spain, the United Kingdom and Japan.

“Manufacture” or “Manufacturing” means, as applicable, all activities associated with the production, manufacture, processing, filling, packaging, labeling, shipping and storage of a drug substance or drug product, or any components thereof, including process and formulation development, process validation, stability testing, manufacturing scale-up, preclinical, clinical and commercial manufacture and analytical methods development and validation, product characterization, quality assurance and quality control development, testing and release.

“Manufacturing Technology” means any BeiGene Know-How, BioAtla Know-How, BeiGene Collaboration Know-How, BioAtla Collaboration Know-How and Joint Inventions, as applicable, which are required for the Manufacture of preclinical, clinical or commercial supply, as applicable, of the Products, including specifications, assays, batch records, quality control data, and transportation and storage requirements.

“Manufacturing Transition Costs” means the Direct Costs associated with the transfer by BioAtla of responsibility for Manufacturing and CMC activities to BeiGene or a Third Party selected by BeiGene, including Direct Costs associated with the transfer of all Manufacturing Technology and the providing of technical assistance by BioAtla in relation to such transfer.

“NDA” means an application submitted to a Regulatory Authority for the marketing approval of a Product, including (a) a BLA or New Drug Application (as such capitalized term is used in C.F.R Title 21), as applicable, filed with FDA or any successor applications or procedures, (b) a foreign equivalent of a US New Drug Application or any successor applications or procedures, including a Marketing Authorization Application in the European Union, and (c) all supplements and amendments that may be filed with respect to the foregoing.

“Net Sales” means, with respect to any Product, the gross amounts invoiced by BeiGene, its Affiliates, Licensee Partners and assignees (each, a “Selling Party”) to Third Parties (that are not Licensee Partners) for sales or other commercial dispositions of such Product, less the following deductions actually incurred, allowed, paid, accrued or specifically allocated in its financial statements and calculated in accordance with the Accounting Standards as consistently applied, for:

- (a) [***]
- (b) [***]

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

(c) [***]

(d) [***]

(e) [***]

There should be no double counting in determining the foregoing deductions from gross amounts invoiced to calculate “Net Sales” hereunder. The calculations set forth in this definition shall be determined in accordance with Accounting Standards consistently applied.

If non-monetary consideration is received by a Selling Party for any Product in the relevant country, Net Sales will be calculated based on the average price charged for such Product during the preceding royalty period, or in the absence of such sales, the fair market value of such Product as determined by the Parties in good faith. Notwithstanding the foregoing, Net Sales shall not be imputed to transfers of a Product for use in Clinical Trials, non-clinical development activities or other development activities with respect to a Product by or on behalf of the Parties, for bona fide charitable purposes or for compassionate use or for Product samples, if no monetary consideration is received for such transfers.

Net Sales shall be determined on, and only on, the first sale by a Selling Party or any of its Affiliates or (sub)licensees to a non-(sub)licensee Third Party.

If a Product is sold as part of a Combination Product (as defined below), Net Sales will be the [***]

[***]

“NMPA” means the National Medical Products Administration of China, or any successor agency thereof.

“Out-of-Pocket Costs” means, with respect to certain activities hereunder, direct expenses paid or payable by either Party or its Affiliates to Third Parties (other than employees of such Party or its Affiliates) that are specifically identifiable and incurred to conduct such activities for a Product hereunder and have been recorded in accordance with the Accounting Standards.

“Patent” means any (a) patent or patent application anywhere in the world, (b) divisional, continuation, continuation in-part thereof or any other patent application claiming priority, or entitled to claim priority, directly or indirectly to (i) any such patent or patent application or (ii) any patent or patent application from which such patent or patent application claims, or is entitled to claim, direct or indirect priority, and (c) patent issuing on any of the foregoing anywhere in the world, together with any registration, reissue, re-examination, patent of addition, renewal, patent term extension, supplemental protection certificate, or extension of any of the foregoing anywhere in the world.

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

“Patent Officers” means BioAtla’s Chief of Intellectual Property and Strategy (or the officer or employee of BioAtla then serving in a substantially equivalent capacity) or his or her designee and BeiGene’s Assistant General Counsel, Intellectual Property (or the officer or employee of BeiGene then serving in a substantially equivalent capacity) or his or her designee; provided that any such designee must have decision-making authority on behalf of the applicable Party.

“Person” means any corporation, limited or general partnership, limited liability company, joint venture, trust, unincorporated association, governmental body, authority, bureau or agency, any other entity or body, or an individual.

“Phase I Clinical Trial” means a human clinical trial of a product, the principal purpose of which is a preliminary determination of safety, tolerability and pharmacokinetics in study subjects where potential pharmacological activity may be determined or a similar clinical study prescribed by any applicable Regulatory Authority, from time to time, pursuant to applicable Law or otherwise, including for example the trials referred to in 21 C.F.R. §312.21(a), as amended (or the non-United States equivalent thereof).

“Phase II Clinical Trial” means a human clinical trial of a product in any country that would satisfy the requirements of U.S. 21 C.F.R. Part 312.21(b) and is intended to explore a variety of doses, dose response, and duration of effect, and to generate evidence of clinical safety and effectiveness for a particular Indication or Indications in a target patient population, or a similar clinical study prescribed by the relevant Regulatory Authorities in a country other than the United States.

“Phase III Clinical Trial” means a human clinical trial of a product in any country that would satisfy the requirements of 21 C.F.R. §312.21(c), as amended (or the non-United States equivalent thereof) and is intended to (a) establish that the product is safe and efficacious for its intended use, (b) define contraindications, warnings, precautions and adverse reactions that are associated with the product in the dosage range to be prescribed, and (c) support Regulatory Approval for such product.

“Phase IV Clinical Trial” means a human clinical trial of a product which is (a) conducted to satisfy a requirement of a Regulatory Authority in order to maintain a Regulatory Approval or (b) conducted voluntarily after Regulatory Approval of the product has been obtained from an appropriate Regulatory Authority for enhancing marketing or scientific knowledge of an approved Indication.

“Pivotal Clinical Trial” means a human clinical trial of a product on a sufficient number of subjects that satisfies both of the following ((a) and (b)):

- (a) such trial is designed to establish (with one or more other Pivotal Clinical Trials, if applicable) that such product has an acceptable safety and efficacy profile for its intended use, and to determine warnings, precautions, and adverse reactions that are associated with such product in the dosage range to be prescribed, which trial is intended to support Regulatory Approval of such product, or a similar clinical study prescribed by the NMPA, FDA, EMA or other applicable Regulatory Authority; and

- (b) such trial is a registration trial designed to be sufficient (with one or more other Pivotal Clinical Trials, if applicable) to support the filing of an application for a Regulatory Approval for such product in China, the U.S. or another country or some or all of an extra-national territory, as evidenced by (i) an agreement with or statement from the NMPA, FDA, EMA or other applicable Regulatory Authority on a Special Protocol Assessment or equivalent, or (ii) other guidance or minutes issued by the NMPA, FDA, EMA or other applicable Regulatory Authority, for such registration trial.

“POC Milestone” means, with respect to a Candidate, the successful achievement of the criteria listed in either of clause (a) or clause (b) on Schedule 1 attached hereto.

“POC Milestone Date” means the date of successful achievement of the POC Milestone.

“Potential Target” means a protein or polypeptide or biological molecule, including all variants thereof and any specific protein that is identified by a GenBank protein accession number or by its amino acid sequence and coded by a genetic locus.

“Product” means any pharmaceutical or formulation that contains the Candidate (in whatever dosage form), whether as a sole active ingredient or in combination with one or more other active ingredients.

“Product Data” means all Data that relates solely to the use in the Field of a Candidate, a Product or a Companion Diagnostic that is either: (a) Controlled by a Party as of the Effective Date; or (b) generated by a Party from Collaboration Activities conducted by or on behalf of a Party under the Development Plan and, in each case, is required for any Regulatory Documentation, including an application for Regulatory Approval of a Product in the Field and in the Territory.

“Product Liabilities” means all losses, damages, fees, costs and other liabilities incurred by a Party, its Affiliate(s) or its Licensee Partner(s) and resulting from or relating to the use of a Product in a human (including in the conduct of Clinical Trials with such Product or in connection with the Commercialization of such Product) in the Territory incurred after the Effective Date. For the avoidance of doubt, Product Liabilities include reasonable attorneys’ and experts’ fees but shall not include liabilities associated with recalls or the voluntary or involuntary withdrawal of any Product.

“Prosecution” or “Prosecute” means the filing, preparation, prosecution and maintenance of Patents, including any and all pre-grant proceedings before any patent authority, such as interferences. For purposes of clarity, “Prosecution” or “Prosecute” will not include any other enforcement actions taken with respect to a patent or patent application.

“Publication” means any publication in a scientific journal, any scientific abstract to be presented to any audience, any presentation at any scientific conference, including slides and texts of oral or other public presentations, any other scientific presentation and any other oral, written or electronic scientific disclosure directed to any audience that pertains to the Candidate or the Products, or the use of any of the foregoing.

“Regulatory Documentation” means all INDs, NDAs and other regulatory applications submitted to any Regulatory Authority, Regulatory Approvals, pre-clinical and clinical data and information, regulatory materials, drug dossiers, master files (including Drug Master Files, as defined in 21 C.F.R. 314.420 and any non-United States equivalents), and any other data, reports, records, regulatory correspondence and other materials relating to Regulatory Approval of any Products, or required to Manufacture or Commercialize the Products, including any information that relates to pharmacology, toxicology, chemistry, Manufacturing and controls data, batch records, safety and efficacy, and any safety database.

“Regulatory Exclusivity” means, with respect to a Product in a country, that a Product has been granted (a) data exclusivity afforded approved drug products pursuant to Section 505(c), 505(j), or 505A of the FDCA, and the regulations promulgated thereunder, as amended from time to time, or their equivalent in a country other than the United States, (b) market exclusivity pursuant to the orphan drug provisions governing approved drugs designated for rare diseases or conditions under Sections 526 and 527 of the FDCA, and the regulations promulgated thereunder, as amended from time to time, or its equivalent in a country other than the United States, or (c) any other data exclusivity or market exclusivity pursuant to any future Law which confers an exclusive period during which a Selling Party has the exclusive right to market and sell such Product in such country.

“Right of Reference or Use” means a “Right of Reference or Use” as that term is defined in 21 C.F.R. §314.3(b), and any non-United States equivalents.

“Regulatory Approval” means all approvals of the applicable Regulatory Authority in a country that are necessary for the commercial marketing and sale of a Product for a particular Indication in such country (including separate Regulatory Authority pricing or reimbursement approvals whether or not legally required in order to sell a Product in such country).

“Regulatory Authority” means a federal, national, multinational, state, provincial or local regulatory agency, department, bureau or other governmental entity with authority over the testing, manufacture, use, storage, import, promotion, marketing or sale (including pricing and reimbursement approval) of a Product in a country or territory.

“ROW” means all countries and territories in the Territory other than those countries and territories included in the BeiGene Territory.

“Target” means CTLA-4.

“Territory” means worldwide.

“Third Party” means any Person other than BioAtla or BeiGene that is not an Affiliate of BioAtla or BeiGene.

“Third Party Rights” means, with respect to a Party, any rights of, and any limitations, restrictions or obligations imposed by, Third Parties pursuant to any Third Party Agreements.

“US” means the United States of America, including its territories, possessions and Puerto Rico.

“Valid Claim” means (a) a claim of any issued, unexpired patent that has not been revoked or held unenforceable or invalid by a decision of a court or governmental agency of competent jurisdiction from which no appeal can be taken, or with respect to which an appeal is not taken within the time allowed for appeal, and that has not been disclaimed or admitted to be invalid or unenforceable through reissue, disclaimer or otherwise, or (b) a patent application or subject matter of a claim thereof filed by a Person in good faith that has not been cancelled, withdrawn or abandoned, nor been pending for more than seven (7) years from the earliest filing date to which such patent application or claim is entitled. For clarity, a claim which issues later from such pending patent application above shall be considered a Valid Claim as defined in this Section as of the date of issuance.

Article II

Governance; Collaboration

Section 2.1 Generally.

(a) Governance Committees. The Parties shall establish a Joint Steering Committee (“JSC”) to oversee and coordinate the overall Collaboration hereunder. The JSC shall have decision-making authority with respect to the matters within its purview to the extent expressly and as more specifically provided herein, it being understood and agreed that notwithstanding anything to the contrary contained herein, from and after the date that BioAtla provides a Co-Development Opt-Out Notice, the JSC shall no longer have any decision-making authority with respect to the Candidates and/or the Products, but shall continue to function solely for information sharing purposes.

(b) JSC Membership and Procedures.

(i) JSC Membership. The JSC shall be composed of [***] representatives from each of BioAtla and BeiGene, each of which shall have the seniority and experience appropriate for service on the JSC in light of the Development status of the Products being pursued hereunder from time to time. Each Party may replace any of its representatives on

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

the JSC at any time with prior written notice to the other Party. The chairperson for the JSC will be appointed by BeiGene. Within fifteen (15) days following each JSC meeting, the chairperson shall circulate to all JSC members a draft of the minutes of such meeting. The JSC shall then approve, by mutual agreement, such minutes within fifteen (15) days following circulation.

(ii) Committee Meetings.

(A) The JSC shall hold an initial meeting within sixty (60) days after the Effective Date unless otherwise agreed by the Parties. Thereafter, the JSC shall meet at least once every Calendar Quarter, unless the JSC members otherwise agree. All JSC meetings shall be conducted in person or by teleconference, unless otherwise determined by the JSC members.

(B) Meetings that are held in person shall alternate between the offices of the Parties, or such other location as the Parties may agree. A reasonable number of other representatives of a Party may attend any JSC meeting as non-voting observers; provided that such additional representatives are under obligations of confidentiality and non-use applicable to the Confidential Information of the other Party that are at least as stringent as those set forth in Article XI; and provided further that the Parties, reasonably in advance of the applicable JSC meeting, approve the list of non-voting observers to attend such meeting. Each Party shall be responsible for all of its own personnel and travel costs and expenses relating to participation in JSC meetings.

(c) Working Groups. From time to time, the JSC may establish working groups to oversee particular projects or activities, as it deems necessary or advisable (each, a "Working Group"). Each Working Group shall consist of such number of members as the JSC determines is appropriate from time to time. Such members shall be individuals with expertise and responsibilities in the relevant areas such as non-clinical development, pharmacology, clinical development, Patents, process sciences, Manufacturing, quality, regulatory affairs, product Development or product Commercialization, as applicable, to the stage of the project or activity. All such Working Groups shall operate under the same principles as are set forth in this Article II for the JSC.

(d) Alliance Managers. Promptly after the Effective Date, each Party shall appoint an individual to act as alliance manager for such Party, which may be one of the representatives of such Party on the JSC (each, an "Alliance Manager"). The Alliance Managers shall be the primary point of contact for the Parties regarding the activities contemplated by this Agreement and shall facilitate all such activities hereunder. The Alliance Managers shall attend all meetings of the JSC and shall be responsible for assisting the JSC in performing its oversight responsibilities. The name and contact information for each Party's Alliance Manager, as well as any replacement(s) chosen by such Party, in its sole discretion, from time to time, shall be promptly provided to the other Party.

(e) Patent Coordinators. Promptly after the Effective Date, each Party shall appoint an individual to act as its patent coordinator (each, a "Patent Coordinator") to serve as such Party's primary liaison with the other Party on matters relating to patent filing, Prosecution, maintenance and enforcement of Patents under this Agreement, which may be such Party's Patent Officer. Each Party may replace its Patent Coordinator at any time by notice in writing to the other Party. The initial Patent Coordinators shall be as follows:

For BeiGene: [***]

For BioAtla: [***]

(f) Other Committees. From time to time, the JSC may establish other committees as it deems necessary or advisable (each, a “Committee”), which may include a Joint Development Committee (“JDC”) to oversee Development activities pursuant to this Agreement; a Joint Commercialization Committee (“JCC”) to oversee Commercialization activities pursuant to this Agreement; and a Joint Research Committee (“JRC”) to discuss matters related to each Party’s research activities and independent studies pursuant to this Agreement.

Section 2.2 Joint Steering Committee.

(a) Establishment. Within [***] after the Effective Date, the Parties shall establish the JSC. Prior to any Co-Development Opt-Out Date, the JSC shall have review, oversight and decision-making responsibilities for all activities performed under the Collaboration, to the extent expressly and as more specifically provided in Section 2.3. The members of the JSC may convene or be polled or consulted from time to time by means of telecommunications, video conferences, electronic mail or correspondence, as deemed necessary or appropriate. The JSC shall disband upon the expiration or termination of this Agreement in its entirety.

(b) General Responsibilities. Except as otherwise set forth in this Agreement, the JSC shall perform the following general functions prior to any Co-Development Opt-Out Date, subject to the final decision-making authority of BeiGene and BioAtla, as applicable, set forth in Section 2.3(d): (a) approve the initial Development Plan; (b) confirm whether or not the POC Milestone has been successfully achieved; (c) manage the strategic direction of the Collaboration; (d) oversee implementation of the Collaboration in accordance with this Agreement; (e) discuss and attempt to resolve any disputes in the JSC or any Working Groups or any Committees; (f) determine whether to submit an IND Filing for a Product hereunder; (g) serve as a forum for exchanging information and facilitating discussions regarding patentability and freedom to operate assessments; and (h) such other responsibilities as may be mutually agreed by the Parties from time to time. For purposes of clarity, the JSC shall not have any authority beyond the specific matters set forth in this Section 2.2, and in particular shall not have any power to amend, modify, interpret or waive the terms of this Agreement, or to alter, increase, expand or waive compliance by a Party with a Party’s obligations under this Agreement. In any case where a matter within the JSC’s authority arises which requires prompt attention, the JSC shall convene a meeting and consider such matter as soon as reasonably practicable, but in no event later than [***] days after the matter is first brought to the JSC’s attention (or, if earlier, at the next regularly scheduled JSC meeting).

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

Section 2.3 Decision Making.

(a) JSC Voting. All decisions of the JSC with respect to the Parties' activities under this Agreement shall be made by unanimous vote, with each Party's representatives collectively having one (1) vote, and each such decision (if made) shall be set forth in minutes approved by both Parties' representatives on the JSC. Upon fifteen (15) Business Days prior written notice, either Party may convene a special meeting of the JSC for the purpose of resolving any failure to reach agreement by unanimous vote on a matter within the scope of the authority and responsibility of the JSC. The JSC shall have no authority to resolve any dispute involving the breach or alleged breach of this Agreement or to amend or modify this Agreement or the Parties' respective rights and obligations hereunder.

(b) Referrals from Working Groups. If a Working Group is unable to decide, by unanimous vote, on any matter so referred to it for resolution by one or both Parties within ten (10) Business Days after the matter is so referred to it, the chairperson of the applicable Working Group, shall refer such matter to the JSC for attempted resolution by unanimous vote.

(c) Referrals from the JSC to Executive Officers. If the JSC is unable to decide, by unanimous vote, on any matter referred to it by any Working Group or on any other matter specified in this Agreement to be decided by the JSC, within ten (10) Business Days after the matter is referred to it or first considered by it, the chairperson of the JSC shall submit such matter for attempted resolution by agreement of the Executive Officers. If the Executive Officers are unable to resolve any matter referred to them by the chairperson of the JSC within ten (10) Business Days after the matter is referred to them then the matter will be resolved in accordance with Section 2.3(d).

(d) Final Decision-Making Authority. Subject to subsection 2.3(e), (i) except as set forth in subsection 2.3(d)(ii), BeiGene shall have final decision-making authority with respect to all matters that the Executive Officers are unable to resolve pursuant to Section 2.3(c) and (ii) BioAtla shall have final decision-making authority with respect to any Development activities to be conducted by BioAtla as the Lead Party pursuant to the Development Plan prior to the POC Milestone Date, except for any such Development activities that are (A) inconsistent with the Development Plan or (B) would reasonably be expected to result in an adverse safety issue related to a Product, each of which is subject to BeiGene's prior consent in its sole discretion.

(e) Exceptions.

(i) This Section 2.3 is subject to the applicable terms and conditions of Article II of this Agreement.

(ii) Notwithstanding anything to the contrary contained herein, no Party shall have the right to finally resolve a dispute pursuant to Section 2.3(d), without agreement of the other Party, (A) with respect to whether or not the POC Milestone has been successfully achieved or (B) in a manner that would (1) impose any obligations on such other Party beyond those for which such other Party is responsible under this Agreement or the then-current Development Plan, (2) diminish such other Party's rights under this Agreement or (3) increase such other Party's financial obligations in any Development Budget that is approved by the JSC.

(iii) Notwithstanding anything to the contrary contained herein, the Parties understand and agree that, from and after the date that BioAtla provides the Co-Development Opt-Out Notice, the Committees shall no longer have any decision-making authority, but shall continue to function for information sharing purposes and for attempting to resolve any dispute as to whether or not the POC Milestone has been successfully achieved.

Article III
Development

Section 3.1 Development of Products.

(a) Development Plan.

(i) Prior to the POC Milestone Date. Subject to Article II, prior to the POC Milestone Date, the Development of the Candidates and the Products shall be governed by the Development Plan attached hereto as Schedule 3.1 that describes the Development activities to be undertaken by the Parties with respect to the Candidates and the Products in the Territory and includes an annual budget of Development Costs pursuant to Section 3.1(c) ("Development Budget") and anticipated timelines for performance. The Development Plan may be amended from time to time by the JSC. The Direct Costs of conducting Development activities in the Territory in relation to a Product shall be reflected in the Development Budget and allocated and paid as set forth in Section 3.2.

(ii) Following the POC Milestone Date. Subject to Article II, on and after the POC Milestone Date, the Development of the Candidates and the Products shall be conducted by BeiGene in accordance with a Development Plan to be prepared by BeiGene and provided to the JSC for its review that describes the Development activities to be undertaken by or on behalf of BeiGene with respect to the Candidates and the Products in the Territory. The Development Plan may be amended from time to time by BeiGene by providing written notice to the JSC.

(b) Updates. Prior to the POC Milestone Date, (i) the JSC will review and approve the Development Plan at least once in each Calendar Year, with the Lead Party for the applicable Clinical Trial proposing the updates for the Development Plan with respect to the Candidates and the Products; (ii) either Party may reasonably request at any time that the JSC consider, and the JSC review and approve, other updates to the Development Plan for Development activities to support Regulatory Approval on a global basis; and (iii) neither Party (itself or by or through any others, including any Affiliates or (sub)licensees) will take any material action regarding the Development of the Products unless described in the Development Plan or mutually agreed upon in writing by the Parties, or as required by applicable Laws or applicable Regulatory Authorities or independent monitoring boards for Clinical Trials.

(c) Development Budgets. Prior to the POC Milestone Date, (i) all Direct Costs incurred by either Party or its Affiliates in conducting Development activities pursuant to the Development Plan shall be considered Development Costs; (ii) the Parties will update and provide the JSC with a copy of the Development Budget, including the budgeted Development Costs, each Calendar Year at a meeting of the JSC sufficiently in advance of the next Calendar Year but in any event no later than November 1st of each Calendar Year during the Term; and (iii) the JSC will review and approve any such update or any other amendment to the Development Budget. In addition, either Party may request at any time that the JSC consider, and the JSC approve, other updates to the Development Budget.

(d) Coordination and Reports. Prior to the POC Milestone Date, (i) each Party shall coordinate with, and keep the JSC informed with respect to, activities assigned to such Party under the Development Plan, including the conduct of any applicable Clinical Trials; (ii) each Party shall provide the JSC with regular quarterly written reports on such Party's Development activities relating to the Collaboration, including (A) a summary of results and Data generated, and updates regarding regulatory matters and material Development activities that are reasonably expected for the next Calendar Quarter and (B) updates regarding intellectual property issues (including a disclosure of Collaboration Intellectual Property discovered, developed, generated or invented since the last written report) relating to the Collaboration. Such written reports may be discussed by telephone or video-conference, or may be provided at a JSC meeting; provided that, reasonably in advance of the meeting of the JSC, the Party providing the written report will deliver to the JSC an agenda setting forth what will be discussed during the meeting. The Party receiving such written report shall have the right to reasonably request, and to receive in a timely manner at or after the JSC meeting, clarifications and answers to questions with respect to such reports. Notwithstanding the foregoing, on and after the POC Milestone Date, BeiGene will update the Development Plan at least once in each Calendar Year by submitting to the JSC updates to the Development Plan summarizing all material Development activities conducted with respect to the Candidates and the Products.

Section 3.2 Development Costs and Related Manufacturing Costs.

(a) Subject to Section 3.2(b) and Section 3.6, the Parties will share all Development Costs and all Manufacturing Costs associated with Manufacturing the Candidates and the Products (including Manufacturing Transition Costs) for Clinical Trials prior to the first Regulatory Approval in the Territory, in each case, incurred on and after the Effective Date in accordance with Section 9.2(a).

(f) BioAtla shall be solely responsible for all preclinical Development Costs for the Candidate and the Product currently under development through the IND Filing, except that, any Manufacturing Costs associated with Manufacturing the Candidate and the Product related to the IND Filing as set forth under the Manufacturing Plan will be shared by the Parties in accordance with Section 9.2(a) and BeiGene shall be responsible for all Development Costs and Manufacturing Costs associated with Manufacturing the Candidate and the Products in the BeiGene Territory as set forth in Section 9.2(b).

Section 3.3 Rights to Use Product Data.

(a) Each Party, in a given country for Development or Commercialization of the Products in such country, shall keep accurate records of all Product Data generated as a result of all activity by or on behalf of such Party in performing Development and Commercialization in relation to the Products and Companion Diagnostics. Each Party shall provide the other Party with copies of all such Product Data Controlled by the Party during the Term that is necessary for or reasonably related to the Development and Commercialization of the Products and Companion Diagnostics promptly following the generation of such Product Data. Product Data Controlled by either Party shall be included in the license grant to the other Party pursuant to Section 8.1(a) or Section 8.1(b), as applicable.

(b) Notwithstanding anything to the contrary in this Agreement, each Party shall promptly provide to the other Party, free of charge, copies of and rights of reference to and use of all Product Data that is Controlled by such Party, and that is relevant to or necessary to address issues relating to: (i) the safety of the Products in the Territory, including data that is related to adverse effects experienced with the Products, or (ii) all activities relating to CMC regarding the Products, and in each of (i) and (ii), that are required to be reported or made available to Regulatory Authorities in the Territory, when and as such data become available.

Section 3.4 Companion Diagnostics. The Parties may mutually agree to jointly Develop or Commercialize a Companion Diagnostic for use with the Products; provided that, in the event the Parties do not agree to jointly Develop or Commercialize a Companion Diagnostic, the JSC may permit a Party to Develop, Manufacture or Commercialize a Companion Diagnostic for use with the Products in the Territory, directly or indirectly through a Third Party Contractor. In such event, all costs and profits with respect to such Development, Manufacturing or Commercialization of the Companion Diagnostic (as Developed, Manufactured and Commercialized in accordance with this Section 3.4) shall be shared by the Parties in accordance with their respective Co-Development Percentages, pursuant to a mechanism agreed to by the Parties at the time the Parties agree or the JSC permits a Party to Develop, Manufacture or Commercialize the applicable Companion Diagnostic.

Section 3.5 Records; Tech Transfer.

(a) Maintenance of Records. Each Party shall maintain in all material respects, and shall require its Selling Parties and Third Party Contractors to maintain in all material respects, complete and accurate records in segregated books of all Development work conducted in furtherance of the Collaboration and all results, Data (including Product Data) and Collaboration Intellectual Property made in conducting such Development activities. Such records shall be complete and accurate and shall fully and properly reflect all such work done and results achieved in sufficient detail and in good scientific manner appropriate for patent and regulatory purposes. Each Party shall require the applicable study sites to maintain original source documents from Clinical Trials of the Products for at least three (3) years (or such longer period as is commercially reasonable under the circumstances, taking into account maintenance requirements under applicable Law) following completion of the Development activities undertaken by such Party or its Selling Parties or Third Party Contractors.

(b) Inspection. Each Party shall have the right, during normal business hours and upon reasonable notice, which shall not be made more frequently than one (1) time per Calendar Year, upon at least thirty (30) days' prior written notice from the other Party, and at the expense of the other Party, to inspect and copy (or request the other Party to copy) all records of the other Party or its Selling Parties or Third Party Contractors, as applicable, maintained in connection with the work done and results achieved in the performance of Development activities under the Collaboration, but solely to the extent access to such records is necessary for such Party to exercise its rights under this Agreement.

(c) Tech Transfer. As soon as reasonably practical after the Effective Date and thereafter upon BeiGene's reasonable request during the Term, BioAtla shall transfer to BeiGene, at no cost to BeiGene, copies of all BioAtla Know-How, BioAtla Collaboration Know-How and BioAtla's interest in any Joint Inventions that are directed or related to the Products, to the extent not previously transferred to BeiGene. Upon BioAtla's reasonable request during the Term, BeiGene shall transfer to BioAtla, at no cost to BioAtla, copies of all BeiGene Know-How, BeiGene Collaboration Know-How and BeiGene's interest in any Joint Inventions that are directed or related to the Products, to the extent not previously transferred to BioAtla. In addition, each Party shall provide reasonable assistance, including making its personnel reasonably available for meetings or teleconferences to answer questions and provide technical support to the other Party with respect to the use of such transferred Know-How in the Development, Manufacture and Commercialization of the Products.

Section 3.6 BioAtla Co-Development Opt-Out.

Without it being a breach of Article VII, BioAtla shall have the right to elect to opt out of its Development rights, its obligation to pay its Co-Development Percentage of Development Costs and its right to receive any portion of the ROW Product Revenue pursuant to Section 9.4 and Exhibit E attached hereto under this Agreement (the "Co-Development Opt-Out") by providing written notice to BeiGene (such notice, the "Co-Development Opt-Out Notice") at least [***] before the date on which BeiGene previously notifies BioAtla in writing that it will dose the first patient in any Clinical Trial, which notice shall include the date on which the Co-Development Opt-Out will be effective (the "Co-Development Opt-Out Date") and which will be no sooner than [***] from the date of the Co-Development Opt-Out Notice (the "Co-Development Opt-Out Notice Period"). During the Co-Development Opt-Out Notice Period, (i) the Parties will continue to fund Development activities in accordance with the applicable Development Plan and Development Budget and (ii) BioAtla shall undertake, and coordinate with BeiGene with respect to, any wind-down or transitional activities necessary to transfer to BeiGene all Development responsibility for the Products throughout the Territory, and the Parties shall use Commercially Reasonable Efforts to complete such activities before any Co-Development Opt-Out Date. The Parties shall reasonably cooperate in seeking to minimize the costs of such wind-down or transitional activities. Commencing on any Co-Development Opt-Out Date, BeiGene, consistent with the terms and conditions of this Agreement, shall have sole discretion with respect to any matters regarding further Development hereunder, provided that [***].

Section 3.7 Effect of Co-Development Opt-Out.

(a) Effective as of any Co-Development Opt-Out Date:

(i) the license and sublicense granted by BeiGene to BioAtla under Section 8.1(b) shall terminate and all licenses granted by BioAtla to BeiGene under Section 8.1(a) with respect to the Products shall convert to exclusive (even as to BioAtla), worldwide licenses and otherwise remain in effect;

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

(ii) neither Party shall have any further obligations under the Development Plan (and such plan, for clarity, shall terminate);

(iii) BeiGene (but not BioAtla) shall continue to have obligations under Section 7.1(a) and Section 7.2;

(iv) BeiGene shall be solely responsible for all Development Costs for the Products incurred on and after such Co-Development Opt-Out Date, except as expressly provided in this Section 3.7, and BioAtla's Co-Development Percentage shall equal zero percent (0%);

(v) BioAtla shall cease to conduct any further Development activities with respect to any Products, cease to have any obligations to use Commercially Reasonable Efforts with respect to Article III, and cease to incur any further Development Costs except as approved by BeiGene; and

(vi) BioAtla shall no longer be entitled to receive any portion of the Operating Profits or Losses under Section 9.4 for any Products and such Products shall instead be subject to the milestone and royalty provisions of Section 9.3 and Section 9.5 in lieu of the sharing of Development Costs under Section 9.2(a) and Operating Profits or Losses under Section 9.4.

(b) Following any Co-Development Opt-Out Date, the Parties shall undertake the following actions:

(i) within forty-five (45) days after any Co-Development Opt-Out Date, BioAtla shall provide to BeiGene a reasonably detailed accounting of all Development Costs incurred by BioAtla under the Collaboration prior to such date for the purpose of calculating a final reconciliation of shared costs through any Co-Development Opt-Out Date in accordance with Section 9.2;

(ii) within forty-five (45) days after any Co-Development Opt-Out Date, BioAtla shall provide to BeiGene a reasonably detailed summary of Development activities performed by BioAtla under the Collaboration, including any Clinical Trials committed but not yet completed as of such date; and

(iii) BeiGene shall provide to BioAtla quarterly written progress reports during the Term on the status of its material Development activities with respect to a Product under this Agreement.

Article IV

Manufacture and Supply

Section 4.1 Generally. Subject to the terms and conditions of this Agreement, the Parties will have the responsibility for Manufacture of the Candidates, the Products and Companion Diagnostics for Development and Commercialization in the Territory as set forth in this Article IV.

Section 4.2 Clinical Supply. Subject to Section 9.2(b), BioAtla shall supply, through its third-party manufacturer, pre-clinical and clinical supply of the Candidate for use in Clinical Trials in the Territory at a transfer price [***]. BioAtla will transfer the existing cell banks and manufacturing processes relating to the Candidate pursuant to a joint manufacturing plan ("Manufacturing Plan"), to be attached as part of the Development Plan and mutually agreed by the Parties. For clarity, the Manufacturing Plan shall provide that BioAtla shall (a) transfer, and thereafter during the Term as may be reasonably requested by BeiGene from time to time, continue the transfer (from BioAtla, its Affiliates, or its Third Party contract manufacturers) to BeiGene and its designees copies in English (in an electronic format) of all Manufacturing Technology Controlled by BioAtla or its Affiliates (or any of its Third Party contract manufacturers, to the extent BioAtla has the right to do so under its agreements with such Third Party contract manufacturers), in order to enable BeiGene and its designees to Manufacture the Candidate, including, if desired by BeiGene, to replicate the process employed by or on behalf of BioAtla prior to the Effective Date to Manufacture the Candidate; and (b) to the extent that BioAtla does not have the right to so transfer under its agreements with such Third Party contract manufacturers, use good faith efforts to obtain such right. Such transfers shall include all process, analytical, and formulation development data, all technical memoranda, all process evolution data, and all batch records. In addition, at the reasonable request of BeiGene from time to time, BioAtla shall make its employees and consultants (including personnel of its Affiliates and Third Party contract manufacturers) available to BeiGene and its designees to provide reasonable consultation and technical assistance in order to ensure an orderly transition of the Manufacturing Technology and operations to BeiGene and its designees and to assist BeiGene and its designees in its Manufacture of the Candidate.

Section 4.3 Manufacturing and Supply Agreement. Upon the written request of BeiGene, the Parties will negotiate in good faith and execute a manufacturing and supply agreement pursuant to which BioAtla's third-party manufacturer of the Candidate will supply certain requirements of the Candidate and Product for Commercialization under the Commercialization Plan in the Territory.

Section 4.4 Manufacturing Transition Costs. Until any Co-Development Opt-Out Date all Manufacturing Costs associated with Manufacturing the Candidates and the Products (including Manufacturing Transition Costs) for Clinical Trials prior to the first Regulatory Approval in the Territory shall be shared by the Parties in accordance with their respective Co-Development Percentages.

Article V Regulatory Matters

Section 5.1 Lead Responsibility for Regulatory Interactions. Except as may otherwise be mutually agreed by the Parties, and subject to oversight by the JSC:

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

(a) Lead Responsibility. Subject to Section 5.1(c), each Lead Party shall have lead responsibility for all Regulatory Interactions with Regulatory Authorities in the Territory for each Product.

(b) Regulatory Interactions Defined. For purposes of this Agreement, “Regulatory Interactions” means (i) monitoring and coordinating all regulatory actions, preparing, submitting and coordinating all communications and filings with, and submissions to, all Regulatory Authorities with respect to the Products and (ii) interfacing, corresponding and meeting with the Regulatory Authorities with respect to the Products.

(c) Transfer of Regulatory Responsibility. Notwithstanding the foregoing, BeiGene shall become the Lead Party for all Regulatory Interactions for any and all Products on and after the earlier to occur of (i) the Co-Development Opt-Out Date and (ii) the POC Milestone Date.

(d) Regulatory Responsibilities. Solely upon and after such time that BeiGene becomes the Lead Party for Regulatory Interactions for any Product pursuant to Section 5.1(c):

(i) Subject to applicable Law, BioAtla shall (A) at BeiGene’s option as directed by BeiGene in writing, either close or inactivate BioAtla’s IND(s) for each Product, or transfer to BeiGene all Regulatory Documentation, including such IND(s), and (B) with BeiGene’s input, complete all relevant activities related to such Regulatory Documentation, including such IND(s) as required for BeiGene to assume regulatory ownership, as applicable, all as soon as practicable (but, in the case of the transfer of any IND(s), in no event later than thirty (30) days after BeiGene’s notice (provided that such notice may only be provided after BeiGene becomes the Lead Party for Regulatory Interactions for any Product pursuant to Section 5.1(c)), unless otherwise agreed by the Parties); and

(ii) BeiGene shall be responsible for the preparation and filing of all Regulatory Documentation with respect to the Development, Manufacturing and Commercialization for the Products after such activities described in clause (i) above are completed.

Section 5.2 Participation Rights.

(a) Review of Regulatory Documentation. Each Party shall keep the JSC reasonably informed in connection with all Regulatory Interactions, preparation of all Regulatory Documentation, Regulatory Authority review of Regulatory Documentation, Regulatory Approvals, annual reports, including annual safety reports to the respective health authorities, annual re-assessments, and any subsequent variations and changes to labeling, in each case with respect to the Products. Each Party shall respond within a reasonable time frame to all reasonable inquiries by the other Party with respect to any information provided pursuant to this Section 5.2(a) (and sufficiently promptly for the other Party to provide meaningful input with respect to responses to Regulatory Authorities).

(b) Participation in Meetings. The Lead Party will provide the other Party with notice of any meeting or discussion with any Regulatory Authority in the Territory related to any Product no later than two (2) Business Days after receiving notice thereof. The Party that is not the Lead Party in a country with respect to the Products shall have the right to have up to two (2) senior, experienced employees reasonably acceptable to the responsible Party participate as observers in material or scheduled face-to-face meetings, video conferences and teleconferences with all applicable Regulatory Authorities relating to any Product unless prohibited or restricted by applicable Law or Regulatory Authority, and shall be provided with advance access to the responsible Party's material documentation prepared for such meetings.

(c) Review. Prior to submission of material correspondence to any Regulatory Authority related to any meeting with respect to the Products, the Party that is the Lead Party shall, sufficiently in advance for the other Party to review and comment, provide the other Party with such material correspondence with the Regulatory Authority related to such meetings. The Lead Party shall also provide the other Party with copies of any material correspondence with Regulatory Authorities relating to Development of, or the process of obtaining Regulatory Approval for, the Products and respond within a reasonable time frame to all reasonable inquiries by the other Party with respect thereto.

Section 5.3 Global Safety Database; Pharmacovigilance Agreement. At a time to be mutually agreed by the Parties and subject to the Pharmacovigilance Agreement, BeiGene shall establish, hold and maintain a single electronic system for the collection and storage of all safety information for the Products in the Territory (the "Global Safety Database"). Such database shall comply in all material respects with all Laws reasonably applicable to pharmacovigilance anywhere where the Products are being or have been Developed or Commercialized. BioAtla may hold and maintain a parallel safety database for the Products as needed or required by applicable Laws. The Parties will use Commercially Reasonable Efforts to negotiate a pharmacovigilance agreement (the "Pharmacovigilance Agreement") to govern cooperation among the Parties that will enable each of them to comply with its respective obligations under applicable Laws and to satisfy its duty of care with respect to the Products, including with regard to ownership of the Global Safety Database, adverse event data collection, analysis and reporting and access to the Global Safety Database. The Pharmacovigilance Agreement will be entered among the Parties no later than ninety (90) days following the Effective Date.

Section 5.4 Recalls, Market Withdrawals or Corrective Actions.

(a) In the event that any Regulatory Authority issues or requests a recall, market withdrawal or similar action in connection with a Product in any portion of the Territory, or in the event either Party determines that an event, incident or circumstance has occurred that may result in the need for a recall, market withdrawal or similar action in any country in the Territory, the Party notified of such recall, market withdrawal or similar action, or the Party that desires such recall, market withdrawal or similar action, shall within twenty-four (24) hours advise the other Party thereof by telephone. The Lead Party shall, after reasonable consultation with the other Party, decide whether to conduct a recall, market withdrawal or similar action in its applicable portion of the Territory and the manner in which any such recall, market withdrawal or similar action shall be conducted. Each Party will make available to the other Party, upon request, all of such Party's (and its Affiliates') pertinent records that such other Party may reasonably request to assist such other Party in effecting any recall, market withdrawal or similar action.

(b) The costs and expenses incurred before any Co-Development Opt-Out Date relating to a recall, market withdrawal or similar action of any Products in the Territory shall be borne by the Parties in accordance with their respective Co-Development Percentages (as, and to the extent, provided in Section 9.2, Section 9.4 and Exhibit E). The costs and expenses incurred after any Co-Development Opt-Out Date for any recall, market withdrawal or similar action of any Products in the Territory shall be borne solely by BeiGene if and only to the extent (i) such recall, market withdrawal or similar action was caused by the occurrence after any Co-Development Opt-Out Date of the event, incident or circumstance that led to the recall, market withdrawal or similar action and (ii) the event, incident or circumstance and the costs and expenses for such recall, market withdrawal or similar action are not the subject of an indemnity obligation of BioAtla under Section 13.2. The costs and expenses incurred after any Co-Development Opt-Out Date relating to any recall, market withdrawal or similar action of any Products shall be borne by the Parties in accordance with the Co-Development Percentages (in effect immediately prior to any Co-Development Opt-Out Date) to the extent (A) such recall, market withdrawal or similar action was caused by the occurrence before any Co-Development Opt-Out Date of the event, incident or circumstance that led to the recall, market withdrawal or similar action and (B) such event, incident or circumstance and such costs and expenses are not the subject of an indemnity obligation of either Party under Section 13.1 or Section 13.2. If BioAtla is invoiced for its portion of such costs and expenses incurred after any Co-Development Opt-Out Date, payment is due within thirty (30) days of receipt of invoice.

Article VI Commercialization

Section 6.1 Commercialization Responsibilities for Products.

(a) Responsibility. Subject to the terms and conditions of this Agreement, BeiGene shall be solely responsible for the Commercialization of the Products in the Territory as specified in the Commercialization Plan. Subject to the foregoing, Article II and the remainder of this Article VI, BeiGene shall have sole responsibility and final decision-making authority for Commercialization of the Products in the Territory.

(b) Sales. BeiGene will book all sales of the Products in the Territory and will have the sole responsibility for the processing of orders, invoicing, terms of sale, and distribution of the Products throughout the Territory associated therewith in accordance with the terms and conditions of this Agreement.

Section 6.2 Commercialization Plan.

(a) Initial Commercialization Plan. No later than the date of submission of the first NDA for the first Product (as set forth in the Development Plan) for Regulatory Approval from the FDA in the US or any other Regulatory Authority in the Territory, as applicable, BeiGene will prepare and provide to the JSC for its review an initial Commercialization plan for the Territory (the "Commercialization Plan") for such Product covering the first two (2) years after First Commercial Sale of such Product in the Territory. Thereafter, BeiGene will update the Commercialization Plan (for the current Calendar Year and the two (2) succeeding Calendar Years) each Calendar Year and provide such update to the JSC for its review.

(b) Additional Terms. In addition, prior to any Co-Development Opt-Out Date:

(i) The Commercialization Plan will specify, as applicable, among other things, the number of sales representatives in the Territory, creation of marketing and promotional materials, planning for conferences, the number, type (e.g., first position, second position) and frequency of details to be conducted by sales representatives for the Products in each Calendar Year, the allocation of sales details across geographies between the Parties, sales forecasts, strategies for compensation packages for sales representatives, Product pricing strategy, strategy for managed care and reimbursement plans; it being understood and agreed that, pursuant to Section 6.3 and subject to Article VII, on and after any Co-Development Opt-Out Date, BeiGene shall have the sole right to specify the form and contents of the Commercialization Plan for the Territory.

(ii) Neither Party (itself or by or through any others, including any Affiliates or (sub)licensees) will take any material action regarding the Commercialization of the Products unless described in the Commercialization Plan or approved by the JSC; it being understood and agreed that, pursuant to Section 6.3 and subject to Article VII, on and after any Co-Development Opt-Out Date, BeiGene shall have the sole right to take any action regarding the Commercialization of the Products, whether or not specified in the Commercialization Plan.

(c) Commercialization Budget. Prior to any Co-Development Opt-Out Date (i) at such times as the JSC will deem appropriate, and concurrently with the preparation of the initial Commercialization Plan, BeiGene (after good faith consultation with BioAtla) will prepare an initial Commercialization budget (collectively, the "Commercialization Budget"); (ii) the JSC will review and approve such initial Commercialization Budget; (iii) thereafter BeiGene (after good faith consultation with BioAtla) will update the Commercialization Budget at least once in each Calendar Year, (but in any event no later than November 30 of each Calendar Year during the Term) and the JSC will review and approve any such update or any other amendment to the Commercialization Budget; and (iv) either Party may request at any time that the JSC consider and approve other updates to the Commercialization Budget; it being understood and agreed that, pursuant to Section 6.3 and subject to Article VII, on and after any Co-Development Opt-Out Date, no Commercialization Budget or update thereto shall be prepared by BeiGene or provided to BioAtla for the Territory.

Section 6.3 BeiGene Commercialization; BeiGene Reports. Prior to any Co-Development Opt-Out Date, (a) BeiGene shall provide the JSC with semi-annual updates on the status of its material Commercialization activities with respect to the Products and related Companion Diagnostics in the Territory, and BeiGene's plans with respect to Commercialization of the Products and related Companion Diagnostics in the Territory and (b) BeiGene and BioAtla shall hold one (1) teleconference call not more than once per Calendar Quarter to discuss Commercialization of the Products and related Companion Diagnostics in the Territory. Notwithstanding the foregoing, following any Co-Development Opt-Out Date, (a) BeiGene shall instead provide to BioAtla an annual written progress report on the status of its material Commercialization activities with respect to the Products and related Companion Diagnostics in the Territory and (b) BeiGene and BioAtla shall hold one (1) teleconference call not more than once per Calendar Quarter to discuss Commercialization of the Products and related Companion Diagnostics in the Territory.

Section 6.4 Commercialization Costs. Subject to Section 3.6, during the Term, all Commercialization Costs (as defined in Exhibit E) shall be shared by the Parties in accordance with Exhibit E.

Section 6.5 Trademarks.

(a) Selection of Trademarks. Prior to any Co-Development Opt-Out Date, BeiGene, following consultation with the JSC and the Patent Coordinators, shall select the trademark(s) to be used in connection with the marketing and sale of the Products in the Territory (such marks, together with registrations, applications for registration and common law rights therein, collectively, "Product Trademarks"), it being understood that on and after any Co-Development Opt-Out Date, BeiGene will have the sole right in its discretion to select Product Trademarks.

(b) Ownership. BeiGene shall own all Product Trademarks for any Product in the Territory.

(c) Branding. Prior to any Co-Development Opt-Out Date and at such time as the JSC deems appropriate, the Parties shall discuss in good faith any branding or co-branding of the Products (the "Licensed Branding"), and the Parties will enter into appropriate trademark licensing agreements to achieve the foregoing. For the avoidance of doubt, nothing in this Agreement shall be construed to grant either Party any rights in or to any of the other Party's trademarks, tradenames, logos, or other marks (other than Product Trademarks), including use thereof, absent a separate trademark licensing agreement entered into by the Parties. Notwithstanding the foregoing, subject to any restrictions on the form or content of the Licensed Branding imposed by any Regulatory Authority, unless the Parties mutually agree otherwise in writing, the Licensed Branding used with respect to the Products shall feature the logos of BioAtla and BeiGene with approximately equal sizing and similar prominence, with BeiGene's name first, on all packaging and materials used for Commercialization of such Products in the Territory, to the extent permitted by applicable Law.

Article VII

Diligence

Section 7.1 Collaboration Activities.

(a) General. Each Party shall use Commercially Reasonable Efforts to perform all Development, Manufacturing and Commercialization activities for which such Party is responsible hereunder in compliance with the applicable Development Plan or Commercialization Plan, including any budget(s) and timeframe(s) set forth therein and including making available those resources set forth in any applicable Development Plan or Commercialization Plan, and the terms of this Agreement.

(b) Compliance with Laws. Each Party shall:

(i) perform its obligations under this Agreement in a scientifically sound and workmanlike manner; and

(ii) carry out all work done in the course of the Collaboration in compliance with all applicable Laws governing the conduct of such work.

Section 7.2 Diligence Obligations. Prior to any Co-Development Opt-Out Date, each Party, and after any Co-Development Opt-Out Date, BeiGene (in each case, directly or through one or more Affiliates or Selling Parties), shall, as applicable, use Commercially Reasonable Efforts to Develop and achieve Regulatory Approval for the Products in each Major Market. Following Regulatory Approval of each Product in any Major Market in the Territory, BeiGene (directly or through one or more Affiliates or Selling Parties) shall, as applicable, use Commercially Reasonable Efforts to Commercialize such Product in each such Major Market.

Section 7.3 Day-to-Day Responsibility. Prior to any Co-Development Opt-Out Date, each Party shall be responsible for day-to-day implementation of the Development, Manufacturing and Commercialization activities for which it (or its Affiliate) has been, or otherwise is, assigned responsibility under this Agreement or the applicable Development Plan or Commercialization Plan and shall keep the other Party reasonably informed as to the progress of such activities, as determined by the JSC.

Article VIII
Grant of Rights; Exclusivity

Section 8.1 License Grants. Subject to the terms and conditions of this Agreement:

(a) Licenses Granted to BeiGene.

(i) During the Term, subject to the terms and the conditions set forth in this Agreement, BioAtla hereby grants to BeiGene, a co-exclusive (with BioAtla and its Affiliates and (sub)licensees) license, with the right to grant sublicenses (through multiple tiers and subject to Section 8.3), under and to the BioAtla Intellectual Property, BioAtla Collaboration Intellectual Property and BioAtla's interest in the Manufacturing Technology for BeiGene, as the Lead Party, to Develop, Manufacture and have Manufactured Candidates, the Products and Companion Diagnostics in the Territory; provided, that, on and after any Co-Development Opt-Out Date, the foregoing license shall be exclusive (even as to BioAtla and its Affiliates and (sub)licensees); provided, further, that, as to Companion Diagnostics, such license grant shall be limited to Developing, Manufacturing and having Manufactured Companion Diagnostics for use as companion diagnostics with the Products under this Agreement.

(ii) During the Term, subject to the terms and the conditions set forth in this Agreement, BioAtla hereby grants to BeiGene, an exclusive license, with the right to grant sublicenses (through multiple tiers and subject to Section 8.3), under and to the BioAtla Intellectual Property, BioAtla Collaboration Intellectual Property and BioAtla's interest in the Manufacturing Technology to Commercialize Candidates, the Products and Companion Diagnostics in the Territory; provided, however, that, as to Companion Diagnostics, such license grant shall be limited to Commercializing Companion Diagnostics for use as companion diagnostics with the Products under this Agreement.

(b) License Granted to BioAtla. During the Term, subject to the terms and the conditions set forth in this Agreement, BeiGene hereby grants to BioAtla, a co-exclusive, royalty-free, fully-paid right and license, with the right to grant sublicenses (through multiple tiers and subject to Section 8.3), under the BeiGene Intellectual Property and BeiGene Collaboration Intellectual Property and BeiGene's interest in the Manufacturing Technology for BioAtla, as the Lead Party, to Develop, Manufacture and have Manufactured the Candidate, the Products and Companion Diagnostics in the Territory; provided, however, that, as to Companion Diagnostics, such license grant shall be limited to Developing, Manufacturing, and having Manufactured Companion Diagnostics for use as companion diagnostics with the Products under this Agreement.

(c) Checkpoint Combination Programs License Granted to BioAtla. If at any time during the Term, BioAtla wishes to Develop a Product by conducting combination Clinical Trials involving such Product and immune checkpoint inhibitors directed against Potential Targets such as PDL-1 and PD-1 in the Territory (each, a "Combination Trial") BioAtla shall provide BeiGene with prior written notice which shall describe the proposed Combination Trial and the country or countries in which the Combination Trial would be conducted and, solely to the extent that BeiGene consents to the conduct of such Combination Trial in such country or countries, BeiGene will grant to BioAtla, a co-exclusive, royalty-free, fully-paid right and license, with the right to grant sublicenses (through multiple tiers and subject to Section 8.3), under (i) the BeiGene Intellectual Property, BeiGene Collaboration Intellectual Property and BeiGene's interest in the Manufacturing Technology BioAtla Intellectual Property, and (ii) BioAtla Collaboration Intellectual Property and BioAtla's interest in the Manufacturing Technology for BioAtla to conduct such Combination Trial in such country or countries.

Section 8.2 Sublicense Rights. Subject to Section 8.3, the Parties shall have the following sublicensing rights.

(a) Sublicenses to Affiliates and Subcontractors. Each Party shall have the right to grant sublicenses within the scope of the licenses and sublicense under Section 8.1:

(i) to such Party's Affiliates; and

(ii) to Third Parties for the purpose of engaging Third Parties as contract research organizations, contract manufacturers, contract sales forces, consultants, academic researchers and the like ("Third Party Contractors") in connection with Development, Manufacturing or Commercialization activities of Candidates and the Products throughout the Territory (to the extent such Party is permitted to engage in such activities in any applicable country) on behalf of such Party or its Affiliates with respect to the Collaboration under this Agreement, subject to the following:

(iii) unless otherwise mutually agreed by the Parties, each Party shall require any such Third Party to whom such Party discloses Confidential Information to enter into an appropriate written agreement obligating such Third Party to be bound by obligations of confidentiality and restrictions on use of such Confidential Information that are no less restrictive than the obligations set forth in Article XI, including requiring such Third Party to agree in writing not to issue any Publications except in compliance with the terms of this Agreement (including approval by the JSC, pursuant to the approved publication plan, and the obligations set forth in Section 11.4, except that Publications by academic collaborators shall be permitted (without JSC consent) if the academic collaborator (i) provides an advance copy of the proposed Publication

(under the same time periods as described in Section 11.4(a)), which must be shared with the other Party, (ii) agrees to delay such Publication sufficiently long enough to permit the timely preparation and filing of a patent application, and (iii) upon the request of either Party, removes from such Publication any Confidential Information of such Party);

(iv) unless otherwise mutually agreed by the Parties, each Party will obligate such Third Party to agree in writing to assign ownership of, or grant an exclusive, royalty-free, worldwide, perpetual and irrevocable license (with the right to grant sublicenses) to, any inventions arising under its agreement with such Third Party to the extent related to Development, Manufacturing or Commercialization with respect to the Products in the Field; and such Party shall structure such assignment or exclusive license so as to enable such Party to sublicense such Third Party inventions to the other Party pursuant to Section 8.1 (including permitting such other Party to grant further sublicenses); provided that, in connection with any academic collaborator performing research work with respect to the Target or the Products that is not reasonably expected by the applicable Party to result in inventions related to composition of matter or methods of use, it shall be sufficient for such Party to obtain a non-exclusive, worldwide, royalty-free, perpetual license (with the right to grant sublicenses) to, and a right to negotiate for an exclusive license, with the right to grant sublicenses, to, any inventions resulting from such research work, which sublicensing rights must permit sublicensing to the other Party pursuant to Section 8.1 (including permitting such other Party to grant further sublicenses); and

(v) each Party shall notify the JSC at a regular meeting of the JSC, of the execution of any such agreement with any such Third Party and, if requested, shall provide the other Party with a copy of such agreement, which copy may be redacted with respect to matters that do not relate to the Collaboration.

(b) Other Sublicenses. Except as provided in Section 8.2(a), any other sublicense by either Party under the licenses and sublicenses set forth in Section 8.1 shall require the prior written approval of the other Party.

Section 8.3 Sublicense Requirements. Any sublicense granted by a Party pursuant to this Agreement shall be subject to the following:

(a) each sublicense granted hereunder by a Party or its Affiliates shall be consistent with the requirements of this Agreement;

(b) any transfer of rights between a Party and its Affiliates shall not be deemed a sublicense by such Party but shall be deemed a direct license by the other Party to such Party's Affiliate; it being understood and agreed that such Party shall remain responsible for the activities of its Affiliate;

(c) a Party's or its Affiliates' Selling Parties or Third Party Contractors shall have no right to grant further sublicenses without the other Party's prior written consent, which consent shall not be unreasonably withheld, conditioned or delayed;

(d) such Party shall be primarily liable for any failure by its Affiliates and Selling Parties and Third Party Contractors to comply with all relevant restrictions, limitations and obligations in this Agreement; and

(e) such sublicense must be granted pursuant to a written sublicense agreement and, with respect to any sublicense other than a sublicense by a Party to an Affiliate of such Party, such Party must provide the other Party with a copy of any sublicense agreement entered into under Section 8.2 above within thirty (30) days after the execution of such sublicense agreement; provided that any such copy may be reasonably redacted to remove any confidential, proprietary or competitive information, but such copy shall not be redacted to the extent that it impairs the other Party's ability to ensure compliance with this Agreement. Such sublicense agreement shall be treated as Confidential Information of the sublicensing Party and no copies are required with respect to sublicense agreements with Third Party Contractors.

Section 8.4 Affiliates and Third Party Contractors. Either Party may exercise its rights and perform its obligations hereunder itself or through its Affiliates and (sub)licensees. Each Party shall be liable for any failure by its Affiliates and (sub)licensees (including Third Party Contractors) to comply with all relevant restrictions, limitations and obligations in this Agreement. If either Party desires to use any Person to conduct any of its Development, Commercialization, Manufacture or other Collaboration activities hereunder, such Party must comply with the obligations of Section 8.2(a)(iii) through (v), even to the extent no sublicense of rights is granted to such Third Party.

Section 8.5 Third Party Agreements.

(a) Acknowledgement. Except as provided in Section 8.5(b) and Section 9.6, each Party acknowledges that each Party is responsible for the fulfillment of its obligations under any Third Party Agreement that it enters into, and each Party agrees to fulfill the same obligations, including any provisions necessary to maintain in effect any rights sublicensed to the other Party hereunder and the exclusive or non-exclusive nature of such rights, as applicable, subject to the other Party's compliance with its obligations hereunder.

(b) Incorporation of Certain Provisions. Each Party agrees and acknowledges that the Licensing Party may be required to provide to licensors under any Third Party Agreements, periodic reports relating to the gross sales and Net Sales of the Products. Each Party acknowledges that the Licensing Party may be required to share certain reports and copies of sublicense agreements provided hereunder with any licensor under a Third Party Agreement, and each Party consents to the sharing of such reports and such copies of such sublicense agreements to the extent required under such Third Party Agreement to the same extent as disclosures are permitted under Section 11.3(b) hereunder; provided that the financial and any other terms of any such sublicense not pertinent to an understanding of the other Party's obligations or benefits under this Agreement may be redacted. In addition, each Party acknowledges that the Prosecution, enforcement and other intellectual property management rights under this Agreement with respect to Patents and other intellectual property licensed under Third Party Agreements shall be subject to the terms and conditions of the applicable Third Party Agreements and, in the case of Third Party Agreements in which the licensor is an academic institution, other provisions of such Third Party Agreements that are customarily required to be imposed on sublicensees in academic licenses (in no event to include any exclusivity covenant).

(c) Covenants Regarding Third Party Agreements. Each Party that has entered into a Third Party Agreement (the "Licensing Party") agrees that during the Term:

(i) The Licensing Party shall not modify or amend any Third Party Agreement in any way that adversely affects the other Party's rights hereunder without the other Party's prior written consent;

(ii) The Licensing Party shall not terminate any Third Party Agreement, in whole or in part, without the other Party's prior written consent;

(iii) Subject to Section 9.6, the Licensing Party shall be solely responsible for, and shall make, all royalty payments, milestone payments, yearly fees, sublicensee fees, Prosecution fees, and all other payments owed to any licensor under and pursuant to any Third Party Agreement;

(iv) The Licensing Party shall not exercise or fail to exercise any of its rights, or fail to perform any of its obligations, under any Third Party Agreement, where such exercise or failure to exercise or perform would adversely affect the other Party's rights hereunder, without the prior written consent of the other Party, including rights with respect to including applicable improvements within the licenses granted under such Third Party Agreement; and, at the reasonable request of the other Party, the Licensing Party shall exercise such rights and make such requests described above as are permitted under such Third Party Agreement;

(v) The Licensing Party shall promptly furnish the other Party with copies of all reports and other communications that the Licensing Party furnishes to any licensor under any Third Party Agreement to the extent that such reports relate to this Agreement;

(vi) The Licensing Party shall promptly furnish the other Party with copies of all reports and other communications that the Licensing Party receives from any licensor under any Third Party Agreement that relate to this Agreement (including notices relating to applicable improvements under such Third Party Agreement);

(vii) The Licensing Party shall furnish the other Party with copies of all notices received by the Licensing Party relating to any alleged breach or default by the Licensing Party under any Third Party Agreement within two (2) Business Days after the Licensing Party's receipt thereof; in addition, if the Licensing Party should at any time breach a Third Party Agreement or become unable to timely perform its obligations thereunder, the Licensing Party shall immediately notify the other Party; and

(viii) If the Licensing Party cannot or chooses not to cure or otherwise resolve any alleged breach or default under any Third Party Agreement, (A) the Licensing Party shall so notify the other Party within two (2) Business Days of such decision, which shall not be less than fifteen (15) Business Days prior to the expiration of the cure period under such Third Party Agreement; provided that the Licensing Party shall use Commercially Reasonable Efforts to cure any such breach or default; and (B) the other Party, in its sole discretion, shall be permitted (but shall not be obligated), on behalf of the Licensing Party, to cure any breach or default under such Third Party Agreement in accordance with the terms and conditions of such Third Party Agreement or otherwise resolve such breach directly with the applicable licensor(s) under such Third Party Agreement; and (C) if the Lead Party pays any such licensor any amounts owed by the Licensing Party (where the Licensing Party is the non-Lead Party) under such Third Party

Agreement, then, provided that such amounts have not arisen as a result of the Lead Party's failure to comply with the terms and conditions of such Third Party Agreement within the categories described in Section 8.5(b) applicable to the Lead Party as a sublicensee, the Lead Party may deduct the Licensing Party's (where the Licensing Party is the non-Lead Party) share of such amounts from payments the Lead Party is required to make thereafter to the Licensing Party (where the Licensing Party is the non-Lead Party) hereunder or, at the Lead Party's election, may otherwise seek reimbursement of such amounts from the Licensing Party (where the Licensing Party is the non-Lead Party).

(d) Survival of Rights Following Termination of Third Party Agreement. The Parties agree that in the event of any termination of any Third Party Agreement with respect to any intellectual property rights licensed to a Party hereunder, such Party shall have the right to become a direct licensee of the Third Party licensor(s) under such Third Party Agreement and the Licensing Party shall assist the other Party in exercising such rights, in each case solely with respect to the Products; provided that the other Party has not breached this Agreement, or breached the applicable Third Party Rights under such Third Party Agreement. In addition, notwithstanding the foregoing, in the event of such termination, the other Party may in any event approach any licensor under any Third Party Agreement for a direct license.

Section 8.6 Exclusivity.

(a) Exclusivity Obligations. From the Effective Date until the third (3rd) anniversary of the Effective Date (the "Exclusivity Period"), each of the Parties covenants and agrees, solely on behalf of itself and its respective Affiliates, that it shall not (except as otherwise expressly permitted in this Section 8.6): (i) alone or with or for any Third Party, develop, Manufacture or Commercialize (A) the Candidate, (B) any molecule in the Field that is Directed against the Target, (C) any pharmaceutical product (including any Companion Diagnostic) in the Field that constitutes, incorporates, comprises or contains any molecule that is Directed against the Target, or (D) any Companion Diagnostic in the Field that is used for the Product for any other pharmaceutical product or (ii) license, authorize, appoint or otherwise willfully or intentionally enable, whether directly or indirectly, a Third Party to conduct any of the activities described in clause (i).

(b) Exceptions.

(i) Clinical Combination Activities. Notwithstanding anything to the contrary in Section 8.6(a), either Party shall have the right, directly or indirectly (whether such activities are conducted internally or with or through a Third Party), to conduct Clinical Combination Activities in accordance with Section 8.6(c).

(ii) Research; Incidental Discoveries. Notwithstanding anything to the contrary in Section 8.6(a), a Party shall be deemed not to be, directly or indirectly (whether such activities are conducted internally or with or through a Third Party), Developing, Manufacturing or Commercializing in violation of the provisions of Section 8.6(a) as a result of (A) conducting non-clinical research for any molecule in the Field that is Directed against the Target; (B) conducting a research program or discovery effort (or Developing, Manufacturing or Commercializing a molecule resulting from such research program or discovery effort) that has as

its specified and primary goal, as evidenced by items such as laboratory notebooks or other relevant documents contemporaneously kept, taken as a whole, to discover or Develop any compound that is Directed against a target other than the Target; or (C) conducting a research program or discovery effort with respect to a Companion Diagnostic (or Developing, Manufacturing or Commercializing a Companion Diagnostic resulting from such research program or discovery effort) that has as its specified and primary goal, as evidenced by items such as laboratory notebooks or other relevant documents contemporaneously kept, taken as a whole, to be used for a target other than the Target.

(iii) Academic Collaborations. Notwithstanding the provisions of Section 8.6(a), and without limiting Section 8.2(a)(ii), each Party shall be permitted to perform any of the activities that would otherwise be prohibited under Section 8.6(a) in relation to the Target, if such activities are (A) the subject of an existing agreement between such Party and an academic institution or academic collaborator entered into prior to the Effective Date, provided that such Party shall not be permitted to amend any such agreement unless such amendment contains provisions consistent with the terms and conditions of such agreement in effect as of the Effective Date with respect to (1) ownership and licenses of pre-existing intellectual property rights, as well as intellectual property rights and inventions arising pursuant to the conduct of activities under such agreement, (2) rights regarding publication of the results arising pursuant to the conduct of activities under such agreement, and (3) confidentiality obligations (collectively, (1) through (3), the "Academic Essential Provisions"), or (B) the subject of a new agreement entered into between such Party and an academic institution or academic collaborator that contains terms and conditions with respect to the Academic Essential Provisions consistent with the terms and conditions of the agreements between such Party and an academic institution or academic collaborator entered into prior to the Effective Date; provided that, if any Academic Essential Provisions of an amendment described in (A) or an agreement described in (B) would not be consistent with the Academic Essential Provisions of the agreements between such Party and an academic institution or academic collaborator entered into prior to the Effective Date, such Party shall not enter into such amendment or agreement on such inconsistent terms and conditions without the prior written consent of the other Party.

(iv) Acquisition of Competitive Programs. Section 8.6(a) shall not apply to the applicable Party if, during the Term, such Party or any of its Affiliates (other than in a Change of Control transaction with respect to such Party) acquires a Third Party, whether by stock purchase, asset purchase, merger or consolidation, that is then engaged in activities that would otherwise constitute a breach of this Section 8.6 by such Party or its Affiliates (a "Competitive Program"); it being understood and agreed that, unless the Parties agree otherwise in writing, such Party that is engaged in a Competitive Program (the "Competitive Program Party") shall, within ninety (90) days after the date of such merger, consolidation or acquisition, notify the other Party that it intends to either: (A) terminate, or cause its relevant Affiliate to terminate, the Competitive Program or (B) divest, or cause its relevant Affiliate to divest, whether by license or otherwise, the Competitive Program. If the Competitive Program Party notifies the other Party within such ninety (90) day period that it intends to terminate, or cause its relevant Affiliate to terminate, such Competitive Program, the Competitive Program Party or its relevant Affiliate, shall (X) terminate such Competitive Program as quickly as possible, and in any event within one hundred and eighty (180) days (unless applicable Law requires a longer termination period) after the Competitive Program Party delivers such notice to the other Party; and (Y) confirm to the other

Party when such termination has been completed, and the Competitive Program Party's continuation of the Competitive Program during such one hundred and eighty (180) day (or, as required by applicable Law, longer) period shall not constitute a breach of the Competitive Program Party's exclusivity obligations under Section 8.6(a). If the Competitive Program Party notifies the other Party within such ninety (90) day period that it intends to divest such Competitive Program, the Competitive Program Party or its relevant Affiliate shall use all reasonable efforts to effect such divestiture as quickly as possible, and in any event within one hundred eighty (180) days after the Competitive Program Party delivers such notice to the other Party, and shall confirm to the other Party when such divestiture has been completed. If the Competitive Program Party or its relevant Affiliate fails to complete such divestiture within such one hundred eighty (180) day period, but has used reasonable efforts to effect such divestiture within such one hundred eighty (180) day period, then, unless otherwise required by applicable Law, such one hundred eighty (180) day period shall be extended for such additional reasonable period thereafter as is necessary to enable such Competitive Program to be in fact divested, not to exceed an additional one hundred eighty (180) days; provided, however, that such additional one hundred eighty (180) day period shall be extended for such period as is necessary to obtain any governmental or regulatory approvals required to complete such divestiture if the Competitive Program Party or its relevant Affiliate is using good faith efforts to obtain such approvals. Notwithstanding anything to the contrary in this subsection (iv), the Competitive Program Party's continuation of the Competitive Program during such notice period and divestiture period shall not constitute a breach of the Competitive Program Party's exclusivity obligations under Section 8.6(a); provided, that, such Competitive Program Party throughout such period adopts and implements Segregation Activities.

(v) Certain Permitted Activities.

(A) During the Exclusivity Period, if either Party (the "Offering Party") desires to perform pre-clinical IND enabling studies on a new pre-clinical pharmaceutical product that binds to the Target (the "ROFN Candidate"), the Offering Party shall notify the other Party (the "Negotiating Party") in writing (the "ROFN Notice"). Upon the Negotiating Party's receipt of the ROFN Notice, the Parties shall engage in good faith discussions on the economic terms of either an exclusive license or co-development and co-commercialization license for the ROFN Candidate for a period of at least ninety (90) Business Days (the "Negotiation Period"). If the Parties cannot agree on the economic terms of either an exclusive license or co-development and co-commercialization license for the ROFN Candidate within the Negotiation Period, then, following the expiration of the Exclusivity Period, the Offering Party shall be entitled to Develop, Manufacture, and/or Commercialize such ROFN Candidate alone or with a Third Party without any further obligation to the Negotiating Party.

(B) The restrictions set forth in Section 8.6(a) shall not be deemed to prevent either Party or its respective Affiliates from (1) fulfilling its obligations under this Agreement, or (2) engaging any subcontractors in accordance with Section 8.2(a)(ii) of this Agreement.

(C) If a Change of Control occurs with respect to either Party with a Third Party and the Third Party already is conducting activities that would cause a Party or an Affiliate to violate Section 8.6(a) (an “Acquirer Program”), then such Third Party will be permitted to continue such Acquirer Program and such continuation will not constitute a violation of Section 8.6(a); provided that (1) none of the BeiGene Collaboration Intellectual Property, BioAtla Collaboration Intellectual Property or Joint IP will be used in any Acquirer Program, (2) none of the other Patents or Know-How licensed by either Party to the other Party pursuant to this Agreement will be used in any Acquirer Program, (3) no Confidential Information of the other Party will be used in any such Acquirer Program, and (4) the Development activities required under this Agreement will be conducted separately from any Development activities directed to such Acquirer Program, including by the maintenance of separate lab notebooks and records (password-protected to the extent kept on a computer network) and the use of separate personnel working on each of the activities under this Agreement, and the activities covered under such Acquirer Program (except that this requirement shall not apply to personnel who have senior research management roles and not project level research roles, provided such personnel in senior research management roles are not directly involved in the day-to-day activities under such Acquirer Program) ((1) through (4) above, “Segregation Activities”).

(c) Clinical Combination Activities. Notwithstanding anything to the contrary in this Agreement but subject to the proviso to this sentence, either Party shall, at all times, have the right to conduct clinical Development of the Products, alone or with Third Parties, in which the Products are used in combination with other therapeutic products, including the conduct of Clinical Trials involving the Products used in combination with other therapeutic products (“Clinical Combination Activities”), and to grant to any such Third Parties the right to use and reference either Party’s regulatory filings for purposes of enabling such Party and such Third Party to include the relevant use of the Products in combination with such other therapeutic products in the approved label for such Products or such other therapeutic product, respectively; provided, that, (i) BioAtla shall obtain the prior written consent of BeiGene to the conduct of any such Clinical Combination Activities, (ii) solely during the period commencing on the Effective Date and ending upon receipt of Regulatory Approval, BioAtla shall not have the right under this Section 8.6(c) to conduct any Clinical Combination Activities that involve any therapeutic compound or product that is Directed to the same receptor or target as a compound or product that is part of a clinical development program then being conducted by or on behalf of BeiGene and (iii) neither Party may grant to any such Third Party the right to sell, offer for sale or otherwise commercially exploit such Products.

Section 8.7 No Implied Licenses or Rights.

Except as expressly provided in Section 8.1, and subject to Section 8.6, all rights in and to the BioAtla Intellectual Property, BioAtla’s and its Affiliates’ interests in BioAtla Collaboration Intellectual Property, Joint IP and any other Patents or Know-How of BioAtla and its Affiliates, are hereby retained by BioAtla and its Affiliates. Except as expressly provided in Section 8.1, and subject to Section 8.6, all rights in and to the BeiGene Intellectual Property, BeiGene’s and its Affiliates’ interests in BeiGene Collaboration Intellectual Property and any other Patents or Know-How of BeiGene and its Affiliates, are hereby retained by BeiGene and its Affiliates.

Section 8.8 Section 365(n) of the Bankruptcy Code. All rights and licenses granted under or pursuant to any section of this Agreement are and will otherwise be deemed to be for purposes of Section 365(n) of the United States Bankruptcy Code (Title 11, US Code), as amended (the "Bankruptcy Code"), licenses of rights to "intellectual property" as defined in Section 101(35A) of the Bankruptcy Code. The Parties will retain and may fully exercise all of their respective rights and elections under the Bankruptcy Code. The Parties agree that each Party, as licensee of such rights under this Agreement, will retain and may fully exercise all of its rights and elections under the Bankruptcy Code or any other provisions of applicable Law in the Territory that provide similar protection for "intellectual property." The Parties further agree that, in the event of the commencement of a bankruptcy proceeding by or against a Party under the Bankruptcy Code or analogous provisions of applicable Law in the Territory, the Party that is not subject to such proceeding will be entitled to a complete duplicate of (or complete access to, as appropriate) such intellectual property and all embodiments of such intellectual property, which, if not already in the non-subject Party's possession, will be promptly delivered to it upon the non-subject Party's written request thereof. Any agreements supplemental hereto will be deemed to be "agreements supplementary to" this Agreement for purposes of Section 365(n) of the Bankruptcy Code.

Article IX
Financial Provisions

Section 9.1 Upfront Payment. BeiGene shall pay to BioAtla within ten (10) Business Days after the Effective Date a one-time, non-refundable, non-creditable upfront payment of Twenty Million U.S. Dollars (\$20,000,000) in cash.

Section 9.2 Sharing of Development Costs.

(a) ROW Development. Subject to Section 3.2(b), Section 3.6 and Exhibit E, the Parties will share Development Costs intended to support Regulatory Approvals in the ROW for the Products as follows: BioAtla will bear [***] percent ([***]%) of such Development Costs, and BeiGene will bear [***] percent ([***]%) of such Development Costs (each, such Party's "Co-Development Percentage"). All Direct Costs incurred by either Party or its Affiliates in conducting Development activities intended to support Regulatory Approvals in the ROW for the Products pursuant to the Development Plan (including Manufacturing related thereto and any Clinical Trials, including any Phase IV Clinical Trials conducted following Regulatory Approval) in accordance with terms and conditions of this Agreement that constitute Development Costs shall be included for the purposes of calculating the ROW Profit & Loss Share. Development Costs shall initially be borne by the Party incurring the cost or expense, subject to reimbursement in accordance with the ROW Profit & Loss Share. Notwithstanding the foregoing, to the extent that BeiGene Develops more than one (1) Product pursuant to the Development Plan, the obligation of BioAtla to bear its Co-Development Percentage of the Development Costs intended to support Regulatory Approvals in the ROW for the additional Product under this Section 9.2(a) shall be subject to BioAtla's prior written consent.

(b) BeiGene Territory Development. BeiGene shall be solely responsible for all costs, including any Manufacturing Costs, associated with the clinical supply of any Product for Clinical Trials solely designed to support Regulatory Approval in the BeiGene Territory from and after the Effective Date.

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

Section 9.3 Milestone Payments.

(a) Development and Regulatory Milestones.

(i) China. BeiGene shall pay BioAtla the following amounts upon the first achievement by or on behalf of BeiGene or its Affiliates or Selling Parties of the corresponding milestone events set forth below with respect to the first Product to achieve such milestone events:

<u>Milestones</u>	<u>Payment (in US Dollars)</u>
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]

(ii) ROW. BeiGene shall pay BioAtla the following amounts after the first achievement by or on behalf of either Party or its Affiliates or Selling Parties of the corresponding development and regulatory milestone events set forth below with respect to the first Product to achieve such milestone events; it being understood and agreed that, if BioAtla delivers the Co-Development Opt-Out Notice to BeiGene pursuant to Section 3.6, each payment below from BeiGene to BioAtla shall be reduced by [***] percent ([***]%).

<u>Milestones</u>	<u>Payment (in US Dollars)</u>
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

<u>Milestones</u>	<u>Payment (in US Dollars)</u>
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]

(b) Sales Milestones. BeiGene shall make the sale milestone payments to BioAtla that are set forth below upon the first achievement by or on behalf of each Party, its Affiliates or Selling Parties of the sales milestone events (“Sales Milestone Events”) set forth below with respect to aggregate Annual Net Sales of a Product in a given Calendar Year in the BeiGene Territory. For clarity, each milestone set forth below shall be due and payable one time only, regardless of the number of Products to achieve the applicable milestone event, the number of times a Product achieves the applicable milestone event and regardless of the number of Indications for which the milestone event may be achieved.

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

<u>Sales Milestone Event</u>	<u>Milestone Payments (in US dollars)</u>
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]

(c) POC Milestone Payment.

(i) If at any time during the Term, BioAtla reasonably believes that the POC Milestone has been successfully achieved, BioAtla will notify BeiGene in writing, which written notice will include the Clinical Data that supports BioAtla's reasonable belief.

(ii) If the Parties mutually agree, based on such Clinical Data, that the POC Milestone has been successfully achieved, BeiGene shall pay to BioAtla a milestone payment of [***] within ten (10) Business Days of such agreement.

(iii) If the Parties do not mutually agree, based on such Clinical Data, that the POC Milestone has been successfully achieved, either Party may convene a special meeting of the JSC within fifteen (15) Business Days for the purpose of resolving such dispute pursuant to Section 2.3(a). For clarity, if the JSC is unable to resolve any dispute between the Parties as to whether or not the POC Milestone has been successfully achieved, the disputed matter will be resolved in accordance with Sections 15.1 and 15.2.

(iv) If (A) either the Parties do not mutually agree that the POC Milestone has been successfully achieved or the Parties mutually agree that the POC Milestone has not been successfully achieved and (B) in either case, BeiGene determines to continue to Develop the Candidate (which determination may be made by BeiGene during the period that the Parties are resolving any dispute with respect to the achievement of the POC Milestone pursuant to subsection (iii) above), then BeiGene shall (1) provide written notice to BioAlta of such determination and (2) pay to BioAtla a milestone payment of [***] within ten (10) Business Days of the date of delivery by BeiGene to BioAlta of such written notice. If the events in the immediately preceding sentence occur and the first Product being Developed by BeiGene subsequently achieves the first milestone set forth in Section 9.3(a)(ii), then, in addition to making the applicable milestone payment for achieving such milestone but in lieu of making the POC Milestone payment set forth in the first sentence of this Section 9.3(c), BeiGene shall pay to BioAtla an additional milestone payment of [***] on the same date on which it makes the payment for the first milestone set forth in Section 9.3(a)(ii).

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

(d) Payment of Milestones. Subject to the payment dates set forth in Section 9.3(c), each milestone payment payable under this Section 9.3 shall be made within [***] after the achievement of the applicable milestone and shall be non-refundable and non-creditable.

Section 9.4 ROW Profit & Loss Share.

(a) ROW Profit & Loss Share. The Parties will share in (and bear) Operating Profits or Losses with respect to the Products in the ROW in accordance with Exhibit E.

(b) Quarterly Reconciliation and Payments. Unless the Parties otherwise agree in advance in writing, reconciliation and payments of the ROW Profit & Loss Share shall be conducted as set forth in Exhibit E.

Section 9.5 Royalty Payments.

(a) Royalty Rate in the Territory. Following any Co-Development Opt-Out Date and subject to Section 9.5(b), BeiGene shall pay to BioAtla royalties on worldwide Annual Net Sales of the Products in the Territory by BeiGene, its Affiliates and all Selling Parties at the applicable royalty rates set forth below (each, a "Royalty Rate").

<u>Annual Net Sales in the Territory</u>	<u>Royalty Rate</u>
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

Each Royalty Rate set forth in the table above will apply only to that portion of the worldwide Annual Net Sales of the Products in the Territory during a given Calendar Year that falls within the indicated portion.

(b) Royalty Rate in the BeiGene Territory. Prior to any Co-Development Opt-Out Date, BeiGene shall pay to BioAtla royalties (each, a "BeiGene Territory Royalty Rate") on Annual Net Sales of the Products solely in the BeiGene Territory by BeiGene, its Affiliates and all Selling Parties as follows:

<u>Annual Net Sales in the BeiGene Territory</u>	<u>Royalty Rate</u>
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]

Each BeiGene Territory Royalty Rate set forth in the table above will apply only to that portion of the worldwide Annual Net Sales of the Products in the BeiGene Territory prior to any Co-Development Opt-Out Date during a given Calendar Year that falls within the indicated portion.

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

For example, if Annual Net Sales of the Products in the BeiGene Territory by BeiGene and its Affiliates and Selling Parties was \$150,000,000, then the royalties payable with respect to such Annual Net Sales, subject to adjustment as set forth in this Section 9.5, would be:

[***]

(c) Royalty Term. Royalties payable under this Section 9.5 shall be paid by BeiGene for each Product on a country-by-country basis from the later of (i) any Co-Development Opt-Out Date (if applicable to such Product) and (ii) the date of First Commercial Sale of such Product in a country with respect to which royalty payments are due, until the latest of:

(i) the last to expire of any Valid Claim of BioAtla Patents, BioAtla Collaboration Patents, BeiGene Collaboration Patents or Joint Patents, in each case Covering such Product in such country;

(ii) ten (10) years following the date of First Commercial Sale of such Product in such country; and

(iii) the last to expire of any Regulatory Exclusivity applicable to such Product in such country;

(each such term with respect to a country, a "Royalty Term").

Notwithstanding the foregoing, in the event that the Royalty Term for a Product in a country continues solely due to Section 9.5(c)(ii) above (*i.e.*, the Product is not Covered by a Valid Claim of BioAtla Patents, BioAtla Collaboration Patents, BeiGene Collaboration Patents or Joint Patents in the applicable country, and such Product is not subject to Regulatory Exclusivity in such country) then, in such event, the Royalty Rate or BeiGene Territory Royalty Rate, as applicable, for such Product in such country will be reduced to [***] percent ([***]%) of the applicable Royalty Rate in Section 9.5(a) or the applicable or BeiGene Territory Royalty Rate in Section 9.5(b) for such Product in such country.

Upon the expiration of the Royalty Term with respect to a Product in a country, the licenses granted by BioAtla to BeiGene pursuant to Section 8.1(a) shall be deemed to be fully paid-up, irrevocable and perpetual with respect to such Product in such country.

(d) Royalty Reduction for Generic Competition. If, on a country-by-country and Calendar Quarter-by-Calendar Quarter basis, a Generic Product(s) is Commercialized by a Third Party in any country in the Territory and there is Loss of Market Exclusivity for such Product in such country, then, subject to Section 9.5(f), the royalties payable with respect to Annual Net Sales of such Product pursuant to Section 9.5(a) in such country during such Calendar Quarter shall be reduced by [***].

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

(e) Deduction for Third Party Payments. In the event that royalties are payable by BeiGene to BioAtla with respect to any Product under this Section 9.5, BeiGene shall have the right to deduct from royalty payments otherwise due and payable by BeiGene to BioAtla under this Section 9.5, on a country-by-country basis, a maximum of [***] of any upfront payments, milestone payments, royalty payments and other amounts actually paid by BeiGene to a Third Party solely for a Product (i) pursuant to any a Third Party Agreement that is executed pursuant to Section 9.6 and is in effect or (ii) under any agreement with any Third Party that is executed by BeiGene from and after the Effective Date solely with respect to such Product in such country(ies), but only to the extent that the Patents or Know-How licensed under such Third Party Agreement or other agreement are necessary for the Development, Manufacture or Commercialization of such Product in such country(ies). Notwithstanding the foregoing, to the extent that any Third Party Agreement is applicable to a Product in the ROW then, prior to any Co-Development Opt-Out Date, [***] of any upfront payments, milestone payments, royalty payments and other amounts actually paid by BeiGene to a Third Party under such Third Party Agreement shall be included as a Development Cost or Commercialization Costs, as the case may be, and this Section 9.5(e) shall not apply.

(f) Royalty Reports; Payments. Within thirty (30) days after the end of each Calendar Quarter, BeiGene with respect to each Product shall provide BioAtla with a report stating the sales in units and in value of such Product made by BeiGene, its Affiliates, and Selling Parties, as applicable, on a country-by-country basis, together with the calculation of the royalties due to BioAtla, including the method used to calculate the royalties, the exchange rates used, and itemized deductions. Payments of all amounts payable under this Section 9.5 shall be made by BeiGene to the bank account indicated by BioAtla within forty-five (45) days from the end of each Calendar Quarter in which such payment accrues.

(g) Cumulative Effect of Royalty Reductions. In no event shall the royalty reductions described in this Section 9.5, alone or together, reduce the royalties payable by BeiGene for a Product in a country in any given Calendar Quarter to less than [***] of the amounts otherwise payable by BeiGene for such Product in such country in such Calendar Quarter. BeiGene may carry over and apply any such royalty reductions, which are incurred or accrued in a Calendar Quarter and are not deducted in such Calendar Quarter due to the limitation set forth above in this Section 9.5(g), to any subsequent Calendar Quarter(s) and shall continue applying such reduction on a Calendar Quarter basis thereafter until fully deducted, in all cases subject to the limitation set forth above in this Section 9.5(g).

Section 9.6 Third Party Payments. If at any time prior to any Co-Development Opt-Out Date, either Party at any time reasonably believes that a license under Third Party Patents or Third Party Know-How could be necessary or useful to Develop, Manufacture or Commercialize the Products, then such Party shall notify (A) the JSC if such notice is provided during Development or Manufacturing of the Products for Development or (B) the JSC if such notice is provided during Commercialization of the Products, and the following shall apply:

(a) If the JSC, as applicable, agrees to obtain such license, and if so, which of the Parties will do so, then the Parties will proceed as determined by the JSC, as applicable. If the JSC, as applicable, cannot agree on whether to obtain such license or which Party will do so, then the Lead Party in the applicable portion of the Territory shall have the first right to obtain such license and if the applicable Lead Party does not promptly exercise such right then the other Party shall have the right to do so; provided, further, that, after a Co-Development Opt-Out Notice, the

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

matter will be escalated to the JSC for resolution in accordance with Section 2.1; provided that, if the JSC cannot agree on which Party should obtain such license, then BeiGene shall have the sole right, but not the obligation, in its sole discretion, to obtain such license throughout the Territory in accordance with Section 9.5(e).

(b) The costs of each license obtained pursuant to Section 9.6(a) (each, a “Third Party Agreement”) to the extent such costs directly relate to the Products and constitute COGS shall be included as Commercialization Costs for purposes of calculating the ROW Profit & Loss Share prior to any Co-Development Opt-Out Date and, following any Co-Development Opt-Out Date, shall be borne solely by BeiGene to the extent incurred after any Co-Development Opt-Out Date, subject to deduction from royalties in accordance with Section 9.5.

(c) For purposes of this Agreement, the Third Party Patents and Third Party Know-How licensed under a Third Party Agreement shall be deemed “Collaboration Intellectual Property” of the Party obtaining such license.

(d) Prior to any Co-Development Opt-Out Date (i) the Party designated to pursue the Third Party Agreement shall keep the other Party fully informed of the status of the negotiations with the applicable Third Party and provide the other Party with copies of all draft agreements; (ii) the other Party may provide comments and suggestions with respect to the negotiation of the agreement with such Third Party, and the Party seeking the Third Party Agreement shall reasonably consider all comments and suggestions reasonably recommended by the other Party; and (iii) the Party seeking the Third Party Agreement shall obtain a license that is sublicensable to the other Party in accordance with the terms of this Agreement, treating (unless otherwise agreed by the Parties) the Third Party intellectual property as Collaboration Intellectual Property hereunder.

Section 9.7 Financial Records. The Parties shall keep, and shall require their respective Affiliates and (sub)licensees to keep, complete and accurate books and records as follows:

(a) BeiGene shall keep, and require its Affiliates and (sub)licensees to keep, complete and accurate records and books of accounts containing all data reasonably required for the calculation and verification, as applicable, of Net Sales, ROW Product Revenue, Development Costs and Commercialization Costs including internal FTEs utilized by BeiGene, and the ROW Profit & Loss Share.

(e) BioAtla shall keep, and require its Affiliates and (sub)licensees to keep, complete and accurate records and books of accounts containing all data reasonably required for the calculation and verification, as applicable, of all Development Costs and Commercialization Costs (including internal FTEs) utilized by BioAtla, and the ROW Profit & Loss Share.

(f) The Parties shall keep, and shall require their respective Affiliates and (sub)licensees to keep, such books and records for at least three (3) years following the end of the Calendar Year to which they pertain. Such books of accounts shall be kept at the principal place of business of the financial personnel with responsibility for preparing and maintaining such records.

Section 9.8 Audits.

(a) Audit Team. Each Party may, upon request and at its expense (except as provided for herein), cause an internationally recognized independent accounting firm selected by it (except one to whom the Auditee has a reasonable objection) (the "Audit Team") to audit during ordinary business hours the books and records of the other Party maintained pursuant to Section 9.7 and the correctness of any payment made or required to be made to or by such Party, and any report underlying such payment (or lack thereof), pursuant to the terms of this Agreement. Prior to commencing its work pursuant to this Agreement, the Audit Team shall enter into an appropriate confidentiality agreement with the Auditee obligating the Audit Team to be bound by obligations of confidentiality and restrictions on use of confidential information that are no less restrictive than the obligations set forth in Article XI.

(b) Limitations. In respect of each audit of the Auditee's books and records: (i) the Auditee may be audited only once per Calendar Year, (ii) no records for any given Calendar Year for an Auditee may be audited more than once; provided that the Auditee's records shall still be made available if such records impact another financial Calendar Year which is being audited, and (iii) the Audit Rights Holder shall only be entitled to audit books and records of an Auditee from the three (3) Calendar Years prior to the Calendar Year in which the audit request is made.

(c) Audit Notice. In order to initiate an audit for a particular Calendar Year, the Audit Rights Holder must provide written notice to the Auditee. The Audit Rights Holder exercising its audit rights shall provide the Auditee with notice of one or more proposed dates of the audit not less than sixty (60) days prior to the first proposed date. The Auditee will reasonably accommodate the scheduling of such audit. The Auditee shall provide such Audit Team(s) with full and complete access to the applicable books and records and otherwise reasonably cooperate with such audit.

(d) Payments. If the audit shows any under-reporting or underpayment, or overcharging or overpayment by any Party, that under-reporting, underpayment, overpayment or overcharging shall be reported to the Audit Rights Holder and the underpaying or overcharging Party shall remit the applicable underpayment amount or reimburse the applicable overpayment amount (together with interest at the rate set forth in Section 9.11) to the underpaid or overcharged Party within forty-five (45) days after receiving the audit report. Further, if the audit for an annual period shows an underpayment or an overcharge by any Party for that period in excess of five percent (5%) of the amounts properly determined, the underpaying or overcharging Party, as the case may be, shall reimburse the applicable underpaid or overcharged Audit Rights Holder conducting the audit, for its respective audit fees and reasonable Out-of-Pocket Costs in connection with said audit, which reimbursement shall be made within forty-five (45) days after receiving appropriate invoices and other support for such audit-related costs.

(e) Definitions. For the purposes of the audit rights described herein, an individual Party subject to an audit in any given year will be referred to as the "Auditee" and the other Party who has certain and respective rights to audit the books and records of the Auditee will be referred to as the "Audit Rights Holder."

Section 9.9 Tax Matters.

(a) [RESERVED]

(b) Withholding and Indirect Taxes.

(i) Subject to Section 9.9(b)(ii), each Party shall deduct and withhold from any amounts paid under this Agreement such taxes as are required to be deducted or withheld therefrom under any provision of applicable Law. The Party that is required to make such withholding (the “Paying Party”) will: (A) deduct those taxes from such payment, (B) timely remit the taxes to the proper taxing authority, and (C) send evidence of the obligation together with proof of tax payment to the other Party (the “Non-Paying Party”) on a timely basis following that tax payment; provided, however, that before making any such deduction or withholding, the Paying Party shall give the Non-Paying Party notice of the intention to make such deduction or withholding (and such notice, which shall set forth in reasonable detail the authority, basis and method of calculation for the proposed deduction or withholding, shall be given at least a reasonable period of time before such deduction or withholding is required, in order for such Non-Paying Party to obtain reduction of or relief from such deduction or withholding). Each Party agrees to cooperate with the other Parties in claiming refunds or exemptions from, or reductions in, such deductions or withholdings under any applicable Law or treaty to ensure that any amounts required to be withheld pursuant to this Section 9.9(b)(i) are reduced to the fullest extent permitted by applicable Law.

(ii) Each Party shall deduct and withhold from any amounts paid or deemed to be paid to such Party under this Agreement by or on behalf of the Partnership (as defined in Exhibit F), or allocable by the Partnership pursuant to Section 1.5 of Exhibit F to such Party, such United States taxes as are required to be deducted or withheld therefrom under any provision of applicable Law in accordance with this Section 9.9(b)(ii). For the avoidance of doubt, with respect to payments described in the foregoing provision of this Section 9.9(b)(ii), (1) the Partnership shall be treated as the Paying Party and making payment to the Non-Paying Party; (2) withholding on the payment by the Partnership to the Non-Paying Party shall be under the control of the Non-Paying Party (in its capacity as a partner in the Partnership); and (3) the Non-Paying Party shall determine for the Partnership the United States tax withholding that may be required on payments or allocations made or deemed made in accordance with these principles by the Partnership to the Non-Paying Party. To the extent permitted by United States tax law, it shall be the obligation of the Non-Paying Party (in its capacity as a partner in the Partnership) to deduct and withhold from any amounts so paid, deemed paid or allocated such taxes as are required to be deducted or withheld therefrom under any provision of applicable United States tax Law. The Non-Paying Party shall indemnify the other Parties for taxes, interest, and penalties arising from any failure by the Paying Party or the Partnership to withhold and pay over the correct amount to the United States tax authority with respect to a payment, deemed payment, or allocation to the Non-Paying Party.

(iii) To the extent permitted by United States tax law, a Party shall not deduct or withhold any amount for United States tax for or in respect of any amount paid or deemed paid by the Partnership to any other Party or allocated by the Partnership pursuant to Section 1.5 of Exhibit F to any other Party nor shall a Paying Party deduct or withhold any amount for United States tax for or in respect of any amount paid or deemed paid by a Paying Party to the Partnership under the principles of this Section 9.9(b).

(iv) Each Party agrees to cooperate with the “Partnership Representative” of such Partnership and with the other Party with respect to claiming refunds or exemptions from, or reductions in, any deductions or withholdings, including pursuant to Code Section 1446(f), required to be withheld or deducted by an acquirer of an interest in the partnership described in Section 15.19 and in reducing or eliminating such withholdings to the fullest extent permitted by applicable Law.

(v) The Parties shall cooperate in good faith to minimize value added tax, sales and use tax, consumption tax and other similar taxes (“Indirect Taxes”) and income or franchise tax imposed in connection with this Agreement, as applicable. If any taxing authority imposes an Indirect Tax with respect to a payment made pursuant to Section 9.1, 9.3, or 9.5 the tax shall be borne by BeiGene if the tax is imposed on the licensee and shall be borne by BioAtla if the tax is imposed on the licensor. If any taxing authority imposes an Indirect Tax with respect to any other payment, including a payment made pursuant to Section 9.2, such Indirect Tax shall be borne by the Parties in the same manner as such payment.

(vi) Each Party has provided a properly completed and duly executed IRS Form W-9 or Form W-8, as applicable, to the other Party. The Parties shall cooperate in obtaining a taxpayer identification number for the Partnership and in causing the Partnership to issue in the name of the Partnership Form W-9 or Form W-8, as applicable, to any person when reasonably required or beneficial to the Partnership. Each Party and any other recipient of payments described in this Section 9.9(b) shall provide to the other Party (including where the other Party is acting in its capacity as Partnership Representative (as defined in Exhibit F)), at the time or times reasonably requested by such other Parties or as required by applicable Law, such other properly completed and duly executed documentation as will permit payments made under this Agreement to be made without, or at a reduced rate of, withholding for taxes, and the applicable payment shall be made without (or at a reduced rate of) withholding to the extent permitted by such documentation, as reasonably determined by the Paying Party; provided, that this obligation shall not arise in cases where the Non-Paying Party withholds and pays the United States tax in accordance with Section 9.9(b)(ii).

Section 9.10 Currency Exchange; Blocked Payments; Prohibitions on Payments.

(a) Currency Exchange. Unless otherwise expressly stated in this Agreement, all amounts specified in, and all payments made under, this Agreement shall be in United States Dollars. If any currency conversion shall be required in connection with the calculation of amounts payable under this Agreement, such conversion shall be performed in a manner consistent with the paying Party’s normal practices used to prepare its audited financial statements for internal and external reporting purposes. BioAtla has the right to verify that the exchange rates used by BeiGene for a given month are within the trading range of the last business day of the month prior.

(b) Blocked Payments. In the event that, by reason of applicable Law in any country, it becomes impossible or illegal for the paying Party (or any of its Affiliates or Selling Parties) to transfer, or have transferred on its behalf, payments owed the other Party hereunder, the paying Party will promptly notify the other Party of the conditions preventing such transfer and such payments will be deposited in local currency in the relevant country to the credit of the other Party in a recognized banking institution designated by the other Party or, if none is designated by the other Party within a period of thirty (30) days, in a recognized banking institution selected by the paying Party or any of its Affiliates or its Selling Parties, as the case may be, and identified in a written notice given to the other Party.

(c) Prohibitions on Payments. When in any country in the Territory applicable Law prohibits both the transmittal and the deposit of royalties on sales in such country, royalty payments due on Net Sales shall be suspended for as long as such prohibition is in effect and as soon as such prohibition ceases to be in effect, all royalties that BeiGene would have been under an obligation to transmit or deposit but for the prohibition shall forthwith be deposited or transmitted, to the extent allowable. The Parties shall cooperate in good faith to overcome, to the extent reasonably possible, any prohibition described in this Section 9.10(c) within a reasonable period of time.

Section 9.11 Late Payments. Any payments that are not paid on or before the date such payments are due under this Agreement shall bear interest at an annual rate equal to the lesser of (x) the “prime rate”, as reported by The Wall Street Journal, plus five percent (5%) or (y) the highest rate permitted by applicable Law; in each case calculated on the number of days such payment is delinquent, compounded monthly; provided that, with respect to any disputed payments, no interest payment shall be due until such dispute is resolved and the interest which shall be payable thereon shall be based on the finally-resolved amount of such payment, calculated from the original date on which the disputed payment was due through the date on which payment is actually made.

Article X
Intellectual Property Ownership, Protection and Related Matters

Section 10.1 Ownership of Inventions. Subject to Section 10.1(d):

(a) Non-Collaboration Know-How. Any Know-How discovered, developed, generated or invented by BeiGene or its Affiliates or BioAtla or its Affiliates, in each case, prior to or outside the Collaboration shall remain the sole property of such Party or its applicable Affiliate(s).

(b) Sole Inventions. Subject to Section 10.1(d), all BeiGene Collaboration Know-How shall be owned exclusively by BeiGene or its applicable Affiliate(s) and all BioAtla Collaboration Know-How shall be owned exclusively by BioAtla or its applicable Affiliate(s).

(c) Joint Inventions. Subject to Section 10.1(d), all Joint Inventions shall be owned jointly on the basis of each Party (or its applicable Affiliate(s)) having an undivided interest without a duty to account to the other Party (or its applicable Affiliate(s)) and shall be deemed to be Controlled by each Party. Each Party shall have the right to use such Joint Inventions, or license such Joint Inventions to its Affiliates or any Third Party, or sell or otherwise transfer its interest in such Joint Inventions to its Affiliates or a Third Party, in each case without the consent of the other Party or its applicable Affiliate(s) (and, to the extent that applicable Law requires the consent of the other Party or applicable Affiliate(s), this Section 10.1(c) shall constitute such consent), so long as such use, sale, license or transfer is subject to Section 8.6 and the licenses granted pursuant to this Agreement and is otherwise consistent with this Agreement.

(d) CAB Know-How and Patents. BioAtla shall solely own all Collaboration Know-How and intellectual property rights therein as and to the extent it relates solely to CAB Know-How and CAB Patents.

(e) Notice. Each Party agrees to provide, at the request of the other Party and no more than once per Calendar Quarter, reports disclosing to the other Party all Collaboration Intellectual Property discovered, developed, generated or invented by employees, agents and consultants of such Party, which disclosures may be made in connection with the updates made in accordance with Section 3.1(d).

(f) Inventorship. For purposes of determining ownership hereunder, the determination of inventorship shall be made in accordance with United States patent laws. In the event of a dispute regarding inventorship, if the Parties are unable to resolve the dispute, the Parties shall jointly engage mutually acceptable independent patent counsel not regularly employed by either Party to resolve such dispute. The decision of such independent patent counsel shall be binding on the Parties with respect to the issue of inventorship.

(g) Further Actions and Assignments. Each Party shall take all further actions and execute all assignments requested by the other Party and reasonably necessary or desirable to vest in the other Party the ownership rights set forth in this Article X.

Section 10.2 Prosecution of Patents. Subject to the terms and conditions of any Third Party Agreement to the extent such agreement applies to the BioAtla Patents, BioAtla Collaboration Patents, BeiGene Patents or BeiGene Collaboration Patents, the following provisions shall apply with respect to the BioAtla Patents, BeiGene Patents, BeiGene Collaboration Patents, BioAtla Collaboration Patents, and Joint Patents in the Territory:

(a) BioAtla. Subject to the provisions of Section 10.2(f) and coordination with the Patent Coordinators, BioAtla shall have the sole right and option to Prosecute the BioAtla Patents, BioAtla Collaboration Patents, and Joint Patents in the Territory.

(b) BeiGene. BeiGene shall have the sole right and option to Prosecute the BeiGene Patents and BeiGene Collaboration Patents.

(c) Costs and Expenses. The Parties shall jointly bear as part of the ROW Profit & Loss Share all costs and expenses in Prosecuting BioAtla Patents, BioAtla Collaboration Patents, BeiGene Collaboration Patents, and Joint Patents (collectively, "Patent Prosecution Expenses") as Development Costs for the purposes of calculating the ROW Profit & Loss Share; provided, however, that, following any Co-Development Opt-Out Date, all such Patent Prosecution Expenses incurred by BeiGene following any Co-Development Opt-Out Date shall be borne solely by BeiGene.

(d) Strategy; Failure of Patent Coordinators to Agree; Diligence and Cooperation.

(i) The Patent Coordinators shall attempt to agree upon a strategy (which may be updated from time to time) for Prosecution of BioAtla Patents, BeiGene Collaboration Patents, BioAtla Collaboration Patents and Joint Patents, including the scope and priority of the claims to be pursued within such Patents and to maximize the value of such Patents, on a global basis. As part of such strategy, the Patent Coordinators shall discuss and consider in good faith filing separate Patents that include claims that Cover the Products specifically or generically and claims that Cover any other compounds. Any failure by the Patent Coordinators to agree by unanimous vote with respect to such strategy or any other Prosecution matter will be resolved by the Prosecuting Party as specified in Section 10.2(a) and (b).

(ii) The Party authorized to conduct prosecution pursuant to Section 10.2(a) or Section 10.2(b) at the relevant time (as applicable, the “Prosecuting Party.”) shall be entitled to use patent counsel selected by it and reasonably acceptable to the non-Prosecuting Party (including in-house patent counsel as well as outside patent counsel) for the Prosecution of the Patents subject to Section 10.2(a) and Section 10.2(b). Each Party agrees to cooperate with the other with respect to the Prosecution of such Patents pursuant to this Section 10.2.4, including (X) executing all such documents and instruments and performing such acts as may be reasonably necessary in order to permit the other Party to undertake any Prosecution of Patents that such other Party is entitled, and has elected, to Prosecute, as provided for in Section 10.2(a) and Section 10.2(b) and (Y) giving consideration to the proper scope of Patents. The Parties agree that such cooperation does not establish joint representation of Prosecuting and non-Prosecuting Parties by patent counsel.

(iii) The Prosecuting Party may abandon the subject matter of a claim in a BioAtla Patent, BeiGene Collaboration Patent, BioAtla Collaboration Patent or Joint Collaboration Patent in response to an office action from the applicable patent office if, in the Prosecuting Party’s reasonable judgment after consultation with the non-Prosecuting Party, such Patent claim requires such abandonment; provided, however, that, prior to such abandonment, if feasible, the Parties will cooperate to file divisional or continuation applications to separate such claim. Without limiting the foregoing, the Prosecuting Party agrees not to otherwise abandon any BioAtla Patent, BeiGene Collaboration Patent, BioAtla Collaboration Patent or Joint Collaboration Patent claim unless it provides the non-Prosecuting Party with reasonable notice to this effect, sufficiently in advance to permit the non-Prosecuting Party to undertake such Prosecution of such BioAtla Patent, BeiGene Collaboration Patent, BioAtla Collaboration Patent or Joint Collaboration Patent claim, and thereafter such non-Prosecuting Party may, upon written notice to the Prosecuting Party, Prosecute such BioAtla Patent, BeiGene Collaboration Patent, BioAtla Collaboration Patent or Joint Collaboration Patent claim at such non-Prosecuting Party’s own expense with counsel of its choice.

(e) Third Party Rights. BioAtla covenants and agrees that it shall not grant any Third Party any right to control the Prosecution of the BioAtla Patents or BioAtla Collaboration Patents or to approve or consult with respect to any Patents licensed to BeiGene hereunder, without the prior written consent of BeiGene. BeiGene covenants and agrees that it shall not grant any Third Party any right to control the Prosecution of the BeiGene Collaboration Patents or to approve or consult with respect to the BeiGene Collaboration Patents licensed to BioAtla hereunder, in any case, that conflicts with BioAtla’s rights hereunder.

(f) Third Party Agreements. Each Party acknowledges that, pursuant to a Third Party Agreement, the applicable licensor(s) thereunder may retain the right to Prosecute the BioAtla Patents, BioAtla Collaboration Patents or BeiGene Collaboration Patents covered by such agreement, and that BioAtla or BeiGene, as applicable, may have certain rights to assume Prosecution under such agreement. BioAtla and BeiGene, as applicable, each agrees to keep the other Party fully informed of these rights, as well as provide to the other Party all information and copies of documents received from the licensor(s) under any such Third Party Agreement, or their patent counsel, relating to the BioAtla Patents, BioAtla Collaboration Patents or BeiGene Collaboration Patents covered by such agreement. To the extent that BioAtla or BeiGene, as applicable, is permitted to proceed with Prosecution or provide comments or suggestions to patent documents under a Third Party Agreement, then the BioAtla Patents, BioAtla Collaboration Patents or BeiGene Collaboration Patents under such Third Party Agreement shall be treated, to the extent possible, in the same manner as other BioAtla Patents, BioAtla Collaboration Patents or BeiGene Collaboration Patents under this Section 10.2, and BioAtla or BeiGene, as applicable, shall exercise all such rights with respect to such BioAtla Patents, BioAtla Collaboration Patents or BeiGene Collaboration Patents pursuant to the instructions of the other Party, if the other Party is given the right to act under this Section 10.2 (provided that all such decisions shall be subject to the applicable Prosecuting Party's final decision-making authority).

Section 10.3 Third Party Infringement and Challenges of BioAtla Patents, BeiGene Collaboration Patents and BioAtla Collaboration Patents. Subject to the terms and conditions of any Third Party Agreement to the extent such agreement applies to the BioAtla Patents, BioAtla Collaboration Patents or BeiGene Collaboration Patents, the following provisions shall apply with respect to the BioAtla Patents, BioAtla Collaboration Patents, BeiGene Collaboration Patents, Joint Patents, BioAtla Know-How, BioAtla Collaboration Know-How, BeiGene Collaboration Know-How and Joint Inventions:

(a) Notice. Each Party shall provide the other Party with prompt written notice reasonably detailing any (i) known or alleged infringement of any BioAtla Patents, BeiGene Patents, BeiGene Collaboration Patents, BioAtla Collaboration Patents, or Joint Patents or known or alleged misappropriation of any BioAtla Know-How, BeiGene Know-How, BeiGene Collaboration Know-How, BioAtla Collaboration Know-How or Joint Inventions, by a Third Party, (ii) "patent certification" filed in the US under 21 U.S.C. §355(b)(2) or 21 U.S.C. §355(j)(2) or similar provisions in other jurisdictions, and (iii) any declaratory judgment, opposition, or similar action alleging the invalidity, unenforceability or non-infringement of any such intellectual property rights (collectively "Third Party Infringement").

(b) First Right to Initiate Infringement Actions. During the period and in the portion of the Territory in which a Party is the Lead Party, such Party shall have the initial right, but not the obligation, to initiate a suit or take other appropriate action that such Party believes is reasonably required to protect the BioAtla Intellectual Property, BeiGene Collaboration Intellectual Property, BioAtla Collaboration Intellectual Property, Joint IP, Joint Patents, or Joint Inventions against any infringement or challenge (including any Third Party Infringement), unauthorized use or misappropriation by a Third Party that relates to a Product in such portion of the Territory ("Competitive Infringement"). The Party having such initial right under the preceding sentence (the "Initial Enforcement Party") shall give the other Party advance notice of the Initial Enforcement Party's intent to file any such suit or take any such action and the reasons therefor, and shall provide the other Party with an opportunity to make suggestions and comments regarding such suit or action. Thereafter, the Initial Enforcement Party shall keep the other Party promptly informed, and shall from time to time consult with the other Party regarding the status of any such

suit or action and shall provide the other Party with copies of all material documents (*e.g.*, complaints, answers, counterclaims, material motions, orders of the court, memoranda of law and legal briefs, interrogatory responses, depositions, material pre-trial filings, expert reports, affidavits filed in court, transcripts of hearings and trial testimony, trial exhibits and notices of appeal) filed in, or otherwise relating to, such suit or action. Without limiting the generality of the foregoing, the Parties shall discuss in good faith the Initial Enforcement Party's intended response to a Competitive Infringement.

(c) Step-in Rights. If the Initial Enforcement Party fails to initiate a suit or take such other appropriate action under Section 10.3(b) above within one hundred twenty (120) days after becoming aware of any Competitive Infringement, then the other Party may, in its discretion, provide the Initial Enforcement Party with written notice of such Party's intent to initiate a suit or take other appropriate action to combat such Competitive Infringement; provided, that, (i) such period will be more than sixty (60) days to the extent applicable Law prevents earlier enforcement of the applicable Patent(s) and provided further that if such period is extended because applicable Law prevents earlier enforcement, the Initial Enforcement Party shall have until the date that is thirty (30) days following the date upon which applicable Law first permits such enforcement proceeding to elect to so enforce the applicable Patent(s), and (ii) the Initial Enforcement Party shall have less than sixty (60) days (or, as applicable, less than the thirty (30) day period described in clause(i)) to elect to so enforce the applicable Patent(s) to the extent that a delay in bringing such enforcement proceeding against such alleged Third Party infringer would limit or compromise the remedies (including monetary relief and stay of regulatory approval) available against such alleged Third Party infringer. If the Party with such step-in rights under the preceding sentence ("Step-In Enforcement Party") provides such notice and the Initial Enforcement Party fails to initiate a suit or take such other appropriate action within thirty (30) days after receipt of such notice from the Step-In Enforcement Party (or such earlier time as is required to avoid limiting or compromising the remedies (including monetary relief and stay of regulatory approval) available against such alleged Third Party infringer), then the Step-In Enforcement Party shall have the right, but not the obligation, to initiate a suit or initiate or take such other appropriate action that it believes is reasonably required to protect the applicable BioAtla Intellectual Property, BeiGene Intellectual Property, BeiGene Collaboration Intellectual Property, BioAtla Collaboration Intellectual Property, Joint IP, Joint Patents or Joint Inventions. The Step-In Enforcement Party shall give the Initial Enforcement Party advance notice of the Step-In Enforcement Party's intent to file any such suit or take any such action and the reasons therefor and shall provide the Initial Enforcement Party with an opportunity to make suggestions and comments regarding such suit or action. Thereafter, the Step-In Enforcement Party shall keep the Initial Enforcement Party promptly informed and shall from time to time consult with the Initial Enforcement Party regarding the status of any such suit or action and shall provide the Initial Enforcement Party with copies of all material documents (*e.g.*, complaints, answers, counterclaims, material motions, orders of the court, memoranda of law and legal briefs, interrogatory responses, depositions, material pre-trial filings, expert reports, affidavits filed in court, transcripts of hearings and trial testimony, trial exhibits and notices of appeal) filed in, or otherwise relating to, such suit or action. Notwithstanding anything in this Section 10.3 to the contrary: (x) if the Initial Enforcement Party has a reasonable, good faith concern that the Step-In Enforcement Party's exercise of its backup enforcement or defense rights with respect to any Patent would be detrimental to the overall patent protection of the Products or related Companion Diagnostics, then the Step-In Enforcement Party shall not be permitted to enforce or defend such Patent without the prior consent of the Initial Enforcement Party, and (y) in no event shall BeiGene ever be entitled to enforce or defend any BioAtla Intellectual Property.

(d) Conduct of Action. The Party initiating suit shall have the sole and exclusive right to select counsel for any suit initiated by it under this Section 10.3, which counsel must be reasonably acceptable to the other Party. If required under applicable Law in order for such Party to initiate or maintain such suit, the other Party shall join as a party to the suit. If requested by the Party initiating suit, the other Party shall provide reasonable assistance to the Party initiating suit in connection therewith at no charge to such Party except that the initiating Party shall reimburse the other Party for Out-of-Pocket Costs, other than outside counsel expenses, incurred in rendering such assistance. The Party initiating suit shall assume and pay all of its own Out-of-Pocket Costs incurred in connection with any litigation or proceedings described in this Section 10.3, including the fees and expenses of the counsel selected by it, provided that, prior to any Co-Development Opt-Out Date, if any, such fees and expenses shall be shared in accordance with the ROW Profit & Loss Share. The other Party shall have the right to participate and be represented in any such suit by its own counsel at its own expense (which shall not be included in the calculation of the ROW Profit & Loss Share). Notwithstanding anything to the contrary contained herein, no Party shall be entitled to settle any action involving Patents owned or Controlled by the other Party which would render such Patents invalid.

(e) Recoveries. Any damages or other monetary awards recovered in any action, suit or proceeding brought under this Section 10.3 shall be shared as follows:

(i) Initial Allocation. Such damages or other sums recovered shall first be applied to reimburse each Party for all of the costs and expenses it incurred in connection with such action, and if such recovery is insufficient to cover all such costs and expenses of both Parties, it shall be shared in proportion to the total of such costs and expenses incurred by each Party; and

(ii) Remaining Proceeds. Any remaining proceeds in case of suits with respect to an enforcement proceeding relating to any Product or Companion Diagnostic under this Section 10.3, shall be shared by the Parties in accordance with the ROW Profit & Loss Share or, if obtained on or after any Co-Development Opt-Out Date, the Party bringing suit under this Section 10.3 shall retain [***] and the other Party shall retain [***] of such amount.

(f) Third Party Agreements. In the event that (i) a Patent covered by a Third Party Agreement is at issue in an action under this Section 10.3 or Section 10.4, (ii) BioAtla or BeiGene, as applicable, has a right to enforce or defend, as applicable, the BioAtla Patents, BioAtla Collaboration Patents or BeiGene Collaboration Patents under such Third Party Agreement, and (iii) BeiGene or BioAtla, respectively, desires to enforce or defend, as applicable, such Patent in accordance with the procedures under this Section 10.3 or Section 10.4, as applicable, then BioAtla or BeiGene, respectively, shall either (A) obtain the licensor(s)' consent under such Third Party Agreement so that BeiGene or BioAtla, respectively, may file such an action in its own name or (B) shall undertake such an action on BeiGene's behalf and at BeiGene's expense or on BioAtla's behalf and at BioAtla's expense, respectively.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

Section 10.4 Claimed Infringement. Each Party shall promptly notify the other Party in writing of any allegation by a Third Party that the activity of either Party or their Affiliates or Selling Parties under this Agreement infringes or misappropriates, or may infringe or misappropriate, the intellectual property rights of such Third Party. If a Third Party asserts or files against a Party or its Affiliates any claim of infringement or misappropriation of the intellectual property rights of such Third Party or other action relating to alleged infringement or misappropriation of such intellectual property rights (“Third Party Infringement Action”), then, unless otherwise agreed by the Parties:

(a) Notice and Defense. If a Party becomes aware of any actual or potential claim that the Development, Manufacture or Commercialization of any Product or Companion Diagnostic infringes or misappropriates the intellectual property rights of any Third Party, such Party shall promptly notify the other Party. In any such instance, the Parties shall as soon as practicable thereafter meet (which may be through the JSC) to discuss in good faith regarding the best response to such notice. With respect to any such claim by a Third Party described in this Section 10.4(a), the applicable Lead Party shall have the sole right, but not the obligation, to defend and dispose (including through settlement or license) such claim in the applicable portion(s) of the Territory; it being understood and agreed that the applicable non-Lead Party shall be entitled to defend itself with respect to any such Third Party claim in the applicable portion(s) of the Territory to the extent that such non-Lead Party’s responses and admissions in conducting such defense do not interfere with the ability of the Lead Party to defend such Third Party claim.

(b) Costs. Prior to any Co-Development Opt-Out Date, the costs and expenses incurred by the Parties in connection with defense of any claim described in Section 10.4(a) in the Territory shall be shared by the Parties [***]. For clarity, this Section 10.4(b) is intended to address the Parties’ defense costs in such claim, and if as a result of any such defense of such claim, a Party obtains a license under Third Party intellectual property rights, Section 9.6 shall apply to the amounts due to any such Third Party pursuant to such license.

Section 10.5 Patent Term Extensions. The Patent Coordinators shall, as necessary and appropriate, use reasonable efforts to agree upon a joint strategy for obtaining, and cooperate with each other in obtaining, patent term extensions for BioAtla Patents, BioAtla Collaboration Patents, BeiGene Collaboration Patents and Joint Patents that Cover the Products. If the Patent Coordinators is unable to agree upon which of such Patents should be extended, and the matter remains unresolved after the procedure described in Section 2.7(d)(i), then BeiGene shall have the right to resolve the dispute, subject in each case to the terms and conditions of any Third Party Agreement to the extent such agreement applies to such BioAtla Patent, BioAtla Collaboration Patent or BeiGene Collaboration Patent.

Section 10.6 Patent Marking. Each Party shall comply with the patent marking statutes in each country in which any Product is Manufactured or Commercialized by or on behalf of a Party or their respective Affiliates or (sub)licensees, as applicable, hereunder.

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

Section 10.7 Application of 35 U.S.C. § 102(c). It is agreed and acknowledged that this Agreement establishes a qualifying collaboration within the scope of 35 U.S.C. § 102(c) and, accordingly, shall be deemed to constitute a “Joint Research Agreement” for all purposes under 35 U.S.C. § 102(c). Neither Party shall invoke the provisions of 35 U.S.C. § 102(c), or file this Agreement, in connection with the prosecution of any patent application claiming, in whole or in part, any 35 U.S.C. § 102(c) invention without the prior written consent of the other Party. In the event that a Party, during the course of prosecuting a patent application claiming a 35 U.S.C. § 102(c) invention (a “35 U.S.C. § 102(c) Patent”), deems it necessary to file a terminal disclaimer to overcome an obviousness type double patenting rejection in view of an earlier filed patent held by the other Party (the “Earlier Patent”), then, if the Parties agree, the Parties shall coordinate the filing of such terminal disclaimer in good faith, and, to the extent required under 35 U.S.C. § 102(c), both Parties shall agree, in such terminal disclaimer, that they shall not separately enforce 35 U.S.C. § 102(c) Patent independently from the Earlier Patent. To this end, to the extent required under 35 U.S.C. § 102(c), following the filing of such terminal disclaimer, the Parties shall, in good faith, coordinate all enforcement actions with respect to 35 U.S.C. § 102(c) Patent.

Section 10.8 Common Interest Agreement. The Parties shall enter into the common interest agreement attached hereto as Exhibit G on the Effective Date.

Article XI Confidentiality

Section 11.1 Confidential Information. Each Party agrees that a Party (the “Receiving Party”) or any of its Affiliates receiving Confidential Information of the other Party (the “Disclosing Party”) or any of its Affiliates shall (a) maintain in confidence such Confidential Information using not less than the efforts such Receiving Party uses to maintain in confidence its own proprietary information of similar kind and value, but in no event less than a reasonable degree of effort, (b) not disclose such Confidential Information to any Third Party without the prior written consent of the Disclosing Party, except for disclosures expressly permitted below, and (c) not use such Confidential Information for any purpose except those permitted by this Agreement (it being understood that this clause (c) shall not create or imply any rights or licenses not expressly granted under this Agreement). No Confidential Information of the Disclosing Party or any of its Affiliates shall be used by the Receiving Party or any of its Affiliates except in performing the Receiving Party’s obligations or exercising rights explicitly granted to the Receiving Party under this Agreement. “Confidential Information” shall exclude any information that:

(a) was known by the Receiving Party or any of its Affiliates prior to its date of disclosure to the Receiving Party or any of its Affiliates by or on behalf of the Disclosing Party or any of its Affiliates, as established by written evidence; or

(b) is lawfully disclosed to the Receiving Party or any of its Affiliates by sources other than the Disclosing Party or any of its Affiliates rightfully in possession of the Confidential Information; or

(c) is or becomes published or generally known to the public through no fault or omission on the part of the Receiving Party or any of its Affiliates or (sub)licensees; or

(d) is independently developed by or for the Receiving Party or any of its Affiliates without reference to or reliance upon such Confidential Information, as established by written records.

Section 11.2 Permitted Disclosure. The Receiving Party may provide the Disclosing Party's or any of the Disclosing Party's Affiliates' Confidential Information:

(a) to the Receiving Party's employees, consultants and advisors, and to the employees, consultants and advisors of such Party's Affiliates, who have a need to know such information and materials for the purpose of performing obligations or exercising rights expressly granted under this Agreement and have an obligation to treat such information and materials as confidential under obligations of confidentiality and non-use no less stringent than those set forth in this Article XI (provided that legal counsel and accountants shall not be required to execute any written confidentiality agreements);

(b) to patent offices in order to seek or obtain Patents or to Regulatory Authorities in order to seek or obtain approval to conduct Clinical Trials or to gain Regulatory Approval with respect to the Products as contemplated by this Agreement; provided that such disclosure may be made only following reasonable notice to the Disclosing Party and to the extent reasonably necessary to seek or obtain such Patents or Regulatory Approvals; or

(c) if such disclosure is required by judicial order or applicable Law or to defend or prosecute litigation or arbitration; provided that, prior to such disclosure, to the extent permitted by Law, the Receiving Party promptly notifies the Disclosing Party of such requirement, cooperates with the Disclosing Party to take whatever action it may deem appropriate to protect the confidentiality of the information and furnishes only that portion of the Disclosing Party's (or its applicable Affiliates') Confidential Information that the Receiving Party is legally required to furnish.

Section 11.3 Publicity; Terms of this Agreement; Non-Use of Names.

(a) Public Announcements. Except as required by judicial order or applicable Law (in which case, Section 11.3(b) must be complied with) or as explicitly permitted by this Article XI, neither Party shall make any public announcement concerning this Agreement without the prior written consent of the other Party, which consent shall not be unreasonably withheld or delayed. The Party preparing any such public announcement shall provide the other Party with a draft thereof at least three (3) Business Days prior to the date on which such Party would like to make the public announcement (or, in extraordinary circumstances, such shorter period as required to comply with applicable Law). Neither Party shall use the name, trademark, trade name or logo of the other Party or its employees in any publicity or news release relating to this Agreement or its subject matter, without the prior express written permission of the other Party. For purposes of clarity, either Party may issue a press release or public announcement or make such other disclosure relating to this Agreement if the contents of such press release, public announcement or disclosure (i) (A) does not consist of financial information and has previously been made public other than through a breach of this Agreement by the issuing Party or its Affiliates, (B) is contained in the issuing Party's financial statements prepared in accordance with Accounting Standards, or (C) is contained in a redacted version of this Agreement, and (ii) is material to the event or purpose for which the new press release or public announcement is made.

(b) Notwithstanding the terms of this Article XI:

(i) Either Party shall be permitted to disclose the existence and terms of this Agreement to the extent required, in the reasonable opinion of such Party's legal counsel, to comply with applicable Laws, including the rules and regulations promulgated by the Securities and Exchange Commission or any other Regulatory Authority. Notwithstanding the foregoing, before disclosing this Agreement or any of the terms hereof pursuant to this Section 11.3(b)(i), the Parties will coordinate in advance with each other in connection with the redaction of certain provisions of this Agreement (together with all exhibits and schedules) with respect to any filings with the US Securities and Exchange Commission ("SEC"), London Stock Exchange, the UK Listing Authority, NYSE, the NASDAQ Stock Market or any other stock exchange on which securities issued by a Party or a Party's Affiliate are traded (the "Redacted Version"), and each Party will seek confidential treatment for such terms as may be reasonably requested by the other Party, and the Parties will file Redacted Versions with any governing bodies which are consistent with the Redacted Version.

(ii) Notwithstanding Section 11.1, the Receiving Party may disclose Confidential Information belonging to the Disclosing Party (or any of its Affiliates), and Confidential Information deemed to belong to both the Disclosing Party (or any of its Affiliates) and the Receiving Party (or any of its Affiliates), to the extent (and only to the extent) such disclosure is reasonably necessary in the following instances:

(A) complying with applicable Laws (including the rules and regulations of the SEC or any national securities exchange) and with judicial process, if in the reasonable opinion of the Receiving Party's counsel, such disclosure is necessary for such compliance;

(B) disclosure, solely on a "need to know basis," to (1) Affiliates, subcontractors, advisors (including attorneys and accountants), (2) subject to Section 11.3(b)(ii)(C), investment bankers, and (3) in each case of (1) and (2), such Affiliates', subcontractors', advisors' and investment bankers', and each of the Parties', respective directors, employees, contractors and agents; provided that, in all cases of (1), (2) and (3), prior to any such disclosure, each disclosee must be bound by written obligations of confidentiality, non-disclosure and non-use no less restrictive than the obligations set forth in this Article XI (provided, however, that in the case of prospective investment bankers, the term of confidentiality may be shortened to three (3) years from the date of disclosure and in the case of legal advisors, no written agreement shall be required), which for the avoidance of doubt, will not permit use of such Confidential Information for any purpose except those permitted by this Agreement; provided, however, that, in each of the above situations, the Receiving Party shall remain responsible for any failure by any Person who receives Confidential Information pursuant to this Section 11.3(b)(ii)(B) or Section 11.3(b)(ii)(C) to treat such Confidential Information as required under this Article XI; and

(C) in the case of any disclosure of this Agreement to any actual or potential acquirer, assignee, licensee, licensor, investment banker, institutional investor, lender or other financial partners, such disclosure shall solely be of the Redacted Version, in each case, which version shall be agreed upon by the Parties in good faith; it being understood and agreed that, in connection with a proposed Change of Control with respect to such Party, only after negotiations with a proposed Third Party acquirer have progressed so that such Party reasonably and in good faith believes it is in the final round of negotiations with such Third Party regarding

execution of a definitive agreement with such Third Party with respect to the proposed transaction, only then may such Party provide an unredacted version of this Agreement as applicable, to such Third Party; provided that a Party may also disclose an unredacted version of this Agreement to Third Party attorneys, professional accountants and auditors who are engaged by licensors and lenders and who are under obligations of confidentiality not to disclose the unredacted terms of this Agreement to such licensors or lenders for the purpose of confirming such Party's compliance with the terms of its applicable license and loan agreements with such licensors and lenders.

(iii) If a Party (the "Requesting Party") wishes to make any public disclosure of the non-financial achievement of milestones or significant events in the development and regulatory process and commercialization activities, it shall first notify the other Party (the "Cooperating Party") of such planned press release or public announcement and provide a draft for review at least three (3) Business Days in advance of issuing such press release or making such public announcement (or, with respect to press releases and public announcements that are required by applicable Law, or by regulation or rule of any public stock exchange (including NASDAQ), with as much advance notice as possible under the circumstances if it is not possible to provide notice at least three (3) Business Days in advance); provided, however, that a Party may issue such press release or public announcement without such prior review by the other Party if (A) the contents of such press release or public announcement have previously been made public other than through a breach of this Agreement by the issuing Party and (B) such press release or public announcement does not materially differ from the previously issued press release or other publicly available information. The Cooperating Party may notify the Requesting Party of any reasonable objections or suggestions that the Cooperating Party may have regarding the proposed press release or public announcement, and the Requesting Party shall incorporate any such objections or suggestions that are provided in a timely manner. The principles to be observed in such disclosures shall include accuracy, compliance with applicable Law and regulatory guidance documents, reasonable sensitivity to potential negative reactions of the FDA (and its foreign counterparts) and the need to keep investors informed regarding the Requesting Party's business.

Section 11.4 Publications. The Parties agree that decisions regarding the timing and content of Publications shall be subject to the oversight and approval of the JSC and the Patent Coordinators and neither Party nor its Affiliates shall have the right to make Publications pertaining to the Collaboration except as provided herein; it being understood and agreed that (a) BioAtla shall be entitled to make all decisions in its sole discretion regarding research that has been submitted for Publication as of the Effective Date; (b) the Parties shall be co-authors for any Publications relating to Clinical Trials for any Product in the Territory and (c) BioAtla shall be the sole author of any Publication relating to any pre-Clinical Trial activities for any Product in the Territory. If a Party or its Affiliates desire to make a Publication, such Party must comply with the following procedure:

(a) JSC Review. The publishing Party shall provide the JSC and the non-publishing Party with an advance copy of the proposed Publication, and the JSC shall then have forty-five (45) days prior to submission for any Publication (ten (10) days in the case of an abstract or oral presentation) in which to determine whether the Publication may be published and under what conditions, including (i) delaying sufficiently long to permit the timely preparation and filing of a patent application or (ii) specifying changes the JSC reasonably believes are necessary to preserve any Patents or Know-How belonging (whether through ownership or license, including under this Agreement) in whole or in part to the non-publishing Party.

(b) Removal of Confidential Information. In addition, if the non-publishing Party informs the publishing Party that such Publication, in the non-publishing Party's reasonable judgment, discloses any Confidential Information of the non-publishing Party or could be expected to have a material adverse effect on any Know-How which is Confidential Information of the non-publishing Party, such Confidential Information or Know-How shall be deleted from the Publication.

(c) Scientific Conferences. Each Party shall have the right to present its Publications approved pursuant to this Section 11.4 at scientific conferences, including at any conferences in any country in the world, subject to any conditions imposed by the JSC in its approval.

(d) Delegation. For purposes of convenience, the JSC may delegate its responsibilities under this Section 11.4 to one or more representatives of BioAtla and BeiGene.

Section 11.5 Term. All obligations under Sections 11.1, 11.2, 11.3 and 11.6 shall survive termination or expiration of this Agreement and shall expire ten (10) years following termination or expiration of this Agreement.

Section 11.6 Return of Confidential Information.

(a) Obligations to Return or Destroy. Upon the expiration or termination of this Agreement, the Receiving Party shall return to the Disclosing Party all Confidential Information received by the Receiving Party or any of its Affiliates from the Disclosing Party or any of its Affiliates (and all copies and reproductions thereof). In addition, the Receiving Party shall destroy:

(i) any notes, reports or other documents prepared by the Receiving Party or any of its Affiliates which contain Confidential Information of the Disclosing Party or any of its Affiliates; and

(ii) any Confidential Information of the Disclosing Party or any of its Affiliates (and all copies and reproductions thereof) which is in electronic form or cannot otherwise be returned to the Disclosing Party.

(b) Destruction. Alternatively, upon written request of the Disclosing Party, the Receiving Party shall destroy all Confidential Information received by the Receiving Party or any of its Affiliates from the Disclosing Party or any of its Affiliates (and all copies and reproductions thereof) and any notes, reports or other documents prepared by the Receiving Party or any of its Affiliates which contain Confidential Information of the Disclosing Party or any of its Affiliates. Any requested destruction of Confidential Information shall be certified in writing to the Disclosing Party by an authorized officer of the Receiving Party supervising such destruction.

(c) Limitation. Nothing in this Section 11.6 shall require the alteration, modification, deletion or destruction of archival tapes or other electronic back-up media made in the ordinary course of business; provided that the Receiving Party shall continue to be bound by its obligations of confidentiality and other obligations under this Article XI with respect to any Confidential Information contained in such archival tapes or other electronic back-up media.

(d) Exceptions. Notwithstanding the foregoing,

(i) the Receiving Party's legal counsel may retain one copy of the Disclosing Party's (and its Affiliates') Confidential Information solely for the purpose of determining the Receiving Party's continuing obligations under this Article XI; and

(ii) the Receiving Party may retain the Disclosing Party's (and its Affiliates') Confidential Information and its own notes, reports and other documents

(A) to the extent reasonably required (1) to exercise the rights and licenses of the Receiving Party expressly surviving expiration or termination of this Agreement; or (2) to perform the obligations of the Receiving Party expressly surviving expiration or termination of this Agreement; or

(B) to the extent it is impracticable to return or destroy such Confidential Information without incurring disproportionate cost.

Notwithstanding the return or destruction of the Disclosing Party's (and its Affiliates') Confidential Information, the Receiving Party shall continue to be bound by its obligations of confidentiality and other obligations under this Article XI.

Article XII

Representations and Warranties

Section 12.1 Mutual Representations. BioAtla and BeiGene each represents, warrants and covenants to the other Party, as of the Effective Date, that:

(a) Authority. Each Party is duly organized, validly existing and in good standing under the Laws of the jurisdiction of its formation and has full corporate power and authority to enter into this Agreement, and to carry out the provisions hereof or thereof, as applicable.

(b) Consents. All necessary consents, approvals and authorizations of all government authorities and other Persons required to be obtained by it as of the Effective Date in connection with the execution, delivery and performance of this Agreement, and the performance of its obligations hereunder have been obtained, except for authorizations and consents that may be necessary under Antitrust Law.

(c) No Conflict. Notwithstanding anything to the contrary in this Agreement, the execution and delivery of this Agreement, the performance of such Party's obligations in the conduct of the Collaboration and the licenses and sublicenses to be granted pursuant to this Agreement (i) do not and will not conflict with or violate any requirement of applicable Laws existing as of the Effective Date and (ii) do not and will not conflict with, violate, breach or constitute a default under any agreement or any provision thereof, or any contract, oral or written, to which it is a party or by which it or any of its Affiliates is bound, existing as of the Effective Date.

(d) Enforceability. This Agreement has been duly executed and delivered on behalf of such Party and is a legal and valid obligation binding upon it and is enforceable in accordance with its terms.

(e) Employee Obligations. To its knowledge, none of its or its Affiliates' employees who have been, are or will be involved in the Collaboration are, as a result of the nature of such Collaboration to be conducted by the Parties, in violation of any covenant in any contract with a Third Party relating to non-disclosure of proprietary information, noncompetition or non-solicitation.

Section 12.2 Additional BioAtla Representations. BioAtla represents, warrants and covenants to BeiGene, as of the Effective Date, as follows:

(a) BioAtla has all rights, authorizations and consents necessary to grant all rights and licenses it purports to grant to BeiGene under this Agreement, except for authorizations and consents that may be necessary under Antitrust Law.

(b) BioAtla has not used, and during the Term will not knowingly use, any Know-How in the applicable Product that is encumbered by any contractual right of or obligation to a Third Party that conflicts or interferes with any of the rights or licenses granted or to be granted to BeiGene hereunder.

(c) BioAtla has not granted, and during the Term BioAtla will not grant, any right or license, to any Third Party relating to any of the intellectual property rights it Controls, that conflicts with or limits the scope of the rights or licenses granted or to be granted to BeiGene hereunder.

(d) There are no claims, judgments or settlements against BioAtla pending, or to BioAtla's knowledge, threatened that invalidate or seek to invalidate any BioAtla Patents in the Territory.

(e) There are no claims, litigations, suits, actions, disputes, arbitrations, or legal, administrative or other proceedings or governmental investigations pending or, to BioAtla's knowledge, threatened against BioAtla, nor is BioAtla a party to any judgment or settlement, which would be reasonably expected to adversely affect or restrict the ability of BioAtla to consummate the transactions contemplated under this Agreement and to perform its obligations under this Agreement, or which would affect the BioAtla Intellectual Property, or BioAtla's Control thereof, or the Target or any Product.

(f) There is no pending litigation, nor has BioAtla received any written notice from any Third Party, asserting or alleging that the Development, Manufacture or Commercialization of the Candidate or any Products prior to the Effective Date infringed or misappropriated the intellectual property rights of such Third Party.

(g) To BioAtla's knowledge, the practice of the BioAtla Intellectual Property as contemplated under this Agreement does not (i) infringe any claims of any Patents of any Third Party (without regard to actual or alleged infringement under 35 USC §271(e)(1) and comparable provisions under applicable Law outside the United States, including any safe harbor, research exemption, government or executive declaration of urgent public health need, or any similar right available in law or in equity which otherwise exempts actual or alleged infringing activity), or (ii) misappropriate any Know-How of any Third Party.

(h) None of (i) the BioAtla Patents owned by BioAtla or both Controlled by and Prosecuted by BioAtla and (ii) to BioAtla's knowledge, the BioAtla Patents Controlled but not Prosecuted by BioAtla are subject to (A) any pending re-examination, opposition, interference or litigation proceedings or inter partes reviews, post grant reviews or covered business methods reviews or (B) any claim by a Third Party challenging BioAtla's ownership rights in, or the validity or scope of, any such BioAtla Patents in the Territory.

(i) BioAtla has complied with any and all obligations under the Bayh-Dole Act to perfect rights to the applicable Patents or Know-How licensed thereunder. Neither BioAtla nor any of its Affiliates has granted any liens or security interests on the BioAtla Intellectual Property and the BioAtla Intellectual Property is free and clear of any mortgage, pledge, claim, security interest, covenant, easement, encumbrance, lien or charge of any kind, except in each case with respect to licenses, covenants not to sue, immunities from suit, standstills, releases and options which would not adversely affect the rights granted to BeiGene herein.

(j) To its knowledge, BioAtla has complied with all applicable Laws applicable to (i) the prosecution and maintenance of the BioAtla Patents and (ii) its Development and manufacture of the Candidate and the Products in the Field.

(k) BioAtla is not a party to any agreement with any governmental entity or an agency thereof pursuant to which such governmental entity or such agency provided funding for the development of any of the BioAtla Patents or BioAtla Know-How and which gives such governmental entity or such agency any rights to any BioAtla Patents or BioAtla Know-How that conflicts with, or limits the scope of, the licenses granted to BeiGene hereunder.

(l) Exhibit D contains a complete and accurate list of all Patents owned or licensed by BioAtla or its Affiliates as of the Effective Date that are included in the Patents licensed hereunder, indicating any co-owner(s), if applicable. Except as set forth on Exhibit D, (i) BioAtla and its Affiliates do not own and have not licensed any Patent that is necessary to Develop, Manufacture or Commercialize any Products, (ii) BioAtla and its Affiliates have not filed any Patent that discloses any Candidate or contains one or more claims that Cover any Candidate and (iii) BioAtla and its Affiliates have not abandoned any Patent that discloses any Candidate or contains one or more claims that Cover any Candidate, including all Patents listed in Exhibit D. The BioAtla Know-How includes all Know-How owned or licensed by BioAtla or its Affiliates that is necessary or reasonably useful to Develop, Manufacture and Commercialize the Candidates and the Products in the Field in the Territory as such Development, Manufacture and Commercialization is currently being conducted by BioAtla or contemplated to be conducted by the Parties hereunder.

(m) BioAtla and its Affiliates are not subject to any payment obligations to Third Parties as a result of the execution or performance of this Agreement.

(n) BioAtla has obtained, or caused its Affiliates to obtain, assignments from the inventors of all rights and embodiments in and to the BioAtla Know-How that is solely owned by BioAtla or its Affiliates, (i) to its knowledge, all such assignments are valid and enforceable, and (ii) the inventorship of the BioAtla Patents that are solely owned by BioAtla or its Affiliates is properly identified on each issued patent or patent application in such BioAtla Patents.

(o) BioAtla and its Affiliates have used reasonable and diligent efforts consistent with industry practices to protect the secrecy, confidentiality and value of all BioAtla Know-How that constitutes trade secrets under applicable Laws.

(p) BioAtla has provided to BeiGene all material documentation, data, and information under its control requested by BeiGene relating to the Candidates, the Products and the use thereof in the Field. Without limiting the foregoing, BioAtla has provided to BeiGene complete and accurate copies of (a) all existing material Regulatory Documentation prepared by BioAtla or its Affiliates relating to the Candidates or the Products (the “Existing Regulatory Materials”), and (b) all other material correspondence to/from any Regulatory Authority prepared or received by BioAtla, in each case related to the Candidates and/or the Products. Other than the Existing Regulatory Materials, neither BioAtla nor any of its Affiliates has, as of the Effective Date, obtained, or filed, any INDs, CTAs or any other form of regulatory application with Regulatory Authorities for approval of Clinical Trials, marketing or other purpose, for the Candidates and/or the Products. The Existing Regulatory Materials are, to the knowledge of BioAtla, in good standing, and neither BioAtla nor any of its Affiliates has received any notice in writing from any Regulatory Authority that the Existing Regulatory Materials are not currently in, or may not remain in, good standing with the applicable Regulatory Authority.

(q) All information and data provided by or on behalf of BioAtla to BeiGene regarding the Candidates and/or the Products on or before the Effective Date in contemplation of this Agreement or the transactions contemplated hereby was and is as of the Effective Date, to the knowledge of BioAtla, accurate in all material respects, and, to the knowledge of BioAtla, BioAtla has not failed to disclose, or cause to be disclosed, any material information or data known to BioAtla that could reasonably be expected to cause the information and data that has been disclosed by BioAtla to BeiGene to be misleading in any material respect.

(r) The business of BioAtla does not involve the production, design, testing, manufacture, fabrication, or development of a “critical technology” within the meaning of 31 C.F.R. § 801.204 and BioAtla is not subject to the “Pilot Program” established in 31 C.F.R. § 801.101 *et seq.* BioAtla shall promptly notify BeiGene in the event that, due to a change in Laws or of the business of BioAtla, the business of BioAtla falls within a category designated for mandatory review by any Law or rule relating to the U.S. Committee on Foreign Investment in the United States (“CFIUS”).

Section 12.3 Covenants.

(a) Mutual Covenants. Each Party hereby covenants to the other Party that:

(i) all employees of such Party or its Affiliates, Selling Parties or Third Party subcontractors working under this Agreement will be under appropriate confidentiality obligations at least as protective as those contained in this Agreement and, to the extent permitted under applicable Law, the obligation to assign all right, title and interest in and to their inventions and discoveries, whether or not patentable, to such Party as the sole owner thereof;

(ii) to its knowledge, such Party will not (A) employ or use, nor hire or use any contractor or consultant that employs or uses, any individual or entity, including a clinical investigator, institution or institutional review board, debarred or disqualified by the FDA (or subject to a similar sanction by any Regulatory Authority outside the US) or (B) employ any individual who, or entity that is, the subject of an FDA debarment investigation or proceeding (or similar proceeding by any Regulatory Authority outside the US), in each of subclauses (A) and (B) in the conduct of its activities under this Agreement

(iii) neither such Party nor any of its Affiliates shall, during the Term, grant any right or license to any Third Party relating to any of the intellectual property rights it owns or Controls which would conflict with any of the rights or licenses granted to the other Party hereunder; and

(iv) such Party and its Affiliates shall perform their activities pursuant to this Agreement in compliance (and shall ensure compliance by any of its subcontractors) in all material respects with all applicable Laws, including GCP, GLP and GMP as applicable.

(b) Third Party Agreement Covenants. Each Party hereby covenants to the other Party that it shall maintain any Third Party Agreements to which it is a Party, and shall not amend or terminate such agreements entered into by such Party, and will not breach such agreements, if such amendment, modification, termination or breach would adversely affect the other Party's rights under this Agreement.

Section 12.4 CFIUS Notice. If BeiGene determines that a filing with CFIUS is required or appropriate in connection with the transactions contemplated by this Agreement, the Parties shall cooperate to jointly prepare and file with CFIUS, as soon as practicable and in any event within ten (10) Business Days following the Effective Date, a joint voluntary notice of the transactions contemplated by this Agreement, and shall furnish any supplemental information requested by CFIUS in connection therewith pursuant to Section 721 of the Defense Production Act of 1950 (50 U.S.C. App. §2170), and the applicable regulations thereunder. Notwithstanding anything contrary in the foregoing, BeiGene shall be free to determine in its sole discretion whether to agree to any mitigation measures proposed by CFIUS as a condition of obtaining clearance from CFIUS of the transactions contemplated by this Agreement (the "CFIUS Clearance").

Section 12.5 Disclaimer. Except as otherwise expressly set forth in this Agreement, NEITHER PARTY MAKES ANY REPRESENTATION OR EXTENDS ANY WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY THAT ANY PATENTS ARE VALID OR ENFORCEABLE, AND EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. Without limiting the generality of the foregoing, each Party disclaims

any warranties with regards to: (a) the success of any study or test commenced under this Agreement; (b) the safety or usefulness for any purpose of the technology or materials, including any Product or Companion Diagnostic; or (c) the validity, enforceability, or non-infringement of any intellectual property rights or technology it provides or licenses to the other Party under this Agreement.

Article XIII
Indemnification; Product Liabilities

Section 13.1 Indemnification by BeiGene. BeiGene agrees, at BeiGene's cost and expense, to defend, indemnify and hold harmless BioAtla and its Affiliates and their respective directors, officers, employees and agents (the "BioAtla Indemnified Parties") from and against any Damages arising out of any claim, demand, action, suit or proceeding brought by a Third Party (collectively, a "Claim") in the Territory relating to:

(a) any breach by BeiGene of any of its representations, warranties or obligations under this Agreement and any other agreement entered into by the Parties pursuant to this Agreement, including the Pharmacovigilance Agreement and any commercial or clinical supply agreement with respect to the manufacture and supply of the Candidate and any Product;

(b) the gross negligence, or willful misconduct or violation of Law of BeiGene or its Affiliates, Selling Parties or Third Party Contractors in connection with BeiGene's performance of its obligations or exercise of its rights under this Agreement; or

(c) any Development, use, Manufacture or Commercialization of the Candidates and/or the Products by or on behalf of BeiGene or any of its Affiliates including any Product Liabilities incurred following any Co-Development Opt-Out Date or any personal injury, property damage or other damage, in each case, resulting from any of the foregoing activities described in this Section 13.1(c); provided, however, that BeiGene shall have no obligation to indemnify, defend and hold harmless the BioAtla Indemnified Parties under this Section 13.1(c) from or against any Third Party Damages including any Product Liabilities arising out of or relating to, directly or indirectly, any Claim brought against BioAtla Indemnified Parties by any director, officer, shareholder or employee of BioAtla acting in his/her capacity as a director, officer, shareholder or employee of BioAtla, as applicable;

in each case, provided, that such indemnity shall not apply to the extent (i) BioAtla has an indemnification obligation pursuant to Section 13.2 for such Damages or (ii) such Damages are reflected in any applicable Operating Profits or Losses calculation.

Section 13.2 Indemnification by BioAtla. BioAtla agrees, at BioAtla's cost and expense, to defend, indemnify and hold harmless BeiGene and its Affiliates and their respective directors, officers, employees and agents (the "BeiGene Indemnified Parties") from and against any Damages arising out of any Claim in the Territory relating to:

(a) any breach by BioAtla of any of its representations, warranties or obligations under this Agreement (including without limitation pursuant to Section 12.4(b)) and any other agreement entered into by the Parties pursuant to this Agreement, including the Pharmacovigilance Agreement and any commercial or clinical supply agreement with respect to the manufacture and supply of the Candidate and any Product;

(b) the gross negligence, willful misconduct or violation of Law of BioAtla or its Affiliates, Selling Parties or Third Party Contractors in connection with BioAtla's performance of its obligations or exercise of its rights under this Agreement; or

(c) any Development, use, Manufacture or Commercialization of the Products by or on behalf of BioAtla or any of its Affiliates prior to the Co-Development Opt-Out Date, including any Product Liability Claims incurred prior to the Co-Development Opt-Out Date or any personal injury, property damage or other damage, in each case, resulting from any of the foregoing activities described in this Section 13.2(c).

in each case, provided, however, that such indemnity shall not apply to the extent (i) BeiGene has an indemnification obligation pursuant to Section 13.1 for such Damages or (ii) such Damages are reflected in any applicable Operating Profits or Losses calculation.

Section 13.3 Indemnification Procedures. In the event of any such Claim against any of the BeiGene Indemnified Parties or BioAtla Indemnified Parties (each, an "Indemnified Party"), as applicable, by any Third Party, such Indemnified Party shall promptly, and in any event within ten (10) Business Days, notify the applicable indemnifying Party (the "Indemnitor") in writing of the Claim. The Indemnitor shall have the right, exercisable by notice to the Indemnified Party within ten (10) Business Days after receipt of notice from the Indemnified Party of the Claim, to assume direction and control of the defense, litigation, settlement, appeal or other disposition of the Claim (provided that such Claim is solely for monetary damages and the Indemnitor agrees to pay all Damages relating to such matter, as evidenced in a written confirmation delivered by the Indemnitor to the Indemnified Party) with counsel selected by the Indemnitor and reasonably acceptable to the Indemnified Party; provided that the failure to provide timely notice of a Claim by a Third Party shall not limit an Indemnified Party's right for indemnification hereunder except to the extent such failure results in actual prejudice to the Indemnitor. The Indemnified Parties shall cooperate with the Indemnitor and may, at their option and expense, be separately represented in any such action or proceeding. The Indemnitor shall not be liable for any litigation costs or expenses incurred by the Indemnified Parties without the Indemnitor's prior written authorization for so long as the Indemnitor controls such litigation. In addition, the Indemnitor shall not be responsible for the indemnification or defense of any Indemnified Party to the extent arising from any negligent or intentional acts by any Indemnified Party or the breach by such Indemnified Party of any representation, obligation or warranty under this Agreement, or any Claims compromised or settled without its prior written consent. Each Party shall use reasonable efforts to mitigate Damages indemnified under this Article XIII.

Section 13.4 Product Liability Costs. Except with respect to such portion (if any) of Product Liabilities that are Claims entitled to indemnification under Section 13.1 or Section 13.2, the Parties jointly shall be responsible for all Product Liabilities, all Out-of-Pocket Costs and FTE costs incurred by the controlling Party under Section 13.5 in connection with any litigation or proceeding related to any applicable Third Party Products Liability Action and all Out-of-Pocket Costs and FTE costs incurred by the non-controlling Party under Section 13.5 at the request of the controlling Party under Section 13.5, all of which such costs and expenses shall (a) if relating to the Products distributed prior to any Co-Development Opt-Out Date, be taken into account in determining the ROW Profit & Loss Share as, and to the extent, provided in Exhibit E or (b) be borne solely by BeiGene if and only to the extent such Product Liabilities arose from the Products distributed after any Co-Development Opt-Out Date.

Section 13.5 Conduct of Product Liability Claims.

(a) Each Party shall promptly notify the other in the event that any Third Party asserts or files any products liability claim or other action relating to alleged defects in any Product (whether design defects, manufacturing defects or defects in sales or marketing) ("Third Party Products Liability Action") against such Party. In the event of a Third Party Products Liability Action against such a single Party, the unnamed Party shall have the right, in the unnamed Party's sole discretion, to join or otherwise participate in such legal action with legal counsel selected by the unnamed Party and reasonably acceptable to the named Party. The Party named in such Third Party Products Liability Action shall have the right to control the defense of the action, but shall notify and keep the unnamed Party apprised in writing of such action and shall consider and take into account the unnamed Party's reasonable interests and requests and suggestions regarding the defense of such action; provided, however, that, in the event of a Co-Development Opt-Out Notice or Co-Commercialization Opt-Out Notice, BeiGene shall have the right to control the defense of all Third Party Product Liability Actions after any Co-Development Opt-Out Date. In the event of a Third Party Products Liability Action against both Parties, unless otherwise agreed by the Parties in writing, BeiGene shall control the response to such Third Party Products Liability Action.

(b) The non-controlling Party of a Third Party Products Liability Action shall reasonably cooperate with the controlling Party in the preparation and formulation of a defense to such Third Party Products Liability Action, and in taking other steps reasonably necessary to respond to such Third Party Products Liability Action. The controlling Party shall have the right to select its counsel for the defense to such Third Party Products Liability Action, which counsel must be reasonably acceptable to the non-controlling Party. If required under applicable Law in order for the controlling Party to maintain a suit in response to such Third Party Products Liability Action, the non-controlling Party shall join as a party to the suit. The non-controlling Party shall also have the right to participate and be represented in any such suit on a voluntary basis by its own counsel at its own expense. The controlling Party shall not settle or compromise any Third Party Products Liability Action without the consent of the other Party, which consent shall not be unreasonably withheld.

Section 13.6 Limitation of Liability. EXCEPT WITH RESPECT TO A BREACH OF SECTION 8.6 OR ARTICLE XI, OR A PARTY'S LIABILITY PURSUANT TO SECTION 13.1 OR SECTION 13.2, NEITHER PARTY SHALL BE LIABLE FOR SPECIAL, CONSEQUENTIAL, EXEMPLARY, PUNITIVE, MULTIPLE OR OTHER INDIRECT OR REMOTE DAMAGES, OR FOR LOSS OF PROFITS, LOSS OF DATA OR LOSS OF USE DAMAGES ARISING IN ANY WAY OUT OF THIS AGREEMENT OR THE EXERCISE OF ITS RIGHTS HEREUNDER, WHETHER BASED UPON WARRANTY, CONTRACT, TORT, STRICT LIABILITY OR OTHERWISE, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR LOSS.

Section 13.7 Insurance. Beginning on the commencement of the first Clinical Trial of a Product and thereafter during the Term, each Party shall maintain commercial general liability insurance (including product liability insurance) from a recognized, creditworthy insurance company, with coverage limits of at least [***] per claim and annual aggregate. BeiGene may elect to self-insure all or parts of the limits described above. Within [***] following written request from the other Party, each Party shall furnish to the other Party a certificate of insurance evidencing such coverage. If such coverage is modified or cancelled, the insured Party shall notify the other Party and promptly provide such other Party with a new certificate of insurance evidencing that such insured Party's coverage meets the requirements of this Section 13.7.

Article XIV
Term and Termination

Section 14.1 Term. The term of this Agreement (the "Term") shall commence on the Effective Date and shall continue, unless earlier terminated pursuant to Section 14.3 on a country-by-country basis, in full force and effect:

(a) if any Co-Development Opt-Out Date has not occurred, until the Parties cease to Develop or Commercialize the Products in accordance with the terms and conditions of this Agreement; or

(b) if any Co-Development Opt-Out Date has occurred, this Agreement shall expire:

(i) for the Product on a country-by-country basis, upon the expiration of the applicable Royalty Term with respect to such Product in such country; and

(ii) in its entirety upon the expiration of all applicable Royalty Terms under this Agreement with respect to the Product in all countries worldwide.

Section 14.2 Effect of Expiration. Following any Co-Development Opt-Out Date, after the expiration of the Term pursuant to Section 14.1(b) above, the following terms shall apply:

(a) Licenses after Product Expiration. After expiration of the Term (but not after early termination) with respect to any Product in a country in the world pursuant to Section 14.1(b)(i), BeiGene's rights and licenses hereunder under the BioAtla Intellectual Property, BioAtla Collaboration Intellectual Property and BioAtla's rights in the Joint IP to develop, manufacture, have manufactured, use, offer for sale, sell, import and otherwise commercialize such Product and related Companion Diagnostics in the Field in such country shall convert to exclusive, irrevocable, non-terminable rights and licenses, with the right to grant sublicenses through multiple tiers.

(b) Licenses after Expiration of Agreement. After expiration of the Term (but not after early termination) with respect to this Agreement in its entirety pursuant to Section 14.1(b)(ii), BeiGene's rights and licenses hereunder under the BioAtla Intellectual Property, BioAtla Collaboration Intellectual Property and BioAtla's rights in the Joint IP to develop, manufacture, have manufactured, use, offer for sale, sell, import and otherwise commercialize the Products and Companion Diagnostics in the Field worldwide shall convert to exclusive, irrevocable, non-terminable rights and licenses, with the right to grant sublicenses through multiple tiers.

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

Section 14.3 Termination.

(a) Termination for Convenience. BeiGene shall have the right to terminate this Agreement in its entirety for convenience at any time on and after the first anniversary of the Effective Date upon ninety (90) days' prior written notice to BioAtla.

(b) Termination by BeiGene for Lack of Feasibility/Failure to Achieve POC Milestone. Notwithstanding any other provision herein to the contrary, BeiGene shall have the right to terminate this Agreement on forty five (45) days' prior written notice in the event that (i) BeiGene reasonably determines, after consultation with BioAtla, based upon data and results, that the continuation of the Collaboration is not technically or scientifically feasible or (ii) the POC Milestone is not successfully achieved.

(c) Termination for Material Breach.

(i) Termination by Either Party for Breach. Subject to Section 14.3(c)(ii) (with respect to a Material Breach by either Party of its obligations to use Commercially Reasonable Efforts), this Agreement and the rights granted herein may be terminated by either Party for the material breach of this Agreement in a manner that fundamentally frustrates the transactions contemplated by this Agreement taken as a whole by the other Party to this Agreement (each, a "Material Breach"); provided that, if the breaching Party has not cured such Material Breach within ninety (90) days after the date of written notice to the breaching Party of such breach (or thirty (30) days, in the case of BeiGene's payment obligations under this Agreement or the specified time period provided in Section 14.3(c)(ii) with respect to a Material Breach by either Party of its obligation to use Commercially Reasonable Efforts, each as applicable) (the "Cure Period"), which notice shall describe such breach in reasonable detail and shall state the non-breaching Party's intention to terminate this Agreement pursuant to this Section 14.3(c)(i). Notwithstanding the preceding sentence, the Cure Period for any allegation made in good faith as to a Material Breach under this Agreement will run from the date that written notice was first provided to the breaching Party by the non-breaching Party. Any such termination of this Agreement under this Section 14.3.3(a) shall become effective at the end of the Cure Period, unless the breaching Party has cured any such Material Breach prior to the expiration of such Cure Period, or, if such Material Breach is not susceptible to cure within the Cure Period, then, the non-breaching Party's right of termination shall be suspended only if and for so long as the breaching Party has provided to the non-breaching Party a written plan that is reasonably calculated to effect a cure and such plan is acceptable to the non-breaching Party, and the breaching Party commits to and carries out such plan as provided to the non-breaching Party within ninety (90) days after the date that written notice was first provided to the breaching Party by the non-breaching Party. The Parties understand and agree that the totality of this Agreement and the totality of the circumstances with respect to this Agreement will be taken into account and assessed as a whole for purposes of determining whether a breach is a Material Breach under this Agreement.

(ii) Additional Procedures for Termination by either Party for Failure of the Other Party to Use Commercially Reasonable Efforts. If either Party wishes to exercise its right to terminate this Agreement pursuant to Section 14.3(c)(i) for the other Party's Material Breach of its obligations to use Commercially Reasonable Efforts, it shall provide to such other Party a written notice of its intent to exercise such right, which notice shall be labeled as a "notice of Material Breach for failure to use Commercially Reasonable Efforts," and shall state the reasons and justification for such termination and recommending steps which such Party believes the other Party should take to cure such alleged breach. For any such notice of breach by a Party, the Cure Period shall, subject to Section 14.3(b)(iii), be one hundred and eighty (180) days, and shall become effective in accordance with Section 14.3(c)(i).

(iii) Disagreement as to Material Breach. If the Parties reasonably and in good faith disagree as to whether there has been a Material Breach, then, subject to Section 15.1: (A) the Party that disputes that there has been a Material Breach may contest the allegation by referring such matter, within thirty (30) days following such notice of alleged Material Breach for resolution to the Executive Officers, who shall meet promptly to discuss the matter, and determine, within ten (10) Business Days following referral of such matter, whether or not a Material Breach has occurred pursuant to this Section 14.3(b); (B) the relevant Cure Period with respect thereto will be tolled from the date the breaching Party notifies the non-breaching Party of such dispute and through the resolution of such dispute in accordance with the applicable provisions of this Agreement (provided, that if such dispute relates to payment, the Cure Period will only be tolled with respect to payment of disputed amounts, and not with respect to undisputed amounts), (C) it is understood and agreed that during the pendency of such dispute, all of the terms and conditions of this Agreement shall remain in effect and the Parties shall continue to perform all of their respective obligations hereunder and (D) if it is finally and conclusively determined in accordance with Section 15.2 that the breaching Party committed such Material Breach, then the breaching Party shall have the right to cure such Material Breach after such determination within the Cure Period (provided, that if such dispute relates to a failure to use Commercially Reasonable Efforts, such post-determination Cure Period shall be strictly limited to ninety (90) days).

(iv) If the Executive Officers are unable to resolve a dispute within such ten (10) Business Day period after it is referred to them, the matter will be resolved as provided in Section 15.2.

(v) Payments. No milestone payments by BeiGene will be due on milestones achieved during the period between the notice of termination under Section 14.3(b) and the effective date of termination; provided, however, that, if either Party provides notice of a dispute pursuant to Section 14.3(b) or otherwise and such dispute is resolved in a manner in which no termination of this Agreement occurs with respect to such breach or the breaching Party cures the applicable breach during the Cure Period, then upon such resolution or cure BeiGene will within five (5) Business Days pay to BioAtla the applicable milestone payment for each milestone achieved during the period between the notice of termination under Section 14.3(b) and the resolution of such dispute or cure of such breach.

(d) Termination for Insolvency. To the extent permitted by Law, this Agreement may be terminated by either Party upon the filing or institution of bankruptcy, reorganization, liquidation or receivership proceedings with respect to, or upon an assignment of a substantial portion of the assets for the benefit of creditors by the other Party; provided, however, that, in the event of any involuntary bankruptcy or receivership proceeding such right to terminate shall only become effective if the non-terminating Party consents to the involuntary bankruptcy or receivership or such proceeding is not dismissed within sixty (60) days after the filing thereof.

(e) Termination for Patent Challenge. Either Party shall have the right to terminate this Agreement upon written notice if the other Party or any of its Affiliates challenges the validity, scope or enforceability of or otherwise opposes any Patent (i) included in the BioAtla Intellectual Property or BioAtla Collaboration Intellectual Property and that is licensed to BeiGene under this Agreement in any action or proceeding, or (ii) included in the BeiGene Intellectual Property or BeiGene Collaboration Intellectual Property that is licensed to BioAtla under this Agreement in any action or proceeding (subject to the exceptions described in this Section 14.3(d), a “Challenge”) (other than as may be necessary or reasonably required to assert a defense, cross-claim or a counter-claim in an action or proceeding asserted by either Party or any of its Affiliates or Selling Parties against the other Party or any of its Affiliates or to respond to a court request or order or administrative law, request or order) it being understood and agreed that either Party’s right to terminate this Agreement under this Section 14.3(e) shall not apply to any actions undertaken by an Affiliate of the other Party (the “Challenging Party”) that first becomes such an Affiliate as a result of a Change of Control involving the Challenging Party, where such new Affiliate was undertaking any of the activities described in the foregoing clause prior to such Change of Control; provided that a Party’s right to terminate this Agreement under this Section 14.3(e) shall apply to actions undertaken by such new Affiliate if the Challenging Party is the acquiror in such Change of Control and such new Affiliate does not terminate or otherwise cease participating in such action, proceeding, challenge or opposition within thirty (30) days after the effective date of such Change of Control. If a Selling Party of either Party challenges the validity, scope or enforceability of or otherwise opposes any Patent included in any of the intellectual property described in this Section 14.3(e) under which such Selling Party is sublicensed in any action or proceeding, then the Party that granted such sublicense shall, upon written notice from the other Party, terminate such sublicense. For the avoidance of doubt, an action by a Party or any of its Affiliates (collectively the “Pursuing Party”) in accordance with this Agreement to amend claims within a pending patent application of the other Party during the course of the Pursuing Party’s Prosecution of such pending patent application or in defense of a Third Party proceeding, or to make a negative determination of patentability of claims of a patent application of the other Party or to abandon a patent application of the other Party during the course of the Pursuing Party’s Prosecution of such pending patent application, shall not constitute a challenge under this Section 14.3(e). Neither Party shall, and each Party shall ensure that its Affiliates and Selling Parties do not, use or disclose any Confidential Information of the other Party or any nonpublic information regarding the Prosecution or enforcement of any BioAtla Patent, BeiGene Collaboration Patent or BioAtla Collaboration Patent (including Joint Patents) to which a Party or any of its Affiliates or (sub)licensees are or become privy as a consequence of the rights granted to such Party pursuant to Article X, in initiating, requesting, making, filing or maintaining, or in funding or otherwise assisting any other Person with respect to, any Challenge.

Section 14.4 Effects Of Termination.

(a) Effects of BeiGene Termination for Convenience or BioAtla Termination for BeiGene Breach, Insolvency or Patent Challenge. Upon termination of this Agreement by BeiGene under Section 14.3(a) or Section 14.3(b) or by BioAtla under Section 14.3(c), 14.3(d) or 14.3(e), the following shall apply:

(i) all licenses granted by BioAtla to BeiGene under Section 8.1(a) shall terminate in their entirety;

(ii) with respect to the Products, BeiGene shall (x) grant to BioAtla an exclusive (even as to BeiGene and its Affiliates), worldwide, royalty-bearing, freely sublicensable (through multiple tiers and in accordance with Section 8.3, *mutatis mutandis*) license under and to the BeiGene Collaboration Intellectual Property as of the effective date of termination solely to Develop, use, Manufacture, have Manufactured, offer for sale, sell, import and otherwise Commercialize such Products and Companion Diagnostics solely for use in connection with such Products, which license shall (i) be terminable by BioAtla at any time upon prior written notice to BeiGene, and (ii) shall obligate BioAtla to pay to BeiGene a royalty equal to [***] of all Net Sales (*mutatis mutandis*, as if each reference to BeiGene shall be a reference to BioAtla) of such Products and Companion Diagnostics that are used solely in connection with such Products; provided, that, the foregoing shall not include a license to any Know-How or Patents Controlled by BeiGene as of the effective date of termination that cover or relate to any proprietary product of BeiGene other than such Products;

(iii) each Party shall be released from its Development, Manufacture and Commercialization obligations (except as set forth in Section 14.4(a)(viii) below with respect to BeiGene's transfer of Manufacturing to BioAtla hereunder);

(iv) within [***] after such termination, unless there has been a Co-Development Opt-Out Date, each Party shall provide the other with a report of ROW Product Revenue, Development Costs and Commercialization Costs and other amounts incurred by such Party that are subject to the Parties' cost-sharing obligations through the effective date of termination for the purpose of calculating a final reconciliation of shared costs and payments in accordance with Section 9.12 and Section 9.4, as applicable. Each Party shall submit any supporting information reasonably requested by the other Party related to such ROW Product Revenue, Development Costs and Commercialization Costs and such other amounts included in such Party's reconciliation report within [***] after the other Party's receipt of such request. The Parties, with the assistance of the JSC, shall conduct a final reconciliation of such costs and payments within [***] after receipt of all such supporting information, and an invoice shall be issued to the Party (if any) that owes the other Party a payment to accomplish the cost sharing or payment envisioned under this Agreement pursuant to Section 9.1 and Section 9.4, as applicable. The paying Party shall pay all amounts payable under any such invoice within [***] after its receipt of such invoice; provided, however, that, each Party shall remain responsible for its applicable share of all Development Costs and Commercialization Costs committed prior to the effective date of termination and not cancelable by the other Party, which other Party shall reasonably seek to minimize, with respect to the Products to the extent such Development Costs and Commercialization Costs (A) are within an approved Development Budget under an approved Development Plan or Commercialization Budget under an approved Commercialization Plan, respectively, in place prior to termination and (B) are solely incurred by the other Party during the period ending [***] after the effective date of termination of this Agreement;

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

(v) within thirty (30) days after such termination, BeiGene shall provide to BioAtla a fair and accurate summary report of the status of Development and Commercialization activities conducted by BeiGene with respect to the Products;

(vi) BeiGene shall promptly transfer and assign to BioAtla all of BeiGene's and its Affiliates' rights, title and interests in and to any Product trademark(s) (but not any BeiGene house marks or composite marks including a house mark) owned by BeiGene and solely used for the Products;

(vii) BeiGene shall as soon as reasonably practicable transfer and assign to BioAtla all Regulatory Approvals and Regulatory Documentation with respect to the Products and a copy of all of the data comprising the Global Safety Database; provided that BeiGene may retain such data and a single copy of such Regulatory Approvals and Regulatory Documentation for its records. Notwithstanding the foregoing, if such Regulatory Approvals or Regulatory Documentation are required for the Development, Manufacture or Commercialization of any product other than the Products, in place of transferring or assigning the foregoing, BeiGene shall instead grant BioAtla a Right of Reference or Use with respect to such approvals or documentation with respect to the Products;

(viii) BioAtla shall have the option, exercisable within thirty (30) days following the effective date of such termination of this Agreement, to obtain BeiGene's inventory of the Products at a price equal to one hundred percent (100%) of BeiGene's Manufacturing Costs for such inventory of the Products; provided that, if BeiGene, its Affiliates or (sub)licensees have outstanding orders, at BioAtla's election, either BioAtla shall fulfill such orders or, notwithstanding BioAtla's option to purchase inventory, BeiGene may retain sufficient inventory to fulfill such orders. BioAtla may exercise such option by written notice to BeiGene during such thirty (30) day period; provided that, in the event BioAtla exercises such right to purchase such inventory, BeiGene shall grant, and hereby does grant, a royalty-free right and license to any trademarks, names and logos of BeiGene contained therein for a period of eighteen (18) months solely to permit the orderly sale of such inventory, subject to BioAtla meeting reasonable quality control standards imposed by BeiGene on the use of such trademarks, names and logos, which shall be consistent with the standards used by BeiGene prior to such termination;

(ix) separate transitional activities shall be undertaken with respect to any Companion Diagnostic(s) to ensure that the appropriate Regulatory Approvals, Regulatory Documentation, Manufacturing Technology or other Know-How or Patents necessary for the Development, Manufacture or Commercialization of such Companion Diagnostic(s) shall be transferred to BioAtla to the same extent as Regulatory Approvals, Regulatory Documentation, Manufacturing Technology or other Know-How or Patents otherwise associated with such the Products are transferred;

(x) notwithstanding anything to the contrary in Section 8.6, BioAtla shall have the right to pursue the Development, Manufacture and Commercialization of the Products; and

(xi) the provisions of Article X (other than Section 10.1) shall terminate, and BeiGene shall, if applicable, provide reasonable assistance to BioAtla and cooperation in connection with the transition of Prosecution and enforcement responsibilities to BioAtla with respect to BeiGene Collaboration Patents, BioAtla Collaboration Patents, and Joint Patents then being Prosecuted or enforced by BeiGene, including execution of such documents as may be necessary to effect such transition.

(b) Effects of BeiGene Termination for BioAtla Breach, Insolvency or Patent Challenge. Upon any termination of this Agreement by BeiGene under Section 14.3(c), 14.3(d) or 14.3(e):

(i) if BeiGene has the right to terminate this Agreement pursuant to Section 14.3(c), Section 14.3(d) or Section 14.3(e), BeiGene may elect, upon written notice to BioAtla, to either:

(A) terminate this Agreement in its entirety, if pursuant to Section 14.3(b) or 14.3(c), or with respect to the corresponding Product, if pursuant to Section 14.3(d), in which case (1) all rights and obligations of the Parties under this Agreement or the corresponding Product, respectively, shall terminate, except (I) BeiGene's payment obligations (accrued as of the effective date of such termination) and the audit rights set forth in Article IX, and (II) Section 14.4(d) shall, in each case (I) and (II), survive such termination, (2) BioAtla shall return any Confidential Information of BeiGene pursuant to Section 11.6 that is not necessary to practice any licenses retained by BioAtla following such termination under this Agreement, (3) Sections 14.4(a)(v), (vi) and (vii) shall apply; or

(B) maintain this Agreement in full force and effect (foregoing, for the avoidance of doubt, the right to terminate this Agreement for such occurrence of such breach) and, with respect to any Product that is the subject of the applicable breach by BioAtla: (1) all future milestones and royalty obligations under this Agreement or in respect of such Products, as applicable, payable by BeiGene under this Agreement following such election shall be subject to a reduction of [***] and (2) the ROW Profit & Loss Share shall be terminated (and the Parties shall treat this Agreement as though a Co-Development Opt-Out Date had occurred pursuant to Section 3.6).

(ii) all licenses granted by BeiGene to BioAtla under Section 8.1(b) with respect to the Products shall terminate if BeiGene has made the election set forth in Section 14.4(b)(i)(B) and all licenses granted by BioAtla to BeiGene under Section 8.1(a) with respect to any Product that is the subject of the applicable breach by BioAtla shall convert to worldwide licenses and otherwise remain in effect;

(iii) BioAtla shall be released from its Development, Manufacture and Commercialization obligations;

(iv) each Party shall provide the other with a report of the Development Costs and Commercialization Costs incurred by such Party that are subject to the Parties' cost-sharing obligations through the effective date of termination for the purpose of calculating a final reconciliation of shared costs in accordance with Section 9.1 and Section 9.4;

(v) if BeiGene has made the election set forth in Section 14.4(b)(i)(B) within [***] after such termination, BioAtla shall provide to BeiGene a fair and accurate summary report of the status of Development and Commercialization activities conducted by BioAtla with respect to the Products;

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

(vi) if BeiGene has made the election set forth in Section 14.4(b)(i)(B) above:

(A) BioAtla shall promptly transfer and assign to BeiGene all of BioAtla's and its Affiliates' rights, title and interests in and to any Product Trademark(s) (but not any BioAtla house marks or composite marks including a house mark) owned by BioAtla and solely used for the Products in the ROW;

(B) BioAtla shall as soon as reasonably practicable transfer and assign to BeiGene all Regulatory Approvals and Regulatory Documentation with respect to the Products for the ROW and a copy of all of the data comprising the Global Safety Database for the ROW; provided that BioAtla may retain such data and a single copy of such Regulatory Approvals and Regulatory Documentation for its records; and provided further that, if such Regulatory Approvals or Regulatory Documentation are required for the Development, Manufacture or Commercialization of any product other than the Products, in place of transferring or assigning the foregoing, BioAtla shall grant BeiGene a Right of Reference or Use with respect to such approvals or documentation with respect to the Products; and

(C) BeiGene shall have the option, exercisable within thirty (30) days following the effective date of such termination of this Agreement, to obtain BioAtla's inventory of the Products at a price equal to one hundred percent (100%) of the Manufacturing Costs for such inventory of the Products; provided that, if BioAtla, its Affiliates or (sub)licensees have outstanding orders, at BeiGene's election, either BeiGene shall fulfill such orders or, notwithstanding BeiGene's option to purchase inventory, BioAtla may retain sufficient inventory to fulfill such orders. BeiGene may exercise such option by written notice to BioAtla during such thirty (30) day period; provided that, in the event BeiGene exercises such right to purchase such inventory, BioAtla shall grant, and hereby does grant, a royalty-free right and license to any trademarks, names and logos of BioAtla contained therein for a period of eighteen (18) months solely to permit the orderly sale of such inventory, subject to BeiGene meeting reasonable quality control standards imposed by BioAtla on the use of such trademarks, names and logos, which shall be consistent with the standards used by BioAtla prior to such termination. Unless BeiGene exercises its option under the first sentence of this Section 14.4(b)(vii)(C) and BioAtla, its Affiliates or (sub)licensees at termination of this Agreement possess Product, have started the manufacture thereof or have accepted orders therefor, BioAtla, its Affiliates or (sub)licensees shall have the right, for up to one (1) year following the date of termination, to sell their inventories thereof, complete the manufacture thereof and Commercialize such fully-manufactured Product, in order to fulfill such accepted orders or distribute such fully-manufactured Product in the ROW, subject to the obligation of BioAtla to pay BeiGene any and all payments as provided in this Agreement.

(vii) if BeiGene has made the election set forth in Section 14.4(b)(i)(B), notwithstanding Section 8.5 or Section 9.5, BeiGene shall be solely responsible for any payments owed to any Third Party licensors of BioAtla Intellectual Property, BioAtla Collaboration Intellectual Property or BeiGene Collaboration Intellectual Property (without deduction under Section 9.5(d)) and shall be responsible for complying with the terms of any license agreements with such Third Party licensors, in either case, directly related to BeiGene's exercise of such license; and

(viii) if BeiGene has made the election set forth in Section 14.4(b)(i)(B), the rights of BioAtla in Article X (other than Section 10.1) shall be terminated and BioAtla shall, if applicable, provide reasonable assistance to BeiGene and cooperation in connection with the transition of Prosecution and enforcement responsibilities to BeiGene with respect to BeiGene Collaboration Patents, BioAtla Collaboration Patents, and Joint Patents then being Prosecuted or enforced by BioAtla, including execution of such documents as may be necessary to effect such transition; and

(ix) if BeiGene has made the election set forth in Section 14.4(b)(i)(A), separate transitional activities shall be undertaken with respect to any Companion Diagnostic(s) to ensure that the appropriate Regulatory Approvals, Regulatory Documentation, Manufacturing Technology or other Know-How or Patents necessary for the Development, Manufacture or Commercialization of such Companion Diagnostic(s) shall be transferred to BioAtla to the same extent as Regulatory Approvals, Regulatory Documentation Manufacturing Technology or other Know-How or Patents otherwise associated with such Products are transferred.

(c) In the case of any termination of this Agreement, if any Clinical Trials are then being conducted at the time of such termination with respect to any Product, the Parties hereby agree (i) to reasonably cooperate in the completion of any such Clinical Trials, and (ii) notwithstanding anything to the contrary contained herein, to grant to the Party that retains global Commercialization rights to such Product following such termination (A) free of charge, copies of and rights of reference to and use of all Product Data that is Controlled by such Party and generated pursuant to such Clinical Trials that are relevant to or necessary to address issues relating to: (1) the safety of such Product in the Territory, including data that is related to adverse effects experienced with such Product or (2) all activities relating to CMC regarding such Product and in each of (1) and (2), that are required to be reported or made available to Regulatory Authorities in the Territory, when and as such data become available, and (B) copies of and rights of reference to and use of all Product Data (other than the Product Data referred to in subclause (A) above) that is Controlled by such Party and generated pursuant to such Clinical Trials that are relevant to or necessary to address the Development and Commercialization of such Product promptly following the generation of such Product Data if, but only if, as to such Product Data described in this subclause (B), such Party that retains global Commercialization rights to such Product following such termination promptly pays for all Development Costs and Commercialization Costs incurred following any such termination of this Agreement with respect to such Clinical Trials.

(d) Survival. Upon any termination or expiration of this Agreement, unless otherwise specified in this Agreement and except for any rights or obligations that have accrued prior to the effective date of termination or expiration, all rights and obligations of each Party under this Agreement shall terminate in whole or with respect to the Products, as the case may be; provided, however, that Section 8.7, Section 8.8, Section 9.7, Section 9.8, Section 9.9, Section 9.9, Section 9.10, Section 10.1, Section 11.5, Section 11.6, Section 12.5, Section 13.1, Section 13.2, Section 13.3, Section 13.4, Section 13.5, Section 13.6, Section 14.4 and Sections 15.2-15.20, as well as any other provision which by its terms or by the context thereof is intended to survive, shall survive any such termination or expiration of this Agreement.

(e) Equitable Relief. Termination of this Agreement shall be in addition to, and shall not prejudice, the Parties' remedies at law or in equity, including the Parties' ability to receive legal damages or equitable relief with respect to any breach of this Agreement, regardless of whether or not such breach was the reason for the termination.

(f) Accrued Liabilities. Except as otherwise specifically provided herein, termination of this Agreement shall not relieve the Parties of any liability or obligation which accrued hereunder prior to the effective date of such termination, nor preclude either Party from pursuing all rights and remedies it may have hereunder or at law or in equity with respect to any breach of this Agreement nor prejudice either Party's right to obtain performance of any obligation. In addition, termination of this Agreement shall not terminate provisions which provide by their respective terms for obligations or undertakings following the expiration of the term of this Agreement.

Article XV
Miscellaneous

Section 15.1 Dispute Resolution. Except for any disagreements that are within the authority of any Committee as provided in Article II (which disagreements shall be resolved in accordance with Section 2.1), the Parties agree that any disputes arising with respect to the interpretation, enforcement, termination or invalidity of this Agreement (each, a "Dispute") shall first be presented to the Parties' respective Executive Officers for resolution. If the Parties are unable to resolve a given dispute pursuant to this Section 15.1 after in-person discussions between the Executive Officers within ten (10) Business Days after referring such dispute to the Executive Officers, either Party may, at its sole discretion, seek resolution of such matter in accordance with Section 15.2.

Section 15.2 Submission to Arbitration for Resolution. Subject to Section 15.1, any Disputes shall be submitted to binding arbitration under the Rules of Arbitration of the International Chamber of Commerce ("ICC") (the "Rules"). The arbitration shall be conducted by a tribunal of arbitrators experienced in the business of pharmaceuticals. The tribunal shall be comprised of three (3) arbitrators, one of whom shall be nominated by each Party and a third of whom, who shall serve as the presiding arbitrator, shall be nominated by mutual agreement of the two party-nominated arbitrators. If the two party-nominated arbitrators do not nominate the third arbitrator within thirty (30) days of the second arbitrator's appointment, then the third arbitrator shall be appointed by the ICC Court. If the issues in dispute involve scientific, technical or commercial matters, the arbitrators chosen hereunder shall engage experts that have educational training or industry experience sufficient to demonstrate a reasonable level of relevant scientific, medical and industry knowledge, as necessary to resolve the dispute. Within thirty (30) days after initiation of arbitration, the Parties shall select the arbitrators. The arbitration proceeding shall be conducted in the English language and the Parties agree that there shall be no written or document or deposition discovery. That is, neither Party shall be requested to provide any documents or other evidence beyond the documents and other evidence that each Party chooses to submit in support of its case. The place of arbitration shall be New York, New York. The award of such arbitration shall be conclusive and binding on the Parties, and judgment upon the award may be entered in any court having jurisdiction thereover. All costs of the arbitration shall be borne in accordance with the Rules and, if different, according to the award rendered, but each Party shall be responsible for its own legal and other costs.

Section 15.3 Governing Law. This Agreement and all questions regarding its validity or interpretation, or the performance or breach of this Agreement, shall be governed by and construed and enforced in accordance with the laws of the State of New York, without reference to conflicts of laws principles.

Section 15.4 Assignment. Neither this Agreement nor any of the rights, interests or obligations hereunder shall be assigned by either Party (whether by operation of law or otherwise) without the prior written consent of the other Party. Notwithstanding the foregoing, either Party may, without the other Party's written consent, assign this Agreement and/or its rights and obligations hereunder, in whole or in part, to (i) an Affiliate of such Party or (ii) a Third Party that acquires, by or otherwise in connection with, merger, sale of assets or otherwise, all or substantially all of the business of the assigning Party to which the subject matter of this Agreement relates; provided that (a) the assignee agrees in writing to assume all of the assigning Party's obligations under this Agreement and (b) the assigning Party will remain responsible for the performance by its assignee of this Agreement or any obligations hereunder so assigned. For clarity, BioAtla hereby acknowledges and agrees that BeiGene Cayman and/or BeiGene Switzerland shall have the right to assign this Agreement and/or its rights and obligations hereunder, in whole or in part, to any of their respective Affiliates that are organized under the laws of China and/or Switzerland, subject to subsection (a) and (b) of this Section 15.4.

Section 15.5 Allocation of Obligations. [***]

Section 15.6 All Other Assignments Null and Void. The terms of this Agreement will be binding upon and will inure to the benefit of the successors, heirs, administrators and permitted assigns of the Parties. Any purported assignment in violation of Section 15.4 will be null and void *ab initio*.

Section 15.7 Change of Control. Notwithstanding anything to the contrary in this Agreement, with respect to any intellectual property rights controlled by the acquiring party or its Affiliates (if other than one of the Parties to this Agreement or any Affiliate of a Party immediately before such Change of Control) involved in any Change of Control of either Party, such intellectual property rights shall not be included in the technology and intellectual property rights licensed to the other Party hereunder to the extent held by such acquirer or its Affiliates (other than the relevant

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

Party to this Agreement or any Affiliate of a Party immediately before such Change of Control) prior to such transaction, or to the extent such technology is developed outside the scope of activities conducted with respect to the Collaboration, the Products, or related Companion Diagnostics. The BioAtla Intellectual Property and the BeiGene Intellectual Property shall exclude any intellectual property owned or controlled by a permitted assignee or successor and not developed in connection with the Collaboration, the Products, or related Companion Diagnostics, Developed, Manufactured or Commercialized pursuant to this Agreement.

Section 15.8 Force Majeure. If the performance of any part of this Agreement by a Party is prevented, restricted, interfered with or delayed by an occurrence beyond the control of such Party (and which did not occur as a result of such Party's financial condition, negligence or fault), including fire, earthquake, flood, embargo, power shortage or failure, acts of war or terrorism, insurrection, riot, lockout or other labor disturbance, governmental acts or orders or restrictions, acts of God (for the purposes of this Agreement, a "*force majeure event*"), such Party shall, upon giving written notice to the other Party, be excused from such performance to the extent of such prevention, restriction, interference or delay; provided that the affected Party shall use its Commercially Reasonable Efforts to avoid or remove such causes of non-performance and shall continue performance with the utmost dispatch whenever such causes are removed.

Section 15.9 Notices. Unless otherwise agreed by the Parties or specified in this Agreement, all notices required or permitted to be given under this Agreement shall be in writing and shall be sufficient if: (a) personally delivered; (b) sent by registered or certified mail (return receipt requested and postage prepaid); (c) sent by express courier service providing evidence of receipt and postage prepaid where applicable; or (d) sent by facsimile transmission (receipt verified and a copy promptly sent by another permissible method of providing notice described in clauses (a), (b) or (c) above), to the address for a Party set forth below, or such other address for a Party as may be specified in writing by like notice:

Any such notices shall be effective upon receipt by the Party to whom it is addressed.

Section 15.10 Waiver. Except as otherwise expressly provided in this Agreement, any term of this Agreement may be waived only by a written instrument executed by a duly authorized representative of the Party waiving compliance. The delay or failure of either Party at any time to require performance of any provision of this Agreement shall in no manner affect such Party's rights at a later time to thereafter enforce such provision. No waiver by either Party of any condition or term in any one or more instances shall be construed as a further or continuing waiver of such condition or term or of another condition or term.

Section 15.11 Severability. If any provision of this Agreement should be invalid, illegal or unenforceable in any jurisdiction, the Parties shall negotiate in good faith a valid, legal and enforceable substitute provision that most nearly reflects the original intent of the Parties and all other provisions of this Agreement shall remain in full force and effect in such jurisdiction and shall be liberally construed in order to carry out the intentions of the Parties hereto as nearly as may be possible. If the Parties cannot agree upon a substitute provision, the invalid, illegal or unenforceable provision of this Agreement shall not affect the validity of this Agreement as a whole, unless the invalid, illegal or unenforceable provision is of such essential importance to this Agreement that it is to be reasonably assumed that the Parties would not have entered into this Agreement without the invalid, illegal or unenforceable provision.

Section 15.12 Entire Agreement. This Agreement (including the Exhibits and Schedules attached hereto and any confidentiality agreements entered into by the Parties prior to the Effective Date) constitutes the entire agreement between the Parties relating to its subject matter, and supersedes all prior and contemporaneous agreements, representations or understandings, either written or oral, between the Parties with respect to such subject matter. There are no covenants, promises, agreements, warranties, representations, conditions or understandings, either oral or written, between the Parties other than as set forth herein and therein.

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

Section 15.13 Modification. No modification, amendment or addition to this Agreement, or any provision hereof, shall be effective unless reduced to writing and signed by a duly authorized representative of each Party. No provision of this Agreement shall be varied, contradicted or explained by any oral agreement, course of dealing or performance or any other matter not set forth in an agreement in writing and signed by a duly authorized representative of each Party.

Section 15.14 Independent Contractors; No Intended Third Party Beneficiaries. This Agreement is not intended nor shall be deemed or construed to create any relationship of employer and employee, agent and principal, partnership, or joint venture between the Parties. Each Party is an independent contractor. Neither Party shall assume, either directly or indirectly, any liability of or for the other Party. Neither Party shall have any express or implied right or authority to assume or create any obligations on behalf of, or in the name of, the other Party, nor to bind the other Party to any contract, agreement or undertaking with any Third Party. There are no express or implied third party beneficiaries hereunder, except for the indemnitees identified in Section 13.1 and Section 13.2. Notwithstanding the provisions of this Section 15.14, the provisions of Section 15.18 shall control for US federal income tax purposes, as applicable.

Section 15.15 Interpretation; Construction. The captions to the several Articles and Sections of this Agreement are included only for convenience of reference and shall not in any way affect the construction of, or be taken into consideration in interpreting, this Agreement. In this Agreement, unless the context requires otherwise, (a) the words “including,” “include,” “includes,” “such as” and “*e.g.*” shall be deemed to be followed by the phrase “without limitation” or like expression, whether or not followed by the same; (b) references to the singular shall include the plural and vice versa; (c) references to masculine, feminine and neuter pronouns and expressions shall be interchangeable; (d) the words “herein” or “hereunder” relate to this Agreement; (e) the word “or” is used in the inclusive sense that is typically associated with the phrase “and/or”; (f) the word “will” shall be construed to have the same meaning and effect as the word “shall”; and (g) all references to “dollars” or “\$” herein shall mean US Dollars and (h) a capitalized term not defined herein but reflecting a different part of speech from that of a capitalized term which is defined herein shall be interpreted in a correlative manner. Each Party represents that it has been represented by legal counsel in connection with this Agreement and acknowledges that it has participated in the drafting hereof. In interpreting and applying the terms and provisions of this Agreement, the Parties agree that no presumption will apply against the Party which drafted such terms and provisions.

Section 15.16 Performance by Affiliates. A Party may perform any obligation this Agreement imposes on such Party through any of such Party’s Affiliates. To the extent that this Agreement imposes obligations on Affiliates of a Party, such Party agrees to cause its Affiliates to perform such obligations.

Section 15.17 Counterparts. This Agreement may be executed in two (2) counterparts, each of which shall be deemed an original, and both of which together shall constitute one and the same instrument. Any such counterpart, to the extent delivered by means of a fax machine or by .pdf, .tif, .gif, .jpeg or similar attachment to electronic mail (any such delivery, an “Electronic Delivery”) shall be treated in all manner and respects as an original executed counterpart and shall be considered to have the same binding legal effect as if it were the original signed version thereof delivered in person. No Party hereto shall raise the use of Electronic Delivery to deliver a signature or the fact that any signature or agreement or instrument was transmitted or communicated through the use of Electronic Delivery as a claim or defense with respect to the formation of a contract, and each Party forever waives any such claim or defense, except to the extent that such claim or defense relates to lack of authenticity.

Section 15.18 Certain US Federal Income Tax Treatment. Pursuant to Section 15.14, this Agreement is not intended nor shall be deemed or construed to create any relationship of employer and employee, agent and principal, legal partnership, or joint venture between the Parties, except as provided in Section 15.19(a).

Section 15.19 Replacement Agreements and Certain Tax Treatment of Partnerships.

(a) Carved-Out Partnership. The Parties acknowledge that upon the first approval by a Regulatory Authority of the marketing of a Product resulting from the submission of an NDA anywhere in the ROW (such approval an “NDA Approval”) the rights and obligations imposed on each Party pursuant to this Agreement that relate to the ROW Profit & Loss Share with respect to such Product shall give rise to a partnership (a “U.S. Partnership”), solely for US federal (and, to the extent applicable, state) income tax purposes (but not for any non-tax or non-US purpose). BioAtla and BeiGene agree that each will take no position inconsistent with such partnership tax treatment for US federal and state income tax purposes for such time. Exhibit F of this Agreement sets forth the Parties’ intentions regarding allocations and other tax matters related to the tax partnership. Exhibit F shall be interpreted in a manner consistent with this Section 15.19. For the avoidance of doubt, the tax partnership referred to in this Section 15.19 shall be treated as separate from any other partnership entered into by, or deemed to exist between, the Parties.

(b) Separate Agreements and Division of Partnership. Within 90 days after BeiGene notifies BioAtla of its election pursuant to this Section 15.19(b), the Parties shall replace the portion of this Agreement that relates to any U.S. Partnership with two separate agreements, of which one agreement (the “Ex-US ROW Agreement”) shall relate exclusively to the rights and obligations with respect to the ROW outside the United States and shall be entered into between BioAtla (or its designee) and BeiGene Switzerland (or its designee), and the second agreement (the “U.S. Territory Agreement”) shall relate exclusively to the rights and obligations with respect to the ROW in the United States (the “U.S. Territory Agreement”) and shall be entered into between BioAtla (or its designee) and BeiGene Switzerland (or its designee). Each entry into a U.S. Territory Agreement or Ex-US ROW Agreement (each, a “Replacement Agreement”) shall be treated by the parties as the division of the relevant U.S. Partnership resulting in a separate U.S. Partnership with respect to each Replacement Agreement. For the avoidance of doubt, the revision contemplated in this Section 15.19 shall include any necessary or incidental changes to Exhibits (including Exhibit F) thereof.

(c) Avoiding a U.S. Trade or Business. The Parties shall take such commercially reasonable steps as may be necessary and shall cooperate in good faith to prevent any U.S. Partnership from being treated as engaged in a United States trade or business or from having a permanent establishment in the United States as determined under any relevant tax treaty (for the avoidance of doubt, this Section 15.19(c) shall apply to any U.S. Partnership arising in connection with an Ex-US ROW Agreement and any U.S. Partnership arising in connection with a U.S. Territory Agreement). Neither Party shall take any position or cause their Affiliates to take any position inconsistent with this Section 15.19 for tax purposes (including with respect to filing U.S. federal income tax returns and in the course of any audit, review or litigation), unless otherwise required by applicable Law.

Section 15.20 Non-Solicitation. During the period beginning on the Effective Date and ending [***] after the Effective Date, neither BeiGene nor any of its Affiliates or representatives will, without the prior written consent of BioAtla, solicit for hire any employee of BioAtla or any of its Affiliates, provided that general advertisements for employment will not be considered solicitations for hire for purposes of this Section 15.20 (Non-Solicitation).

Section 15.21 Equitable Relief. Notwithstanding anything to the contrary herein, the Parties shall be entitled to seek equitable relief, including injunction and specific performance, as a remedy for any breach of this Agreement. Such remedies shall not be deemed to be the exclusive remedies for a breach of this Agreement but shall be in addition to all other remedies available at law or equity.

Section 15.22 Further Assurances. Each Party shall execute, acknowledge and deliver such further instruments, and do all such other acts, as may be necessary or appropriate in order to carry out the expressly stated purposes and the clear intent of this Agreement.

AMENDMENT NO. 1 TO GLOBAL CO-DEVELOPMENT AND COLLABORATION AGREEMENT

This Amendment No. 1 to Global Co-Development and Collaboration Agreement (this “**First Amendment**”) is dated as of December 24, 2019 (the “**Amendment Effective Date**”) by and between:

BeiGene, Ltd., a Cayman Islands corporation (“**BeiGene Cayman**”)
c/o Mourant Governance Services (Cayman) Limited
94 Solaris Avenue
Camana Bay
PO Box 1348
Grand Cayman KY1-1108
Cayman Islands

BeiGene Switzerland GmbH, a company organized under the laws of Switzerland (“**BeiGene Switzerland**”)
c/o VISCHER AG
Aeschenvorstadt 5
4051 Basel, Switzerland

(together with BeiGene Cayman and its Affiliates, collectively, “**BeiGene**”)

and

BioAtla, LLC, a Delaware limited liability company
11085 Torreyana Road
San Diego, CA 92121

(hereinafter called “**BioAtla**”),

Capitalized terms used but not otherwise defined herein shall have the meanings ascribed to such terms in the Global Co-Development and Collaboration Agreement by and between the Parties effective as of April 8, 2019 (the “**Agreement**”).

WHEREAS, the Parties desire to amend the Agreement as described more fully herein; and

WHEREAS, pursuant to Section 15.13 of the Agreement, the Agreement may be modified only by a written agreement signed by the Parties.

NOW, THEREFORE, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the Parties hereto, intending to be legally bound, hereby agree as follows:

A. Payment of Past Manufacturing Costs

Within [***] after the Amendment Effective Date, BeiGene will pay to BioAtla a total of four million nine hundred fifty six thousand thirty four dollars (\$4,956,034) for BeiGene's portion of past Manufacturing Costs incurred by BioAtla prior to the Amendment Effective Date. BioAtla acknowledges that this payment represents payment in full for all Manufacturing Costs prior to the Amendment Effective Date and that BeiGene owes no further amounts for Manufacturing Costs incurred by BioAtla prior to the Amendment Effective Date (whether or not invoiced as of the Amendment Effective Date).

B. Amendments to Agreement.

1. The definition of Manufacturing Costs section 7(f) of Exhibit E of the Agreement is hereby deleted in its entirety and replaced with the following:

"Manufacturing Costs" means costs to supply applicable therapeutic ingredients, Candidates, finished Products and Companion Diagnostics, or related components or inputs and services for the Development and Commercialization of the Products and Companion Diagnostics (i) [***], or (ii) [***]; it being understood and agreed that (A) in the case of costs referred to in subsection (i) of this sentence [***] and (B) in the case of costs referred to in subsection (ii) of this sentence [***]. Overhead included in Manufacturing Costs incurred with respect to activities conducted at the same facility for (I) Development and Commercialization of the Products and Companion Diagnostics in the ROW and in the BeiGene Territory, and (II) other Development and Commercialization purposes, will each be allocated on a reasonable basis that is mutually agreed upon by the Parties. As applicable, "Manufacturing Costs" shall include Manufacturing Transition Costs.

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

C. Update to POC Milestone Criteria. The Parties agree to negotiate in good faith an updated Schedule 1 to the Agreement (POC Milestone Criteria) within forty five (45) days after the Amendment Effective Date.

. Miscellaneous. The Parties hereby confirm and agree that, except as amended hereby, the Agreement remains in full force and effect and is a binding obligation of the Parties hereto. This Agreement and Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

This First Amendment is executed by the authorized representatives of the Parties as of the date first written above.

**AMENDMENT NO. 2 TO GLOBAL CO-DEVELOPMENT AND COLLABORATION
AGREEMENT**

This Amendment No. 2 to Global Co-Development and Collaboration Agreement (this “**Second Amendment**”) is dated as of October 5, 2020 (the “**Amendment Effective Date**”) by and between:

BeiGene, Ltd., a Cayman Islands corporation (“**BeiGene Cayman**”)
c/o Mourant Governance Services (Cayman) Limited
94 Solaris Avenue, Camana Bay
PO Box 1348
Grand Cayman, KY1-1108
Cayman Islands

BeiGene Switzerland GmbH, a company organized under the laws of Switzerland (“**BeiGene Switzerland**”)
c/o VISCHER AG
Aeschenvorstadt 4
4051 Basel, Switzerland

(together with BeiGene Cayman and its Affiliates, collectively, “**BeiGene**”) and

BioAtla, Inc., a Delaware corporation (which is the successor to BioAtla, LLC)
11085 Torreyana Road
San Diego, CA 92121

(hereinafter called “**BioAtla**”),

Capitalized terms used but not otherwise defined herein shall have the meanings ascribed to such terms in the Global Co-Development and Collaboration Agreement by and between the Parties effective as of April 8, 2019, as amended by Amendment No. 1 to Global Co-Development and Collaboration Agreement by and between the Parties effective as of December 24, 2019 (as amended, the “**Agreement**”).

WHEREAS, the Parties desire to amend the Agreement as described more fully herein; and

WHEREAS, pursuant to Section 15.13 of the Agreement, the Agreement may be modified only by a written agreement signed by the Parties.

NOW, THEREFORE, in consideration of the mutual covenants contained herein, and for other good and valuable consideration, the receipt and adequacy of which are hereby acknowledged, the Parties hereto, intending to be legally bound, hereby agree as follows:

A. Co-Development Opt-Out.

In consideration of this Second Amendment, BioAtla hereby exercises its Co-Development Opt-Out pursuant to Section 3.6 of the Agreement, with the effects of such Co-Development Opt-Out pursuant to Section 3.7. Notwithstanding anything to the contrary, the “Co-Development Opt-Out Date” is deemed to be the Amendment Effective Date and no Development Costs incurred by either BioAtla or BeiGene prior to the Amendment Effective Date will be due BioAtla or BeiGene, respectively, and no accounting of such Development Costs will be due under Section 3.7(b)(i). Each of BioAtla and BeiGene acknowledges that the consideration included in this Second Amendment includes payment in full for all Development Costs incurred by BioAtla and BeiGene, respectively, prior to the Amendment Effective Date and that neither BeiGene nor BioAtla owes any further amounts for Development Costs incurred by BioAtla or BeiGene, respectively, prior to the Amendment Effective Date (whether or not invoiced as of the Amendment Effective Date).

B. Amendments to Agreement.

1. Schedule 1 of the Agreement (POC Milestone Criteria) is hereby deleted and replaced with the attached Schedule 1.

2. The definition of Lead Party in Section 1.1 of the Agreement is hereby deleted in its entirety and replaced with the following:

“**Lead Party**” means BeiGene for the conduct of all Collaboration Activities, including all Development, Manufacturing and Commercialization activities with respect to Candidates and the Products; provided, that, prior to completion of the Initial Technology Transfer, BioAtla shall be the Lead Party solely with respect to the conduct of Manufacturing activities with respect to Candidates and the Products.

3. Section 2.3(d) (Final Decision-Making Authority) of the Agreement is hereby deleted in its entirety and replaced with the following:

(d) **Final Decision-Making Authority.** Subject to subsection 2.3(e), BeiGene shall have final decision-making authority with respect to all matters that the Executive Officers are unable to resolve pursuant to Section 2.3(c), provided that prior to completion of the Clinical Trials designed to achieve the POC Milestone, BeiGene shall not exercise its final decision-making authority in a manner that (A) is materially inconsistent with the Development Plan, or (B) would reasonably be expected to result in a materially adverse safety issue related to a Product, each of which is subject to BioAtla’s prior consent, which consent shall not be unreasonably delayed, conditioned or withheld.

4. Section 3.1(a)(i) (Development of Products) of the Agreement is hereby deleted in its entirety and replaced with the following:

Section 3.1 Development of Products.

3.1(a) Development Plan.

(i) Prior to the POC Milestone Date. Subject to Article II, prior to the POC Milestone Date, the Development of the Candidates and the Products shall be conducted by BeiGene in accordance with a Development Plan to be drafted by BeiGene and approved by the JSC that describes the Development activities to be undertaken by the Parties with respect to the Candidates and the Products in the

Territory and includes an annual budget of Development Costs pursuant to Section 3.1(c) (“**Development Budget**”) and anticipated timelines for performance. The Development Plan may be amended from time to time by the JSC. The Direct Costs of conducting Development activities in the Territory in relation to a Candidate and a Product shall be reflected in the Development Budget and allocated and paid as set forth in Section 3.2.

5. Section 3.7(b)(iii) of the Agreement is hereby deleted in its entirety and replaced with the following:

(iii) BeiGene shall provide to BioAtla (A) quarterly written progress reports during the Term on the status of its material Development activities, [***], with respect to a Product under this Agreement. and (B) quarterly written reports during the Term until completion of the Clinical Trials designed to achieve the POC Milestone which include [***] (as and to the extent available). In addition, BeiGene will provide to BioAtla a final clinical study report for each Clinical Trial within [***] after the date of the last patient, last dose in such Clinical Trial.

() BioAtla shall use Commercially Reasonable Efforts to provide information and reference data reasonably requested by BeiGene to support BeiGene’s continued Development activities

6. Section 5.1(c) (Transfer of Regulatory Responsibility) of the Agreement is hereby deleted in its entirety and replaced with the following:

(c) Transfer of Regulatory Responsibility. As of the Amendment Effective Date, BeiGene shall become the Lead Party for all Regulatory Interactions for any and all Candidates and Products, and BioAtla will promptly transfer to BeiGene all Regulatory Documentation Controlled by BioAtla. BioAtla will transfer to BeiGene or its designated Affiliate all BioAtla Know-How and any materials constituting BioAtla Know-How related to Candidates and the Products that are necessary or reasonably useful for BeiGene to assume responsibility as the Lead Party of any Clinical Studies of the Candidates and the Products initiated or planned to be initiated as of the Amendment Effective Date. Upon BeiGene’s request and at BeiGene’s sole discretion, BioAtla will cooperate to transfer to BeiGene or its designated Affiliated any Third Party contracts constituting BioAtla Know-How related to any such Clinical Trials (including any clinical site agreements or clinical research organization agreements), and BioAtla will be solely responsible for any costs incurred in terminating or suspending any such Third Party contracts that are not transferred to BeiGene (and any such shut-down costs will not be considered Development Costs subject to sharing under the Agreement).

7. The first sentence of Section 9.3(a)(ii) is hereby deleted in its entirety and replaced with the following:

9.3(a)(ii). ROW. BeiGene shall pay BioAtla the following amounts after the first achievement by or on behalf of either Party or its Affiliates or Selling Parties of the corresponding development and regulatory milestone events set forth below with respect to the first Product to achieve such milestone events; it being understood and agreed that, each of payments (1) through (6) under this Section 9.3(a)(ii), inclusive, below from BeiGene to BioAtla shall be reduced by [***] percent ([***]). Payments (7) through (15) under this Section 9.3(a)(ii), inclusive, [***].

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

8. Sections 9.3(c)(i), 9.3(c)(ii), 9.3(c)(iii), and 9.3(c)(iv) (POC Milestone Payment) of the Agreement are each hereby deleted in their entirety and replaced with the following:

9.3(c)(i). If at any time during the Term, either Party reasonably believes that both (x) the POC Milestone has been successfully achieved and (y) the Technology Transfer (as defined in Section 4.2) has been completed in all material respects as of such date, such Party will notify the other Party in writing, which written notice will include, if by BeiGene, the Clinical Data generated by BeiGene, and if by BioAtla, any analysis by BioAtla that supports such Party's reasonable belief. If BioAtla delivers any such notice pursuant to Section 9.3(c)(i), BeiGene shall promptly deliver to BioAtla (by electronic or other means), no later than ten (10) Business Days following such request, access to such Clinical Data generated by BeiGene.

9.3(c)(ii).

(A) If the Parties agree that the Initial Technology Transfer has been completed prior to November 30, 2020, BeiGene shall pay to BioAtla a milestone payment of [***] within ten (10) Business Days after such agreement.

(B) If, based on such Clinical Data, the Parties agree that both (x) the POC Milestone has been successfully achieved and (y) the Technology Transfer has been completed in all material respects as of such date, BeiGene shall pay to BioAtla a milestone payment of [***] within ten (10) Business Days of such agreement.

9.3(c)(iii). If the Parties do not mutually agree, based on such Clinical Data, that the POC Milestone has been successfully achieved or that the Initial Technology Transfer has been completed as of the applicable date or that the Technology Transfer has been completed in all material respects as of the applicable date, either Party may convene a special meeting of the JSC within fifteen (15) Business Days for the purpose of resolving such dispute pursuant to Section 2.3(a). For clarity, if the JSC is unable to resolve any dispute between the Parties as to whether or not the Initial Technology Transfer, the Technology Transfer and/or the POC Milestone has been successfully achieved as provided above, the disputed matter will be resolved in accordance with Sections 15.1 and 15.2.

9.3(c)(iv). If (A) the Parties do not mutually agree that both (x) the POC Milestone has been successfully achieved and (y) the Technology Transfer has been completed in all material respects, and (B) BeiGene determines to continue to Develop the Candidate (which determination may be made by BeiGene during the period that the Parties are resolving any dispute with respect to the achievement of the POC Milestone pursuant to subsection (iii) above), then BeiGene shall provide written notice to BioAtla of such determination and BeiGene may then proceed with such continued Development. In such event, the POC Milestone Payment in Section 9.3(c) shall not be paid but the other milestones set forth in Section 9.3(a) would apply to any Products arising from BeiGene's continued Development.

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed**

9. The Table in Section 9.5(a) (Royalty Rate in the Territory) of the Agreement is hereby deleted in its entirety and replaced with the following:

[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]
[***]	[***]

10. Section 4.2 is amended by adding the following at the end of the section:

BioAtla will use its Commercially Reasonable Efforts to complete the Initial Technology Transfer (as defined below) promptly after the Amendment Effective Date and the Technology Transfer (as defined below) within the agreed upon project timeline, in each case within the timelines set forth in the next sentence. The Initial Technology Transfer Date shall be no later than [***]. The Technology Transfer shall be completed in all material respects no later than [***] after the Amendment Effective Date (the “**Technology Transfer Date**”), subject to extension up to the date on which the POC Milestone is determined to have occurred, as mutually agreed in writing by BeiGene and BioAtla. Other than Manufacturing Transition Costs as provided in Section 4.4 of the Agreement, BioAtla shall be solely responsible for any payments due to its Third Party service providers and contract manufacturers, and its or their licensors, for any payments due such Third Parties that are incurred in connection with the transfer of Manufacturing Technology to BeiGene, including the Initial Technology Transfer and Technology Transfer.

“**Initial Technology Transfer**” means: (i) transfer to BeiGene or its designated Affiliate of the Product cell line, Product master cell bank, and process documentation controlled by BioAtla or its Third Party contract service providers or contract manufacturers as of the Amendment Effective Date, (ii) a mutually agreed project plan and timeline for completion of the Technology Transfer, including allocation of roles and responsibilities of the parties, (iii) the execution of any agreements with or between BeiGene, BioAtla and/or its Third

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed

Party service providers and contract manufacturers necessary to complete the Technology Transfer, such agreements to be reasonably acceptable to BeiGene, (iv) transferring to BeiGene all of BioAtla's existing inventory of Product, and (v) using its Commercially Reasonable Efforts to provide complete responses to each of the questions and document requests set forth in Schedule 2 to this Second Amendment.

“**Technology Transfer**” means: transfer to BeiGene or its designated Affiliate of all Manufacturing Technology (including all Manufacturing Technology that is held by BioAtla's Third Party contract service providers and contract manufacturers) and all materials, technology and Know-How that are necessary or reasonably useful for the Manufacturing of Products by BeiGene or its Affiliate.

11. New Section 4.5 is added to the Agreement, as follows:

4.5. **Manufacturing Technology Transfer.** Within [***] following the Amendment Effective Date, BeiGene shall provide BioAtla with shipping instructions including the technical requirements (e.g., quantities and packaging form) to a BeiGene facility in China CIP (Incoterms 2020) for the transfer in no less than [***] separate shipments of the Product cell line and Product master cell bank and, within [***] following receipt of such shipping instructions, BioAtla shall give irrevocable written instructions to the depositories that hold the Product cell line and Product master cell bank (with a copy to BeiGene) to ship such Product cell line and Product master cell bank, and BioAtla shall use its Commercially Reasonable Efforts to cause the depositories to make such shipments in accordance with such instructions to BeiGene immediately, but in any event within [***] after the dates specified in such instructions and ensure that the transfers to BeiGene or its designated Affiliate of the Product cell line and Product master cell bank by BioAtla or its depository as provided in the immediately preceding sentence is completed on or before [***]. In addition, BioAtla covenants and agrees to provide to BeiGene all process documentation for the manufacture of the Product which is controlled by BioAtla or its Third Party contract service providers or contract manufacturers as of the Amendment Effective Date that has not previously been provided to BeiGene within [***] following the Amendment Effective Date. In the event that the shipment of the Product cell line and Product master cell bank contemplated by this section is prohibited due to an event specified in Section 15.8 (governing *force majeure events*) or by applicable Law, BeiGene shall provide alternative shipping instructions within [***] of such event that avoid such prohibition, and the remaining portions of this Section 4.5 shall continue to apply.

C. Miscellaneous. The Parties hereby confirm and agree that, except as amended hereby, the Agreement remains in full force and effect and is a binding obligation of the Parties hereto. This Agreement and Amendment may be executed in counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Any and all public announcements regarding this Second Amendment are subject to Section 11.3 of the Agreement.

LIFE TECHNOLOGIES [*] CELL LINE LICENSE AGREEMENT**

This [***] CELL LINE LICENSE AGREEMENT (the “**AGREEMENT**”), is entered Into and made effective as of June 28 2018 (the “**EFFECTIVE DATE**”), by and between Life Technologies Corporation, a Delaware corporation and subsidiary of Thermo Fisher Scientific Inc., having its principal place of business at 5823 Newton Drive, Carlsbad, CA 92008 USA (“**LIFE**”), and the following organization, organized under the laws of the indicated state or jurisdiction, and having its principal place of business at the indicated address as follows:

Organization name: BioAtla, LLC

State or jurisdiction: Delaware

Organization address: 11085 Torreyana Road, Suite 100

San Diego, CA 92121

Attention: Monica Sullivan

(which organization shall hereinafter be referred to as “**LICENSEE**”).

Each of LIFE and LICENSEE may be referred to herein as a “**PARTY**” or collectively as the “**PARTIES**”.

BACKGROUND RECITALS

WHEREAS, LIFE has developed certain cell lines that are useful for producing recombinant proteins (LIFE CELLS, defined below) and offers them for research purposes only under the TERMS AND CONDITIONS (defined below), and for clinical and commercial purposes under this AGREEMENT.

WHEREAS, LIFE has developed certain associated documentation (CELL LINE DOCUMENTATION PACKAGE, as defined below) related to LIFE CELLS which is LIFE’s CONFIDENTIAL INFORMATION (defined below) and may be used by LICENSEE only to assist LICENSEE to qualify or gain approval of certain produced recombinant proteins to regulatory authorities; and

WHEREAS, LICENSEE desires to obtain a non-exclusive license to use LIFE CELLS for producing recombinant protein(s) for commercial purposes and to use such CELL LINE DOCUMENTATION PACKAGE In seeking regulatory approval for sale of such recombinant proteins; and

WHEREAS, LIFE is willing to grant to LICENSEE a non-exclusive license to use LIFE CELLS and such CELL LINE DOCUMENTATION PACKAGE under the terms and conditions set forth hereunder.

AGREEMENT

NOW THEREFORE, the PARTIES, for valuable consideration, agree as follows:

1. **Definitions.** For the purpose of this AGREEMENT, the capitalized terms are defined as follows:
 - 1.1 **“AFFILIATE”** means any entity CONTROLLING, CONTROLLED by, or under common CONTROL with a PARTY. “CONTROL” means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of an entity, whether through the ownership of voting securities, by contract, or otherwise.
 - 1.2 **“AUTHORIZED AFFILIATE”** means an AFFILIATE of LICENSEE that is authorized to share rights with LICENSEE according to the procedures set forth in Section 2.2(iii).
 - 1.3 **“CELL LINE DOCUMENTATION PACKAGE”** means one (1) electronic copy of source, history and generation information for the cell line and a single lot of LIFE CELLS, including the preparation, characterization and testing of the seed, master, working and/or catalog cell banks (as applicable) for such LIFE CELLS. The CELL LINE DOCUMENTATION PACKAGE is subject to LIFE RIGHTS and is LIFE’s CONFIDENTIAL INFORMATION and is a trade secret of LIFE.
 - 1.4 **“CONFIDENTIAL INFORMATION”** means tangible or intangible non-public information one PARTY or its AFFILIATEs (“DISCLOSER”) provides the other PARTY or its AFFILIATEs (“RECIPIENT”) that is:
 - (i) disclosed orally, visually or in writing, and is clearly marked or identified as proprietary or confidential at the time of disclosure;
 - (ii) disclosed under conditions or is of such a nature that a reasonable person would consider the information disclosed as confidential or proprietary; or
 - (iii) acquired while present at a PARTY’s facility.
 - (iv) Examples of CONFIDENTIAL INFORMATION include confidential or proprietary financial statements, projections, information about customers, personnel or suppliers, research, designs, data, plans, compilations, methods, techniques, processes, procedures, know-how, strategies, policies, systems, technologies, inventions, developments, formulations, applications and manufacturing methods. LIFE’s CONFIDENTIAL INFORMATION includes: the CELL LINE DOCUMENTATION PACKAGE, including the table of contents, and any information related to biological materials developed by LIFE, including the genetic profile of LIFE CELLS. LICENSEE’s CONFIDENTIAL INFORMATION includes LICENSEE PROTEIN(S) and any other recombinant proteins of interest to LICENSEE, as well as LICENSEE’s preclinical and clinical development activities and plans.
 - (v) CONFIDENTIAL INFORMATION excludes information that the RECIPIENT can establish is:
 - a) within or enters the public domain other than as a result of unauthorized disclosure by RECIPIENT or by those to whom RECIPIENT has disclosed such CONFIDENTIAL INFORMATION;

- b) in RECIPIENT's lawful possession on or before the date of disclosure;
 - c) lawfully acquired by RECIPIENT on a non-confidential basis from a THIRD PARTY having the right to disclose it on such basis; or
 - d) Independently developed by RECIPIENT without use of or assistance from the CONFIDENTIAL INFORMATION, as evidenced by RECIPIENT's records.
- 1.6 **"FEE or FEE(S)"** means one or more of LICENSEE FEE or ADDITIONAL CLDP FEE.
- 1.6 **"FIELD"** means LICENSEE's use of LIFE CELLS and LICENSEE MODIFIED CELLS for the production of LICENSEE PROTEINS for clinical or commercial use solely as therapeutic agents.
- 1.7 **"LICENSEE MODIFIED CELLS"** means any and all modifications, derivatives, proprietary components or progeny of the LIFE CELLS that are made or obtained by LICENSEE, its AUTHORIZED AFFILIATE and/or SERVICE PROVIDERS as allowed under this AGREEMENT and that express LICENSEE PROTEIN(S) For clarity, LICENSEE MODIFIED CELLS, are subject to LIFE RIGHTS and the terms of this AGREEMENT.
- 1.8 **"LICENSEE PROTEIN(S)"** means recombinant protein produced by or on behalf of LICENSEE or an AUTHORIZED AFFILIATE of LICENSEE using LICENSEE MODIFIED CELLS. For clarity, LIFE will not have any rights to the LICENSEE PROTEIN(S) or the DNA sequences that encode LICENSEE PROTEIN(S), which remain the exclusive property of LICENSEE.
- 1.9 **"LIFE CELLS"** means [***].
- 1.10 **"LIFE RIGHTS"** means all intellectual property rights and proprietary information, know-how, and methods, owned or controlled by LIFE, and related to the LIFE CELLS (including the pCHO 1.0 vector and LIFE CELLS incorporated within LICENSEE MODIFIED CELLS), and the CELL LINE DOCUMENTATION PACKAGE.
- "NON-COMPLIANT ENTITY"** means any REPRESENTATIVE that is or was using LIFE CELLS, LIFE RIGHTS, LICENSEE MODIFIED CELLS, LICENSEE PROTEINS, or the CELL LINE DOCUMENTATION PACKAGE, other than as permitted under this AGREEMENT.
- 1.12 **"REPRESENTATIVE(S)"** mean individually or collectively any LICENSEE AFFILIATE, AUTHORIZED AFFILIATE, officers, representatives, agents, subcontractors, and employees, SERVICE PROVIDER, or other THIRD PARTIES under control or direction of LICENSEE or an AUTHORIZED AFFILIATE, or that are contractually obligated to LICENSEE or an AUTHORIZED AFFILIATE.
- 1.13 **"SERVICE PROVIDER"** means a THIRD PARTY that performs services producing LICENSEE MODIFIED CELLS, or LICENSEE PROTEINS for consideration and solely on behalf of LICENSEE or an AUTHORIZED AFFILIATE, and with whom LICENSEE or an AUTHORIZED AFFILIATE of LICENSEE has entered into a written agreement for these services.

- 1.14 **“TERM”** means the period of time described in Section 7.1.
- 1.15 **“TERMS AND CONDITIONS”** means LIFE’s general terms and conditions of sale for the purchase of LIFE CELLS and which are located at www.thermofisher.com; all applicable limited use label license(s) from LIFE or its AFFILIATES for LIFE CELLS printed as “notice to purchaser” in the user manual; and/or the terms and conditions under which LIFE or a LIFE AFFILIATE performs custom service(s) for LICENSEE.
- 1.16 **“THIRD PARTY”** means any person or entity other than LIFE, LIFE AFFILIATES, LICENSEE, or AUTHORIZED AFFILIATES.
- 2. Use of the LIFE CELLS; Grant of License**
- 2.1 Use of the LIFE CELLS Generally.** The rights to LIFE CELLS conveyed under this AGREEMENT are separate from, and supplemental to, the research use rights conveyed under LIFE’s TERMS AND CONDITIONS. The terms and conditions in this AGREEMENT will govern LICENSEE’s, and REPRESENTATIVE(S)’ uses of LIFE CELLS, the commercial uses specifically in the FIELD as defined In Section 1.6, and granted in Section 2.2(i) below, The TERMS AND CONDITIONS will govern any other uses of LIFE CELLS.
- 2.2 Grant to LICENSEE under LIFE RIGHTS.** Subject to the terms and conditions of this AGREEMENT:
- (i) LIFE grants to LICENSEE, a worldwide, non-exclusive, royalty-free, non-sublicensable license under LIFE RIGHTS for LICENSEE to **use** LIFE CELLS and LICENSEE MODIFIED CELLS to make, and to have made (by SERVICE PROVIDERS only), offer to sell, sell or have sold, import or otherwise transfer LICENSEE PROTEINS for use in accordance with the FIELD.
 - (ii) LIFE also grants to LICENSEE a worldwide, non-exclusive, royalty-free, non-sublicensable license, to transfer to SERVICE PROVIDERS, LIFE CELLS to generate LICENSEE MODIFIED CELLS; and/or LICENSEE MODIFIED CELLS for use by SERVICE PROVIDERS only to produce LICENSEE PROTEIN(S). Such LICENSEE PROTEIN(S) shall be used by LICENSEE and its AUTHORIZED AFFILIATES (if any) solely in accordance with the grant in Section 2.2(i) above. As a condition of this grant, LICENSEE and AUTHORIZED AFFILIATES (if any) must:
 - a) Obtain SERVICE PROVIDER’s prior written agreement that SERVICE PROVIDER will not:
 - 1) Transfer LIFE CELLS or LICENSEE MODIFIED CELLS or LICENSEE PROTEIN(S) to any THIRD PARTY;
 - 2) Use LIFE CELLS or LICENSEE MODIFIED CELLS or LICENSEE PROTEINS for the benefit of any THIRD PARTY;

- 3) Reverse engineer or deconstruct the LICENSEE MODIFIED CELLS or in any way analyze or determine the structure of the LIFE CELLS that are incorporated into or were used to create the LICENSEE MODIFIED CELLS; and
- b) Obtain SERVICE PROVIDER's prior written agreement that SERVICE PROVIDER will return to LICENSEE and/or its AUTHORIZED AFFILIATES, or destroy, all LIFE CELLS and/or LICENSEE MODIFIED CELLS and/or LICENSEE PROTEIN(S) in SERVICE PROVIDER's possession upon completion or termination of its activities on behalf of LICENSEE and/or its AUTHORIZED AFFILIATES, and to certify such return or destruction in writing to LICENSEE (with a copy of such certification provided to LIFE upon written request) and/or its AUTHORIZED AFFILIATES.
- c) Obtain SERVICE PROVIDER's written agreement to allow LIFE to directly enforce the LIFE RIGHTS against SERVICE PROVIDER as described in and pursuant to Section 6.2 using language that is substantially similar to that provided in Exhibit D.
- d) Promptly notify LIFE once LICENSEE and/or its AUTHORIZED AFFILIATES become aware that any SERVICE PROVIDER is using LIFE CELLS and/or LICENSEE MODIFIED CELLS other than as permitted under this AGREEMENT.

LICENSEE agrees that its and/or its AUTHORIZED AFFILIATES' continued employment of a SERVICE PROVIDER for use of LIFE CELLS and/or LICENSEE MODIFIED CELLS when LICENSEE and/or its AUTHORIZED AFFILIATES is aware that such SERVICE PROVIDER is using LIFE CELLS and/or LICENSEE MODIFIED CELLS other than as permitted hereunder, if not cured as provided under Section 7.3, will constitute a material breach by LICENSEE under this AGREEMENT. Notwithstanding the foregoing, LICENSEE will remain responsible for its own, its AUTHORIZED AFFILIATES', and its and their SERVICE PROVIDERS' performance under this AGREEMENT.

(iii) AUTHORIZED AFFILIATES Rights. LICENSEE may share its rights under this grant only with AUTHORIZED AFFILIATES. Sharing of these rights with AUTHORIZED AFFILIATES is not considered a sublicense of LIFE RIGHTS.

- a) If an AFFILIATE is CONTROLLED by LICENSEE, then it is an AUTHORIZED AFFILIATE upon written notification to LIFE through an updated Exhibit A. Upon LICENSEE sending a copy of Exhibit A to LIFE, LICENSEE may then share its licensed rights with such AUTHORIZED AFFILIATE who is CONTROLLED by LICENSEE.
- b) If an AFFILIATE is not CONTROLLED by LICENSEE, then:
 - 1) LICENSEE must obtain prior written consent from LIFE to so share rights hereunder with such AFFILIATE (LIFE's determination as to such consent will not be unreasonably withheld, but will be subject to LIFE's reasonable discretion); and

- 2) such AFFILIATE will sign Exhibit A, agreeing to be bound by this AGREEMENT, and thereafter such AFFILIATE will be deemed an AUTHORIZED AFFILIATE, and upon execution of Exhibit A, such AUTHORIZED AFFILIATE thereby grants LIFE the right to enforce compliance under this AGREEMENT against such AUTHORIZED AFFILIATE.

If LIFE consents to the addition of an AFFILIATE (as described in (b) above), LIFE will send an updated Exhibit A to LICENSEE for signature by the approved AFFILIATE. LICENSEE may share its licensed rights with such AUTHORIZED AFFILIATE only after return of the signed Exhibit A document and a copy of the AGREEMENT with each page initialed by the AUTHORIZED AFFILIATE. To the extent that the rights granted to LICENSEE are shared with an AUTHORIZED AFFILIATE pursuant to this Section 2.2(iii), LICENSEE will remain responsible for any and all obligations, liabilities, actions or inactions of its AUTHORIZED AFFILIATES.

2.3 grant and Terms for Use of CELL LINE DOCUMENTATION PACKAGE.

- (i) LIFE grants to LICENSEE a worldwide, royalty-free, non-exclusive, non-sublicensable license under LIFE RIGHTS to use the CELL LINE DOCUMENTATION PACKAGE solely for the purpose of applying for, and seeking governmental regulatory approval for LICENSEE's use and sale of LICENSEE PROTEINS in the FIELD as authorized under this AGREEMENT
- (ii) LICENSEE's payment of the LICENSE FEE described in Section 3 of this AGREEMENT includes the right for LICENSEE to receive one (1) copy of a CELL LINE DOCUMENTATION PACKAGE for one (1) specified lot of LIFE CELLS from which LICENSEE MODIFIED CELLS have been or will be derived. LIFE will send LICENSEE a CELL LINE DOCUMENTATION PACKAGE which will include the specified lot number [***] and part number [***] of LIFE CELLS no later than ten (10) business days after receipt of the LICENSEE FEE. LIFE is under no obligation to deliver the CELL LINE DOCUMENTATION PACKAGE to LICENSEE prior to LIFE's receipt of the LICENSE FEE. LICENSEE acknowledges and agrees that:
- a) neither LIFE nor any of its AFFILIATES will be under any obligation to provide to LICENSEE or its AUTHORIZED AFFILIATES any documentation or information pertaining to LIFE CELLS (including, without limitation, other lots of LIFE CELLS) other than the CELL LINE DOCUMENTATION PACKAGE sent by LIFE to LICENSEE for the aforementioned specific lot of LIFE CELLS, and
- b) the CELL LINE DOCUMENTATION PACKAGE provided by LIFE to LICENSEE will be deemed CONFIDENTIAL INFORMATION of LIFE under this AGREEMENT.
- (iii) Neither LICENSEE nor Its AUTHORIZED AFFILIATES have the right to share a CELL LINE DOCUMENTATION PACKAGE with any THIRD PARTY, other than to a regulatory authority in connection with products containing a LICENSEE PROTEIN as limited in sub-section 2.3 (i) above and in Section 5.1 below.

[*] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

- (iv) LIFE may, at LIFE's option, provide reasonable technical assistance to LICENSEE, concerning the CELL LINE DOCUMENTATION PACKAGE, during LIFE's regular business hours either by phone or email.

2.4 THIRD PARTY Licenses.

- (i) In order for a THIRD PARTY, including LICENSEE's licensee, to use LIFE CELLS or LICENSEE MODIFIED CELLS, for clinical or commercial purposes, such THIRD PARTY must obtain a separate commercial license to LIFE RIGHTS from LIFE prior to receipt of LIFE CELLS or LICENSEE MODIFIED CELLS. LICENSEE must inform any THIRD PARTIES interested in using the LIFE CELLS or LICENSEE MODIFIED CELLS that these are the intellectual property of LIFE and that such THIRD PARTY must obtain a license directly from LIFE. LICENSEE must use the form attached hereto at Exhibit B to inform that THIRD PARTY and LICENSEE will send a copy of any such notification to LIFE. The identity of such THIRD PARTY is CONFIDENTIAL INFORMATION of LICENSEE.
- (ii) Upon request from such THIRD PARTY, LIFE will offer, at LIFE's reasonable discretion, to such THIRD PARTY, a separate license under the LIFE RIGHTS to use LICENSEE MODIFIED CELLS to make LICENSEE PROTEINS for clinical and commercial purposes at LIFE's then-current terms and conditions, including fees.
- (iii) Regardless of anything stated in this Section 2.4, nothing will limit the rights of LICENSEE, as between LICENSEE and LIFE, to license out LICENSEE's own intellectual property rights (including but not limited to LICENSEE's intellectual property rights pertaining to LICENSEE PROTEINS) to any THIRD PARTY.

2.5 Limitations.

- (i) On LICENSEE. LICENSEE acknowledges and agrees that the licenses granted in this AGREEMENT are specific to LICENSEE. LICENSEE's rights concerning assignment or transfer are covered in Section 11.2. LICENSEE acknowledges and agrees that it does not acquire any rights hereunder to:
 - a) sublicense the rights granted under this AGREEMENT;
 - b) transfer LIFE CELLS and/or LICENSEE MODIFIED CELLS to any THIRD PARTY other than LICENSEE's or AUTHORIZED AFFILIATES' SERVICE PROVIDERS as specifically set forth in Sections 2.2(iii) and (ii);
 - c) sell or offer to sell LIFE CELLS or LICENSEE MODIFIED CELLS to any THIRD PARTY;
 - d) use LIFE CELLS or LICENSEE MODIFIED CELLS directly for therapeutic, diagnostic or prophylactic purposes (other than the use of LICENSEE MODIFIED CELLS to produce LICENSEE PROTEINS in the FIELD as specifically set forth in Section 2.2);

- e) directly administer the LIFE CELLS or LICENSEE MODIFIED CELLS into humans or animals;
- f) have replicated or have used LIFE CELLS or LICENSEE MODIFIED CELLS, by any THIRD PARTY for any purpose, including use in the FIELD, except for use of LIFE CELLS or LICENSEE MODIFIED CELLS by its AUTHORIZED AFFILIATES pursuant to Section 2.2(iii), or its or their SERVICE PROVIDERS pursuant to Section 2.2(ii).

3. Fees.

- 3.1 **Commercial Use Rights Fees.** As full and complete consideration for the rights granted to LICENSEE in Section 2 of this AGREEMENT, LICENSEE will pay to LIFE a one-time, non-creditable, non-refundable fee in the amount of [***] ("**LICENSE FEE**"). No royalties are due to LIFE from LICENSEE beyond the FEE(S) during the TERM for the rights granted under this AGREEMENT.

Unless agreed otherwise, LICENSEE will be responsible for any and all bank transfer charges associated with payments made under this AGREEMENT.

LICENSEE must make the LICENSE FEE payment to LIFE within fifteen (15) calendar days following the EFFECTIVE DATE.

- 3.2 **Cell Line Documentation Package Fees.** The above LICENSE FEE includes one copy of the CELL LINE DOCUMENTATION PACKAGE for one specific lot of LIFE CELLS. The fee payment amount for additional CELL LINE DOCUMENTATION PACKAGE(S) for additional specific lots of LIFE CELLS will be [***] ("**ADDITIONAL CLDP FEE**"). In the event LICENSEE would like to request an additional CELL LINE DOCUMENTATION PACKAGE(s), LICENSEE will send such request in writing to LIFE with payment of the ADDITIONAL CLDP FEE for each such additional CELL LINE DOCUMENTATION PACKAGE requested, and LIFE will send such additional CELL LINE DOCUMENTATION PACKAGE(s) to LICENSEE within [***] days of LIFE's receipt of the ADDITIONAL CLDP FEE(S). Terms governing LICENSEE's and/or its AUTHORIZED AFFILIATE's use of additional CELL LINE DOCUMENTATION PACKAGE(S) are set forth in Section 2.3 above,

4. **Payments.** All payments due hereunder will be payable in United States Dollars and will be made by check or wire to the appropriate account as follows:

Payment by check will be made to:

Thermo Fisher Scientific
Life Sciences Group
5823 Newton Drive
Carlsbad, CA 92008
Attention: Contract Management & Analytics (CMA)

[***] Certain information in this document has been omitted from this exhibit because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

Any amount not paid by LICENSEE when due will bear interest at an annual rate of three percent (3%) over the prime rate offered by Citibank N.A. on the date the payment is due from the due date until paid. The payment of such interest will not foreclose LIFE from exercising any other rights it may have as a consequence of the lateness of any payment.

5. Confidentiality; Press Release.

5.1 Generally, During the TERM and for 5 years following this AGREEMENT's termination, except as provided herein, each PARTY will retain the other PARTY's CONFIDENTIAL INFORMATION in confidence and refrain from disclosing it to any THIRD PARTY. If any portion of CONFIDENTIAL INFORMATION qualifies as a trade secret, RECIPIENT will not use or disclose such portion of CONFIDENTIAL INFORMATION without DISCLOSER's express prior permission for as long as it remains a trade secret. For clarity, the CELL LINE DOCUMENTATION PACKAGE, whether marked as such or not, is LIFE's trade secret and CONFIDENTIAL INFORMATION.

RECIPIENT may provide CONFIDENTIAL INFORMATION to its AFFILIATES and its REPRESENTATIVES who have a need to know or are directly concerned with RECIPIENT's rights and obligations under this AGREEMENT. RECIPIENT will advise its AFFILIATES and REPRESENTATIVES receiving CONFIDENTIAL INFORMATION of its proprietary nature and these confidentiality obligations, and use reasonable safeguards to prevent its AFFILIATES' and REPRESENTATIVES' unauthorized use or disclosure. RECIPIENT is responsible for any breach of this AGREEMENT by its AFFILIATES and/or REPRESENTATIVES. LICENSEE will only disclose the CELL LINE DOCUMENTATION PACKAGE to regulatory authorities for the purpose of regulatory review in relation to products containing the LICENSEE PROTEINS. In no case will the LICENSEE provide the CELL LINE DOCUMENTATION PACKAGE to any other THIRD PARTIES.

RECIPIENT may disclose DISCLOSER's CONFIDENTIAL INFORMATION if required by law, regulation, rule, act, order of any governmental authority or agency or any judicial order. In such case:

- (i) RECIPIENT will give DISCLOSER prompt and sufficient advance written notice to permit DISCLOSER to seek to limit or avoid such disclosure, and/or to seek a protective or similar order or other available remedies with respect to the CONFIDENTIAL INFORMATION required to be disclosed; and

- (ii) whether or not DISCLOSER limits or avoids disclosure, or obtains a protective or similar order, or avails itself of another available remedy, RECIPIENT will disclose only the minimum CONFIDENTIAL INFORMATION required to comply.

5.2 Return or Destruction of CONFIDENTIAL INFORMATION. Upon DISCLOSER's written request or this AGREEMENT'S termination, RECIPIENT will promptly:

- (i) Destroy or return DISCLOSER's CONFIDENTIAL INFORMATION that is not in electronic form, except RECIPIENT may retain 1 archival copy strictly for legal purposes; and
- (ii) Use diligent and commercially reasonable efforts to destroy all electronic copies of DISCLOSER's CONFIDENTIAL INFORMATION, except RECIPIENT is not required to destroy computer files it or its AFFILIATES create during automatic system back up or retain in the legal department for legal purposes.

5.3 Relief. In the event of a breach or threatened breach of this Article 5 by RECIPIENT that could cause DISCLOSER irreparable harm, DISCLOSER may seek equitable relief, including injunctive relief and specific performance, in addition to an award of money damages. Such remedies are in addition to all available legal or equitable remedies.

5.4 Publicity. Neither PARTY will use the other PARTY's or respective AFFILIATE's or REPRESENTATIVE's name in any publicity or public announcement without the other PARTY's prior written consent, except as legally required or necessary under applicable federal or state securities laws or regulations. With respect to LIFE and LICENSEE, only its legal department can provide the requisite approval.

However, LICENSEE and its AUTHORIZED AFFILIATES have the option to reference LIFE's name, trade dress, logo, or other trademark or service mark (hereinafter referred to collectively as "LIFE MARKS"), in association with products (including, without limitation, products containing LICENSED PROTEINS and LICENSED PROTEINS themselves); provided that LICENSEE (1) provides a written request to LIFE specifically identifying (a) the LIFE MARKS to be referenced, (b) the product(s) to be associated with LIFE MARKS, and (0) the manner in which LIFE MARKS are to be used with the products, and (2) receives written consent from LIFE, which such consent LIFE may or may not grant in its sole discretion.

6. Reservation of Rights.

6.1 LICENSEE understands and agrees that the license provided under this AGREEMENT is non-exclusive. LIFE may provide THIRD PARTIES with draft contracts that are substantially identical to this AGREEMENT. As between the PARTIES, all rights, title and interest in and to the LIFE RIGHTS is owned and will be retained by LIFE. LICENSEE will not make any claim or representation of ownership for, or act as the owner of, the LIFE RIGHTS,

6.2 LIFE Enforcement Rights.

If LICENSEE becomes aware that a NON-COMPLIANT ENTITY is using the LIFE RIGHTS, LICENSEE MODIFIED CELLS or LICENSEE PROTEINS other than as permitted under this AGREEMENT, LICENSEE must notify LIFE within 15 days of becoming so aware.

- (ii) LICENSEE will use reasonable commercial efforts to obtain compliance by the NON-COMPLIANT ENTITY under the terms of this AGREEMENT.
- (iii) If the NON-COMPLIANT ENTITY doesn't cure the non-compliance within thirty (30) calendar days of LICENSEE's notification to the NON-COMPLIANT ENTITY, then LICENSEE must terminate the NON-COMPLIANT ENTITY's rights to the LIFE CELLS, the LICENSEE MODIFIED CELLS and the LICENSEE PROTEINS.
- (iv) If, despite the termination of the NON-COMPLIANT ENTITY's rights and LICENSEE's other efforts to obtain compliance, the NON-COMPLIANT ENTITY continues to be non-compliant then LIFE can go against the NON-COMPLIANT ENTITY directly, and LICENSEE will provide LIFE reasonable assistance to obtain this compliance.
- (v) If LICENSEE doesn't terminate the NON-COMPLIANT ENTITY under subsection (iii) above, then LIFE can terminate LICENSEE's rights pursuant to Section 7.3 (2) of this AGREEMENT.

7. **Term and Termination**

7.1 **TERM.** The license granted to LICENSEE under this AGREEMENT begins on the EFFECTIVE DATE. This AGREEMENT will continue in perpetuity unless terminated as allowed in Section 7.2 or 7.3 below.

7.2 **Termination by LICENSEE.** LICENSEE may terminate this AGREEMENT for any reason (or for no reason) with thirty (30) calendar days' prior written notice to LIFE. This termination will be effective at the end of the thirty (30) day notice period.

7.3 **Termination by LIFE.** LIFE may terminate this AGREEMENT if LICENSEE breaches or defaults on a material term. A breach or default of a material term includes but isn't limited to: 1) a failure to pay FEE(S) when due; 2) LICENSEE's failure to terminate a NON-COMPLIANT ENTITY's rights as described in Section 6.2; or 3) sharing the CELL LINE DOCUMENTATION PACKAGE with any THIRD PARTY other than a regulatory authority in connection with products containing a LICENSEE PROTEIN and as permitted above. LIFE will notify LICENSEE of the breach or default of a material term in writing and will describe in reasonable detail what must be done to cure this breach or default. If the breach or default isn't cured, or LICENSEE has not made substantive steps to cure the breach or default, within thirty (30) calendar days of receipt of the notice by LICENSEE, then the AGREEMENT is terminated.

7.4 **Effect of Termination.**

- (i) If this AGREEMENT is terminated, the license granted in Section 2.2 ends on the termination date and LICENSEE and any of its AUTHORIZED AFFILIATES will immediately stop using those license rights. LICENSEE will also cause all of its REPRESENTATIVES to immediately stop using the license rights granted in Article 2 of this AGREEMENT.

- (ii) LICENSEE will return to LIFE or destroy all physical or electronic copies of the LIFE RIGHTS including LIFE CELLS, LICENSEE MODIFIED CELLS and the CELL LINE DOCUMENTATION PACKAGE, within thirty (30) calendar days following the termination date, including any copies in the possession of AUTHORIZED AFFILIATES. However, LICENSEE may retain one copy of the CELL LINE DOCUMENTATION PACKAGE with LICENSEE's legal department if required by law.
- (iii) LICENSEE will also cause all of its REPRESENTATIVES to return to LICENSEE or destroy all LIFE CELLS and/or LICENSEE MODIFIED CELLS that are in those REPRESENTATIVES' possession.
- (iv) If for any reason LICENSEE terminates the rights allowed to be conveyed to any of Its REPRESENTATIVES under this AGREEMENT, but that termination is not a termination of this AGREEMENT, LICENSEE will within thirty (30) calendar days following the effective date of that termination cause the terminated REPRESENTATIVE to return to LICENSEE or destroy all LIFE CELLS and/or LICENSEE MODIFIED CELLS in such REPRESENTATIVE's possession.
- (v) LICENSEE will provide LIFE with written certification of (ii), (iii) or (iv) above, upon written request of LIFE.

8. **Warranties, Representations and Acknowledgement; Limitation of Liability**

8.1 **By LIFE.** LIFE represents and warrants to LICENSEE that as of the EFFECTIVE DATE:

- (i) it has the full right and authority to enter into this AGREEMENT and to grant to LICENSEE the rights granted in Section 2 of this AGREEMENT;
- (ii) to LIFE's knowledge, LIFE has not received notice from a THIRD PARTY that LIFE's manufacture and/or sale of LIFE CELLS infringe the intellectual property rights of such THIRD PARTY;
- (iii) to LIFE's knowledge, the Information contained in the CELL LINE DOCUMENTATION PACKAGE is true and accurate.

8.2 **By LICENSEE.** LICENSEE represents and warrants to LIFE that:

- (I) LICENSEE and Its AUTHORIZED AFFILIATES are responsible for determining the suitability of each specific lot of LIFE CELLS obtained from LIFE for the uses to which LICENSEE and its AUTHORIZED AFFILIATES will put such LIFE CELLS;
- (ii) LICENSEE and its REPRESENTATIVES will use LIFE CELLS, LIFE RIGHTS, LICENSEE MODIFIED CELLS, and LICENSEE PROTEINS in compliance with all applicable laws and regulations;
- (iii) LICENSEE and its REPRESENTATIVES will not resell, distribute or out license LIFE CELLS or the LICENSEE MODIFIED CELLS, except pursuant to an assignment of this AGREEMENT to a THIRD PARTY pursuant to Section 11 2; Or

- (iv) LICENSEE and its AUTHORIZED AFFILIATES will conduct all necessary tests, comply with all applicable regulatory requirements and obtain all applicable regulatory approvals, issue all appropriate warnings and information to users, and be responsible for obtaining any required THIRD PARTY intellectual property rights with respect to LICENSEE's and its AUTHORIZED AFFILIATES' (a) use of LIFE CELLS LICENSEE MODIFIED CELLS and LICENSEE PROTEINS, and (b) commercialization of LICENSEE PROTEINS and/or products containing them.
- (v) LICENSEE understands, and will communicate to its REPRESENTATIVES, that there may be proprietary rights owned by THIRD PARTIES that may be necessary or desirable for the production and/or commercialization of LICENSEE PROTEINS which are not included in the LIFE RIGHTS. LICENSEE agrees that: (i) securing access to such THIRD PARTY rights is the responsibility of LICENSEE and its AUTHORIZED AFFILIATES, and (ii) neither LIFE nor any AFFILIATE of LIFE has any responsibility or liability with respect to any such THIRD PARTY proprietary rights that are necessary or desirable for the production and/or commercialization of LICENSEE PROTEINS. The only rights LIFE grants are the LIFE RIGHTS. This AGREEMENT confers no license or rights by implication, estoppel or otherwise under any existing or future know-how, patent application or patent rights owned by or licensed to LIFE or its AFFILIATES other than those rights defined in LIFE RIGHTS.

8.3 Mutual. Each PARTY represents and warrants to the other PARTY that (i) it is a company or corporation duly organized, validly existing and in good standing under the laws of the jurisdiction in which it is organized; (ii) it has the legal power and authority to execute, deliver and perform this AGREEMENT; (iii) the execution, delivery and performance of this AGREEMENT has been duly authorized by all necessary corporate action; (iv) this AGREEMENT constitutes the legal, valid and binding obligation of such PARTY, enforceable against it in accordance with Its terms; and (v) the execution, delivery and performance of this AGREEMENT will not cause or result in a violation of any law, of its charter documents, or of any contract by which it is bound.

8.4 Warranty Disclaimers. LICENSEE acknowledges that the LIFE CELLS have not been tested by or for LIFE for safety or efficacy, unless expressly stated in LIFE'S catalogues or on the label or other documentation accompanying the LIFE CELLS.

EXCEPT AS EXPRESSLY SET FORTH HEREIN, NEITHER LIFE NOR ANY OF ITS AFFILIATES MAKE ANY WARRANTIES, EXPRESS OR IMPLIED, (a) OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OR (b) THAT THE MANUFACTURE, USE, IMPORT OR SALE, BY LICENSEE OR ANY REPRESENTATIVE, OF LIFE CELLS, LICENSEE MODIFIED CELLS OR LICENSEE PROTEINS, OR THAT THE USE OF THE LIFE RIGHTS OR CELL LINE DOCUMENTATION PACKAGE BY LICENSEE OR ANY REPRESENTATIVE, WILL NOT INFRINGE ANY PATENT OR OTHER RIGHTS OF A THIRD PARTY. NEITHER LIFE NOR ITS AFFILIATES GUARANTEE THAT ANY PARTICULAR RESULTS WILL BE ACHIEVED BY USE OF THE LIFE RIGHTS. EACH OF LIFE AND LIFE'S AFFILIATES EXPRESSLY DISCLAIM ANY AND ALL IMPLIED OR STATUTORY

WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, INCLUDING ANY PURPOSE IN THE FIELD, AND NON-INFRINGEMENT. THIS ALLOCATION OF RISK BETWEEN THE PARTIES IS REFLECTED IN THE TERMS OF THIS AGREEMENT AND IS AN ESSENTIAL ELEMENT OF THE BARGAIN BETWEEN THE PARTIES.

- 8.5 Limitation of Liability; Exceptions. EXCEPT AS EXPRESSLY SET FORTH IN THIS SECTION 8,5, NEITHER PARTY NOR ITS AFFILIATES, OFFICERS, DIRECTORS, AND EMPLOYEES WILL BE LIABLE HEREUNDER TO THE OTHER PARTY, ITS AFFILIATES OR ANY OTHER PERSON OR ENTITY FOR SPECIAL, INCIDENTAL, CONSEQUENTIAL, EXEMPLARY OR OTHER INDIRECT DAMAGES (INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS OR LOSS OF USE DAMAGES) ARISING FROM THE MANUFACTURE, USE OR SALE OF LIFE CELLS, LICENSEE MODIFIED CELLS OR LICENSEE PROTEINS, OR USE OF THE LIFE RIGHTS OR CELL LINE DOCUMENTATION PACKAGE, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR LOSSES.
- LICENSEE ACKNOWLEDGES AND AGREES THAT BREACHES BY LICENSEE OR ITS AUTHORIZED AFFILIATES OF SECTION 5, SECTION 6.2 OR SECTION 7.4(0) OF THIS AGREEMENT MAY CAUSE IRREPARABLE HARM TO LIFE AND ITS AFFILIATES THAT MAY BE DIFFICULT TO ASCERTAIN. THEREFOR, LICENSEE ACKNOWLEDGES AND AGREES THAT, IN THE EVENT OF SUCH A BREACH BY LICENSEE OR ONE OF ITS AUTHORIZED AFFILIATES THAT MAY CAUSE SUCH IRREPARABLE HARM TO LIFE AND ITS AFFILIATES, THE LIMITATION OF LIABILITY PROVISIONS CONTAINED IN THIS AGREEMENT (INCLUDING IN THE FIRST PARAGRAPH OF THIS SECTION 8,5) SHALL NOT APPLY TO DAMAGES AND REMEDIES RELATED TO SUCH BREACHES, AND LIFE MAY SEEK, WITHOUT LIMITATION, INJUNCTIVE RELIEF.
- 8.6 Irreparable Harm. Each Party acknowledges that its breach of the confidentiality provisions of this Agreement will cause irreparable damage to the other Party and hereby agrees that the other Party shall be entitled to injunctive relief under this Agreement for such breach or threatened breach as well as such further relief as may be granted by a court of competent jurisdiction.
9. Export Reputations. LICENSEE understands and agrees that the LIFE CELLS, LICENSEE MODIFIED CELLS, CELL LINE DOCUMENTATION PACKAGE and any other equipment, product, commodities, services, software, samples, materials, information, technical data, or technology (collectively the "ITEMS") LICENSEE receives under this AGREEMENT may be subject to U.S. government export controls. These export controls may include, among others, those of the Export Administration Regulations of the US Department of Commerce (the "EAR"), which may restrict or require licenses for the export of the Items from the United States and/or their re-export from other countries. LICENSEE will comply, and will cause all REPRESENTATIVES to comply, with the EAR and all other laws, regulations, treaties and agreement applicable to the export or re-export of any Item by LICENSEE or its REPRESENTATIVES. LICENSEE will provide, upon LIFE's written request, written assurances of LICENSEE's and its REPRESENTATIVES' compliance with the EAR applicable to the Items intended for export. LICENSEE will, and will cause its REPRESENTATIVES to, reasonably cooperate with LIFE in audit requested by LIFE or governmental authorities concerning

compliance with export or import laws and regulations, for example provide shipping documentation in LICENSEE's possession or respond to questionnaires and information requests or allow government authorities access to LICENSEE's records or facilities as LICENSEE would allow for its own business compliance. Except with written agreement between the parties, any such audit conducted by LIFE will be limited to regular business hours and not to exceed one business day in any calendar year.

10. Indemnity and Insurance.

101 LICENSEE will assume full responsibility for LICENSEE's activities, and any activities of LICENSEE's REPRESENTATIVES and each of LICENSEE's and REPRESENTATIVES' officers, directors, employees and agents, in exercising the rights granted in this AGREEMENT. This includes responsibility for LICENSEE's, its employees, REPRESENTATIVES, and their employees' use of the LIFE RIGHTS, or LICENSEE PROTEINS. LICENSEE will defend, indemnify and hold harmless LIFE, LIFE's AFFILIATES, and its and their respective officers, directors, agents, employees and stockholders, from and against all THIRD PARTY claims, liability, demands, damages, expenses (including reasonable attorneys' and expert witness fees and expenses) and losses for death, personal injury, illness or property damage, infringement or misappropriation of intellectual property, or any other injury or damage to the extent arising out of (i) the replication or use of LIFE RIGHTS or LICENSEE PROTEINS by LICENSEE or its REPRESENTATIVES, (ii) material breach by LICENSEE of this AGREEMENT, (iii) any use, sale, or Import of LICENSEE PROTEINS by LICENSEE or its REPRESENTATIVES, including but not limited to, uses of or reliance upon such LICENSEE PROTEINS or LIFE RIGHTS by LICENSEE, its REPRESENTATIVES and/or LICENSEE's or REPRESENTATIVES' distributors or customers.

10.2 LIFE shall defend, indemnify and hold harmless LICENSEE, LICENSEE's AFFILIATES, and its and their respective officers, directors, agents, employees and stockholders (each, a 'LICENSEE INDEMNITEE'), from and against all THIRD PARTY claims, liability, demands, damages, expenses (including reasonable attorneys' and expert witness fees and expenses) and losses for death, personal injury, illness or property damage, infringement or misappropriation of intellectual property, or any other injury or damage to the extent arising out of breach by LIFE of any of its representations, warranties or covenants set forth in Sections 8.1 or 8.3, except to the extent caused by the negligence or willful misconduct of LICENSEE, its AFFILIATES or any LICENSEE INDEMNITEE.

10.3 Insurance.

- (I) At all times during the TERM of this AGREEMENT, LICENSEE shall maintain, at its sole cost and expense, commercial general liability insurance, including products liability Insurance, with limits of at least [***] per occurrence with reputable insurers preferably rated A- or better by A.M. Best.
- (ii) Clinical Trials Insurance. From the first day LICENSEE commences clinical trials using LICENSEE PROTEINS or products containing them, and for at least two (2) years of consistent coverage (tail coverage for claims-made policy) after termination or conclusion of the clinical trial period, LICENSEE will maintain in

[***] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.

effect clinical trial insurance coverage with limits and policy terms to be consistent with current insurance market standards for such products in LICENSEE's industry, but not less than compulsory limits as required by the law or territory(ies) where such LICENSEE's clinical trials are taking place. For clarification, LICENSEE is responsible for ensuring that THIRD PARTIES receiving LICENSEE PROTEIN and entering clinical trials or commercialization using LICENSEE PROTEINS or products containing them, shall maintain adequate insurance to fulfill LICENSEE's obligations in this AGREEMENT.

(iii) Insurance upon Commercialization. Prior to or upon the grant of a regulatory authorization to commercialize a LICENSEE PROTEIN or a product containing it, LICENSEE will maintain commercial general liability and product liability insurance, covering therapeutic products and LICENSEE'S obligations under the terms of this AGREEMENT, including its Indemnification obligations and costs for defense, for any claims arising from bodily injury and property damage to the extent arising from the use of LIFE CELLS or LICENSEE MODIFIED CELLS by LICENSEE or its REPRESENTATIVES, with limits not less than [***] dollars ([***) per occurrence and naming LIFE as an additional insured. This insurance policy will be maintained until the later of:

- (a) the expiration of any applicable statute of limitations;
- (b) two (2) years following termination of this AGREEMENT;
- (c) two (2) years following the last sale of the commercialized LICENSEE PROTEIN or a product containing it.

11. General

- 11.1 Relationship of Parties. The PARTIES are independent contractors. This AGREEMENT does not establish either PARTY or its AFFILIATES or REPRESENTATIVES as, and neither PARTY will hold itself out as being, the other PARTY's agent, legal representative, joint venturer, partner or employee. Neither PARTY has, and will not hold itself out as having, any right, power or authority to assume, create or incur any express or implied expense, liability or obligation on the other PARTY's behalf except as expressly provided herein. Any LIFE AFFILIATE may perform any LIFE obligation or enforce any LIFE right under this AGREEMENT but limited to administrative tasks such as payment processing, invoicing and contract management.
- 11.2 Assignment. Neither PARTY may assign this AGREEMENT without the other PARTY's prior written consent, which will not be unreasonably withheld, conditioned or delayed, except that LIFE may assign this AGREEMENT in its entirety as part of the sale or transfer of all or substantially all of its business relating to this AGREEMENT, or to any AFFILIATE. In that situation, LIFE will notify LICENSEE within sixty (60) days after such assignment.
- 11.3 Entire AGREEMENT and Amendments. This AGREEMENT and its Exhibits represent the PARTIES' entire and final agreement regarding its subject matter, and supersede all prior and contemporary agreements and understandings of the PARTIES. No modification or amendment of this AGREEMENT is binding unless both PARTIES agree through a signed writing, other than a modification to Exhibit A as described in Section 2.2(iv). If either PARTY waives or fails to enforce a breach of any AGREEMENT provision, this does not constitute an ongoing waiver of any other breach or provision.

[*] Certain information in this document identified by brackets has been omitted because it is both (i) not material and (ii) would be competitively harmful if publicly disclosed.**

- 11.4 Governing Law. This AGREEMENT will be governed by the laws of California, without reference to California's conflict of laws or choice of law provisions. The PARTIES expressly waive any right to a jury trial of any dispute arising out of this AGREEMENT.
- 11.5 Compliance with Law. Each PARTY will comply with applicable law in exercising its rights and performing its obligations under this AGREEMENT, Nothing in this AGREEMENT shall be construed so as to require the commission of any act contrary to law, and wherever there is any conflict between any provision of this AGREEMENT or concerning the legal right of the PARTIES to enter into this AGREEMENT and any statute, law, ordinance or treaty, the latter shall prevail, but in such event the affected provisions of this AGREEMENT shall be curtailed and limited only to the extent necessary to bring it within the applicable legal requirements.
- 11.6 Notices. All communications or notices contemplated herein will be in writing and will be considered delivered at the PARTY's respective addresses below unless either PARTY gives written notice of a change of address in accordance with this Section 11.6:
- (I) at the time delivered if personally delivered;
 - (ii) 3 business days after being deposited prepaid in registered or certified mail, return receipt requested; or
 - (iii) at the time of receipt during the addressee PARTY's normal business hours, if delivered by an overnight mail courier service prepaid.

Exhibit B

Letter to Third Parties

BioAtla, LLC (“LICENSEE”) is licensed to use certain Life Technologies Corporation products and technologies, including modifications to the [***] cell line and proprietary components, derivatives and progeny thereof produced by or on behalf of LICENSEE (collectively, “LICENSEE Modified Cells”) for clinical and commercial purposes. LICENSEE may not provide or transfer the LICENSEE Modified Cells or any Life Technologies Corporation [***] cell line to any third party without permission from Life Technologies Corporation.

Any commercial, clinical, or research use of the LICENSEE Modified Cells or any Life Technologies Corporation [***] cell line, by you or a third party, requires you or the third party to obtain rights from Life Technologies Corporation prior to receipt of any [***] cells or LICENSEE Modified Cells. Commercial use of [***] cells or LICENSEE Modified Cells includes any use to produce recombinant proteins for use in clinical trials and/or in return for consideration or payment of any sort, such as a contract or fee-based research or manufacturing service, or for use in producing such recombinant proteins for sale.

Life Technologies Corporation has a license program that can offer you a commercial use license for LICENSEE Modified Cells, or any [***] or other cell line, if you are interested in producing recombinant proteins or peptides for sale or use in clinical research, or providing research, manufacturing or development services with the LICENSEE Modified Cells or any [***] cell lines. In addition to conveying rights for commercial use, this license program includes a documentation package that contains information related to the cell line lineage and characterization. Please contact outlicensing@thermofisher.com if you are interested in obtaining more information about a commercial license for LICENSEE Modified Cells or a Life Technologies Corporation cell line, or if you have questions regarding commercial use of any of Life Technologies Corporation’s products or technologies.

Sincerely,

Life Technologies Corporation

Licensing and Commercial Supply

EXHIBIT D
SERVICE PROVIDER CONTRACT LANGUAGE

BioAlta's defined terms for SERVICE PROVIDER - "SP" I understand, acknowledge and agree that Life Technologies Corporation ("LTC") has licensed to [BioAlta defined term for Bioatla ("BA")] certain limited commercial production rights in regards to the [Licensee's defined term for the Life Cells, Licensee Modified Cells - "Cells"] provided by BA to SP and related intellectual property ("Life IP"). SP further acknowledges and agrees to the following: SP will: (a) not transfer the Cells, their components, or materials or information made using the Cells or their components to any third party; (b) use the Cells, their components, and all materials or information made using the Calls or their components solely for performing [Defined term for services - "Services"] using the Cells and solely for the benefit of BA and no other party; (c) reverse engineer or deconstruct the Cells or in any way analyze or determine the structure for the Cells; and (d) return to BA or destroy any and all remaining Cells, components, or materials made using the Cells or components upon completion or termination of Services and certify such destruction in writing upon request to BA and LTC. Further, SP acknowledges and agrees that if it fails to conform with the requirements of this paragraph or in any other way infringes upon or misuses the Life IP. SP agrees that LTC may directly or indirectly enforce LTC's rights against SP.

ROYALTY SHARING AGREEMENT

This Royalty Sharing Agreement (this "Agreement") is made and entered into as of January 1, 2020 by and between BioAtla, LLC, a Delaware limited liability company ("BioAtla"), and BioAtla Holdings, LLC, a Delaware limited liability company ("Holdings").

WHEREAS, BioAtla and Fl Oncology Inc., a Delaware corporation ("F I"), entered into that certain Amended and Restated Exclusive License Agreement on November 22, 2019 (the "Exclusive License Agreement"); and

WHEREAS, BioAtla now wishes to share with Holdings one-half of any royalties it receives from F 1 pursuant to the Exclusive License Agreement.

NOW, THEREFORE, in consideration of the mutual promises contained herein and for other good and valuable consideration the receipt and sufficiency of which is hereby acknowledged, and intending to be legally bound, the parties hereby agree as follows:

1. BioAtla hereby grants to Holdings a right to receive fifty, percent (50%) of any royalties received by BioAtla pursuant to the Exclusive License Agreement. BioAtla covenants and agrees to pay Holdings fifty percent (50%) of any royalties received pursuant to the Exclusive License Agreement, within ten (10) days of receipt, by wire transfer in immediately available funds to a bank and account designated by Holdings.
2. This Agreement shall be governed by and construed in accordance with the laws of the State of California, USA, excluding its conflicts of laws principles. This Agreement is both a final expression of the parties' agreement and complete and exclusive statement with respect to all of its terms. This Agreement supersedes all prior and contemporaneous agreements and communications, whether oral, written or otherwise, concerning any and all matters contained herein, between BioAtla and Holdings. This Agreement may be amended, or any term hereof modified, only by a written instrument duly executed by authorized representatives of both parties hereto.
3. Except as expressly provided herein neither this Agreement nor any rights or obligations hereunder or under the Exclusive License Agreement may be assigned or otherwise transferred by either party without prior written consent of the other party.
4. This Agreement be executed in counterparts, each of which shall be deemed an original document, and all of which, together with this writing, shall be deemed one instrument. This Agreement may be executed by facsimile or PDF signatures, which signatures shall have the same force and effect as original signatures.

NOTE

SBA Loan #	
SBA Loan Name	BioAlta, LLC
Date	April 22, 2020
Loan Amount	Six Hundred Seventy One Thousand Nine Hundred Ninety Two and NO/100 Dollars (\$671,992.00)
Interest Rate	1.00% per annum
Borrower	BioAlta, LLC, a Delaware limited liability company
Operating Company	BioAlta, LLC, a Delaware limited liability company
Lender	City National Bank

1. PROMISE TO PAY:

In return for the Loan, Borrower promises to pay to the order of Lender the amount of Six Hundred Seventy One Thousand Nine Hundred Ninety Two and NO/100 Dollars (\$671,992.00), interest on the unpaid principal balance, and all other amounts required by this Note. Under the PPP (as defined below), certain amounts may be forgiven by the Lender under the direction of the Administrator of the SBA so long as the requirements of the PPP for forgiveness are satisfied. Until an amount is forgiven, the principal amount owed is as set forth in the preceding paragraph and interest accrues thereon. **Forgiveness does not occur automatically. Borrower must submit a request for forgiveness and all required documentation, and forgiveness will not occur unless and until the request for forgiveness is approved. Borrower should submit the request for approval timely in accordance with the rules of the PPP to avoid unnecessary delay.**

2. DEFINITIONS:

"Application" shall mean the SBA Form 2483 together with all supporting documentation submitted to Lender as the application for the Loan.

"Disbursement Date" means that date on which the Loan is disbursed by Lender. "Loan" means the loan evidenced by this Note.

"Loan Documents" means the documents related to this loan signed by Borrower, including, without limitation, the Application.

"Maturity Date" means the date that is **two (2) years** from the Disbursement Date.

"Payroll Costs" shall have the meaning set forth in the CARES Act and Section 2(f) of the SBA's PPP rules, as the same may be amended, modified, supplemented or interpreted by the SBA from time to time.

"PPP" means the Paycheck Protection Program set forth in the Coronavirus Aid, Relief, and Economic Security Act (the "CARES Act"), as may be amended, modified or supplemented from time to time, and the rules and regulations promulgated thereunder.

"SBA" means the Small Business Administration, an Agency of the United States of America.

3. PAYMENT TERMS:

Borrower must make all payments at the place Lender designates.

The Loan shall be repaid in full no later than **two (2) years** from the Disbursement Date (the "Maturity Date"). Unless earlier forgiven in whole or in part, subject to and in accordance with the Forgiveness Guidelines described (and defined) below, the Borrower shall begin making monthly payments of principal in equal installments in an amount that would fully amortize the Loan by the Maturity Date, plus interest, in arrears, calculated based upon the original principal amount of this Note until the date of any forgiveness and on the remaining outstanding principal balance thereafter, and a per annum interest rate of one percent (1.00%) beginning seven months from the month of the Disbursement Date; payments must be made on the date in the months they are due that corresponds to the date in the month on which proceeds were initially disbursed or, if no such corresponding date, on the next succeeding business day. Interest shall accrue, and be due and payable from, the date of initial disbursement of the Loan. The interest rate may be changed during the life of the loan. Borrower hereby authorizes Lender automatically to deduct from any deposit account(s) of Borrower with Lender, the amount of any payment due under this Note. Lender will apply each installment payment first to pay interest accrued to the day Lender receives the payment, then to bring principal current, then to pay any late fees, and will apply any remaining balance to reduce principal.

4. USE OF PROCEEDS:

Proceeds of the Loan must be (1) paid or disbursed by Borrower within eight (8) weeks of the date of initial disbursement of the Loan and (2) used solely for the following purposes (the "Permitted Purposes"):

- A. Payroll Costs;
- B. costs related to the continuation of group health care benefits during periods of paid sick, medical, or family leave, and insurance premiums;
- C. mortgage interest payments (but not mortgage prepayments or principal payments);
- D. rent payments;
- E. utility payments; in each case of C through E, to the extent the same were incurred in connection with agreements in effect before February 15, 2020;
- F. interest payments on any other debt obligations that were incurred before February 15, 2020; and/or
- G. refinancing an SBA EIDL loan made between January 31, 2020 and April 3, 2020.

5. LOAN FORGIVENESS:

The principal amount of the Loan may be forgiven, in-whole or in part, in accordance with the CARES Act, as may be amended from time to time and modified or supplemented pursuant to any regulatory or administrative regulations, guidance, or interpretations issued by the SBA from time to time (collectively, the "Forgiveness Guidelines"). Any such **forgiveness** shall be conditioned upon Borrower providing to Lender in a timely manner all documentation required under the Forgiveness Guidelines or otherwise requested by Lender supporting Borrower's request for loan forgiveness, including documentation to determine whether the forgiven amount must be reduced in accordance with the Forgiveness Guidelines. The final amount of loan forgiveness, if any, shall be determined **by** Lender in Lender's discretion in accordance with, and to the extent not expressly prohibited by, the Forgiveness Guidelines. Not more than twenty-five percent (25%) of the amount forgiven shall be attributable to non-Payroll Costs. Borrower has received an EIDL (Economic Injury Disaster Loan) advance in the amount of \$0.00. That amount will be subtracted from the loan forgiveness amount.

6. OTHER INDEBTEDNESS:

This Note is considered permitted indebtedness, howsoever defined, under any other loan evidenced by any promissory note or credit agreement solely between Borrower and Lender (whether currently in effect or hereafter entered into; each, a "Credit Agreement"). Notwithstanding any provision in any other Credit Agreement solely between Borrower and Lender or this Note, any collateral or guarantees for other obligations of Borrower to Lender shall not apply to the indebtedness evidenced by this Note.

7. BORROWER'S AGREEMENTS:

Borrower acknowledges and agrees that (1) Borrower has and shall maintain in full force and effect through the Maturity Date or prior satisfaction in full of this Loan, and shall provide evidence of the same to Lender upon Lender's request therefor, the following: liability insurance; other insurance of the type typically maintained by companies in the same or similar lines of business as Borrower; and worker's compensation insurance; in each case, with an insurance company satisfactory to Lender and, with respect to worker's compensation insurance,

in an amount meeting state law requirements; (2) Borrower's ownership and management have not changed without Lender's approval since the application for this Loan was submitted; and (3) Borrower will keep books and records in a manner satisfactory to Lender, furnish financial statements as requested by Lender and allow Lender and SBA to inspect and audit books, records and papers relating to Borrower's financial or business condition.

8. FURTHER ASSURANCES:

At any time and from time to time Borrower shall execute and deliver such further instruments and take such further action as may reasonably be requested by Lender to effect the purposes of this Note and in the event the SBA requires additional, supplemental or replacement documents to, and/or of this Note.

9. LOAN PREPAYMENT:

Notwithstanding any provision in this Note to the contrary, Borrower may prepay this Note at any time without penalty. Borrower may prepay 20 percent or less of the unpaid principal balance at any time without notice. If Borrower prepays more than 20 percent and the Loan has been sold on the secondary market, Borrower must:

- A. Give Lender written notice;
- H. Pay all accrued interest then unpaid; and
- B. If the prepayment is received less than 21 days from the date Lender receives the written notice from Borrower, pay an amount equal to 21 days' interest from the date Lender receives the notice, less any interest accrued during the 21 days and paid under subparagraph b., above.

If Borrower does not prepay the amount specified in its notice within 30 days from the date Lender receives the notice, Borrower must give Lender a new written notice and comply with subparagraphs b and c above.

10. DEFAULT:

Borrower is in default under this Note if Borrower does not make a payment when due under this Note, or if Borrower or Operating Company:

- A. Fails to do anything required by this Note and other Loan Documents;
- B. Defaults on any other loan with Lender;
- C. Is not eligible to receive a loan under the PPP when the Loan is made;
- D. Does not disclose, or anyone acting on their behalf does not disclose, any material fact to Lender or SBA;
- E. Makes, or anyone acting on their behalf makes, a materially false or misleading representation to Lender or SBA;
- F. Defaults on any loan or agreement with another creditor, if Lender believes the default may materially affect Borrower's ability to pay this Note;
- G. Fails to pay any taxes when due;
- H. Becomes the subject of a proceeding under any bankruptcy or insolvency law;
- I. Has a receiver or liquidator appointed for any part of their business or property;
- J. Makes an assignment for the benefit of creditors;
- K. Has any adverse change in financial condition or business operation that Lender believes may materially affect Borrower's ability to pay this Note, provided that this provision shall not apply to adverse changes or conditions resulting from the Covid-19 pandemic and the circumstances giving rise to the CARES Act;
- L. (1) Reorganizes, merges, consolidates, or otherwise changes ownership or business structure, (2) makes any distribution of Borrower's assets that would adversely affect its financial condition, or (3) transfers (including by pledge) or disposes of any assets except in the ordinary course of business, in each case without Lender's prior written consent; or
- M. Becomes the subject of a civil or criminal action that Lender believes may materially affect Borrower's ability to pay this Note.

11. LENDER'S RIGHTS IF THERE IS A DEFAULT:

Without notice or demand and without giving up any of its rights, Lender may:

- A. Require immediate payment of all amounts owing under this Note;
- B. Collect all amounts owing from any Borrower or Guarantor; or
- C. File suit and obtain judgment.

Borrower acknowledges that if Borrower defaults on the Loan, SBA may be required to pay Lender under the SBA guarantee, and SBA may then seek recovery on the Loan (to the extent any balance remains after loan forgiveness in accordance with the Forgiveness Guidelines above).

12. LENDER'S GENERAL POWERS:

Without notice and without Borrower's consent, Lender may:

- A. Incur expenses to collect amounts due under this Note, enforce the terms of this Note or any other Loan Document. Among other things, the expenses may include reasonable attorney's fees and costs. If Lender incurs such expenses, it may demand immediate repayment from Borrower or add the expenses to the principal balance;
- B. Release anyone obligated to pay this Note; and
- C. Take any action necessary to collect amounts owing on this Note or comply with the PPP.

13. WHEN FEDERAL LAW APPLIES:

When SBA is the holder, this Note will be interpreted and enforced under federal law, including SBA regulations. Lender or SBA may use state or local procedures for filing papers, recording documents, giving notice, foreclosing liens, and other purposes. By using such procedures, SBA does not waive any federal immunity from state or local control, penalty, tax, or **liability**. As to this Note, Borrower may not claim or assert against SBA any local or state law to deny any **obligation**, defeat any claim of SBA, or preempt federal law.

14. SUCCESSORS AND ASSIGNS:

Under this Note, "Borrower" include any successor, **and "Lender"** includes its successors and assigns. Lender may assign all or any portion of this Note without notice to, or consent of, Borrower.

15. GENERAL PROVISIONS:

- A. To the extent there is more than **one** Borrower on this Note, all such Borrowers are jointly and severally liable.
- B. Borrower waives all suretyship defenses.
- C. Borrower must sign all documents necessary at any time to comply with the Loan Documents or the statutes and regulations applicable to the PPP.
- D. Lender may exercise any of its rights separately or together, as many times and in any order it chooses. Lender may delay or forgo enforcing any of its rights without giving up any of them.
- E. Borrower may not use an **oral** statement of Lender or SBA to contradict or alter the written terms of this Note.
- F. If any **part of** this Note is unenforceable, all other parts remain in effect.
- G. To the **extent** allowed by law, Borrower waives all demands and notices in connection with this Note, including presentment, demand, protest, and notice of dishonor.
- H. Borrower shall initial one of the boxes below and a failure to initial one of the boxes shall be interpreted and construed as Borrower's representation that no agent or broker was involved in arranging the Loan, preparing an application for the Loan or referring Borrower to Lender.

Borrower acknowledges and agrees *[initial one]*:

XXXXX _____ No agent or broker was involved in arranging the Loan, preparing an application for the Loan or referring Borrower to Lender; OR

_____ An agent or broker arranged the Loan, assisted in the preparation of the Loan or referred Borrower to Lender and Borrower has caused such agent or broker to execute and deliver the Agent Fee Agreement required by Lender.

Borrower shall not be charged for any fee of agent or broker, nor shall Borrower or Lender pay any such fee out of proceeds of the Loan. Borrower shall indemnify and hold harmless Lender for any loss, costs or expenses Lender incurs as a result of any misrepresentation by Borrower under this Section 15.

Lender will pay a flat fee to qualifying agents assisting applicants under the PPP not to exceed: \$600.*

*Additional terms and conditions apply, contact a City National SBA specialist for details.

16. BORROWER'S NAME(S) AND SIGNATURE(S):

By signing below, the Borrower evidences that it is obligated under this Note.,
BioAlta, LLC, a Delaware limited liability company
